# ECTS Information Package for Academic Year 2013/2014

## Course Catalogue – Undergraduate Study

### Basic Croatian Linguistic Culture (85296)
- **Eng. Lev:** L0
- **Study Hours:** 30
- **Sem.:** 1, 2, 3, 4, 5, 6

### Informatics Practicum (45831)
- **Eng. Lev:** L0
- **Study Hours:** 30
- **Sem.:** 1, 3, 5

### Academic English (45642)
- **Eng. Lev:** Li
- **Study Hours:** 60
- **Sem.:** 1, 2, 3, 4, 5, 6

### Academic German (45829)
- **Eng. Lev:** Li
- **Study Hours:** 60
- **Sem.:** 1, 2, 3, 4, 5, 6

### Archaeology and Croatian Medieval History (93930)
- **Eng. Lev:** Li
- **Study Hours:** 30
- **Sem.:** 2, 4, 6

### Catholic Church and Croatian Politics 1918.-1990. (52996)
- **Eng. Lev:** Li
- **Study Hours:** 30
- **Sem.:** 1, 2, 3, 4, 5, 6

### Church History in the Light of Medieval Sources (61895)
- **Eng. Lev:** Li
- **Study Hours:** 30
- **Sem.:** 2, 4, 6

### Communist Party Policy toward Political Opponents and Dissidents (53021)
- **Eng. Lev:** Li
- **Study Hours:** 30
- **Sem.:** 2, 4, 6

### Croatian History - Selected Topics 1929-1941 (93960)
- **Eng. Lev.:** Li

Courses
19th and 20th Century Croatian Historiography

Lecturer in Charge

Prof. dr. sc.
Mijo Korade

Course Description

Course objectives are to introduce students to a new stage of development of Croatian historiography in the 19th century and its gradual transformation into a scientific discipline. The material is exposed clearly and synthetically in the context of the time, but students need to learn about different approaches to the study of the past in some areas of the Croatian ethnic propagation, particularly with the major representatives of historiography in the 19th and then 20th century. In particular, attention should be drawn to new developments and modern outlier Croatian historiography in the last three decades.

Course Type

» History (Dual-major studies Study) (required course, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (required course, 2nd semester, 1st year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain previous efforts of Croatian Historical Sciences,
2. Describe new approaches to the study of Croatian history
3. Explain how the Croatian historiography has developed through its research period,
4. Indicate the most important people of Croatian historiography,
5. Define the basic problems of Croatian historiography in the 19th and 20th century,
6. Analyze the most important characteristics of Croatian historiography in the said period,
7. Explain historical processes and historiographical approaches used in their study.

**General Competencies**

After finishing the programme student will be able to:
- compile a list of literature for each historical period,
- identify major issues in interpretation of history,
- tell what is the interpretation of history,
- reconstruct historiographic tools in making conclusions of historical processes and events,
- appraise the value of historiographic interpretations.

**Grading**

Activity of students will be monitored throughout the semester. Classes is required to attend. Written exam, with the possibility for oral.

**Week by Week Schedule**

1. Introductory lecture. Students duties and topics of their presentations.
2. What is historiography and what are its Croatian specialties;
3. Ivan Lucić Lucius—culmination of Croatian historiography in the 17th century;
4. From Ivan Lucić to 19th century stagnation of Croatian historiography;
5. Istria and Kvarner: Pier Antonio Biancini, Giuseppe Brodmann, Martin Botterini, Josip Voltić, Ivan Feretić, Girolamo Galzigna;
6. Dalmatia: početak novinstva Kraljski Dalmatin; Grigor Stratifico, Marko Lauro Ruić, Andrea Cicarelli/Cicarellic/Cicarelovič;
7. Dubrovnik: Duro Gvoždenica Ferić, Franjo Marija Appendini;
8. Upper Croatia: Maksimilijan Vrhovac, Josip Mikoczi (Mikoczy); Matija Petar Katančić, Martin Duro Kovačić;
9. Illyrian times Ljudevit Gaj, Ivan Švear, Romuald Josip Kvaternik, Ivan Katalinić/Giovanni Cattalinich (Dalmacija); Pietro Kandler (Istra), Ivan Franjo Jukić (Bosna);
10. The Age of Bach's absolutism Antun Mažuranić, Ante Starčević, Andrija Torkvat Brlić, Nikola/Niccolò Tommaseo (Dalmatia), Emanuel Sladović (Croatian coast), Petar Stanković/Pietro Stancovich (Istria)
13. 1914. - 1918.: Ivan Strohal, Nikola Tomasić, Nikodim Milaš, Konstantin Jireček, Luđevit/Lajos Thallocky;
14. Croatian historiography of the interwar period;
15. Croatian historiography during the Second World War;

20th Century Croatian Cultural and Political History

Course Description
The course aims is to provide basic knowledge and the ability to critically consider the most important events, processes and people in the Croatian cultural and political history of the 20th century.

Course Type
» Croatian Studies (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (required course, 4th semester, 2nd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the acquisition of factual knowledge about key events, processes and people from the Croatian cultural and political history of the 20th century, which implies the ability to identify, define and describe key events, processes and people, how they emerged to be and their workings in the Croatian cultural and political history of the twentieth century (Example: the identification, positioning and describing programmatic records, internal structure and political activities of political parties which operated in the Croatian countries)

2. Analyze: the students should demonstrate the ability to understand and the ability to reflect on the meaning of factual knowledge, which implies the ability to explain, generalize, classify, paraphrase, summarize and group factual knowledge gained during the course (Example: identification and contextual positioning of political and social tendencies of the rural population in the Croatian countries)

3. Apply: the students should demonstrate the ability to separate the learned content into constituent parts and understand the organizational structure of the acquired course subject matter, which implies the abilities such as selection, planning and interpretation of course content (Example: correlating key (i.e., constant) internal problems of both Yugoslav states, i.e. the issues of nationality, in particular the Croatian)

4. Analyze: the students should demonstrate the ability of personal assessment and critical approach in relation to the course subject matter, which implies the ability to separate information in different parts, which is to say point out how they relate to each other (Example: spotting and pointing out the occurrence of longer historical influences such as the harm from non-democratic systems of managing and ruling the Croatian countries)

5. Present: the students should demonstrate skills such as categorization, planning, hypothesizing, modifying, reviewing and formulating, which implies the ability to create new information based on the data collected (Example: shaping and establishing general, but also new insights, such as the need for a different type of international community's intervention in the conflicts which qualify as aggression and civil war)

6. Explain: the students should demonstrate skills such as comparison, assessment, evaluation and objective criticism (Example: after the adoption of the synthetic conclusion on the necessity of reaching a fair political and legal status of minority communities in the Republic of Croatia, by means of assessment (critical discussion) the current situation is established, followed by recommendations for improvement

General Competencies

Knowledge and understanding of basic factual knowledge about the most important events, processes and people in the Croatian cultural and political history of the twentieth century, and their critical assessment and evaluation.

Grading

Class attendance and participation in the discussion related to the topic of the seminar paper will be assessed throughout the semester and will be incorporated in the final grade (oral exam).

Week by Week Schedule

1. Introductory lecture, explanation of student obligations and seminar papers
2. Overview of fundamental ideological and political directions in Croatian politics at end of the 19th and in the early twentieth century, seminar paper
3. The emergence of the Kingdom of Serbs, Croats and Slovenes (SHS), seminar paper
4. Overview of political life from 1919 until 1929 in the Kingdom of Serbs, Croats and Slovenes, seminar paper
5. The Yugoslav idea in Croatian culture, seminar paper
6. Croatian people in WWII from 1941 until 1945, seminar paper
7. Croatian people in the first communist Yugoslavia, seminar paper
8. Croatian people in the second communist Yugoslavia, seminar paper
9. Croatian language and politics in the twentieth century, seminar paper
10. The creation of independent Croatia and the Homeland War, seminar paper
14. Croatian cultural and political history of the twentieth century, synthesis in terms of the analysis of political satire, seminar paper
15. Test

Literature

20th Century History

Lecturer in Charge
Izv. prof. dr. sc.
Josip Jurčević

Course Description
Aim of the course are to display causes, course and consequences of the fundamental political and social processes and events in the 20th century. Emphasis is placed on the methodological particularities of research and understanding of the history of the 20th century. In working with an interdisciplinary study group we will handle various global phenomena that marked the 20th century, such as totalitarianism, international law, mega-cities, etc.

Course Type
- History (Dual-major studies Study) (required course, 5th semester, 3rd year)
- Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
- Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
- History (Study) (required course, 5th semester, 3rd year)
- Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
- Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
- Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Explain the basic problems of world history in the 20th century,
2. Show the most important data persons specified period of world history,
3. Define causal connections during the period,
4. Explain historical processes of world history during the period,
5. Compare historical processes the flow of historical events in modern world history,
6. Show the important from the unimportant in the interpretation of historical events processes specified period,
7. Differentiate level of interpretation of the level of historical events in modern world history.

**General Competencies**

After finishing the programme student will be able to:
1. define historical processes typical for certain historical period;
2. summerize basic information of the Croatian and the World history
3. identify the most important persons and institutions in the Croatian and the World history
4. explain cause and effect relations of historical events and processes
5. combine a different historical processes
6. interpret a historical sources

**Grading**

Activity of students will be monitored throughout the semester. Classes is required to attend. Written exam, with the possibility for oral.

**Week by Week Schedule**

1. Introductory lecture: the rights and obligations of students, the exam; Road to the First World War: colonialism, international crisis of the early 20th century
2. The First World War (The Great War)
3. Versailles peace order
4. Russian Revolution and the creation of the USSR
5. World between the two wars: the strengthening of totalitarian nationalism (Italy, Japan, Germany)
7. The Second World War (Part 2): 1943 to 1945; world order after it (creating the Organization of the UN)
8. The Cold War and its Crisis (Korea, Vietnam, Berlin, Cuba, MAD, Witch Hunt)
9. Western Europe from the 1945 until 2000. (United Kingdom, France, West Germany, Italy)
10. Eastern Europe from the 1945 until 2000. (East Germany, Poland, Hungary, Czechoslovakia, Romania, Bulgaria), the fall of the Iron Curtain
11. USA in the 20th century
12. decolonization of Africa
13. Dictatorships in Central and South America
14. Middle East in the 20th century
15. The two most populous countries: China and India in the 20th century

Academic English

Lecturer in Charge

V. pred. dr. sc.
Lucia Miškulin Saletović

Course Description

The course is aimed at enabling students to independently use professional and academic texts in English. In addition, it is aimed at encouraging students to independently develop their language skills with the help of reference books and other available sources.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use various types of dictionaries independently, explain and apply the concepts of cohesion and connectives,
2. Identify and explain various types of word formations,
3. Identify and explain structure, style and register of an academic text,
4. Identify and use common academic collocations,
5. Identify and use expressions used for describing, comparing, exemplifying, adding information, expressing reason and result, defining and drawing conclusions,
6. Describe charts and graphs,
7. Explain and apply the basics of rephrasing and referencing
8. Describe the main features of the English academic vocabulary (false pairs, synonyms, antonyms, words with multiple meanings, internationalisms)

General Competencies

Students will be able:
to apply knowledge and understanding of concepts, principles and theories of the basic elements of academic texts in global understanding of professional and academic texts in English;
to use dictionaries, grammar books and other available reference book in order; to further develop their English language competencies;
to present their opinions and attitudes on issues related to their field of study in English.

Grading

Active participation 10% / written assignments 10% / written exam 40% / independent reading and analysis of an academic text 20% / oral exam 20%.
Week by Week Schedule

1. Dictionary work (types of dictionaries, dictionary entry, parts of speech)
2. Cohesion and connectives (cohesive devices and basic types of connectives)
3. Text and paragraph structure
4. Style and register (main features of the academic writing style)
5. Rephrasing and referencing
6. Collocations
7. Reading comprehension and reading strategies (surveying, skimming and scanning)
8. Word formation (prefixes, suffixes, compound nouns and compound adjectives)
9. Academic vocabulary (internationalisms, false pairs, synonyms, antonyms, words with multiple meanings)
10. Describing and comparing
11. Exemplifying and adding information
12. Defining and drawing conclusions
13. Expressing reason and result
14. Interpreting data, charts and graphs
15. Revision and evaluation

Saletović

Course Description

The course is aimed at enabling students to independently use media texts, as well as professional and academic texts in German. In addition, it is aimed at encouraging students to independently develop their language skills with the help of reference books and other available sources. Thirdly, the course is aimed at familiarizing students with the culture and civilization of the German-speaking countries and regions. Finally, the course is aimed at further developing students reading and speaking skills.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use various types of German dictionaries and reference books independently
2. Recognize and describe various ways of expressing time in German
3. Recognize and explain word formation patterns in German
4. Explain form and content organization, as well as the main characteristics of German media and academic texts
5. Describe main features of the vocabulary found in German media and academic texts (false pairs, synonyms, words with multiple meanings, terminology)
6. Describe the main characteristics of the culture and civilization of the German-speaking countries and regions
7. Identify and use expressions used for comparing, exemplifying and expressing reason and result in German
8. Identify and use expressions for providing arguments, expressing opinion, agreeing or disagreeing
9. Explain main ideas of media and academic texts in German and discuss in German issues related to their field of study

General Competencies

Students will be able: - to apply knowledge and understanding of concepts, principles and theory of the basic features and elements of media and academic texts in global understanding of media, professional and academic texts in German - to use dictionaries, grammar books and other available reference book in order to further develop their German language competencies - to apply knowledge on the culture and civilization of German-speaking countries in the profession - to present their opinions and attitudes on issues related to their field of study in German

Grading

Active participation 10%; written assignments and a presentation 20%; written exam 45%; oral exam 30%.
**Week by Week Schedule**

1. Placement test. Dictionary work (types of dictionaries, dictionary entry, parts of speech)
2. Expressing time in German (tenses, time conjunctions and adverbs)
3. Form and content, as well as the main characteristics of media and academic texts in German
4. Reading comprehension (media texts on studying in Germany)
5. Word formation in German (composition, derivation)
6. Culture and civilization of German-speaking countries and regions
7. Print and electronic media in German-speaking countries (reading and listening comprehension)
8. Vocabulary of media and academic texts (false pairs in Croatian and German, synonyms, antonyms, words with multiple meanings, terminology)
9. Basic words and expressing for opening and closing of a presentation in German
10. Expressing opinion, providing arguments, agreeing and disagreeing in German
11. Comparing, expression reason and result, exemplifying in German
12. Reading comprehension (media texts on intercultural differences and politics)
13. Reading comprehension (academic texts on media, young people and politics)
14. Student presentations and discussion (possible topics: effective learning, media in Croatia and in German-speaking countries and regions, students in Croatia and in German-speaking countries and regions etc.)
15. Revision and evaluation

Academic Literacy

Lecturer in Charge

Doc. dr. sc.
Tomislav Janović

Course Description

The aim of this course is to enable the student to acquire basic standards of academic writing in regard to its stylistic, grammatical, graphic, bibliographic and ethical aspects.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses 2, 2nd semester, 1st year)
» Communication Sciences (Study) (elective courses 2, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the ability to use bibliographic and other sources and independently create a selection of relevant material in order to produce academic text.
2. Generate notes, use manuals, Internet resources and other research tools.
3. Apply and know the basic bibliographic standards of academic writing.
4. Demonstrate the ability to independently write academic text (written homework, seminar paper or the final paper) by employing standard procedures and norms of academic writing (in terms of logic, grammar, style, bibliography, graphics and ethics).
5. Demonstrate the ability to identify and correct errors and flaws in one's own and other people's academic text.

General Competencies

Apply standard academic writing tools in writing essays, written assignments and qualification theses (B.A. and M.A. thesis). • to search bibliographic databases and other sources when carrying out simple research assignments. Exhibit reading comprehension and analytic skills when reading academic text and media contents. Articulate and lay out attitudes and arguments, both in oral and written form.
Grading

Elements of grading: regular attendance: 5%;
first assignment: 5%;
second assignment: 10%;
third assignment: 10%;
fourth assignment: 20%;
fifth assignment: 50%.

Week by Week Schedule

1. Important information about the course: teaching and learning methods, students' obligations, credits, and grading; rules of conduct and rules of communication (email etiquette).
2. Oral and written forms of expression; types and functions of text; academic text, academic community and academic communication; tradition of academic writing and critical thinking; goals, purposes and forms (genres) of academic texts; norms and tools of academic writing.
3. Macro-level of academic text: articulation of the topic (title) and text composition (table of contents); research question and thesis statement; purpose and techniques of writing an introductory section.
4. Macro-level of academic text: elaboration of the topic/thesis; chapters, sections, paragraphs; purpose and techniques of writing a conclusion.
5. Micro-level of academic text: characteristics of academic language and style (normativeness, stylistic neutrality, simplicity, clarity, conciseness, preciseness); absence of author's “voice” from the text; technical terms; abbreviations.
6. Micro-level of academic text: structure and length of sentences; building paragraphs and sections; types and functions of paragraphs; connectors and modifiers; articulating and connecting statements; taking stance, comparing and contrasting different views.
7. Logical norms and tools of academic writing: definition, classification, argument; argumentative strategies; valid and invalid arguments; analysis and interpretation of text; giving examples; appeal to evidence and appeal to authority; qualitative and quantitative evidence; tables, pictures and audio-visual material; graphic arrangement of text.
8. Bibliographic norms and tools of academic writing: citing and referring; preparing and singling out citations; reference techniques; plagiarism and ethical norms of academic writing; ethical codex of scientific and academic community.
9. Bibliographic norms and tools of academic writing: summarizing (synthesizing) and paraphrasing; purpose and techniques of paraphrasing author's words and thoughts; function of footnotes.
10. Bibliographic norms and tools of academic writing: types of sources, ways of referring to sources and citing sources (primary and secondary sources, most common sources, sources with many authors and anonymous sources, internet sources, unpublished and other atypical sources); putting together a bibliography/list of sources.
11. Before writing: empirical research, searching bibliographic bases and other sources, putting together a working bibliography, reading comprehension and taking notes, evaluation of evidence, outline and working plan. After writing: proofreading, revising, correcting; plagiarism avoidance.
12. Tutorial and discussion class: evaluation and discussion of written assignments.
13. Tutorial and discussion class: evaluation and discussion of written assignments.
14. Tutorial and discussion class: evaluation and discussion of written assignments.
15. Tutorial and discussion class: evaluation and discussion of written assignments.

Literature

Aesthetics 1

Lecturer in Charge

Doc. dr. sc.
Davor Pećnjak

Course Description

Aim of this course is that students can recognize, describe, analyse and interpret concepts, arguments and theories concerning the philosophy of art.

Course Type

» Philosophy (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and analyze definitions of art
2. Compare various arguments which aim to justify these definitions
3. Analyze and interpret various concepts which are used in describing artworks
4. Analyze theories of the ontology of artworks - what kind of works are artworks
5. Analyze arguments and theories about evaluating art and artworks
6. Argue for one's own position regarding philosophy of art
General Competencies

Students will be able to: (1) independently understand, evaluate and interpret theories and arguments used in debates on the philosophy of art; (2) develop their general abilities for philosophical analysis; (3) apply methods of analysis in new situations.

Grading

Written exam: 70%;
Oral exam: 30%.

Week by Week Schedule

1. Introduction
2. Representational Theory of Art
3. Types of Representations
4. Expressivist Theory of Art
5. Expressing, Emotions and Metaphors in Art
6. Formalist Theory of Art
7. Forms in Different Kinds of Art
8. Theory of Aesthetic Experience
9. Theory of Aesthetic Experience
10. Institutional Theory of Art
11. Historical Definition of Art
12. Evaluation of Artwork
13. Evaluation of Artwork
14. Interpretation in Art
15. Concluding Discussion

Literature

Ancient Egypt, Greece and Rome in Motion Pictures: Facts vs. Fiction

Lecturer in Charge

Doc. dr. sc.
Mladen Tomorad

Course Description

The aim of the course is to enable students to recognize differences between facts shown in motion pictures and the real historical facts. Within the course, students will learn interdisciplinary approach of this subject through various motion pictures filmed during the 20th and the early 21st century and the historical sources (mythology, architecture, letters, biographies, epigraphical sources, paintings, mosaics etc.). After the whole course students will be able to demonstrate their knowledge about this subject and the difference between facts shown in movies and the facts based on the historical sources and literature.

During the course students will get review of the most important motion pictures related to the history of Ancient Egypt, Greece and Rome and the historical sources of the same subjects.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
» History (Study) (elective courses / working groups, 1st semester, 1st year)
» History (Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Study) (elective courses / working groups, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe key historical facts of the motion pictures and historical figures shown in these movies
2. Explain the key issues of the motion pictures related to this subject
3. Explain the key issues of the history of Ancient Egypt, Greece and Rome
4. Explain the key issues of the various myths and legends of the heroes shown in the motion pictures related to this subject
5. Explain the key issues and development of motion pictures related to the Ancient world
6. Explain the importance of the Ancient world
7. Identify the major characteristics of the motion pictures related to the history of Ancient Egypt, Greece and Rome

**General Competencies**

After completing the course, students will be able to:
1) engage meaningful debate about the history and mythology of the Ancient Egypt, Greece and Rome
2) recognize and interpret key historical sources about this subject

**Grading**

Class attendance 25 %; 
Colloquium 50 % or Written exam at the end of term (50 %): 
- 1st colloquium 25%
- 2nd colloquium 25%
- Written exam 50%
Seminar essay 25%.

**Week by Week Schedule**

1. Ancient Egypt: Cleopatra
2. Ancient Egypt: Pyramid building
3. Ancient Egypt: Ancient Egyptian literature
4. Ancient Egypt: Exodus
5. Ancient Greece: mythology
6. Ancient Greece: Greco-Persian wars
7. Ancient Greece: Alexander the Great
8. Ancient Rome: Beginning of Christianity
9. Ancient Rome: Wars with barbarians
10. Ancient Rome: gladiators
11. Ancient Rome: Julius Caesar
12. Ancient Rome: Roman Emperors
13. Ancient Rome: Late Antiquity
14. Final discussion
15. Colloquium

**Literature**

ANOVA Models

Lecturer in Charge

Doc. dr. sc.
Mislav Stjepan Žebec

Course Description

Systematic introducing the basic logic and series of operative analysis of variance (ANOVA) models as inferential statistical method based on central limit theorem, and directed to empirical data analysis obtained in experimental and quasi-experimental research. Generating at students an adoption and appropriate interpretation of basic concepts, logic and prerequisite assumptions of different ANOVA models, as well as of analysis of covariance (ANCOVA) models, necessary in psychological disciplines and for systematic acquisition of the other psychology subjects topics (undergraduate and graduate). Introducing to students a various multiple comparisons test in ANOVA designs (a priori and post hoc) and related prerequisite assumptions, advantages and limitations. Developing at students the skill of (1) recognition of situations where some of targeted ANOVA or ANCOVA models are used, (2) selection of adequate multiple comparisons tests inside the targeted model, (3) conduction of ANOVA/ANCOVA calculus in SPSS, and (4) detection of eventually unfulfilled prerequisite assumptions and application of necessary corrections. Preparing the students for conduction of minor empirical research by quasi-/experimental design, for adequate ANOVA models applications in related data analysis, and for scientific/professional report writing, in accordance to international standards.

Course Type

» Psychology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain statistical-mathematical logic of the calculus of (1) independent samples ANOVA (one-way and factorial), (2) repeated measures ANOVA, (3) mixed ANOVA model, (4) ANCOVA;
2. Name assumptions for specific ANOVA model application, assess their presence in a given problem situation and thereafter choose the adequate model
3. Arrange research design adequate for an ANOVA model application
4. Analyze empirical research findings with adequate ANOVA procedure by using SPSS program
5. Interpret the ANOVA results in terms of set up research problem
6. Categorize and describe specific tests of a priori and post hoc multiple comparisons in ANOVA designs
7. Distinguish ANOVA models of fixed and random factors
8. Explain and in specific data analysis case interpret a basic concepts of statistical power, effect size of independent variable on dependent one, main, interactional and simple effects and homogenous subsets.

9. Evaluate limitations and conclusion range of specific ANOVA/ANCOVA model application

10. Write professional/scientific report on the bases of conducted research and adequate ANOVA model data analysis and take responsibility for the quality of scientific interpretation of the results obtained with data analysis.

General Competencies

10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.

11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Grading

Class attendance - up to 14% of the course grade;
Active participating during lessons and exercises - up to 3% of the course grade;
A short computer assessment of knowledge and skills of SPSS application during exercises - up to 4% of the course;
3 homeworks - up to 11% of the course grade;
3 written seminar works - up to 31% of the course grade;
Written exam - up to 13% of the course grade;
Oral exam- up to 24% of the course grade;
Extra points - up to 2% of the course grade.

Week by Week Schedule

1. Introduction to ANOVA models course syllabus. Definition of ANOVA and general situation of its application. Central limit theorem and basic logic of independent samples one-way ANOVA. Prerequisite assumptions of independent samples one-way ANOVA.

2. Variance decomposition of the sampling distribution when an alternative hypothesis (H1) is valid. Sources of variance at independent samples one-way ANOVA. Prerequisite assumptions of one-way ANOVA. Sum of squares (total, between groups and within groups) and their interrelationship. Degrees of freedom and mean square of specific sources of variability. F ratio and operative calculus of one-way ANOVA.

3. Deflection from one-way ANOVA prerequisite assumptions and ways of its solution: Box approach, Welch approach, variable transformation (logarithmic, inverse, square root). Effect size of independent variable (IV) on dependent one (DV) at one-way ANOVA: η² and ω². Statistical power of one-way ANOVA: basic concepts (central and non-central F-distribution) and calculus.

4. Multiple comparisons between groups of one-way ANOVA and Type I error (family-wise α and per-comparison α). Definition and basic logic of a priori tests. Kinds of a priori tests and their application: (1) multiple t-tests, (2) linear contrasts, (3) Bonferroni-Dunn test, (4) Holm-Larzerelle-Mulike test.

6. Two-way independent samples ANOVA: definition, motivation, basic concepts (main, interactional and simple effects). Prerequisite assumptions of independent samples factorial ANOVA designs. Sources of variance at independent samples two-way ANOVA. Sum of squares and degrees of freedom calculus.

7. Calculus and interpretation of simple effects in independent samples two-way ANOVA. Multiple comparisons at independent samples two-way ANOVA. Statistical power and effect size of more IV on DV.

8. First seminar report analysis. Three-way independent samples ANOVA: examples and crucial features (main effects, two-way interactions, three-way interaction and simple effects). Prerequisite assumptions assessment and calculus in SPSS. Unequal sample sizes at factorial ANOVA: problems and possible solutions.

10. Post hoc tests at repeated measures ANOVA model: (1) Games-Howell and (2) modified Fisher LSD test. Two-way and three-way repeated measures ANOVA model: example and crucial features (main effects, two-way interactions, three-way interaction). Prerequisite assumptions assessment and calculus in SPSS.

11. Repeated measures ANOVA model with one between groups IV mixed model: example, crucial features, basic logic and variance decomposition. Mixed ANOVA model calculus (sums of squares, degrees of freedom, F-ratio). Mixed ANOVA model prerequisite assumptions.

13. Analysis of variance and analysis of covariance (ANCOVA) in general linear model (GLM) frame: basic concepts and interrelationship. One-way ANCOVA: (1) definition and motivation, (2) covariate interpretation, (3) example, (4) prerequisite assumptions, (5) calculus, (6) adjusted values (means).

14. Third seminar report analysis. Factorial ANCOVA: (1) basic concepts, (2) basic logic and calculus components, (3) example, (4) adjusted values (means).

15. Test.

Course Catalogue – Undergraduate Study

Applied statistics in social research

Lecturer in Charge

Izv. prof. dr. sc. Vanja Šimičević

Course Description

The aim of this course is to enable the adoption and application of methodological competence of statistical methods and techniques of inferential statistics on the level of theory and practice. Course content includes the study of specific problems in the application of various methods for statistical analysis of data, and is expected applicability of certain methods of inferential statistics in response to specific research problems. The program potentially includes some of the existing methods that are primarily focused on the implementation and analysis of the obtained indicators of inferential statistics.

Course Type

» Sociology (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Sociology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Prepare for a thorough insight into the specifics, advantages and limitations of particular methods of inferential statistics to analyze the data.
2. Apply adopted methodological knowledge in sociological research.
3. Use statistical software SPSS.
4. Select appropriate methodological procedures.
5. Plan the research activities related to the use of methods and techniques of descriptive statistics.
6. Argue the interpretation of results obtained using different statistical methods.
7. Select appropriate methodological procedures.
8. Summarize the results of the statistical analysis.

General Competencies

Use the advanced statistical terms and information
Design a simple research project.
Organize the implementation of a simple research project.
Use the computer software for the analyses of qualitative and quantitative data.
Employ the adequate methodological approach in the research of social phenomena.
Use different social sciences methods in the analyses of the relevant data.
Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises, written exam and orally

Week by Week Schedule

1. Sampling methods and properties of the sampling distribution.
2. Confidence Intervals of the Mean.
3. Confidence Intervals for Population Proportion.
4. Concepts of Hypothesis testing.
11. Analysis of Variances.
12. Correlation Analysis. Linear Regression Model.
13. Correlation Coefficient.
15. Selected Nonparametric Method

Literature

Approaching a text in Latin

Lecturer in Charge

Doc. dr. sc. Šime Demo

Course Description

Students will learn how to analyze latin sentences. First they will have to determine grammatical role of the individual words, and after that their function within the sentence.

Course Type

Latin language (Dual-major studies Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the following terms: predicate, finite verb, non finite verb, valency of the verbs, nucleus of the sentence, grammatical/logical subject, complement, object.
2. Differentiate various different types of the predicate.
3. Differentiate various different functions of the words in the sentence.
4. Explain use of the verb "sum, esse, fui".
5. Predict factors that determine the form of the anaphora.
6. Relate grammatical role with the function of the word in the sentence.

General Competencies

Differentiate parts of the sentence by its function.

Grading

Student responsibilities: Class attendance. Active engagement in the class (discussion on materials). Completion of weekly assignments. Absence: student has a right to absent twice. Written exam.

Week by Week Schedule

1. Predicate and its recognizing.
2. Valency.
3. Subject and copulative verbs (especially sum, esse, fui).
5. Objects.
6. Complex predicates.
8. Attribute.
10. Adverbial phrases.
11. Hyperbaton.
12. Sentence clause structure.
15. Correlations.

Archaeology and Croatian Medieval History

Lecturer in Charge

Doc. dr. sc. Tomislav Popić

Course Description

The aim of the course is to provide students with knowledge of Croatian medieval history using the achievements of archeology. In the absence of written sources for the Croatian early medieval history, archeology becomes unavoidable discipline that allows consideration of certain social phenomena and more complex understanding of certain aspects of social life. Therefore, emphasis is placed precisely on linking knowledge from historical and archaeological disciplines.

Course Type

- History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
- History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
- History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
- History (Study) (elective courses / working groups, 2nd semester, 1st year)
- History (Study) (elective courses / working groups, 4th semester, 2nd year)
- History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define main problems of Croatian early medieval history
2. Define main problems of Croatian archaeology
3. Explain the course of historical development from 7th to 12th century
4. Estimate the importance of archaeological sources in the study of Croatian medieval past
5. Identify main archaeological sources
6. Compare archaeological and written sources in reconstructing past

General Competencies

After successfully graduating student will be able to:

1. explain cause and effect relations of historical events and processes,
2. identify major issues in interpretation of history,
3. tell what is the interpretation of history,
4. demonstrate the importance of interdisciplinary interpretations of historical events.
Grading
Oral exam 100%.

Week by Week Schedule

1. Introduction - student obligations, literature and exams
2. Archaeology as a discipline - subject of study, methods, approaches and paradigms
3. Croatian archaeology - problem of “national” archaeologies, history of archaeology in Croatia
4. Main issues of Croatian medieval archaeology
5. Christianization of Croats
6. Višeslavos font
7. Early medieval cemeteries
8. Early medieval inscriptions
9. Church of St. Marta in Bijaći near Trogir
10. Church of St. Spas on the Cetina
11. Church of St. Mary in Biskupija near Knin
12. Church of St. Trinity in Zadar
13. Epitaph of queen Jelena
14. Relief of king Petar Krešimir IV
15. Church tower of the St. Mary monastery in Zadar

Literature

A two-day field trip

Lecturer in Charge

Doc. dr. sc. Šime Demo

Course Description

The aim of the course is to introduce students to the areas of historical, civilization and cultural flows through the monument, archaeological, archival and literary heritage.

The area in which you are travelling and systematically specialist processed cyclically related to marking important dates and anniversaries. Areas can be: Istria and Croatian Littoral, Central, Southern Dalmatia, Lika and Banovina, Croatian Zagorje and Međimurje, Northeast Croatia, Slavonia and Baranja.

Course Type

» Latin language (Dual-major studies Study) (field study, 1st semester, 1st year)
» Latin language (Dual-major studies Study) (field study, 2nd semester, 1st year)
» Latin language (Dual-major studies Study) (field study, 3rd semester, 2nd year)
» Latin language (Dual-major studies Study) (field study, 4th semester, 2nd year)
» Latin language (Dual-major studies Study) (field study, 5th semester, 3rd year)
» Latin language (Dual-major studies Study) (field study, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and know the area of important historical and cultural events
2. Define and explain the causes of historical and cultural events
3. Distinguish the important from the unimportant circumstances
4. Define and compare the sites with important historical and cultural events
5. Evaluate the importance of cultural space for the historic event
6. Write an essay about the details or the overall fieldwork

General Competencies

Upon completion of their studies, students will be able to:

1.) observe the basic problems of conditional correlations of historical and cultural events and processes;
2.) write an essay about the detail or the totality of the historical and cultural processes of a given area;
3.) to come to their own conclusions about cultural processes with the necessity of interdisciplinary and multi-cultural observations of historical, economic, cultural and similar events range.
Grading

Due to the vastness of the planned areas there is no prescribed literature, students will be indicated the necessary literature ahead of each trip. Drawing up of a paper is required.

Week by Week Schedule

1. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

2. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

3. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

4. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

5. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

6. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

7. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

8. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

9. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

10. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

11. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.

12. Trip itinerary; Important sites - historical and cultural context; Introduction to authors who studied and investigated the given area; Tours of individual sites under the guidance of “in situ” experts and synthesis of data at the end of tours.
13. Trip itinerary; Important sites - historical and cultural context; 
    Introduction to authors who studied and investigated the given area; Tours 
    of individual sites under the guidance of “in situ” experts and synthesis of 
    data at the end of tours.

14. Trip itinerary; Important sites - historical and cultural context; 
    Introduction to authors who studied and investigated the given area; Tours 
    of individual sites under the guidance of “in situ” experts and synthesis of 
    data at the end of tours.

15. Trip itinerary; Important sites - historical and cultural context; 
    Introduction to authors who studied and investigated the given area; Tours 
    of individual sites under the guidance of “in situ” experts and synthesis of 
    data at the end of tours.

Literature

Literaturu nije moguće dati s obzirom na širinu predviđenog 
područja - studenti će biti prije putovanja upoznati s 
potrebnom literaturom.
Austrian History

Lecturer in Charge
Izv. prof. dr. sc.
Darko Vitek

Course Description
Course objectives are aimed at introducing the history of Austria with special emphasis on the contextualization of national history. We will try to point out the connection between the historical process within Central Europe, especially the historical link of the people who lived in the monarchical part.

Course Type
History (Study) (required course, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Show the underlying determinants of Austrian history from ancient times to the 21st century,
2. Define the fundamental problems of the Austrian past, shaped by its geographical position,
3. Explain the cause-effect relationship of various historical processes within each historical period,
4. Show the ideological significance of the Habsburg family in shaping the Austrian identity,
5. Analyze the historical processes and links between Austrian and Croatian history,
6. Compare historical events related to the person and work of the Habsburg rulers and other European rulers,
7. Show the contribution of Austrian cultural achievements to the European civilization.

General Competencies
After finishing the programme student will be able to:

1. Summarize basic information of the Croatian and the World history
2. Identify the most important person and institutions in the Croatian and the World history
3. Differentiate specificities of historical periods
4. Distinguish difference between important and non-important facts within historiographic interpretation
5. Compare historical processes of different periods
Grading

The activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is oral.

Week by Week Schedule

1. Introductory lecture.
2. Austrian duchy and Babenberg family history of Austria before the arrival of the Habsburgs.
3. Arrival of the Habsburgs: the family and the power.
4. The emergence of multiethnic monarchy: the Central European.
5. Croatian Kingdom and selection of Habsburgs.
6. How did it happen - Bruderzwist?
7. Austriaca.
8. The Ottoman Empire and the Habsburg: siege of Vienna, winning the Liberation War and the establishment of absolutism in Hungarian countries.
9. Spain tragedy and Central victory: problem of inheritance in the Habsburg Monarchy, the Pragmatic Sanction internal integration and European peace.
10. Habsburgs and the Community: Crown of St. Stephen's relations with the Hungarian nobility, balancing between the Croatian and Hungarian nobility.
11. Maria Theresa and Joseph II.: the pinnacle of Habsburg power, reformatory activities and formation of an effective government.
12. Tradition, newspapers Revolution tumultuous 19th century and changes in the Central European area.
14. From Sarajevo to First Republic: World War I, the collapse of the monarchy and the events before and during the Second World War.
15. From 1945: contemporary Austrian history, its rise, development and today's European path.

Literature

Basic Croatian Linguistic Culture

Lecturer in Charge

Izv. prof. dr. sc.
Mario Grčević

Course Description

The aim of this course is to familiarize students with the concepts of Croatian linguistic culture and encourage them to express themselves orally and in writing in accordance with the standards of the Croatian literary language.

Course Type

» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical knowledge through identifying errors in specific texts and in public communication, individually and in dialogue with others.
2. Define fundamental concepts of Croatian linguistic culture.
3. Analyze Croatian normative principles.
4. Analyze Croatian normative handbooks.
5. Describe normative divergences.
6. Apply the rules described in Croatian orthographies.
Grading

Activity in class 20%;
Exam 60%;
Attendance 20%.

Week by Week Schedule

1. Introduction to the Croatian linguistic culture: what is it and what is it for, terminology and concepts, definitions and bibliography
2. Concepts: standard literary language - the language of Croatian literature - standards and standardization, review of the recent history - functional styles, dialects
3. Council for Standard Croatian Language Norm
4. Contemporary Croatian normative acts and their application (orthographies, grammar books, dictionaries), network tools (dictionaries, corpora)
5. Different types of orthographic rules (phonological, morphological and etymological spelling), orthography of the Croatian Academy of Science and Art, transcription and transliteration, orthographic rules of the Croatian language
6. Orthoepy (accentual system)
7. Diphthong /ie/ and orthographical doubts
8. Further orthographic and phonological problems (č-ć, dž-d), sound changes (assimilation, coarticulation)
9. From comma to full stop (punctuation marks and punctuation)
10. Writing foreign words, solid and divided writing, uppercase and lowercase letters, abbreviations
11. Declension (doubts and duality in the declension of nouns, pronouns, adjectives and numbers)
12. Verb forms (selected questions about simple and complex verb forms)
13. Lexical norm
14. Seminar papers and student letters - examples of (non-) academic expression
15. Early exam term and / or revisions

Literature

Basic Croatian Linguistic Culture

Lecturer in Charge

Izv. prof. dr. sc.
Mario Grčević

Course Description

The aim of this course is to familiarize students with the concepts of Croatian linguistic culture and encourage them to express themselves orally and in writing in accordance with the standards of the Croatian literary language.

Course Type

» Croatian Studies (Study) (required course, 1st semester, 1st year)

Learning Outcomes

Literature

Basic Social Behaviour

Lecturer in Charge

Doc. dr. sc. Ines Sučić

Course Description

The aim of the course is to familiarize students with theoretical explanations and determinants of human social behavior. Also, given that the social psychology is an empirical science with a well-developed set of methods for answering questions about social behavior, the emphasis of the course will be on describing a number of examples of socio-psychological research and consideration of their implementation.

Course Type

Psychology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the extent of the influence of situational factors on human social behavior.
2. Apply knowledge of the socio-psychological concepts to everyday life and students life experience.
3. Analyze behavioral issues using theories and concepts from the perspective of social psychology.
4. Discuss about socio-psychological concepts in daily life.
5. Discuss about socio-psychological concepts in daily life. Develop and organize research about socio-psychological concepts in daily life.
6. Formulate explanations of obtained data on the basis of acquired knowledge. Present the results of students own research to colleagues.
7. Demonstrate the results of students’ own research to colleagues.

General Competencies

Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.
Grading

Attendance and activity during lectures - 5%;
Attendance and activity during exercises - 5%;
Group project - 10% Two colloquia - 70%, each 35% (in case of non-passing or unsatisfactory achievement on colloquia, students can take the final exam, which, by volume, the content and the corresponding ECTS meets the colloquia;
Oral exam - 10%.

Week by Week Schedule

1. Determinants of interpersonal attraction.
2. Theoretical explanations of interpersonal attraction.
3. Theories of love, relationship breakups.
4. Theoretical explanations of motives for prosocial behavior.
5. Personal and situational determinants of prosocial behavior, methods for increase of prosocial behavior.
6. Definition of aggression, neurological and chemical impacts on aggression.
7. Situational and social causes of aggression.
9. The first colloquium.
10. Informational social influence.
12. Compliance to the requests, obedience to authority.
13. Definitions of groups, the impact of the group on individual behavior.
14. Group decisions, group polarization, conflict and cooperation.
15. The second colloquium.

Literature

Basics of Biological Psychology

Lecturer in Charge

Doc. dr. sc.
Ivana Hromatko

Course Description

The general aim of this course is understanding of fundamental principles of nervous system organization, morphology of human central nervous system and functional organization of sensory and motor systems.

Course Type

» Psychology (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic parts of central nervous system at both micro- and macroscopic levels;
2. Recognize basic parts of neuron and types of glia cells;
3. Describe basic principles of functional and anatomical organization of sensory and motor systems in humans;
4. Describe mechanisms of sensory neural analysis at all hierarchical levels, from receptor to primary sensory cortex;
5. Explain the role of cortical and sub-cortical structures in motor planning and spatial orientation
6. Apply the acquired knowledge in understanding of biological foundations of complex mental functions.

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).

Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Grading

Activity during classes 10%, tests 70%, written exam 20%.
Week by Week Schedule

1. Definition of biological psychology
2. Incidence and consequences of psychomotorical, neurological and other disorders related to dysfunction of nervous system
3. Development of basic divisions of the CNS, planes and axis
4. Neuron as the basic structural and functional element of CNS, methods for studying the CNS
5. Signal mechanisms, synaptic mechanisms, receptors
6. Neurotransmitters: definition, classification, chemical structure, functional properties
7. Membrane resting potential, action potential
8. Brain morphology, peripheral nervous system
9. Transduction of sensory information into neural code, basic organization of sensory systems
10. Pain, touch, proprioception
11. Chemical senses: taste and smell
12. Vision, organization of visual system
13. Auditory system, vestibular system and cerebellum
14. General organization of motor systems, pyramid and extrapyramid systems
15. Test

Literature

Course Description
The students will come to understand the multidimensional phenomenon of security as a prerequisite for a successful physical, spiritual and material development of an individual, group, society and the state. They will learn about the basic elements of the national security system as well as private security systems of a modern society and state, as well as the basic organizational, structural and functional forms of security at the individual, national and international level.

Course Type
» Sociology (Study) (elective courses (2), 2nd semester, 1st year)
» Sociology (Study) (elective courses (2), 4th semester, 2nd year)
» Sociology (Study) (elective courses (2), 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Explain basic theoretical concepts regarding the phenomenon of security.
2. Classify security challenges, risks and threats to modern society.
3. Analyze tasks, structure and subject of internal security system.
4. Analyze tasks, structure and subject of the defence system.
5. Outline private security as a non-state factor of security in modern societies.
6. Explain forms, methods, standards and conditions of work in private security sector.
7. Compare powers and entitlements of private security and public police.
8. Explain oversight of private security.

General Competencies
Use the general knowledge of society and of social processes.
Explain causal relationships between the various social phenomena.
Conform to a teamwork with co-workers from various disciplines, of different attitudes or value orientations.
Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.

Grading
50 % seminar paper;
50 % oral exam.

Week by Week Schedule
1. Course introduction. Introduction to the system theory.
2. Basic theoretical concepts related to the phenomenon of security (individual, national, international, human); The theoretical model of national security (security policy: the policy process, actors and factors; safety structure, security self-organization of a civil society) in contemporary societies.
3. Threats to contemporary society (security challenges, risks and threats) at the national, supra-national and global level.

4. The national security system (case studies); (National) security policy - forms, processes, actors, factors.

5. The internal security system: tasks, structure, subjects; Internal security policy; The police; The State Attorney's Office; Intelligence and security services; Customs; Judicial police; Communal order officers/local/municipal police; Inspection service and other agencies of formal social control.

6. Defense system: tasks, structure, subjects; Defense policy; Armed forces: organizational, hierarchical, communicational, motivational structure; civil-military relations; Civil defense, defense planning and crisis management.

7. The system of protection and rescue: tasks, structure, subjects.

8. National security system management and control: the government, the prime minister, ministers, the parliament, the president, the National Security Council, the supervision of the public (non-governmental organizations, the media, public opinion).

9. Private security as a non-state security factor in modern societies; The definition of private security: private security, private security industry, private policing, private detective activity; Plural policingy and the "hybridization" of security.

11. Private security services: Forms/licenses and jobs; Areas and methods; standards and conditions.

12. The measures, tasks, rights and powers of security guards.

13. Private detective activity: Private detective areas of work; Private detective methods, rights and powers.

14. Cross-border operations of private security companies and private detectives; National and international interest groups and associations in the field of private security; Cooperation between the police (and other public security services) and private security.

15. Control over private security; Conclusions and preparation for final exam.

Literature

BA work

Course Description
Undergraduate thesis is a complete, comprehensive and highly independent obligation the fulfillment of which marks the students' completion of their undergraduate studies and in which the students must demonstrate their ability to independently use literature in the field or branch of science in which their studies are founded. The aim of this course is to allow the students to demonstrate their knowledge of the subject, the ability of independent work and use of literature, as well as the application of appropriate methodology. Double major students write their thesis on only one of their major studies.

Course Type
» Communication Sciences (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Croatian Studies (Dual-major studies Study) (required course, 6th semester, 3rd year)
» History (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Latin language (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Philosophy (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Sociology (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Communication Sciences (Study) (required course, 6th semester, 3rd year)
» Croatian Studies (Study) (required course, 6th semester, 3rd year)
» History (Study) (required course, 6th semester, 3rd year)
» Sociology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Collect and critically study relevant literature;
2. Choose a thesis topic;
3. Write the thesis syllabus;
4. Plan the course of completion of the thesis within a well-defined frame;
5. Define problems, hypotheses and methods which will be used in order to reach predicted results;
6. Write a thesis in the extent of approximately 3500-4500 words (16 to 20 standard pages of text).
Grading

100 % written final paper

Week by Week Schedule

1. Discussion of the topic, its approval and the acceptance of tasks.
2. Writing the thesis.
3. Writing the thesis.
4. Writing the thesis.
5. Writing the thesis.
6. Writing the thesis.
7. Writing the thesis.
8. Writing the thesis.
9. Writing the thesis.
10. Writing the thesis.
11. Writing the thesis.
12. Writing the thesis.
13. Writing the thesis.
14. Writing the thesis.
15. Writing the thesis.

Literature

Mentor je dogovara sa svakim studentom ovisno o temi završnog rada.
Behavioral Neurobiology

Lecturer in Charge

Prof. dr. sc.
Zdravko Petanjek

Course Description

The aim of this course is to provide students with thorough understanding of biological foundations of complex cognitive human functioning.

Course Type

» Psychology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic parts of the central nervous system, morpho-functional division of the human cerebral cortex, its laminar organization and neuron morphology;
2. Explain the basic principles of cortico-cortical and cortico-subcortical connections crucial for processing of higher cognitive functions;
3. Explain the principles of neuronal activation in visual and auditory association cortex involved in higher level of information processing, and the role of cerebral cortex in planning, control and execution of voluntary movements and space orientation;
4. Explain the role of higher order association areas in language, working memory, reasoning, planning and other human specific higher cognitive functions, as well as the connections between higher association areas, limbic system and other subcortical structures involved in emotional behaviour, motivational drives, biorhythms and homeostasis;
5. Apply acquired theoretical and practical knowledge in understanding the underlying mechanisms of psychological development and related disorders
6. Apply acquired knowledge in practical use of neuroimaging techniques (fMRI, PET, EEG, MEG);
7. Use educational multimedia online neuroscience resources in written reports and oral presentations;
8. Create a multimedia presentation showing clinical examples of correlations between brain damage and functional outcomes;
9. Analyze scientific review articles from the field of neurobiology of higher cognitive functions;
10. Explain and present the role of biology in normal everyday behaviour and in the onset of psychological disorders.
General Competencies

Explain the biological and neurobiological foundations of psychological processes and behaviour. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development. Value the basic contents from the complementary social, humanistic and biomedical disciplines.

Grading

Class activity - 10%, Seminar - 10%, Exercises - 10%, Two written tests - 60%, Oral test - 10%.

Week by Week Schedule

1. The role of biological factors in behaviour: trends in brain research in the world, the role of genetic background in shaping of brain structure, the impact of other developmental factors on brain structure, the role of the neural network structure in behaviour, the role of psychologists in brain research; the relationship between growing complexity in brain structure and growing complexity in psychomotor and cognitive functions during phylogenesis; functional division of the cerebral cortex: primary, parasensory and general associative areas; recognition on the scheme.

2. Functional anatomy and histology of the cerebral cortex: laminar organization, allocortex, paleocortex, archicortex, mezocortex, neocortex; recognition of layers on the scheme.

3. Cellular structure and organization of cortical connections: pyramidal neurons and interneurons, afferent systems of the cerebral cortex, laminar organization of afferent and efferent connections; features of cortical neurons; the pyramidal neurons (morphological, chemical and functional characteristics), GABAergic interneurons, baskets cells, axo-axonal neurons, columnar "double bouquet" neurons: identification on the scheme.

4. Brain chemical anatomy and reticular formation: neurotransmitters (glutamate, GABA, acetylcholine, noradrenaline, serotonin, dopamine, peptides), brain stem reticular formation and the continuum toward diencephalon and telencephalon; activating brain systems, central limbic central continuum: identifying limbic continuum nuclei on the scheme.

5. Ascending reticular activating system (ARAS): MFB, centrenecephalon, mediobasal telencephalon; functional organization of the limbic system; structures of the limbic system: Papez circuit, the amygdala, the central limbic continuum, mediobasal (septal) area, hypothalamus, hippocampus, fornix; identification on the scheme.

6. EEG and general cortical activity: EEG waves, methods of monitoring the functional activity of the brain, evoked potentials; neurobiology of consciousness and sleep: thalamic reticular nucleus, sleep spindles, levels of consciousness, sleep cycles, REM stages; demonstration of the EEG; multimedia EEG presentation.

7. Neurobiology of vision: the organization of the primary visual areas, ocular dominance columns, secondary visual areas, opposite opponent colours system, perception of depth and movement; visual illusions: computerized exercise displaying visual illusions and their interpretation.

8. Visual-motor processing: the area for the control of eye movements (area 8); the role of the cerebral cortex in motor activity: primary and supplementary motor areas; motor pathways: computerized demonstration of the differences in stimulating pyramidal and extrapyramidal system.
9. Neurobiology of biorhythms: supraoptic area of the hypothalamus, circadian, circannual rhythm; neurobiology of emotion: orbital prefrontal cortex, limbic system, the theory of emotions; functional anatomy of the limbic system: the effect of stimulation of different areas of the limbic system - a multimedia presentation.

10. Neurobiology of sexuality: the hypothalamus, sexual dimorphism, sex differentiation, sex differences in the brain; neurobiology of higher cognitive functions: the relationship between general and parasensory associative areas; functional anatomy of associative areas: the prefrontal cortex, angular and supramarginal gyrus; identification on the scheme and functional implications.

12. Neuroanatomy of learning and memory: localization of short-term memory and long term memory storage; case study H. M.; cellular mechanisms of learning and memory: long-term potentiation (LTP), long-term depression (LDP), retrograde synaptic transmission, Kandel’s learning model on Aplysia; anatomy of the hippocampal formation: entorhinal area, dentate gyrus, perforant pathway, mossy fibers, Schaffer collaterals, CA1 and CA3 area, alveus; identification on the scheme.

13. Neurobiology of speech and language: Broca’s and Wernicke’s area, Wernicke-Geschwind model; the evolution of language functions and the importance for the development of human specific higher cognitive functions; lateralization of brain function, "split brain" experiments; differences between the concept of dominance and lateralization of brain function; anatomical differences between left and right hemispheres: demonstration (in the native slices) of the differences between the left and right hemispheres in the size of the Broca’s and Wernicke's area.

14. Neurobiology of social behaviour: metacognition ("theory of mind"), the Klüver-Bucy syndrome and differences in symptomatology between man and ape, the biological basis of altruism and moral behaviour; brain plasticity: medical and educational significance, social, philosophical and ethical aspects.

15. Interindividual variability in brain structure: native and histological slices demonstrations; changes in the morphology of the brain after lesions: native and histological slices demonstrations.

Bosna Srebrena in Ottoman Empire

Lecturer in Charge

Prof. dr. sc.
Mijo Korade

Course Description

Franciscan province Bosna Srebrena (Bosna Argentina) was only institution from medieval period of Bosnia to survive Ottoman conquest. History and activity of Catholic Church in Bosnian and Hecrgovinian area are inseparable from the Bosnian Franciscans. For almost five centuries they were basically the only pastoral workers. This activity had key role in preservation of the Catholic component of the population in Bosnia which was then during 19th and 20th century incorporated in the contemporary Croatian nation.

Main goal of the lectures is to enable students to understand historical frame and ways in which Bosna Srebrena operated during this period.

Students are expected to regularly attend lectures and to actively participate in it.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
» History (Study) (elective courses / working groups, 1st semester, 1st year)
» History (Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Study) (elective courses / working groups, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Outline the main events related to the history of the Bosna Srebrena
2. Review the most important historical characters of the Bosna Srebrena
3. Identify the most important people of the Bosna Srebrena
4. Explain the most important cultural achievements of the Bosnian Franciscans
5. Relate processes of the development of the Bosna Srebrena with the similar processes of the other Catholic institutions
6. Describe development of pastoral care provided by the Bosnian Franciscans

ECTS Information Package for Academic Year 2013/2014
Course Catalogue – Undergraduate Study
University of Zagreb Centre for Croatian Studies
General Competencies

After finishing the programme student will be able to:
identify major issues in interpretation of history,
construct a historical context,
defend his/her own opinion in discussions on different historical events and processes,
demonstrate the importance of interdisciplinary interpretations of historical events,
reconstruct historiographic tools in making conclusions of historical processes and events,
appraise the value of historiographic interpretations.

Grading

Student responsibilities: Class attendance. Active engagement in the class (discussion on materials). Absence: student has a right to absent twice. The exam is oral.

Week by Week Schedule

1. Introduction in the history of the Franciscans
2. Christianity in Bosnia before arrival of Franciscans
3. Arrival of the Franciscans in Bosnia
4. Islamisation of Bosnia
5. Bosna Srebrena in period before 1699.
6. Bosna Srebrena after Great Turkish War
7. Divisions of Bosna Srebrena during 18th century
8. Bosnian Franciscan literature
9. Education of the Bosnian Franciscans
10. Habsburg Monarchy and the Bosnian Franciscans
11. Apostolic vicariate in Bosnia 1735-1881
12. Bosna Srebrena during 19th century
13. Illyrian movement and the Bosnian Franciscans
14. Relations of the Orthodox Church and the Bosnian Franciscans
15. The final lecture

Catholic Church and Croatian Politics 1918.-1990.

Teaching assistant
Izv. prof. dr. sc.
Miroslav Akmadža

Course Description
Course objectives are to acquire basic information and scientifically founded knowledge about the situation in Croatian and Yugoslav society in the first Yugoslavia, during and after the Second World War, linking different impact on Church-state relations in given historical periods and circumstances and the consequences thereof.

Course Type
» History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 1st semester, 1st year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 5th semester, 3rd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. List the most relevant information about the interaction between the Catholic Church and the state in the 20th century,
2. Define the basic problems of the interrelationship between the Catholic Church and the state in that period,
3. Explain historical processes that have marked the history of Croatia during the period,
4. Define how the Catholic Church affected the country during this period and that the state is influenced by the Catholic Church,
5. Explain the causal link of this correlation during the period,
6. Compare historical processes and the flow of historical events in the history of Croatian 20th century due to the different social and political environment that has passed in this period (two of Yugoslavia, ISC (NDH), etc.).

**General Competencies**

After successful completion of their studies, students will be able to:

- define the historical processes inherent in the present period,
- specify the persons and institutions that have marked the history of Croatia,
- explain the cause and effect relationships between historical events and historical processes,
- discuss the context of historical events,
- connect various historical processes.

**Grading**

Active students will be monitored throughout the semester. Classes is obligatory to attend. The final exam is oral.

**Week by Week Schedule**

1. Introductory approach to content, course goals and literature
2. The relationship of the Catholic hierarchy to the South Slavic unification
3. Croatian Catholic movement
4. Catholic Action
5. The emergence and operation of the Old Chatolic church
6. Concordat problem between Vatican and the Kingdom of Yugoslavia
7. Catholic Church and CPP
8. Catholic Church and ISC
9. The relationship of the Catholic Church and communism
10. Policy of communist regime towards the Catholic Church in the early postwar years
11. Confiscation of the property of the Catholic Church by the communist regime
12. The trial of Archbishop Alojzije Stepinac and to the other ecclesiastical persons
13. Priests Association in the service of the communist regime
14. Yugoslav-Vatican relations
15. The Catholic Church in independent Croatia

**Literature**

Church History in the Light of Medieval Sources

Lecturer in Charge

Doc. dr. sc.
Tomislav Popić

Course Description

The aims are: to acquaint students with the main processes and the most important events in institutional history of medieval Church; to provide them with knowledge about important popes, monastic orders, ecclesiastical organizations (European and Croatian) and about various primary sources regarding church history (for example: famous Donation of Constantine, correspondent letters between Croatian state rulers and papacy, narrative sources – church chronicles). The aim is also to train students to handle medieval primary sources.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe processes related to Church history of medieval period
2. Develop an ability to write a seminar
3. Analyze and interpret sources in ecclesiastical history of medieval period
4. Compare historical processes which took part in Croatian historical territories
5. Identify historical problems and questions related to ecclesiastical history of medieval period
6. Explain problems related to specific historiographical questions
General Competencies

After finishing the programme student will be able to:
define historical processes typical for certain historical period,
summarize basic information of the Croatian and the World history,
combine different historical processes,
Appraise the value of historiographic interpretations,
defend his/her own opinion in discussions on different historical events and processes,
design his/her own conclusion on different historical events and processes,
interpret a historical sources.

Grading

Student responsibilities: Class attendance. Active engagement in the class (discussion on materials). Completion of weekly assignments (reading texts).
Absence: student has a right to absent twice.

Week by Week Schedule

1. Introduction in the church history.
2. Early medieval papacy.
3. Donation of Constantine.
4. Benedictines and Regulae.
5. Pope John VIII and Croatian duke Branimir.
6. Church council of 10th century.
7. The age of reform: pope Gregory VII.
8. Reform of Cluny.
9. Ecclesiastical organizations in Dalmatia and continental Croatia.
10. St Francis of Assisi and the emergence of mendicant orders.
11. Papal monarchy: Innocent III and Gregory IX.
12. Thomas Archdeacon (chronicler of the Archdiocese of Split).
13. Pope Boniface VIII.
15. Church councils of the 15th century.
Literature

Communist Party Policy toward Political Opponents and Dissidents

Lecturer in Charge
Izv. prof. dr. sc. Miroslav Akmadža

Course Description
Course objectives are to acquire basic information and scientifically established knowledge about the situation in Croatian and Yugoslav society after World War II, the analysis of various forms of political relations by the Communist Party of political opponents and dissenters from the ranks of the Communists (dissidents) in some periods and the consequences thereof.

Course Type
» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. List the most relevant information on the Communist Party of Yugoslavia (CPY) for a period of 1945 up in 1990.,
2. Explain the concept of opponents CPY on the social and political level,
3. Define the basic problems of interrelationships of CPY and its dissidents,
4. Explain the causal link of this correlation during the period,
5. Explain historical processes that have marked the history of Croatia in this period,
6. Describe how CPY shaped country in this period.
General Competencies

After successful completion of their studies, students will be able to:
define the historical processes inherent to different historical periods,
clearly and concisely describe the basic course of historical events of the period,
explain the cause and effect relationships between historical events and historical
processes,
identify the basic problems of interpretation of historical events and processes,
express their opinions about historical events and historical processes.

Grading

Activity of students will be monitored throughout the semester. Classes is
required to attend. The final exam is oral.

Week by Week Schedule

1. Introductory approach to content, course goals and literature
2. The organization and operation of the repressive communist system
3. Bleiburg and the Way of the Cross
4. Clash of the guerrilla groups (Crusaders)
5. Policy of CPY to the CPP
6. Policy towards Folskođerški and Italians
7. Relationship of the CPY to the Catholic Church and other religious
communities
8. The Draza Mihailovic trial and attitudes towards members of Chetnik
Movement
9. Clash of the members of informbiro and the Hebrang case
10. Žigić, Brkić i Opačić cases
11. Dilas case
12. Ranković case
13. Relationship CPY to the participants of "Croatian Spring"
14. Communist Party of Yugoslavia, Croatian political emigration and murder
of Bruno Busić
15. Franjo Tuđman and some Croatian communist dissidents

Comparative Psychology

Lecturer in Charge

Doc. dr. sc. Zoran Tadić

Course Description

Enable the students to approach the study of animal behavior and the creation of new scientific hypotheses in this multidisciplinary field, especially from the standpoint of learning, cognition and the effect of the evolution of these processes.

Course Type

» Psychology (Study) (elective courses, 2nd semester, 1st year)
» Psychology (Study) (elective courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and critically evaluate the results of experiments in the field of animal behavior in nature and in the laboratory.
2. Criticize their own and the results of others in the field of comparative psychology.
3. Analyze and apply the information from the scientific literature of the area in the course of independently devising and testing scientific hypotheses and designing experiments in comparative psychology.
4. Explain and interpret the data from different areas of comparative psychology (e.g. neuroetology, behavioral endocrinology, behavioral ecology).

General Competencies

Determine the biological and neurobiological bases of mental processes and behavior.
Critically assess the scientific and technical papers in the field of humanities, social sciences and biomedicine.
Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.
Week by Week Schedule

4. LEARNING: What is learning? Learning and behavioural adaptation, types of learning: habituation, classical (Pavlovian dogs) and operant conditioning, latent learning and its adaptiveness, logical learning, social learning, learning and cognition in animals - examples and considerations.

7. DEVELOPMENT BEHAVIOR: What causes behavioral changes during the development of an individual unit? The role of genes and environment in the development of song in birds, critical periods in the development of behavior, filial and sexual imprinting in birds and mammals, homeostasis in the development of behavior, social development of rhesus monkeys, development of the nervous system and behavior of amphibians.

8. SEARCHING FOR FOOD: How to search for and find food? Methods of searching and hunting for food, optimal search for food (theoretical models and their practical application).

9. ANTI-PREDATORY BEHAVIOR: How not to be eaten: Protective (cryptic) coloration, aposematic coloration, Batesian and Mullerian mimicry, polymorphism as a defense against predators, distraction, visual expression of body condition, bluff, attack as defense, group defense - advantages and disadvantages.

10. SEXUAL REPRODUCTION, PARTNER SELECTION AND MATING SYSTEMS: Why is there sex? The evolution of sex and the sex determination, sex partner selection, theories of female choice evolution: "runaway" selection model, the handicap principle, Bateman's principle, Trivers' theory of parental investment in offspring, intra- and intersexual conflict and partner selection: female choice and male choice, parental care for offspring, mating systems: monogamy, polygamy, polygyny, polyandry. Is the study of partner selection that simple?
11. LIFE IN GROUPS AND COMMUNICATION AMONG ANIMALS: The advantages and disadvantages of living in a group, natal philopatry, territoriality, definitions of communication among animals, game theory and its application in the prediction of conflict between two individuals, asymmetry in aggressive interaction of two individuals, nature of communication signals and channels, evolution of communication signals - ritualization, selection pressures that affect the communication among animals, the tasks of communication, intra- and interspecific communication, maintaining relationships in a group by physical touch, communication and language development in apes.

12. LIFE IN GROUPS AND COMMUNICATION AMONG ANIMALS: The advantages and disadvantages of living in a group, natal philopatry, territoriality, definitions of communication among animals, game theory and its application in the prediction of conflict between two individuals, asymmetry in aggressive interaction of two individuals, nature of communication signals and channels, evolution of communication signals - ritualization, selection pressures that affect the communication among animals, the tasks of communication, intra- and interspecific communication, maintaining relationships in a group by physical touch, communication and language development in apes.

13. SELFISHNESS AND ALTRUISM: What is altruism? Hypotheses about the evolution of altruism: Individual selection, selection by relatives, reciprocal altruism, parental manipulation of offspring. Examples of cooperation among animals (alarms, group rearing of pups, cooperation in the search for a sexual partner, eusociality), the theory of eusociality evolution in insects (haplodiploidy and other genetic theories), the naked mole rat (heterocephalus glaber) as a model eusocial mammal, factors driving the evolution of eusociality.

14. SELFISHNESS AND ALTRUISM: What is altruism? Hypotheses about the evolution of altruism: Individual selection, selection by relatives, reciprocal altruism, parental manipulation of offspring. Examples of cooperation among animals (alarms, group rearing of pups, cooperation in the search for a sexual partner, eusociality), the theory of eusociality evolution in insects (haplodiploidy and other genetic theories), the naked mole rat (heterocephalus glaber) as a model eusocial mammal, factors driving the evolution of eusociality.

15. Exam

Literature

Critical Thought in Sociology

Lecturer in Charge

Izv. prof. dr. sc. Renato Matić

Course Description

To train students for the interpretation of ideas and author's contributions; analysis of basic concepts that have arisen as a result of the development of critical thought in sociology primarily through the activity of the Frankfurt School.

Course Type

» Sociology (Study) (elective courses (2), 2nd semester, 1st year)
» Sociology (Study) (elective courses (2), 4th semester, 2nd year)
» Sociology (Study) (elective courses (2), 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the terms and theoretical concepts developed as a part of critical thought
2. Interpret correctly the widest range of theoretical perspectives and authors' contributions to critical thinking in sociology
3. Argue the importance of developing critical thinking in social sciences
4. Analyze social phenomena using the basic concepts and approaches that have arisen as a result of the development of critical thought in sociology primarily through the activity of the Frankfurt School
5. Demonstrate the ability to recognize the autonomous process of institutionalization of ideology; doubt the ultimate truth about society
6. Compare and contrast the dialectical critical approach to social phenomena as opposed to the empirical analytical one
General Competencies

Read and interpret classical sociological texts in light of philosophical influence on them,
correctly interpret the basic concepts of the profession,
differentiate, classify and compare different theories of society,
argue the pros and cons of different rationales behind the theoretical and
methodological paradigms / programs,
analyze the adequacy of contemporary social theory regarding actual empirical
situation and social and cultural conditions,
correctly interpret the importance of teaching classical sociological theory in its
generality and specificity,
analyze the diachronic development of thinking about society,
interpret philosophical and critical basics of discipline,
apply the lessons learned to the analysis of research achievements,
synthesize lessons learned through the efforts of its contribution through the
writing of a paper, oral presentations and asking critical questions.

Grading

Attending classes and active participation brings 20% of the final grade. Individual
oral presentations of assigned seminar topics and a written term paper carry 20%
of the final grade. Final oral exam carries a maximum of 60% (excellent).

Week by Week Schedule

1. Introduction
2. What is critical thought
3. Significant authors and ideas of critical thought before the Frankfurt School
4. The social and historical circumstances that preceded the establishment of
   the Institute for Social Research in Frankfurt
5. The mission of the Institute and of the activity: the initial year, sheltering
   from Nazi persecution, work in the United States, and the return in the
   post-war era
6. Max Horkheimer
7. Theodor Wieseground Adorno
8. Herbert Marcuse
9. Erich Fromm
10. Franz L. Neumann
11. Jürgen Habermas
12. "Post-Frankfurt" period of critical thought
13. Critical thought in national sociology
14. Seminar presentations and discussion
15. Seminar presentations and discussion

Croatia in the Second Half of the 20th Century

Lecturer in Charge

Doc. dr. sc.
Ivica Lučić

Course Description

Course objectives are focused on learning the important people and events that have marked the history of Croatia in the second half of the 20th century. In doing so, students develop a sense of importance of the period, they better they to understand and become more competent in their understanding and future teaching.

Course Type

- History (Dual-major studies Study) (required course, 6th semester, 3rd year)
- Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
- Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
- History (Study) (required course, 6th semester, 3rd year)
- Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of historical events in the Croatian second half of the 20th century,
2. Analyze individual events and processes,
3. Explain the basic problems of Croatian history in the second half of the 20th century,
4. Identify the most important information and people in world history in this period,
5. Define causal connections during the period,
6. Show the important from the unimportant in the interpretation of historical events and processes of the specified period.
General Competencies

After finishing the programme student will be able to:
summerize basic information of the Croatian and the World history,
identify the most important person and institutions in the Croatian and the
World history,
explain cause and effect relations of historical events and processes,
construct a historical context,
distinguish difference between important and non-important facts within
historiographic interpretation,
combine a different historical processes.

Grading

Activity of students will be monitored throughout the semester. Classes is
obligatory to attend. Written exam, with the possibility for oral.

Week by Week Schedule

1. Important factors in the Croatian position after the World War II
2. Determination of Croatian borders in the renewed Yugoslavia
3. Character of the new government
4. The post-war political life
5. Construction of a new society
6. The Catholic Church in the Second Yugoslavia
7. The resistance to the communist dictatorship and national oppression
8. The position of the Serbs in Croatia
9. Josip Broz Tito
10. Croatia since the beginning of the 50s to mid-60s of XX century
11. Brioni plenum
12. 'Creeping democratization *
13. Croatian spring
14. Karadordevo and its consequences
15. From the first multi-party initiative to independence

Literature

Croatian Archaeological Heritage

Lecturer in Charge

Doc. dr. sc. Mladen Tomorad

Course Description

The aim of the course is to introduce students to the basics of archaeology and its basic methods, devoting particular attention to the interdisciplinary character of archaeological science. Further, to offer students insight into the diversity of Croatian archaeological heritage and the important role it plays for the Croatian culture.

Course Type

ECTS Information Package for Academic Year 2013/2014
Course Catalogue – Undergraduate Study

University of Zagreb Centre for Croatian Studies
Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish the basic methods of archaeological investigation and gain familiarity with basic archaeological terminology and topics.
2. Recognize the basic forms of manipulating archaeological heritage.
3. Identify archaeological periods.
4. Distinguish basic values and potentials of archaeological sites and finds.
5. Distinguish the most important Croatian archaeological monuments, the places where they were discovered and where they are kept.
6. Analyze and approach literature with a critical mind, as well as to articulate views on the subject of Croatian archaeological heritage.
7. Prepare a reactive text on the subject of Croatian archaeological heritage, and to present it orally.

General Competencies

After completing the Croatian Archaeological Heritage course students will be able to recognise the position, role and significance of Croatian archaeological heritage in the wider framework of Croatia’s cultural heritage, as well as in the European context.

Grading

To be eligible for the written examination students shall have submitted an essay —and obtained a positive evaluation—in written form and as a presentation. Oral examination 80%; essay 20%.

Week by Week Schedule

1. Introduction to archaeology and archaeological methods
2. Special archaeological disciplines
3. Stone Ages
4. Metal Ages
5. Antiquity
6. Late Antiquity
7. Mythic worldview of the ancient Croats and the process of occupation of conquered spaces – theory
8. Mythic worldview of the ancient Croats and the process of occupation of conquered spaces – selected examples
9. Mediaeval cemeteries
10. Mediaeval settlements
11. Mediaeval sacred architecture
12. Mediaeval fortification architecture
13. Archaeology of the Modern Period
14. Selected archaeological sites
15. Selected archaeological finds

Croatian Cultural and Political History of the 16th and 17th Centuries

Lecturer in Charge

Doc. dr. sc. Ivana Jukić

Course Description

The history of Croatia in the 16th and 17th Century was marked with desintegration process of its territory. The main course objective is to explain how this process created and changed Croatian cultural and political identity. The medieval Croatian territory was dismembered in above mentioned centuries between Habsburg Monarchy, Venice and Ottoman Empire and the course will describe how those political centers influenced (or/and not) social, political and cultural life within Croatian lands.

Course Type

- Croatian Studies (Dual-major studies Study) (required course, 2nd semester, 1st year)
- Croatian Studies (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe socio-political processes within Early Modern Croatia in the 16th and 17th century
2. Argue why was Croatian territory desiginated and what were the implications of that process for the future
3. Analyze how different social classes faced with socio-political changes of the period
4. Compare cultural identities of Croatian lands based on their political affiliation
5. Explain how political desintegration influenced creation of the multiple Croatian identities
6. Relate socio-cultural similarities and differences of Croatian lands to neighboring countries

General Competencies

Students will be able to analyze and describe social and cultural processes within early modern Croatia.
Grading
The final grade will be result of student's class attendance, activity during seminars and discussions. The final exam is written and oral exam.

Week by Week Schedule
1. Class overview, schedule, requirements
2. World-Europe-Croatia 1490-1595
3. Once upon a time Glorious Kingdom and 16th century: desintegration's echos
4. Power centers and local autonomy
5. The Croatian society
6. The economy of the Croatian lands
7. The faith, science and turmolis
8. Is there culture in the century of turmoils?
9. World-Europe-Croatia 1595-1722
10. Power centers and local autonomy 1595-1648
11. Power centers and local autonomy 1648-1722
12. The economy of the Croatian lands
13. The faith, science and education
14. The society of the Croatian lands
15. Baroque in Croatian lands

Literature
Croatian Cultural and Political History of the 18th and 19th Centuries

Lecturer in Charge
Izv. prof. dr. sc.
Darko Vitek

Course Description
The aim of the course is to inform students with the basic information and historical processes that occurred in Croatia during the 18th and 19th century, introduce them to the basic problem of studying the Croatian cultural and political history, and to prepare them for independent judgment about people, events, and processes of Croatian cultural and political history of the 18th and 19th century.

Course Type
» Croatian Studies (Dual-major studies Study) (required course, 3rd semester, 2nd year)
» Croatian Studies (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:
1. Define the basic problems of the Croatian cultural and political history of the 18th and 19th century,
2. Explain the causality in this period,
3. Interpret historical processes in the 18th and 19th century,
4. Distinguish the specifics of cultural and political history of the 18th and 19th century,
5. Compare historical processes in Croatia with European historical processes,
6. Recognize the important political, social, and cultural events during the 18th and 19th century.

General Competencies
1. Define the basic problems of interpretation of Early Modern sources
2. Identify the most important types and collections of sources
3. Explain the cause-and-effect relationships in the interpretation of sources
4. Assess historical processes during the period based on sources
5. Differentiate level of interpretation of the level of historical events in modern history
Grading

Activity, written exam and essay.

Week by Week Schedule

1. Introduction, periodization, overview of literature.
2. Political area, institutions and demographics of the Croatian in 18th and 19th century.
3. War and its effects on cultural and political history.
4. Baroque and its impact on cultural activities in Croatia.
5. Absolutism, modernization and democratization of society.
6. Habsburgs and Croatia: basic overview of the rule.
7. Military Frontier in 18th and 19th century.
11. Istria in 18th and 19th century.
12. Croatian literature and its political and social conditioning.
14. Social differentiation during the 18th and 19th century.
15. Church in 18th and 19th century.

Literature

Croatian Cultural and Political History of the Middle Ages

Lecturer in Charge

Doc. dr. sc. Ante Birin

Course Description

Course objectives is to bring closer to the students the Croatian medieval history and point out to them how the events and processes are intertwined on the Croatian and European level, in the political, social and cultural sense. The history of Croats in the Middle Ages was marked, after their arrival, by the creation of their own state, which has experienced ups and downs depending on the internal and external political factors. Uniting with the Kingdom of Hungary in a personal union (upon the arrival of the Arpad dynasty on Croatian throne) and the increasingly powerful Venetian presence on the eastern coast marked the history of Croatia during the period of the High Middle Ages, at the end of which, as a result of the Ottoman conquest, Croatia will be reduced to remnants of the remains. The underlying aim of the course therefore is to introduce to the students how these processes affected the medieval political, social and cultural development of the Croatian lands.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 1st semester, 1st year)
» Croatian Studies (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the socio-political processes that affected the Croatian territory during the Middle Ages.
2. Explain why the Arpad dynasty came to hold the Croatian throne.
3. Analyze how historical circumstances led to the reduction of the Croatia to "the remnants of the remains".
4. Compare the medieval social and cultural development of the Croatian lands in the European context.

General Competencies

The course contributes to the acquisition of knowledge on the Croatian medieval history.
Grading

Student activity shall be monitored throughout classes which will reflect on the final grade. Class attendance is obligatory. Final exam is in written form.

Week by Week Schedule

1. De administrando imperio: imagining the tradition or a credible source for the earliest history of the Croats?
2. Croats and Byzantium
3. Croatia during the reign of Duke Branimir
4. The peak of the early medieval Croatian state
5. Istria in the early Middle Ages
6. The Benedictines in Croatia
7. The old Croatian material culture
8. The Church of Holy Salvation at the source of the Cetina
9. Crusader-Venetian conquest of Zadar in 1202
10. Andrija II, the birth of nobility
11. Ludovik I the Great, the culmination of Croatian medieval period
12. Croatia at the time of the Jagelović dynasty
13. Bosnia and Hum Christians
14. Triliterate and trilingual Croatian medieval literature
15. Test

Neven Budak (1994). Prva stoljeca Hrvatske, Hrvatska sveučilišna naklada,
Croatian Dialectology

Lecturer in Charge

Izv. prof. dr. sc.
Sanja Vulić

Course Description

Introduction to the Croatian dialect groups, dialects and subdialects. Recognizing the relationship between individual systems.

Course Type

» Croatian Studies (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify compact and isolated areas of individual Croatian dialect groups and dialects.
2. Explain the basic differences between certain dialect groups and dialects.
3. Demonstrate the basic differences between the archaic Shtokavian and Neo-Shtokavian.
4. Present and independently perform basic dialectal analysis of Chakavian speech.
5. Present and independently perform basic dialectal analysis of archaic Shtokavian speech.
6. Present and independently perform basic dialectal analysis of Neo-Shtokavian speech.
7. Present and independently perform basic dialectal analysis of Kaikavian speech.
8. Present and independently recognize foreign influences in individual speeches.

General Competencies

After completing the course, the students shall be able to independently analyze examples of various local dialect groups, dialects and subdialects, which shall contribute to their cognitive abilities and better understanding of Croatian dialects and relations between the dialects, in addition to a better understanding of the relationship between dialectology and sociolinguistics.
Grading

The evaluation takes into consideration lecture attendance, lecture effort, knowledge demonstrated in continuous assessment tests, participation and activity in field work, knowledge demonstrated in the exam.

Week by Week Schedule

1. Relationship between dialectology and sociolinguistics
2. Basic dialectology terminology: the difference between concrete and abstract systems, the relationship between local speech - speech groups - subdialect - dialect-dialect group
3. Distribution of individual dialect groups and dialects in the past and present
4. Basic features of the Chakavian dialect group
5. Relationship between the northwest and southeast Chakavian dialect
6. Dialects of the Chakavian dialect group
7. Chakavian Ikavian- Ekavian dialect
8. The basic characteristics of the Croatian Shtokavian dialects: the relationship between the archaic Shtokavian and Neo-Shtokavian
9. Croatian archaic Shtokavian dialects
10. Subdialects of the Slavonic dialect
11. Neo-Shtokavian Croatian dialects
12. Basic features of the Kaikavian dialect group
13. Dialects of the Kaikavian dialect group
14. Permeation between dialect groups
15. Dialectal literature

Literature

Croatian Ethnology

Lecturer in Charge

Prof. dr. sc.
Jadranka Grbić

Course Description

To introduce students to the beginnings of the development of anthropological and ethnological sciences in Croatia, and introduce them to the modern scientific and professional ethnological and anthropological developments in Croatia. Acknowledges the fact that the study of traditional culture (in an earlier stage of Croatian ethnology) and the intertwining of traditional with contemporary culture and patterns of everyday life (in the latest phase of Croatian ethnology and cultural anthropology), ethnological science analyzed and interpreted the Croatian ethnic and cultural identity in European context.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (required course, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)

» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define Ethnology and Anthropology, as well as the general science of culture of the people.
2. Explain the definitions and concepts of ethnology and cultural anthropology.
3. Analyze the contents of cultural elements and phenomena in terms of ethnology and anthropology.
4. Analyze traditional Croatian cultural and contemporary Croatian culture.
5. List specify core competencies: critical classification, analysis and evaluation of Croatian identity ethnological and anthropological approach.
6. Analyze and interpret the Croatian ethnic and cultural identity in the European context.

**General Competencies**

After the cours Croatian culture, students will be able to: Explain the importance of Croatian ethnology and anthropology of national identity in the European and global context. Will explain the terminology and conceptual differences in the Croatian ethnology and anthropology, which will contribute to cognitive thinking tradition and understanding of contemporary global culture and national culture and identity within it.

**Grading**

Attendance, reading assignments, participating in discussion with the professor and their colleagues (20% of the final grade), essay (20% of the final grade), written exam (60% of the final grade).

**Week by Week Schedule**

1. Introductory lecture
2. Terminology ethnolgy
3. Theories of ethnology and anthropology
4. Stages of development of ethnological thought throughout history
5. The beginnings of Croatian ethnological science
6. Development of ethnological thought in Croatia
7. Antun Radic
8. 1st colloquium
9. Milovan Gavazzi, Branimir Bratanić
10. Theoretical and methodological developments in the 20th Century
11. Croatian non-European researchers
12. Croatian diaspora and immigration
13. Old, newer and new Croatian diaspora
14. 2nd colloquium
15. Final conclusions
Literature

Croatian Folk Literature

Lecturer in Charge

Prof. dr. sc.
Ljiljana Marks

Course Description

The aim of the course is to introduce to the students the variety of genres in the Croatian oral literature, its longevity and the extent to which it is intertwined with written literature from its beginnings to the present, the connection with customs (life and annual cycles) and the immersion in the everyday life. Theoretical, methodological, stylistic, mythological, cultural, anthropological, historical and genre aspects of oral literature will be analyzed in selected texts.

Course Type

» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (required course, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the facts;
2. Analyse and independently solve tasks (text, audio and video record interpretation);
3. Recognize oral literary genres and their interpretation;
4. Apply research methods in other areas of humanities as well;
5. Analyse theoretical texts.

General Competencies

Analyze and synthesize facts and theoretical knowledge on the research area subject matter; the possibility of establishing links with other knowledge in Croatology (literary, linguistic, historical, ethnological, anthropological).
Grading

Preliminary exams; student presentations on assigned topics; joint commentary (in seminars) on required theoretical literature

Week by Week Schedule

1. Establishing the oral literary corpus
2. Basic theoretical approaches to oral literature
3. Oral lyric poetry in the customs of life and annual cycles
4. Oral lyric poetry in research and the history of Croatian literature
5. Ballads, romance and bugarištica
6. Oral epic poems: style, performance, research
7. Large systematic research in the 19th century and the foundational collections of oral literature (ONŽO and MH)
8. Course subject matter revision; preliminary exam
9. Ethnotheatrology between performance and recording
10. Fundamental features of prose genres
11. Fairy tale
12. Oral tradition
13. Interpretation of selected prose texts from various Croatian regions and periods
14. Everyday retelling, autobiographies, memoirs
15. Summary of the whole course, shared conclusions, the debate about the limits of research

Croatian Glagolitism

Lecturer in Charge

Prof. dr. sc. Alojz Jembrih

Course Description

Introduce the students to the beginnings of Slavic literacy. Show the origin of Glagolitic and Cyrillic script. Introduce the students to the theories about the origin of the Glagolitic alphabet. Show the importance and role of the Glagolitic script in Croatian culture, literature and language. Introduce the students to palaeographic features of the Glagolitic alphabet. Demonstrate to the students the characteristics of Croatian redaction of the Church Slavonic language. Introduce the students to the importance of triliteracy in Croatian culture and literature.

Course Type

» Croatian Studies (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and understand the meaning and importance of the Cyril and Methodius' Moravian (Slavic) mission in the ninth century.
2. Recognize paleographic features of Glagolitic monuments in the 10th and 11th century.
3. Identify linguistic features in the Croatian Glagolitic monuments in the 11th and 12th centuries
4. Identify linguistic features of non-liturgical and liturgical Glagolitic texts.
5. Recognize the Glagolitic printing production of the printing houses of Senj, Rijeka and Urach (15th and 16th centuries).
6. Demonstrate the value of Glagolitic script in the service of the reformation (16th century).
7. Identify transliteration and distinguish it from transcription.

General Competencies

Understand the meaning and the position of the activity of the Slavic educators Cyril and Methodius in the ninth century, explain and understand the meaning and importance of the Cyril and Methodius' Moravian (Slavic) mission in the 9th century and the development of its tradition in the Croatian cultural space.
Grading

At the beginning of the semester incoming students’ competences will be tested and the students will be given instructions in regard to the possible lack of previous learning in terms of the course in question. The exam and seminar paper for the course. At the end of the semester, the course and the course teacher shall be evaluated. This data shall be used by the teachers for the purpose of self-evaluation and possible restructuring of the classes, methods of work and student evaluation. The exam and seminar paper for the course.

Week by Week Schedule

1. The history of the Cyril and Methodius’ Moravian mission in the context of Slavic literacy and literature
2. Genesis of Slavic Glagolitic and Cyrillic alphabets
3. Theories about the origin of the Glagolitic alphabet
4. Cyril and Methodius’ Glagolitic tradition and the oldest monuments from the 10th until the 12th centuries
5. Paleographic characteristics of the Croatian Glagolitic monuments from the 10th until 12th century
6. The oldest Croatian Glagolitic lapidary monuments
7. Croatian redaction of the Church Slavonic language in the Croatian Glagolitic monuments
8. Manuscript liturgical and non-liturgical Glagolitic works
9. Croatian Glagolitic incunabula and conundrums surrounding it
10. Glagolitic script in the service of the reformation in the 16th century
11. Monastic orders as promoters and guardians of the Glagolitic script in Croatia
12. Glagolitic script in the service of the Roman Congregation for the doctrine and dissemination of faith in the 17th and 18th centuries

Croatian Literature of the Middle Ages

Lecturer in Charge

Prof. dr. sc. Antonija Zaradija Kiš

Course Description

A) This course has the task to introduce students to the foundations of Slavic literacy and culture. Special emphasis shall be placed on the Croatian triliteracy phenomenon that involves the usage of three scripts: Glagolitic, Cyrillic, Latin and trilingual (Latin, Church Slavonic and Croatian Church Slavonic). Students will become more familiar with the origin, purpose and objectives of the Cyril and Methodius' Slavic mission as the life work of the Holy Brothers that is reflected to this day in the Croatian literary and linguistic heritage, and in the general cultural premises of the South Slavic area. The students will be thoroughly familiarized with the Glagolitic and Cyrillic Slavic canonical monuments as the foundation of the development of Slavic literacy and the strong interest in it, especially in the 19th century. This paves the way to addressing the Croatian Glagolitic and Cyrillic matter and the oldest literary creations in this regard. In this sense, the importance of the Benedictines' activity in the Croatian region shall be emphasized as a key propagator of Glagolitic written word. Exceptional attention shall be focused on the Croatian Glagolitic epigraphy and its oldest monuments which shall be analysed with respect to their palaeographic and visual elements. The Baška Tablet will be particularly studied as the oldest surviving complete epigraphic monument. Its textual structure shall be studied, as well as its palaeographic specificity and cultural and historical background of the time of its making.

B) An important part of this course will be to master the scripts: Glagolitic and Cyrillic with an emphasis on the development of graphic characters and thus the issue of the origin of the Glagolitic and Cyrillic scripts and the related theories that arise during the 20th century. Ligatures, shortening of words and getting to know the Croatian numerical system shall receive special attention.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 1st semester, 1st year)
» Croatian Studies (Study) (required course, 1st semester, 1st year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and write in Cyrillic and Glagolitic script with the use of ligatures/explain the Croatian cultural specificity: triliteracy and trilingualism;
2. Analyze the situation of the Croatian cultural space in the early Middle Ages in regard to the Western European and Slavic literacy;
3. Distinguish and compare theories about the origin of the Glagolitic/Cyrillic alphabet;
4. Analyze and interpret the importance of the first written monuments for the Slavic and Croatian space/canonical writings;
5. Analyze epigraphic monuments in the context of the earliest Croatian triliteracy and trilingualism (the Plomin Tablet, the Valunsk Tablet, the Krk Inscription, the Konavle Fragment, etc.)
6. Recognize the influence of the Benedictines on the Croatian territory in the context of Croatian literacy
7. Recognize the importance of Glagolism in the history of Croatian cultural knowledge
8. Identify and describe literary genres
9. Recognize the importance of philological discovery for the literary history of Croatia
10. Analyze the macro and micro structure of the Baška Tablet

General Competencies

After the first semester of study/learning (Croatian literature of the Middle Ages, 2 classes per week, 12 lessons units/Croatology, undergraduate), the students will be able to do the following:

- clearly perceive the development of the beginnings of Slavic literacy by means of acquired theoretical philological and historical knowledge
- acquire the skill of writing in three scripts (triliteracy) - Latin, Glagolitic, Cyrillic - competently interpret the historical development of the Croatian language and literature, and then observe it in the wider context of medieval Europe along with well-argumented knowledge (activity of Cyril and Methodius, the development of the Glagolitic and Cyrillic script, canonical writings, Old Slavonic language evolution, the formation of redaction, transmission of literary genres;
- describe, analyze and define the beginnings of Slavic and Croatian literacy in medieval European context;
- observe in parallel the development of literacy on the Croatian territory over time (from the 7th century to the year 1396) and space (Istria, Dalmatia) in regard to the European (Byzantium, Italy, France) with well-presented historical and literary factors, applying the recent scientific achievements (supplementary literature);
- summarize the European medieval Literacy (Benedictine heritage - common values) and identify and interpret Croatian specificities such as: Angular Glagolitic script, triliteracy and trilingualism and the activity of Glagolitians in the context of medieval Slavic and Western European written cultural heritage.

Grading

Required three preliminary exams on the scripts as a precondition for attending the literature exam: Glagolitic and Cyrillic script, ligatures. Final exam knowledge assessment: 70 questions (pass mark 60 correct answers). Oral exam possible if the student wishes a better grade.
Week by Week Schedule

1. Timeframe of the Croatian Middle Ages in the context of the Western European Medieval period (upper/lower boundary of the Middle Ages: key events, key people, important dates).

2. Approach to learning the Glagolitic and Cyrillic alphabet once and today. Alphabets, their importance and alphabetical prayer - ways of learning the order of letters. Understanding and mastering the writing of Glagolitic script (rounded and angular) and Cyrillic (with reference to the Greek alphabet) shall be conducted in parallel for two weeks, in 4 classes.

3. Croatian literary beginnings: defining the term of Sklavinia, linguistic interference and symbiosis (Latin language as the mother tongue of Croatian literature - the oldest testimonies from the time of Croatian rulers. Emergence of the Old Slavic language, i.e. Methodii doctrina: the first testimonies of the Glagolitic activity.

6. The development of the Glagolitic script, types of script (rounded, angular, cursive Glagolitic alphabet), paleography, the emergence of manuscripts, illumination, miniatures.

7. Stages of development of the Glagolitic script: of Thessaloniki, of Moravia, Czech, of Ohrid. Croatian Angular Glagolitic alphabet, basic palaeographic characteristics. Familiarization with ligatures, mastering and applying them.

8. The golden age of Croatian Glagolism: basic notes, liturgical texts, non-liturgical texts (Glagolitic cursive).

10. Old Slavonic canon and canonical texts: Glagolitic and Cyrillic - the location of the finding, level of research, literature about them. The notions of review and redaction.

11. Chronological periodization of the Croatian medieval literature (triliteracy/trilingualism) from the beginning to the "Golden Age" of Glagolitic literature. The most important manuscript fragments (apostle paragraphs of Gršković and Mihanović in "Bečki listići").

12. Glagolitic medieval literature: the division through three periods. Access to each through historical framework and the most representative manuscripts, ending with incunabula and the Glagolitic printing house in Senj.

13. Glagolitic epigraphy: timeframe through eight time points. Introducing the oldest Glagolitic and Cyrillic monuments from the Croatian territory: the Valunskas Tablet, the Plomin Tablet, the Krk Inscription, the Senj Tablet, the Senj Relief and Inscription, etc. The definition of letters, recognition of Glagolitic, Cyrillic and Latin letters.

14. The Baska Tablet: fundamental Croatian medieval monument, the starting point of Croatian literacy. Place of origin, place of discovery, place of storage. Historical background of the Baska Tablet, its place in the St. Lucia in Jurandvor. Croatian scientists on the Baska Tablet. Macro and micro analysis, graphic analysis, text reading, text comprehension.

Literature

Croatian Music in the Context of European Musical Culture

Lecturer in Charge

Prof. dr. sc.
Stanislav Tuksar

Course Description

Systematization of knowledge about the major aspects and developments in the Croatian art music and their contextualization in terms of the history of European art music.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)

» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Indicate musical styles from the Middle Ages to the 20th century.
2. Identify works of European music across stylistic periods.
3. Identify works of Croatian music across stylistic periods.
4. Identify the determining features of musical culture (composing, playing, perception, material basis, instruments).

General Competencies

Competently navigating the stylistic features of Croatian music in the context of European musical culture.

Grading

Written grade based on the percentage of points obtained in the exam

Week by Week Schedule

1. European musical culture of antiquity (Greece, Rome)
2. European musical culture of the Middle Ages
3. Croatian music of the Middle Ages
4. European musical culture during the Renaissance
5. Croatian Renaissance music
6. European musical culture in the Baroque period
7. Croatian Baroque music
8. European musical culture during the period of Classicism
9. Croatian music during the period of Classicism
10. European musical culture during the period of Romanticism
11. Croatian music during the period of Romanticism
12. European musical culture in the 20th century
13. Croatian music in the 20th century
14. Recapitulation and revision
15. Exam ahead of term

Literature

Croatian Mythology

Lecturer in Charge

Prof. dr. sc.
Ljiljana Marks

Course Description

On the texts of mythical and historical Croatian oral traditions and legends the course aims to consider and review their thematic, stylistic, literary and cultural-historical features, demonstrate the feasibility of different approaches to research, point out the longevity and the large number of observed phenomena and the important role they play in the shaping of regional and Croatian identity. Their adaptability to the latest media and genre relevance shall be emphasized as well.

Course Type

» Croatian Studies (Study) (elective courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective courses, 3rd semester, 2nd year)
» Croatian Studies (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the facts;
2. Analyze the tasks (text and source interpretation);
3. Explain prose oral literary genres;
4. Apply research methods in other areas of the humanities;
5. Explain theoretical texts;
6. Prepare independent field research of traditions.

General Competencies

Analyze and synthesize facts and theoretical knowledge on the research area subject matter; the possibility of establishing links with other knowledge in Croatology (literary, linguistic, historical, ethnological, anthropological); making of independent conclusions about the importance of research in humanities; raising the awareness about intangible heritage and its importance in the national corpus.

Grading

Student presentation on assigned topics; joint commentary (in seminars) on the required theoretical literature; interpretation of sample texts.
**Week by Week Schedule**

1. Establishing oral tradition as an oral literary genre: dilemmas and problems.
2. Basic theoretical approaches to defining oral tradition: historical schools, contemporary approaches.
3. Analysis of sample theoretical texts.
4. Mythical legends about fairies in Croatian oral and written literature.
5. Mythical legends about anthropomorphic creatures: plague, mora, krsnik, granbandajaš.
7. Oral tradition on witches in Croatian records.
8. Jointly commenting on different sources and methodological approaches and schools.
10. Oral tradition on buried treasure between the historical and mythical.
11. Etiological oral tradition.
12. Historical oral tradition as source of mediated oral history.
13. Historical figures from the Croatian and European history as examples of mythisation.
15. The summary of the whole course, shared conclusions, the debate about the limits and possibilities of research.

**Literature**

- Bošković-Stulli, Maja (1968). *Narodna predaja-volksage kamen spoticanja u podjeli vrsta usmene proze*. U: Usmena književnost kao umjetnost riječi
Course Description

The course provides the students with the ability to independently define and recognize phonological and morphological facts in the Croatian language and to apply the acquired knowledge in oral and written communication.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 2nd semester, 1st year)
» Croatian Studies (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and delineate the phonological and morphological categories in the Croatian language;
2. Analyze and determine the sound changes;
3. Describe and introduce various theoretical approaches to morphology and phonology;
4. Analyze and spot deviations from the norm, both in writing and speech;
5. Apply the acquired knowledge in oral and written communication.

General Competencies

Adequately define and identify basic concepts in the Croatian phonology and morphology. Apply the knowledge in spotting and avoiding mistakes in written and oral communication.

Grading

Class effort 20%, exam 60% (or two continuous knowledge assessments), class attendance 20%.

Week by Week Schedule

1. Introduction and overview of the course (terms word and lexeme, phoneme, fon, allophone, morpheme, morph, allomorph, morphology, phonology morpho(fo)nology)
2. Phonology in regard to phonetics, Croatian phonological system and the alternation of phonemes, accent
3. Inflectional morphology in regard to derivational morphology, morphological analysis according to word formation, types of morphemes and grammatical endings
4. Types of words and types of changes in variable words
5. Grammatical categories according to the types of words (categories of gender, number and case)
6. Adjectives (definite and indefinite, their declension, comparison and conversion)
7. Verbs - infinite and finite forms, grammatical categories of verbs
8. Simple and complex verb forms, tenses and voices
9. Pronouns and numerals
10. Nouns
11. Six types of verbs and their sub-types
12. Invariable types of words, repetition
13. Phonology and morphology in Croatian language textbooks
14. Exercises in declination, conjugation and phonological and morphological analysis
15. Exam ahead of term

Stjepan Babić i dr. (2007). Glasovi i oblici hrvatskoga književnoga jezika
Croatian Regions during the Classical Antiquity

**Course Description**

The course consists of two parts: 1 the Illyrian tribes in today’s Croatia and the Greek colonization of the eastern Adriatic coast 2 Croatian lands in the Roman times. The course teaches about the life and culture of the autochthonous Illyrian tribes, the arrival of the Greeks and their colonization of the East Adriatic coast and the consequences of the meeting of the two civilizations. Also, the arrival of the Roman civilization, Romanisation, Roman state administration, emergence of Christianity and first Christian communities in today’s Croatian territory are addressed. Through seminars, students should elaborate on individual sites as integral parts of the cultural, historical and archaeological Croatian heritage.

**Course Type**

- Latin language (Dual-major studies Study) (elective courses, 2nd semester, 1st year)
- Latin language (Dual-major studies Study) (elective courses, 4th semester, 2nd year)

**Learning Outcomes**

On successful completion of the course, students will be able to:

1. Defining of basic methodological approaches in the understanding of today’s Croatian territory in the Antiquity
2. Defining and acquiring insights into Illyrian life and culture
3. Defining and acquiring insights into the essence of the Greek colonization of the Adriatic
4. Defining and understanding of the merging of the autochthonous peoples and colonizers
5. Defining and understanding the Roman insertion into the Illyrian land and its consequences
6. Defining and understanding of the Romanization process, government and the emergence of Christianity
7. Defining and observing traces of the ancient civilization in present day Croatia
8. Defining and evaluating the importance of the archaeological heritage in the context of contemporary society

**General Competencies**

This course offers the basic knowledge of our land in the Antiquity through: 1) historical and civilization facts 2) archaeological sites both in urban and non-urban centres. Addressed areas are Histria, Illyr and Pannonia accessed through the most important urban and suburban centres, pagan and Christian religious centres and economy.

**Grading**

The evaluation of the work consists of results related to class participation, preparation and presentation of seminar work and the oral exam.

**Week by Week Schedule**

1. Topography of Illyrian tribes in the present day Croatia
2. Life and culture of Illyrian tribes in the Eastern Adriatic. Life and culture of the Illyrian tribes in the Pannonian
3. Greek colonization of the East Adriatic. Colonization through written sources and antique writers.
4. Greek colonies in the East Adriatic coast
5. Cultural heritage of the Greek colonies in present day Croatia
6. Illyrians and Greeks in the Antiquity in present day Croatia
7. Celts on Croatian territory
8. Arrival of the Romans to the present day Croatia; Roman conquest through written sources and writers
9. Roman rule in our lands
10. Roman Emperors of Illyrian origin
11. Roads, settlements and architectural heritage to Byzantine times
12. Early Christian heritage
13. Ancient heritage – Histria
14. Ancient heritage – Dalmatia
15. Ancient heritage – Pannonia

Croatian Syntax

Lecturer in Charge

Izv. prof. dr. sc. Mario Grčević

Course Description

Gaining knowledge about the Croatian language syntax, understanding syntactic standards, the application of this knowledge in creation of texts, identifying syntactic errors in public communication

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 3rd semester, 2nd year)
» Croatian Studies (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and understand appropriately syntactic categories of the Croatian language;
2. Identify syntactic units in text
3. Explain and get to know various theoretical approaches of syntax
4. Analyze and perceive syntactic deviations from the norm, both in writing and speech;
5. Apply the acquired knowledge of syntax

General Competencies

Appropriately define basic concepts of Croatian syntax. Apply knowledge of syntax acknowledging and avoiding mistakes in written and oral communication.

Grading

Activity in class 10%
Student paper 20%
Exam and colloquium 60%
Attendance 10%

Week by Week Schedule

1. Syntax in Croatian grammars
2. Methods of syntactic description
3. Syntactic units
4. Delineation between syntactic units and terminological and phraseological ones
5. From words to sentences
6. Sentence and statement
7. Information, content and grammatical structure of sentences
8. Syntax categories
9. Simple sentences
10. A complex sentence
11. Word order
12. Agreement - concord
13. From a sentence to a text
14. Punctuation
15. Syntactical errors in contact between Croatian and other languages

ECTS Credits 4.0
English Level L1
E-learning Level L1
Study Hours 15
Teaching assistant
Prof. dr. sc. Diana Vukičević-Samaržija

University of Zagreb Centre for Croatian Studies
Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe periods of art and types of artistic expressions in architecture, sculpture and painting.
2. Define the basic concepts and terminology.
3. Recognize stylistic labels of work of art.
4. Recognize 50 selected most important art works.
5. Analyze an art work – painting, architecture, sculpture.
6. Name our most prominent artists and their work.
7. Analyze and differentiate urban network of projected towns through history.
8. Count Croatian monuments and protected enviroments on UNESCO’s world heritage list

General Competencies

Croatian visual art is an important determinant of culture and clarifies the relationship of student and artworks. After completing the course „Croatian visual art“ students will be able to describe and analyze the work of art: to recognize relationship of human shaping of nature in designed gardens, parks and historic gardens which will contribute to the cognitive and aesthetic abilities of getting acquainted with cultural heritage.

Grading

Written exam. Essay obligatory. Students activities will be monitored through semester.

Week by Week Schedule

1. Introductory lecture. Students duties and topics of their presentations.
2. Stylistic periods – chronological sequence and terminology.
3. Antiquity towns and the landscape. Students mapping a topic.
4. Planned city through history - from antiquity to contemporary age.
7. Braiding – the decoration the monuments. Differences between church inventory in Croatian state and others parts of Carolingian word.
8. West european influence at late medieval period - architecture and sculpture (Zadar, Trogir, Majstor Radovan, Buvina).
14. Modern art, architecture, painting (secession architecture: Lubinsky, Aladar Baranyaj, Kovačić, etc. and painters: Kraljević, Račić, Becić, Herman - Munich group.

15. Ivan Meštrović and modern sculpture.

Cross-Cultural Psychology

Lecturer in Charge

Doc. dr. sc. Eva Andela Delale

Course Description

Introduction to individual psychological processes and behavior in different cultures, as well as similarities and differences in behavior together with defining universal and specific features of behavior of individuals in different cultures. Comparative approach and facilitation of student reasoning and deducing about applicability of theories and research results. Cross-cultural approach to study of different basic and practical problems in different areas of psychology.

Course Type

- Sociology (Study) (elective courses (2), 1st semester, 1st year)
- Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
- Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and differ individual psychological processes and behavior in different cultures, similarities and differences in behavior and universal and specific determinants of individual behavior of different culture members.
2. Explain knowledge of the basic psychological processes in the field of personality, cognitive abilities, motivation and social behavior within the context of cultural differences.
3. Assess and compare psychological theories created in different cultures.
4. Evaluate psychological behavior considering the culture as one of determinants.
5. Apply and generalize the acquired knowledge on recognizing the differences in cooperation with different cultures' representatives and experts of cognate sciences (Sociology, Anthropology, Social Work).
6. Value applicability of comparative approach to theory and research results in professional work.
7. Apply cross-cultural approach into studying fundamental and applied problems in different areas of psychology.

Grading

Class attendance: 10 points;
Written exam: 90 points.
Week by Week Schedule

1. Introduction to cross-cultural psychology
2. Historical aspects of cross-cultural psychology
3. Methodology of cross-cultural psychology
4. Personality
5. Cognitive abilities
6. Emotion
7. Motivation
8. Individualism-collectivism, self
9. Socialization and identity, acculturation
10. Cross-cultural psychology, multiculturalism and cultural competencies
11. Sex and gender
12. Social relationships
13. Verbal and non-verbal communication
14. Culture and health
15. Conclusion

Literature

Cross-Cultural Psychology

Lecturers in Charge
Doc. dr. sc. Eva Andela Delale
Doc. dr. sc. Ana Butković

Course Description
Introduction to individual psychological processes and behavior in different cultures, as well as similarities and differences in behavior together with defining universal and specific features of behavior of individuals in different cultures. Comparative approach and facilitation of student reasoning and deducing about applicability of theories and research results. Cross-cultural approach to study of different basic and practical problems in different areas of psychology.

Course Type
» Psychology (Study) (elective courses, 1st semester, 1st year)
» Psychology (Study) (elective courses, 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 1st semester, 1st year)
» Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Explain and differ individual psychological processes and behavior in different cultures, similarities and differences in behavior and universal and specific determinants of individual behavior of different culture members.
2. Explain knowledge of the basic psychological processes in the field of personality, cognitive abilities, motivation and social behavior within the context of cultural differences.
3. Assess and compare psychological theories created in different cultures.
4. Evaluate psychological behavior considering the culture as one of determinants.
5. Apply and generalize the acquired knowledge on recognizing the differences in cooperation with different cultures representatives and experts of cognate sciences (Sociology, Anthropology, Social Work).
6. Value applicability of comparative approach to theory and research results in professional work.
7. Apply cross-cultural approach into studying fundamental and applied problems in different areas of psychology.
General Competencies

2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).

8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.

14. Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.

19. Express the necessity of lifelong learning and professional development.

Grading

Class attendance: 10 points;
Written exam: 90 points.

Week by Week Schedule

1. Introduction to cross-cultural psychology
2. Historical aspects of cross-cultural psychology
3. Methodology of cross-cultural psychology
4. Personality
5. Cognitive abilities
6. Emotion
7. Motivation
8. Individualism-collectivism, self
9. Socialization and identity, acculturation
10. Cross-cultural psychology, multiculturalism and cultural competencies
11. Sex and gender
12. Social relationships
13. Verbal and non-verbal communication
14. Culture and health
15. Conclusion
Literature

Cultural Anthropology

Lecturer in Charge
Doc. dr. sc. Valentina Gulin Zrnić

Course Description
To acquire fundamental knowledge in the discipline of Cultural anthropology (subject/s of research, terminology, theories); to acquire knowledge of and respect for other cultures and to foster critical judgments on our own culture; to learn about cultural anthropological approaches, methodology and epistemology; to develop ethical (professional, social) principles.

Course Type
» Sociology (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Sociology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Define basic concepts of the discipline;
2. Identify and discuss fundamental controversies on culture as the subject of research in the 20th century Cultural anthropology;
3. Compare cultural systems;
4. Estimate cultural and social phenomena in our society;
5. Employ basics of fieldwork methodology;
6. Collect scientific self-reflection on theories and methods used in the research

General Competencies
Use the general knowledge of society and of social processes
Explain the initial assumptions of the different political, religious and cultural orientations.
Explain causal relationships between the various social phenomena.
Explain the social change using classical and contemporary sociological approaches.
Explain the difference between micro and macro level of the sociological analysis. Illustrate the relevance of the concepts of culture, socialization, stratification, social structure and social institutions in interpreting of the social phenomena.

Grading
Class attendance and activity 10%; seminar 30%; written exam 60%.
Week by Week Schedule

1. Lectures (L): introduction to key theories/theoreticians, presentation of classic ethnographies and themes/area of research, debating cultural anthropological controversies in the history of discipline
2. Seminars(S): preparation of students' research projects (dozen groups); discussions - integration of knowledge from lecture and particular projects
3. L - introduction to cultural anthropology definitions and key concepts
4. S - discussion on potential project themes (1st assignment to find references dealing with selected project's theme)
5. L - evolutionism (Tylor, Frazer; armchair anthropology; magic - religion - science)
6. L - evolutionism (Tylor, Frazer; armchair anthropology; magic - religion - science)
7. S - discussion on nature of knowledge in cultural anth. and sociology
8. L - functionalism in cultural anth. (Malinowski, fieldwork, kula, economic anth.)
9. S - discussion on qualitative methods (fieldwork, empiric research)
10. L - structural functionalism and structuralism in cult. anth. (Radcliffe-Brown, Lévi-Strauss)
11. S - discussion on assign. one; discussion on constructing research question; (2nd assignment construct research questions for particular projects)
12. L - culture and personality school in cult. anth. (M. Mead i Benedict, national characters)
13. S - discussion on ethical principles of fieldwork and of writing ethnography
14. L - cultural ecology and environmental anth. (Lewis, Steward, current approaches)
15. S - discussion on auto-ethnography

Literature

Cultural Aspects of Work

Lecturer in Charge

Izv. prof. dr. sc. Nikša Dubreta

Course Description

The main goals of the elective course are focused on introduction of students to closer understanding of diversity in establishing individual and social identities at work. Also, to enable students to apply concepts of culture to studying work. Course will demonstrate definitions (Becker, Spradley) which address role of culture as shared worldviews and their influence to making specific work cultures.

Course Type

» Sociology (Study) (elective courses (2), 1st semester, 1st year)
» Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Determine modalities of work in matrix of contemporary types of employment
2. Describe elements of Beck's political economy of insecurity
4. Explain sociological concepts of culture at the field of work
5. Interpret main elements of ethical acting at the workplace
6. Compare elements of popular and scientific approaches to phenomenon of career
7. Link appropriate elements of organisational culture with modalities of participation in team-work
8. Judge types of leadership in given examples of organisational acting

General Competencies

Successful outcomes of course enable students in understanding, application and questioning of specific sociological contributions in researching work in recent complex societies and economies.

Grading

Short written essay and oral presentation in seminar 30% + oral exam 70%.
Week by Week Schedule

1. Work as a social and cultural phenomenon (lecture and seminar).
2. Sociology and application of concepts of culture at the field of work (lecture and seminar).
3. Mapping the sociological history social and cultural context of work in works of Marx, Durkheim, Weber and Simmel (lecture and seminar).
4. Work and identity in industrial context (lecture and seminar).
5. Changes in work continuities and discontinuities (lecture and seminar).
6. Worlds of work in complex societies (lecture and seminar).
7. Issue of gender in paid and unpaid work (lecture and seminar).
8. Microsocial context of work work and leisure (lecture and seminar).
10. Different images of team-work (lecture and seminar).
11. Ethics at the workplace (lecture and seminar).
12. Sociological concepts of career (lecture and seminar).
13. Organisational cultures questions and challenges (lecture and seminar).
14. Cultures of work and social structures (lecture and seminar).
15. Work experience and experience of time (lecture and seminar).

Literature

Descriptive Statistics

Lecturer in Charge

Doc. dr. sc. Mislav Stjepan Žebec

Course Description

Introducing students to different kinds of data, gathered in professional and scientific examination/measurement, and enabling students for their recognition. Presenting different kinds of empirical data description via tables, graphs, measures of central tendency and variability, and preparing the students for successful selection of the appropriate descriptors for specific kind of data. Systematic informing of students on procedures for determination the position of individuals result in a group, and procedures for evaluating the relations between two or more sets of data, but also to train the skills of appropriate application of these procedures. Training students in critically choosing proper descriptive statistics procedures based on their advantages and limitations, as well as in independently conducting of the procedures and proper interpreting of the results attained. Demonstrating crucial concepts of probability theory for statistical procedures in social disciplines (especially random variables) and integrating them into students understanding of social processes, as a basis for explaining test statistics and related theoretical distributions in inferential statistics.

Course Type

» Psychology (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify kinds of data gathered in professional, or scientific in examination/measurement, that define possible statistical procedures
2. Choose the most appropriate procedures for description and presentation of some data set, related to one or more variables
3. Illustrate examination results via the most appropriate graphs and tables
4. Calculate all measures of central tendency, variability and position of an individual result in a group
5. Apply basic concepts of probability calculus in social processes comprehension
6. Recognize characteristics of discrete and continuous random variables and related theoretical distributions
7. Evaluate the importance of normal distribution and apply their characteristics in solving problems/exercises in psychological phenomena that assume normal distribution of related variable
8. Demonstrate and describe interrelation two and more observed variables by calculating appropriate correlation indicators.
9. Indicate values of one variable on the bases of its relation with another variable (one or more)
10. Categorize various scale measures, variables, measures of central tendency, variability and position of an result in a group, theoretical distributions, and correlation indicators according to relevant criteria.

General Competencies

11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.
12. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Grading

Class attendance - up to 12% of the course grade;
Quiz tests every second exercises - up to 18% of the course grade;
Two mid-term written tests - up to 46% of the course grade;
Oral exam - up to 24% of the course grade;
Additional points - up to 5% of the course grade.

Week by Week Schedule

1. Introduction to Descriptive statistics course syllabus; Definition, importance and division of statistics; Basic concepts of statistics: entity, sample, population and attribute/variable
2. Definitions and examples of measurement in psychology; Measurement scales: definitions, examples, characteristics and appropriate statistical procedures; Variables: definitions, divisions and examples.
6. Basic concepts of probability (probability experiment, elementary event, event); Definition of probability and relation psychological variable and statistics; Properties and basic laws of probability; Basic concepts of combinatorics: basic lemma of combinatorics, combinations and permutations without replication.
7. Discrete random variable: definition, distribution, probability function, distribution function, expectation and variance; Important discrete distributions: Binom, Multinom, and Hypergeometric.
8. Continuous random variable: definition, distribution, probability function, distribution function, expectation and variance; Normal distribution the most theoretical distribution in psychology: generic presumptions, probability function, distribution function and important features; Z-distribution: genesis, purpose and properties.
10. Statistical relations between two variables: purpose, basic logic and graphical presentation (scatter diagram); Pearson correlation: assumptions, derivation, modes of calculation, basic features, and interpretation determinants; Coefficient of determination and alienation.

11. Correlation and causal relations; Correlation and linear regression; Regression line and prognosis: definition, derivation and interpretation; Prognosis error (definition and operative calculation) and adjacent concepts (homoscedascity and normality of conditional distributions, confidence interval).

12. Multiple regression: definition, basic logic, purpose and limitations; Two forms of multiple regression equation: layout, coefficient interpretation, two predictor case; Multiple correlation coefficient and prognosis error; Partial correlation: definition, purpose, coefficient derivation.

13. Pointbiserial and biserial coefficient: definitions, specific situations, modes of calculation and specific problems; Spearman (r_s) and Kendall (τ) rank correlations: definition, specific situations, modes of calculation, advantages and limitations.

15. Test.

Literature

Developmental neurobiology

Lecturer in Charge

Prof. dr. sc.
Zdravko Petanjek

Course Description

The general aim of this course is to familiarize students with basic histogenetic and morphogenetic concepts in human brain development as well as the development of other species, from insects to primates, in order to gain a deeper and broader understanding of biological foundations of higher cognitive functions and other human-specific processes. Specific aims are elaborated according to teaching units.

Course Type

» Psychology (Study) (elective courses, 2nd semester, 1st year)
» Psychology (Study) (elective courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize basic morphological and histological characteristics of different developmental stages; 
2. Explain the role and the relationship between biological predisposition and external factors in neural network development; 
3. Apply acquired theoretical and practical knowledge in working with children with developmental disorders; 
4. Apply acquired knowledge in practical use of neuroimaging techniques (fMRI, PET, EEG, MEG) when analysing developmental disorders in children and adolescents; 
5. Use educational multimedia online neuroscience resources in written reports and oral presentations; 
6. Create multimedia presentations using examples that show correlation between the development of certain brain areas and the changes in the psychological status of the condition; 
7. Analyze scientific review papers from developmental neurobiology; 
8. Explain and present the role of biological factors in the determination of neural network development of the human cerebral cortex.
General Competencies

3. Explain the biological and neurobiological foundations of psychological processes and behaviour.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
13. Value the basic contents from the complementary social, humanistic and biomedical disciplines.

Grading

Class effort 20%,
Seminar paper 20%,
2 preliminary exams 20%,
Essay - 20%,
Practical work - 20%,
Oral knowledge assessment 20%.

Week by Week Schedule

1. Brain morphogenesis during the embryonic and fetal period; brain morphogenesis during the perinatal and postnatal development.
2. Histogenetic processes during the embryonic and early fetal period; histogenetic processes during the fetal and perinatal period.
3. Imaging of the fetal brain; structural-chemical characteristics of the fetal brain organisation.
5. Ingrowth of axons, neuronal differentiation and the establishment of cortical connections; synaptogenesis - the role of activity and interaction with the environment.
6. Excessive production of synapses as a developmental event - phylogenetic comparison; selective stabilization of synapses as a mechanism of environmental shaping of brain structure.
7. Functional changes in brain activity during childhood and adolescence; the importance of recording functional brain activity in development disorders.
11. The role of early diagnosis in developmental disorders; brain imaging and early diagnostics for developmental disorders.
12. Time pattern of brain plasticity during development; imaging of brain plasticity during development.
13. Protracted period of human brain maturation; evolutionary characteristics of the development of human brain ("life history theory").
14. Macroscopic features of brain evolution; histological features of brain evolution; evolutionary aspect and biological basis for the emergence of higher cognitive functions in humans.
15. Comparative anatomy and histology of the cerebral cortex in primates; evolutionary aspects of neurobiology of the development of higher cognitive functions in primates; comparative anatomy of primate brain using imaging methods.

Literature

Knežević, M.; Petanjek, Z. (ur.) Priručnik: Neurobiologija ontogenetskog i filogenetskog razvoja; Web izdanje.

Differential Psychology

Lecturer in Charge

Doc. dr. sc. Ana Butković

Course Description

Explain individual differences to students as well as meaning of those differences to society in general and psychology in particular. Explain measurement of individual differences. Look at individual differences in abilities, personality and creativity. Analyze genetic and environmental contributions to those differences. Describe development of theories and models of intelligence. Describe development of theories and models of personality. Argue for importance of intelligence and personality in everyday life.

Course Type

» Psychology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and distinguish between different theoretical approaches in personality and intelligence;
2. Tell what we can and can not conclude from results of behavioral genetic studies;
3. Interpret results of research in differential psychology;
4. Analyze scientific studies of individual differences.

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
5. Compare theoretical approaches to the study of individual differences.
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.
10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.
Grading

Class attendance 10%;
Seminar essay 15%;
Two tests 60% or Final written exam 60%;
Final oral exam 15%.

Week by Week Schedule

1. History of differential psychology.
4. Concept and measurement of personality.
5. Eysenck’s personality theory.
6. Big Five and Five-factor model.
7. Personality and life outcomes (academic, work, romantic relations, health).
8. Personality and life outcomes (academic, work, romantic relations, health).
9. Intelligence: definition and history.
10. Models of intelligence.
11. Specific abilities.
12. ‘Hot’ theories of intelligence.
13. Intelligence and life outcomes (academic, work, health).
14. Intelligence and life outcomes (academic, work, health).
15. Creativity.

Literature

Early-Modern Croatian Literature

Lecturer in Charge
Doc. dr. sc. Viktoria Franić Tomić

Course Description
Subject of instruction is divided into fifteen sections. They are formed on the basis of chronology but at the same time they include the thematic and genre systems. Subject covers the following canonical authors of the Croatian Renaissance: Benedikt Kotruljević, Ivan Ćesmički, Marko Marulić, poets of Ranjina Collection, Mavro Vetranović, Nikola Našješković, Hanibal Lucić, Vinko Pribujević, Petar Hektorović, Peter Zoranić, Marin Držić, Mikša Pelegrinović, Sabo Bobaljević, Antun Sasin, Brne Knarutić, Dominko Zlatarić, Matija Vlačić, Faust Vrančić. Their texts as well as texts less typical but not less important written by literary personalities of the second grade are going to help students in building diachronic view of dominant genres in literature of early modern time. In doing so, we stress the genre of Renaissance drama in comparison with medieval poetics of the space, then also we are going to study profoundly the occurrence of tragedies in the second half of the sixteenth century, than the development of poetry of early renaissance in relation to tendencies of mannerism in early modern poetry. Also will be studied poetic and non poetic nonfiction and fiction texts from that era, as well as didactic questions. Students will acquire the knowledge of ideological concepts and ideologies as well as the changes in style and stylistic formation especially with regard to the relationship between the Renaissance and Medieval and then with the crisis of Renaissance known in stylistic terms as mannerism. In this part of subject with special attention will be studied the books of Burckhardt, Huizinga and Hocke. In details will be described literature in Latin that was established in renaissance Dubrovnik and Dalmatia and also at the Korvin court in Buda With students will be discussed the issues of Protestants within the Croatian literature and its relations with humanistic tradition. With special attention students will be familiarized with the phenomenon of women in the Renaissance, especially with the texts of Marija Gundulić Gozze and Nada Vittoria Speranza Bona. For students will be prepared material on the comparative aspects of Croatian Renaissance literature, especially the relationships with Italian literature of that time, but also the Croatian texts from renaissance will be compared with similar examples in other European literature. During the work we are going to study the numerous texts from the edge of literary space, especially scientific, history writing and philosophical works, as well as those who, though not written with the literary intention show the spiritual level and preoccupations of that time. During work with students will be discussed work of the leading writers who wrote not only in the Croatian language but in other languages such as Italian and Latin.

Course Type
» Croatian Studies (Dual-major studies Study) (required course, 2nd semester, 1st year)
» Croatian Studies (Study) (required course, 2nd semester, 1st year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze of the texts from the literature of Croatian Renaissance.
2. Identify of literary genres of Renaissance and analyzing the texts.
3. Develop of the ability of thematic analysis of literary works.
4. Develop of the ability to literature works as the sources for the history of ideas.
5. Identify of literary genres in the Croatian Renaissance literature.
6. Demonstrate the origins of the Croatian Renaissance literature.
7. Apply of the methodology and concepts suitable for the study of literary works of Croatian Renaissance.
8. Develop of the ability of critical thinking in writing term papers based on primary and secondary literature.

General Competencies

Participants will be instructed about the importance of Renaissance for the formation of Croatian and other national identities. Also students will be thought about the various cultural components of that identity in the context of Western Europe and its nations. Students will understand the cultural and historical context of the Croatian Renaissance literature. They will be able to explain the values and meanings of the canonic texts of Croatian Renaissance literature written in the language of that time. They will be able to recognize the characteristics of Croatian and Western identity in literary works of Croatian Renaissance. They will be able to use scientific and secondary sources during the interpretation of the literary works of Croatian Renaissance literature.

Grading

From the students it is required to participate actively in all forms of teaching. Monitoring and evaluative activities will be applied during the teaching process. Each program assignment (including the written seminar papers) will be included in the formation of the final grade. Students will be tested for their commitment by passing all requirements and at the end during regular examination time they will undergo the written and oral exam.

Week by Week Schedule

Literature

Jacob Burckhardt (1997). Kultura renesanse u Italiji [preveo M. Prelog], Zagreb: Prosvjeta
Early Modern European and World History

Doc. dr. sc.
Ivana Jukić

Lecturer in Charge

Course Description

The main objectives of the course are to describe Early Modern period in simple and clear way, to explain interconnections of events and processes on a global level such as: absolutism, religion questions, scientific revolutions, witch-hunt, global trade, explorations etc.). All those topics will be used to compare cultural and political encounters on global level.

Course Type

- History (Dual-major studies Study) (required course, 3rd semester, 2nd year)
- History (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe processes that shaped Early Modern period in Europe and World
2. Explain chronology stereotypes of the period
3. Identify the most important person and events 1500-1800
4. Explain cause and effect relations of the most important events of the period
5. List processes that 'prepared' Europe and the World for modern times
6. Evaluate specificities of the European regions and how they influenced the acceptance of Early Modern socio-political novelties
7. Appraise different historiographic interpretation of Early Modern period
8. Relate Early Modern social processes with contemporary ones
9. Compare processes and events in different European monarchies (France, Spain, Habsburg Mobarchy etc)

General Competencies

After finishing the programme student will be able to:

describe historical processes,
identify the most important persons and institutions in the Croatian and the World history,
compare historical processes of different periods,
summarize basic information of the Croatian and the World history,
explain cause and effect relations of historical events and processes.
Grading

The final grade is the result of class activity and attendance. The final exam is written exam.

Week by Week Schedule

1. Class overview, schedule, requirements
2. Early Modern World: general overview
3. Europe and the Renaissance
4. Politics, Church and Renaissance: 1450-1560
5. Politics, faith and War: 1560-1618
6. Politics, faith and War: 1618-1648
7. Europe and the New World 1500-1700: encounters and exchange
8. Societies and economies: 1450-1700
9. Thoughts and spirits: scientific revolution and culture in time of crises
10. Muslim Empires in Early Modern period: 1450-1789
11. East Asia in Early Modern period: 1450-1789
12. The State-building? Absolutism and domestic consolidations 1648-1789
13. To Balance of Power and diplomatic revolution: 1650-1776
14. The enlightened Europe
15. Society and World economy in the 18th century

Literature

Economic Picture of Istria during Antiquity

Lecturer in Charge

Doc. dr. sc. Mladen Tomorad

Course Description

The aim of the course is that students adopt a theoretical knowledge of the basics of the economic history of the ancient world and specific instructions as in regional terms, and that this knowledge is educated to understand the economic processes in antiquity. Developing the ability to correctly define the essential features of the economic history of antiquity, analysis and critical examination of the process of economic history, and, indirectly, apply the results of the analysis of the economic history of other periods and regions.

Course Type

- History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
- History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
- History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
- History (Study) (elective courses / working groups, 1st semester, 1st year)
- History (Study) (elective courses / working groups, 3rd semester, 2nd year)
- History (Study) (elective courses / working groups, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the period of the Roman conquest of Histria-causes and consequences;
2. Explain the terms: Romanization and the establishment of government;
3. Explain their views on the history of the economy in terms of regional natural predisposition of ancient Istria;
4. Analyze territorial specificity: the great economic possessions (senatorial and imperial estates, residential complexes, private estates, the imperial porcelain workshops);
5. Define the main concepts (villa rustica, villicus) and periodization;
6. Explain various aspects of everyday life of all strata of the population.
General Competencies

After finishing the programme student will be able to:
1. define historical processes typical for certain historical period;
2. explain cause and effect relations of historical events and processes;
3. compare historical processes of different periods.

Grading

Evaluation of essay, participation in classes and knowledge test (40:10:50).

Week by Week Schedule

1. Introductory lecture, introduction to the subject and literature
2. Historical resources (material and written); researchers of ancient Istria
3. The geographical position of Istria in antiquity, history and proto-history (Histrians); Wars-Histrians and Romans / Histrian wars (working on sources), Roman management of Istria
4. Roman economy, the Roman army, pacification and urbanization Illyria / Histria
5. Indigenous people and the process of Romanization; civitates peregrinae
6. Ceramic furnaces, ponds, water reservoirs, ports and harbors; Roman villas Istria and Dalmatia
7. Veriga, Valbadon, Barbariga Cervar, Byzantine castrum, Kolci, Val Madonna
8. Cults in the preroman Istria; Cults in Roman Istria
9. Cultural and social life; necropolis (from prehistoric tumuli to early medieval cemeteries)
10. Mirna valley in ancient times
11. Olive oil and wine, storage
12. Roman administration and Roman province in today's Croatian; Provincial economy-differences and commonalities
13. Ancient Brioni Processed fabric / fulionicae
14. The development of early Christianity in today's Croatian and during the fall of the Roman Empire on the territory of Illyria
15. Field work

Literature

Economic Sociology

Course Description

The aim of the course is to develop an understanding on economic problems in the world as well as in Croatia as primarily social problems, with the special emphasis on the social basis of the production process and exchange, the social basis of production and of use of the new created value and economic and social institutions as central categories in economic and social life.

Besides the classical topics related to the economic sociology, in every semester special attention is given to the newer (local/international) economical phenomena, and the choosing of such phenomena is made through the discussion with students.

Course Type

» Sociology (Study) (elective courses (2), 2nd semester, 1st year)
» Sociology (Study) (elective courses (2), 4th semester, 2nd year)
» Sociology (Study) (elective courses (2), 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define perspectives of classical and modern sociology for analysis of the key economic manifestations and institutions
2. Identify and describe - basic sociological characteristics of economic organization, capitalism, corporation, market, relationship between politics and economy etc.
3. Explain and differ - basic concepts for understanding of social importance of specific economic manifestations
4. Demonstrate seminars related to the analysis of the special economic manifestations and institutions, especially those that are related to the Croatian economy/society
5. Recognize - historical development, contemporary social meaning of the basic economic manifestations and processes related to the Croatian capitalism
6. Create seminars related to the analyses of special economic manifestations, institutions and especially those that are related to the Croatian contemporary society

General Competencies

Upon successfully passed exam students will be able to:
Use the general knowledge of society and of social processes.
Explain the key structural factors that shape society.
Explain the difference between micro and macro level of the sociological analysis.
Illustrate the relevance of the concepts of stratification, social structure and social institutions in interpreting of the social phenomena.
Illustrate the social questions in the context of social class, capitalism, individualization, nationalism and globalization.

Grading

Obligatory class attendance, seminar presentations, in-class exam and final oral exam.
Week by Week Schedule

1. Defining economic sociology.
2. Defining economic organization.
4. Market in history and economic approaches to the topic of market.
7. Culture and economic development.
8. Culture, trust and consumption: sociological analysis.
9. Production, consumption and lifestyles.
13. Croatian economy: basic processes.
14. Modern organizations, capital and socio-cultural capital.

Literature

- Bilješke s predavanja

Emotions

Lecturer in Charge

Doc. dr. sc.
Eva Anđela Delale

Course Description

Course objective is to familiarize students with systematic review of scientific terms and concepts in the field of emotion, and with the development, enrichment and applying scientific concept of emotion. Special emphasis is placed on the application of theoretical knowledge of psychology of emotions in everyday life and professional practice.

Course Type

» Psychology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic principles of formation of emotional responses.
2. Explain the laws of emotional connection with the occurrence of other mental processes
3. Generalize factual knowledge about emotional phenomena to specific cases and developments in practice
4. Predict relationship between emotional and other mental processes
5. Evaluate the achievements of research projects and scientific articles
6. Formulate new research projects to verify the relationship between emotional phenomena and emotional phenomena and other mental processes

General Competencies

2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
Grading

Class activity (max 10 points)
Seminar (max 10 points)
Written exam (max 30 points)

Total grade: Class activity + Seminar + Written exam
excellent (5) 45 – 50
very good (4) 38 – 44
good (3) 31 – 37
acceptable (2) 25 – 30

Week by Week Schedule

1. The concept of emotion and history research
2. Approach to understanding emotions
3. Defining emotion
4. Evolution of emotion
5. Mechanisms of emotion in the brain
6. The development of emotion
7. Individual differences in emotional development
8. Emotions in relationships with other people
9. Functions and effects of emotion in cognition and persuasion
10. Emotions and psychopathology in childhood
11. The role of emotions in adult psychopathology
12. Cultural understanding of emotions
13. Psychotherapy, awareness literature
14. Emotional intelligence
15. Emotional regulation

English for Journalists

Lecturer in Charge

Pred.
Spomenka
Bogdanić

Course Description

To acquire techniques and strategies for reading comprehension related to journalism.

To improve students’ language competence through the study of topic-related literature.

To develop new strategies of learner autonomy.

Course Type

» Communication Sciences (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply acquired skills and strategies for reading comprehension
2. Use authentic materials to further develop their communicative competence
3. Demonstrate the ability to rephrase the acquired topic-related vocabulary.
4. Express autonomously their views and attitudes related to the media, politics and business
5. Apply and integrate the acquired grammatical structures and language skills in writing short structured texts
6. Differentiate between the main styles and registers in quality press and tabloids
7. Compare and contrast different political regimes

General Competencies

Apply and make effective use of the acquired basic concepts related to journalism in the English language. Express themselves clearly and concisely in spoken and written word in the English language with emphasis on English for journalists and public relations. Explain and critically analyse the acquired theoretical and practical information. Make effective use of acquired skills in reporting for the media in the English language.
Grading

Regular attendance and active participation in classes (20%); oral presentation of a topic of choice (10%); work on the course portfolio (30%); final exam (40%).

Week by Week Schedule

1. Introduction to general vocabulary related to print and electronic media.
2. Reading techniques and strategies (skimming and scanning) using authentic materials.
3. Interviews - practising reported speech.
4. Using collocations on different texts of choice related to print and electronic media.
5. Headlines in print media - differences in style by comparing headlines in quality papers and tabloids.
6. Political correctness - contrast and comparison of politically correct vocabulary in foreign and national print media.
7. Expressing moral values in journalism focusing on political topics.
8. Giving opinions on different political regimes.
11. Register transfer in authentic materials.
12. Openings and closings of articles - how to make an opening or closing paragraph more interesting to the reader (a quotation, a reference to a well-known fact, a description, a surprising or bizarre statement, etc.).
13. Writing short structured texts with reference to politics, business and print and electronic media.
14. Writing short structured texts with reference to politics, business and print and electronic media.
15. Vocabulary building through various topic-related authentic materials. Autonomous students' presentations and subsequent discussions.

Literature

Priručnici: Jednojezični rječnik prema izboru

Autentični materijali i tekstovi: članci iz novina i časopisa

Gramatički priručnik prema izboru
Course Description

To enable students to develop their translation techniques using various aspects of elements of culture and civilization in English speaking communities.

To enable students to independently apply the acquired skills and strategies in translating short structured texts from the English language into Croatian and vice versa.

Course Type

» Communication Sciences (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Translate various aspects of culture and civilization in English speaking communities focusing on socio-political terminology
2. Examine and differentiate between parts of language structures.
3. Explain the difference between formal and informal style
4. Use and integrate the acquired language skills and competencies for the purpose of translating correctly on the lexical level (false pairs, collocations and constant linguistic patterns, idioms and phrases).
5. Translate independently short structured texts (headlines, leading articles, reviews, etc.)
6. Develop skills to critically evaluate their own and peer translations in terms of style and accuracy

General Competencies

Apply and make effective use of the acquired basic concepts related to journalism in the English language. Express themselves clearly and concisely in spoken and written word in the English language with emphasis on English for journalists and public relations. Work efficiently both as individuals and as team members. Explain and critically analyse the acquired theoretical and practical information.

Grading

30% regular attendance and active participation; 30% course portfolio; 40% written and oral final exam.
Week by Week Schedule

1. Introduction to translation, style and accuracy.
2. Differences between styles and accuracy on the grammatical and lexical level.
3. Word formation: translating short sentences from English into Croatian and vice versa, focusing on adjectives.
4. Adjectives: differences between infinitive and -ing forms; translation of a text of choice.
8. The role of connectives on the syntactical level, translating short structured texts.
10. False pairs.
11. Formal and informal style; idioms and phrases; register transfer.
12. Translation of political terminology; writing a short article.
13. Stereotypes and prejudices focusing on accents and dialects in English speaking communities vs Croatian.
14. Types of communication, vocabulary building.
15. Describing people and places.

Autentični jezični materijali i tekstovi
Epistemology 1

Lecturer in Charge

Prof. dr. sc. Zvonimir Ćuljak

Course Description

1. Present and explain the most important epistemological concepts, theories and arguments, providing their elementary understanding and correlating,

2. Enable students to analyze the most important epistemological concepts and arguments,

3. Enable students for critical assessment of the major epistemological theories and arguments.

Course Type

» Philosophy (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and analyze the main epistemological concepts (knowledge, epistemic justification, evidence, epistemic reasons, perception, introspection, rational intuition, testimony, a priori / a posteriori
2. Explain, understand and classify the major epistemological theories (realism, anti-realism, empiricism, rationalism, foundationalism, coherentism, contextualism, infinitism, tripartite analysis of knowledge, causal theory of knowledge, reliabilism, defeasibility analysis, conditional theory of knowledge, internalism, externalism, naturalism)
3. Analyze, explicate and assess the most important epistemological arguments (e.g. argument from illusion, time gap arguments, argument from error, Russells hypothesis, Agrippas trilemma, brain-in-a-vat argument, Gettier counterexamples)
4. Describe the correlation between reasoning and inferential justification

General Competencies

Students will be able to: 1. understand and explain the main epistemological concepts with respect to the main logical, metaphysical and semantic problems; 2. understand and explain the major epistemological theories with respect to the related theories in metaphysics, ethics, philosophy of science and philosophy of mind, 3. apply epistemological arguments to the related problems in ethics and philosophy of science.

Grading

On the basis of test results, the quality of the participation in seminar discussion and a seminar paper, and on the basis of the final oral exam.

Week by Week Schedule

1. Introduction: the main epistemological concepts and problems (truth, belief, justification, knowledge)(2+0+2)
2. Perception: kinds of perception; realism and anti-realism - seminar : analysis of arguments for realism, anti-realism and skepticism, (2+0+2)
3. Memory: kinds of memory; realism and anti-realism, memory skepticism; introspection (introspective consciousness): the doctrine of the privileged access; private language argument; testimony: the kinds of testimony: weak and strong individualism; reductionism vs. anti-reductionism - seminar : arguments for memorial and introspective realism, anti-realism and skepticism (2+0+2)
4. Rational intuition (reason): concepts and propositions; analytic and synthetic, necessary and contingent truths; empiricism, rationalism and transcendentalism - seminar : analysis of standard/traditional examples of analytic, necessary and a priori truths; some empiricist arguments against a priori knowledge; arguments against analyticity; arguments for contingent a priori truths, necessary particular truths etc. (2+0+2)
5. Reasoning: deduction, induction, abduction; justification:: inferential and non-inferential; conclusive and inconclusive reasons- seminar : types of deductive, inductive and abductive arguments; the structure and forms of justification (2+0+2)
6. Theories of justification: foundationalism, coherentism, contextualism, infinitism; regressive skepticism - seminar : regress argument (Agrippa’s trilemma): its skeptical and non-skeptical application (2+0+2)
7. Test
8. Tripartite analysis of knowledge; Gettier problem - seminar: test results review; analysis of Gettier's counterexamples and defenses of the tripartite analysis (2+0+2)

9. Theories of knowledge after Gettier: defeasibility analysis, causal theory, conditional theory, theory of conclusive reasons, indicator reliabilism, relevantism - seminar: definitions/analyses of knowledge, arguments (2+0+2)

10. Externalist i naturalist theories of justification and knowledge (process reliabilism, virtue epistemology, proper functionalism, naturalism) - seminar: externalist i naturalist definitions of knowledge and justified belief; arguments (2+0+2)

11. Types of skepticism; the main skeptical arguments; anti-skeptical strategies (common-sense realism, naturalism, externalism, contextualism) - seminar: skeptical arguments i counterarguments (2+0+2)

12. Individual i social epistemology; first-order epistemology and meta-epistemology; normativism i descriptivism - seminar: selected parts of the papers by W. V. O. Quine, A. I. Goldman and F. Schmitt (2+0+2)

13. Domains and kinds of knowledge; special epistemologies: common-sense, scientific, moral and religious knowledge / folk, scientific, moral and religious epistemology - seminar: demarcation criteria for knowledge domains and kinds; arguments for and against the existence of certain domains of knowledge (2+0+2)

14. Test

15. Test results review - concluding discussion (2+0+2)

Literature

Ethics 1

Lecturer in Charge

Izv. prof. dr. sc.
Tomislav
Bracanović

Course Description

Course objectives are to provide students with insight into the basic concepts and problems of ethics and to familiarize them with paradigmatic ethical viewpoints and ways of moral argumentation. The course focuses primarily on problems of ethics, with only periodic digressions into the history of ethics. It consists of lectures and seminars dealing with the following topics: ethics as a philosophical discipline, ethical relativism, theistic ethics, ethical egoism, virtue ethics, deontology, utilitarianism, applied ethics and metaethics. Particular issues to be addressed are the methods of ethics, nature of moral thinking, relationship between facts and values, impartiality, conscientiousness, freedom, autonomy etc. Seminars will be devoted to student presentations on a selection of classical ethical texts.

Course Type

» Philosophy (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 2nd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the essential works and authors from both history of ethics and contemporary ethics
2. Describe the basic ethical theories, concepts and branches (normative ethics, applied ethics and metaethics)
3. Interpret and compare major historical and contemporary approaches to ethics
4. Describe and clearly present the basic ethical problems, viewpoints and arguments
5. Evaluate classical ethical writings and independently read them.

General Competencies

After completing the course, students will be able to: understand and explain the place of ethics within the framework of both history of philosophy and contemporary philosophy; apply ethical knowledge in order to critically assess the contents of similar philosophical courses (e.g. political philosophy, practical ethics); identify similarities and connections between ethical arguments and arguments from other philosophical disciplines; integrate specifically ethical models of reasoning into the general philosophical ability of critical thinking.

Grading

On the basis of (a) regular attendance and active participation in discussions, (b) oral presentation grade and (c) grades of two tests.

Week by Week Schedule

1. Lecture: Ethics as a philosophical discipline (4 hours)
2. Lecture: Theistic ethics (2 hours) / Ethical relativism (2 hours)
3. Lecture: Ethical egoism (2 hours) / Utilitarianism (2 hours)
4. Lecture: Utilitarianism (2 hours) / Utilitarianism (2 hours)
5. Lecture: Deontology (2 hours) / Deontology (2 hours)
6. Lecture: Deontology (2 hours) / Virtue theory (2 hours)
7. Test / Seminar: Nagel, Rachels and Benedict (2 hours)
8. Seminar: Mortimer and Russell (2 hours) / Seminar: Hobbes and Rawls (2 hours)
9. Seminar: Kant (2 hours) / Seminar: Kant (2 hours)
10. Seminar: Kant (2 hours) / Seminar: Bentham and Mill (2 hours)
11. Seminar: Mill (2 hours) / Seminar: Mill (2 hours)
12. Seminar: Aristotle (2 hours) / Seminar: Aristotle (2 hours)
13. Seminar: MacIntyre and Slote (2 hours) / Seminar: Thomson and Rachels (2 hours)
14. Seminar: Singer and Harris (2 hours) / Seminar: Moore and Mackie (2 hours)
15. Test / Closing discussion

Literature

Tomislav Bracanović (prir.) (2011). Etika 1: Radni materijali
Ethics in Journalism

Lecturer in Charge

Izv. prof. dr. sc. Danijel Labaš

Course Description

The main objective of this course is to provide insight into the basic knowledge about journalism and media ethics, with special emphasis on its practical application in daily journalism and media work. The specific objective of this course is to prepare the students to understand journalism ethics as a practical philosophical discipline that deals with the specific morals and deontology of the profession, which must take into account the ethical codes and legal regulations which govern the journalistic and media profession, and which the students will have to adhere to themselves in journalistic practice.

Course Type

» Communication Sciences (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Communication Sciences (Study) (required course, 4th semester, 2nd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare historical and contemporary ethical directions and principles of journalism and media professional ethics;
2. Explain and apply the basic universal principles, and concepts like morality, ethics, professional ethics and deontology of journalism and the media;
3. Explain the importance of knowing and respecting ethical and legal standards in as a public service profession;
4. Describe and explain the various ethical codes of journalism in the world;
5. Analyze and interpret the ethical and legal requirements which the print media, radio, television, new media, promotional activities and public relations in Croatia and abroad must adhere to;
6. Use the acquired knowledge about different ethical approaches to mass media;
7. Evaluate the quality of contemporary media from the ethical and moral standpoint;
8. Critically analyze media content from the moral standpoint;
9. Explain the reasons why it is necessary for every future communicologist to know journalism and media ethics.

General Competencies

The students will become familiar with the basic moral, ethical and legal principles, with a variety of traditional and contemporary ethical directions, especially with deontology of journalism and professional media ethics. The course will enable them to critically analyze and clearly distinguish truthful, objective and fair reporting on the events of public interest from the journalistic and media activity that is false, sensationalistic, scandal prone, morally unacceptable and legally punishable.

The students will be able support with arguments the reasons why some journalistic work is ethically acceptable, and why some is not, and in this sense they will be able to critically analyze all types of media: print, radio, television and new media. They will acquire this competence by working on a common blog, where, together with all the participants of the course they will acquire and develop skills of critical consideration, presentation and analysis of the journalism and media ethics.

Grading

5 % lecture attendance, 5 % discussion participation, 10 % work on the blog, 20 % seminar work, 60 % preliminary exams and/or final exam.

Week by Week Schedule

1. Anthropological-philosophical foundation of communication: interpersonal communication and social communication; subject, its veracity and morality/ethics in communication;
2. Philosophical ethics: definition of ethics; from Aristotle to the present day; Kant: morality from reason; paradigm: Sartre-Heidegger-Marcel/Levinas; contemporary ethical directions;
3. Deontology of journalism: term and definition;
4. Social communication ethics: foundation of the communication ethics; goals and standards of social communication ethics, journalism and media ethics;
5. Doctrinal content of journalism ethics: truth, objectivity, information source, professional secret, right of privacy, correction, professional integrity, copyright and plagiarism, the prohibition of war propaganda, promotion of democracy and peace;
6. Media ethics: ethics of the press; radio ethics; television ethics;
7. Ethics in advertising/promotion; ethics in the cinema/on film; ethics of public relations/spokesmanship, the new media (Internet - Facebook) - a new morality?;
8. Self-regulation and regulation of journalists: journalistic codes: differences between regulatory and self-regulatory acts; Code of Honour of Croatian Journalists (2009);
9. International journalistic codes: Declaration of Principles on the Conduct of Journalists; Munich Declaration, UNESCO International Principles of Professional Ethics in Journalism; Danish code of professional conduct; Journalistic Code of the Voice of America;
10. International journalistic codes: Declaration of Principles on the Conduct of Journalists; Munich Declaration, UNESCO International Principles of Professional Ethics in Journalism; Danish code of professional conduct; Journalistic Code of the Voice of America;

11. Introduction to law: international documents on human rights;

12. Right to privacy: protection of dignity, reputation and honor;

13. Protection of children in the media;

14. The right of access to information, the right of reply and correction;

15. The responsibility of the recipient - the view from the other side: the Decalogue of the Italian advisory council of media users.

Ethics in Psychology

Lecturer in Charge

Prof. dr. sc. Jasminka Despot Lučanin

Course Description

The aim of the course is to introduce the students into the ethical principles, dilemmas and approaches to psychology as a profession, and to other professions. Students will acquire knowledge on basic theoretical approaches, ethical principles, the process of ethical decision making, meta-codes and codes of ethics. Students will learn about ethical aspects of psychological research, with special emphasis on research with children. This course should enable the students to acquire basic knowledge on ethical principles, as well as ensure ethical approach to their profession, and their future practice.

Course Type

» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (required course, 5th semester, 3rd year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concepts of ethics, morals and values, as well as theoretical schools in ethics.
2. Differentiate the basic ethical principles.
3. Analyze the approaches of professional ethics and general principles of psychological ethics.
5. Demonstrate, individually and in group, the analysis of ethical dilemmas in professional work with people.
6. Apply the ethical principles to different fields of professional practice (clinical, educational, organizational, etc.)

General Competencies

8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.
14. Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.
18. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Grading

Students' achievement is continually evaluated through certain activities. A student can achieve a maximum of 50 points according to following arrangement: 10 points for regular class attendance, 20 points for group task presentation, and 20 points for end term test OR written exam. Points are turned into final grade as follows: 30-34 points = pass (2); 35-40 points = good (3); 41-46 points = very good (4); 47-50 points = excellent (5).

Week by Week Schedule

1. Introduction to psychological ethics.
2. History review: Moral principles and ethics.
3. Theoretical approaches and general ethical principles. Interdependence of the four principles.
4. Professional ethics, ethics in the helping professions - fundamental principles of the psychological ethics: respect for a person's rights and dignity, competency, responsibility, integrity.
5. Demonstration of ethical standards and and comparison of codes of ethics: Croatian Psychological Chamber, American Psychological Association, European Federation of Psychological Associations.
6. Standards of ethical behaviour, ethical issues, ethical decision making, risk vs. gain relationship.
8. Ethics in psychological research: Deception in Milgram's obedience study.
10. Ethics in psychological research with children: from Pavlov, and Watson, and on. Ethical code and ethical issues.
11. Ethics in psychological research on the Internet.
12. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
13. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
14. Application of ethical principles in different fields of psychological practice: clinical, educational, organizational, etc.
15. Conclusion: What have we learned?
Literature

Evolutionary psychology

Lecturer in Charge

Doc. dr. sc.
Ivana Hromatko

Course Description

Identification and understanding of basic principles of evolutionary theory and its implications in explaining a wide range of different human behaviors. Students shall be able to analyze and interpret behavior in terms of its function and adaptivity as well as to understand that behavior, much like our organs, is an evolved answer to selection pressures.

Course Type

» Psychology (Study) (elective courses, 1st semester, 1st year)
» Psychology (Study) (elective courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the basic principles of evolutionary theory;
2. Describe the functionalistic approach to human behavior analysis;
3. Analyze the selection pressures which could have shaped certain behaviors throughout our evolutionary history; and
4. Argue why can a certain behavior be considered an adaptation or its by-product.

Grading

Students activity and participation in discussions shall be evaluated throughout the semester, but the overall grade shall mostly be determined by the final exam.

Week by Week Schedule

3. Testing the evolutionary hypotheses. Proximal and ultimate mechanisms. Evolutionary approach in different fields of psychology.
4. Testing the evolutionary hypotheses. Proximal and ultimate mechanisms. Evolutionary approach in different fields of psychology.
5. What is an adaptive design? Psychological or mental mechanisms? Problems of survival: food acquisition and selection, shelter and landscape preferences, predators and other environmental dangers.

11. Living with others: sharing and reciprocity. Food sharing among hunter-gatherers. Are humans innately selfish?

15. Evolution of culture.

**Literature**

Exact Sciences in Croatian Culture

Lecturer in Charge

Prof. dr. sc.
Stipe Kutleša

Course Description

Course objectives are to acquire the knowledge about development of exact sciences in the Croatian history and put that development in context of European science. It is important to consider the scientific achievements as a part of culture. In this sense an integral sight of the cultural heritage of one nation is offered to the students. The aim is also to stimulate curiosity in this area of research.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (required course, 6th semester, 3rd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe most important information about status of science in worlds scale.
2. Describe the knowledge about the development of the exact sciences in Croatian history.
3. Compare the development of science in the Croatian history and in present time with those in Europe and in the world.
4. Describe critically some periods, scientists and solution of some scientific problems.
5. Apply acquired knowledge.
6. Analyze and encourage to furthering their own research in this area.
General Competencies

History of science is a part of culture, therefore the acquired knowledge offer an integral sight into significance of science and understanding of worlds and national science in context of general culture.

Grading

Evaluation of the: seminars, tests, written and oral exams.

Week by Week Schedule

1. About science and its significance in culture.
2. European science in ancient times and in the Middle Ages.
3. The beginnings of the Croatian science - Hermann Dalmatian.
4. Other Croatian scientists in the Middle Ages.
5. The beginnings of European science in the New Age.
6. The Croatian science in the beginning of New Age.
7. The role od scientist from Dubrovnik in the development of Croatian and European science.
8. Roger Boscoovich and his scientific achievements.
9. Other Croatian scientists in the 18th century.
10. Science in Croats in the 19th century.
11. The scientific institutions in Croatia in the 19th century.
12. Scientific terminology and the science written in Croatian language.
13. Science at the crossing between the 19th and 20th century.
15. Science in the second half of the 20th century.

Experimental Methods

Lecturer in Charge

Prof. dr. sc.
Goran Milas

Course Description

The main objectives of the course are to introduce students to the basics of the experimental methodology and the different modalities of its use. Through lectures, students will get to know the basics of the experimental methodology, the reasons for its use, and basic designs through which it is applied. Students will also be acquainted with the way of conceiving experimental research and writing a report or research paper based on it.

Course Type

Psychology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the experimental designs and different modalities of their use
   - Analyze the different segments of experimental research approaches
   - Evaluate the experimental studies - Apply experimental designs in their own research - Create the research that will make advantage of the experimental design
2. Analyze the different segments of experimental research approaches
3. Evaluate the experimental studies
4. Apply experimental designs in their own research
5. Create the research that will make advantage of the experimental design

General Competencies

Critically assess scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.
Critically assess scientific and professional papers in the field of humanities, social sciences and biomedicine.
Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

Grading

Colloquia, seminars, attendance and oral exam.
Week by Week Schedule

1. Introductory remarks
2. The variables in the experiment
3. Control and validity
4. The validity of the statistical conclusions
5. Threats to statistical conclusion validity
6. Internal validity
7. Construct and external validity
8. Group design I: the control group and the assignment of respondents
9. Group design II: Types of group designs
10. The within subjects designs
11. Mixed design
12. The choice of the design, the design as a way to control the variance
13. Artifact in the experiment
14. Statistical analysis of the experiment I: simple ANOVA
15. Statistical analysis of experiment II complex ANOVA

Literature

Film and Religion

Lecturer in Charge

Izv. prof. dr. sc. Danijel Labaš

Course Description

The main goal of this course is to provide an insight into the basic theological knowledge and expertise in the field of film as an art form. The specific objective of this course is to enable students to understand the influence that the religious themes have had on the film industry, but also the desire of the film industry to answer some fundamental questions about the meaning of existence and life by means of religious themes. Another specific objective of the course is to teach students to recognize the explicitly and the implicitly religious in the film, and finally to write a film review and criticism on films that will be analysed.

Course Type

- Communication Sciences (Dual-major studies Study) (elective courses, 4th semester, 2nd year)
- Communication Sciences (Study) (elective courses, 2nd semester, 1st year)
- Communication Sciences (Study) (elective courses, 4th semester, 2nd year)
- Communication Sciences (Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare the basic theological concepts and themes that appear in the film,
2. Classify basic film genres and sub-genres
3. Justify the importance of knowing the theological themes present in the film for the contemporary society,
4. Describe and explain different approaches to film,
5. Analyze and interpret various approaches to film criticism,
6. Apply the acquired knowledge in writing film reviews and criticism,
7. Evaluate contemporary film with religious themes,
8. Write a competent criticism or review of the film with the implicit or explicit theme.

General Competencies

Apply the knowledge of the basic concepts of communication sciences associated with film. Identify and describe the role and the place of religious film in the society. Reproduce, apply and explain the basic theory related to the religious film and the theological understanding of the film. Name and explain key events and people from the history of religious film.
Grading

5% - class attendance, 5% - taking part in discussions, 10% - work on the blog, 30% - preparing essays, 50% - preparing film reviews / criticism.

Week by Week Schedule

1. Introductory lecture, layout of the course, overview of the bibliography and students' obligations
2. The film analysis. Different methodological approaches to film: semiotics, psychology, sociology of the film;
3. Different approaches to film criticism: film criticism and the evaluation of films. Theological approach to film criticism;
4. Quiet quest for the religious one behind (Star Wars I-VI: God as a spiritual question; God as a field of energy; the riddle of the universe)
5. Fairy tales for a "starving audience": the difference between magic and religion (The Lord of the Rings I-III);
6. Signs that there is someone up there? The theological semiotics (Signs); Religious experience: coveted dreams or arguments that there is God, that God exists? (Contact);
7. The issue of the death penalty (Dead Man Waling);
8. Life after death? (Dragonfly);
9. God allows evil in the world? (Signs, Star Wars I III);
10. Miracles? (The Green Mile, The Third Miracle);
11. Redemption? (The Matrix, Matrix Reloaded, Matrix Revolutions);
12. The issues of contemporary bioethics, euthanasia (Život je more, Mar adentro);
13. Respecting the others (Ottavo giorno, Yo tambien);
14. Exorcism: is demonic possession possible? (Exorcism, Stigmata, The Rite)

PETERLIĆ, A. (2001). Osnove teorije filma, Hrvatska sveučilišna naklada, Zagreb

Forms of Communication in Journalism

Lecturer in Charge

Izv. prof. dr. sc.
Nada Zgrablić
Rotar

Course Description

The aim of the course is to create in students the routine of writing and conducting objective journalistic news, reports and interviews, and teach them how to recognize events worth of publication, the method of acquisition of information and process of making an information a news story or report.

Course Type

» Communication Sciences (Dual-major studies Study) (required course, 2nd semester, 1st year)
» Communication Sciences (Study) (required course, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate knowledge functioning of the media / editorial board.
2. Identify and write the required journalistic forms.
3. Demonstrate the ability to independently monitor course of events.
4. Demonstrate the skills of independent collection and processing of information.
5. Demonstrate the skills of independent news writing, reporting and interviewing.
Grading

Attendance and participation in exercises (30 percent), independent practical work (50 percent), oral exam (20 percent).

Week by Week Schedule

1. From events to the news, communication channels, making newspapers,
2. Working in editorial board, desk, sources of information,
3. Introduction to the objective journalist forms,
4. Quality news / flaws in news reports,
5. Types of news,
6. Ways of writing a news,
7. Flash news,
8. Standard news,
9. News in a row, news on the occasion,
10. Selective listening and reading,
11. Field reporting,
12. Shortening the text, quotes and citations,
13. Embargo, state secret - correction,
14. Rule of inverted pyramid - writing the headline,
15. Expanded news.

Literature

The Missouri Group (2010). News Reporting and Writing, New York: School of Journalism University of Missouri, Columbia
Fundamental Problems of Philosophy

Lecturer in Charge

Izv. prof. dr. sc.
Tomislav
Bracanović

Course Description

The objective of the course is to introduce students to some basic problems in philosophy (e.g. the problem of knowledge, the body-mind problem, the problem of language and meaning, and the problem of God’s existence), and to demonstrate the appropriate way of reading and analysing philosophical texts (of authors such as Bertrand Russell, Rene Descartes, George Berkeley, Gilbert Ryle, Edmund Gettier, Willard V. O. Quine, John Locke and others), and to show them how to argue in philosophical discussions.

Course Type

» Philosophy (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and explain some of the central philosophical problems and theories
2. Construct and set forth a number of significant philosophical arguments, and to explain their importance
3. Compare various competing views related to problems discussed during the course
4. Evaluate such views, as well as a number of arguments proposed as their support

**General Competencies**

After they pass the exam, (1) the students will be able to understand a number of basic philosophical problems, and they will see what does it mean to do philosophy, (2) they will be able to independently read and analyze less demanding philosophical texts, (3) they will be able to apply the knowledge the course provides to future philosophical courses.

**Grading**

Seminar essay 15% of the final grade, written exam 50% of the final grade, oral exam 35 of the final grade.

**Week by Week Schedule**

1. Introduction
2. Knowledge and the external world: the common-sense realism and the reliability of the senses (I)
3. Knowledge and the external world: the common-sense realism and the reliability of the senses (II)
4. The classical sceptical arguments
5. Descartes methodological scepticism
6. Berkeley’s refutation of materialism
7. The refutation of idealism (Russell)
8. Mind and body: the Cartesian dualism
9. Refutation of dualism
10. Descartes two arguments for God’s existence
11. Hume’s criticism of miracles
12. The philosophical problem of language
13. Locke’s conception of language and meaning
14. Wittgenstein’s criticism of Augustinian conception of language
15. The closing discussion

**Literature**

Simon Blackburn (2002). *Poziv na misao: Poticajni uvod u filozofiju*, AGM: Zagreb

Osnovni problemi filozofije: zbirka izvornih tekstova, Dostupno u knjižnici i kopiraonic Hrvatskih studija.
Fundamentals of Cellular Biology and Genetics

Lecturer in Charge

Prof. dr. sc.
Zdravko Petanjek

Course Description

The general objectives of the course are to learn of the role of genetic factors in the normal behavior and in the event of occurrence of mental illnesses and to understand the basic principles of cellular organization of the central nervous system. Specific objectives are elaborated according to the topics of teaching.

Course Type

Psychology (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic parts of the cell,
2. Explain the principles of translation and transcription, the role of proteins in cellular processes,
3. Explain the principles of inheritance, the methods of regulation of gene expression,
4. Apply the acquired knowledge to understanding the mechanisms of emergence and inheritance of hereditary diseases and disorders,
5. Use e-web materials in the field of cell biology and genetics in the preparation of presentations,
6. Develop a tree of inheritance of different genetic disorders (autosomal dominant-recessive, sex-linked),
7. Analyze the reviewed scientific articles in the field of mental disorder genetics,
8. Explain and present the role of genetic factors in behavior, especially in the development of mental disorders and abnormal behavior,
9. Identify the basic parts of the central nervous system at the microscopic level,
10. Identify the basic parts of neurons and types of glial cells.

ECTS Credits 3.0
English Level 1.1
E-learning Level 1.1
Study Hours 30
15
General Competencies

Preparing the students to more easily master the subject matter in the area of biological psychology by expanding their knowledge of cellular biology and genetics and the cellular organization of the central nervous system. Developing a critical approach to the understanding of the relationship of genetic determination and the environmental psycho-social factors in shaping of the phenotype.

3. Determine the biological and neurobiological bases of mental processes and behavior.

5. Critically assessing the theoretical approaches to the study of individual differences.

Grading

Class activity - 10%, two preliminary exams - 60%, independent seminar assignment - 20%, written knowledge assessment - 10%.

Week by Week Schedule

1. The development of molecular biology methods and impact on the development of psychology as a profession. Cell structure: introduction to the basic structure and function of cell parts: nucleus, cytoplasm, cell membrane, ribosomes, endoplasmic reticulum, mitochondria, lysosomes, Golgi apparatus.

3. Krebs cycle and energy production: introduction to the basic principle of oxidative cycle (citric acid cycle), and the forms and ways of creating and storing energy. The role of phosphorylation in cellular neural signaling.

4. Amino acids: introduction to the basic types and chemical structure of amino acids, proteins - chemical structure of proteins and conformational states. The role of proteins in the body.

5. From the nucleic acid to the chromosome 1: understanding the structure of nucleic acids and their multiplication. From the nucleic acid to the chromosome 2: packaging of nucleic acid within the chromosome, histones, coding and non-coding regions.

7. DNA replication and repair. The cell cycle and cell division - cycles and mechanisms of mitosis.

8. Mitosis and meiosis: introduce the main differences between mitosis and meiosis, spermatogenesis, oogenesis. The relationship of genotype and phenotype: understanding the concept of gene and allele.

11. The difference between monogenetic and polygenic disorders, methylation as a mechanism of gene expression. (The role of genes in the pathology of the Huntington's and Alzheimer's diseases, the role of genes in the pathology of schizophrenia and manic-depressive psychosis - exploring the basic clinical picture, a critical evaluation of the hypotheses about the role of genes and/or environmental factors in the development of these disorders. The role of genes in the pathology of mental and neurological disorders. (The influence of environmental factors during brain development in individuals with a hereditary predisposition to develop psychological and neurological disorders, and the possibility of reducing the incidence of these disorders. The role of genes in the pathology of autism and epilepsy - exploring the basic clinical picture, a critical evaluation of the hypotheses about the role of genes and/or environmental factors in the development of these disorders.)

12. Gene expression and the theory of evolution of human brain. The role of genes in the normal development and the environmental impact on the expression. The structure of cell membranes; receptors and ion channels. Signaling mechanisms between the cells, types of ion channels, receptor-ion channel, membrane and cytoplasmic receptors.

13. The cell structure of the nervous system: morphological and functional properties of different types of neurons and glial cells. Signaling mechanisms. Synaptic mechanisms.

Fundamentals of Market Research

Lecturer in Charge

Doc. dr. sc.
Ivan Burić

Course Description

The aim of the course is to teach students the application and methods of the market oriented and advertising research. To introduce to them the basic terms and concepts of market and advertising together with the main research methods in the field. To train them on how to carry out main tasks and duties of market researchers.

Course Type

» Sociology (Study) (elective courses 1., 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, classify and explain concept of the market in classical sociology.
2. Apply sociological models and methods for the purpose of market and advertising research.
3. Demonstrate process of market research with its basic division on exploratory, descriptive and causal research.
4. Contrast primary and secondary data and their sources.
5. Define and explain application of the market research.

General Competencies

Upon successfully passed exam, students will be able to:
Design a simple research project.
Use the computer software for the analyses qualitative data.
Develop the research question related to the subject/process/phenomenon of social interest.
Use different social sciences methods in the analyses of the relevant data.
Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects from any possible harm.

Grading

Obligatory class attendance and discussion; final written exam.

Week by Week Schedule

1. Introduction: sociologist as market researcher
2. Defining market in classical sociology
3. Market, market society and the process of marketization
4. Process of commodification
5. Application of sociological models and methods in market and advertising research
6. Basic concepts of advertising
7. Process of market research
8. Exploratory, descriptive and causal research
9. Primary and secondary data
10. Application of market research
11. Analysis of examples of qualitative research 1. part
12. Analysis of examples of qualitative research 2. part
13. Analysis of examples of quantitative research 1. part
14. Analysis of examples of quantitative research 2. part
15. Repetitions, preparations for the exam

Literature

Course Description

The goal of the course is to acquaint the students with the basic theoretical foundations of feminism and human rights of women, feminist critique of (liberal) human rights theories and practice, as well as with international and national mechanisms of the protection of the human rights of women and the typical violations of the human rights of women. The goal is also to develop the students’ ability to critically analyse and evaluate the controversial questions of the theory and practice of feminism and human rights of women.

Course Type

- Sociology (Study) (elective courses (2), 2nd semester, 1st year)
- Sociology (Study) (elective courses (2), 4th semester, 2nd year)
- Sociology (Study) (elective courses (2), 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the concept of the human rights of women
2. Explain different feminist perspectives
3. Identify and explain different forms of violations of the human rights of women
4. Distinguish between and critically discuss the different feminist standpoints
5. Distinguish between and critically discuss different concepts of gender equality
6. Explain basic theoretical concepts of feminism and human rights of women
7. Identify and analyse violations of human rights of women in practice, their causes and consequences
8. Evaluate different policies and practices of the protection and the promotion of women's rights
9. Apply innovative solutions to the problems in theory and practice of women's human rights and reconstruct traditional canon of human rights

General Competencies

Use the general knowledge of society and of social processes.
Explain the initial assumptions of the different political, religious and cultural orientations.
Conform to a team work with co-workers from various disciplines, of different attitudes and value orientations.
Plan own engagement in resolving of the various social issues.
Explain the key structural factors that are shaping society.
Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.
Explain the origin of social problems and conflicts while bearing in mind the ways in which the social order is maintained.

Grading

Active participation in class: 10%, oral exam: 20%, essay: 70%.
Week by Week Schedule

1. Introduction: Basic concepts of feminism and controversies in theory and practice
2. Feminist theories
3. Feminist critique of human rights
4. Multiculturalism and the universality of human rights (of women)
5. International system of the protection of the human rights of women
6. The UN Convention on the Elimination of All Forms of Discrimination against Women
7. Jurisprudence of the European Court of Human Rights
8. Protection of women's rights in Croatia
9. Feminist activism
10. Discrimination at work and in access to social services
11. Violence against women
12. Reproductive rights
13. Students' presentations
14. Hypothetical case (Moot Court)
15. Evaluation

Literature

C. Smart (1989). Feminism and the Power of Law, Routledge
General Psychopathology

Lecturers in Charge

Doc. dr. sc. Renata Glavak Tkalić
Prof. dr. sc. Slavko Sakoman

Course Description

To acquaint the students with characteristics of psychological disorders; epidemiology, diagnosis, and classification of mental disorders. To understand the basic notions in general psychopathology. To acquaint with the application of research methods in the study of abnormal psychology. To understand the methods of clinical assessment and methods of communicating with patients with mental health disorder.

Course Type

» Psychology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define general psychopathological conditions
2. Differentiate and describe the basic notions related to mental disorders
3. Classify psychological disorders into categories
4. Identify the terms of psychopathological epidemiology
5. Design the hypothesis within different theoretical approaches in psychopathology
6. Explain the specifics of different research methods in psychopathology
7. Plan research in the field of psychopathology
8. Apply the principle of confidentiality in the relationship between psychologist and patient
9. Apply knowledge on conducting clinical interviews
10. Support the application of ethical standards in the work with patients

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
Assess the mental status and classify the different diagnostic criteria for mental disorders.
Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.
Grading

Participation in class - 10%;
Seminar essay and its oral presentation - 20%;
Clinical interview - 10%;
First test - 30%;
Second test - 30%.
If a student does not take tests or achieve unsatisfactory result on one or both tests, student will take written exam that corresponds the tests by its scope, content and the ECTS.

Week by Week Schedule

1. Introductory lecture, history of psychopathology
2. Classification and diagnosis, the importance of classification
3. Paradigms in psychopathology and therapy
5. Disorders of consciousness, disorders of attention
6. Disorders of memory and learning, disorders of intelligence
7. Affective disorders
8. Thought disorders
9. Disorders of morality
10. Disorders of perception
11. Disorders of volition
12. Disorders of self-awareness
13. Impulse disorders
14. Psychomotor disorders
15. Disorders of orientation

Literature

Geographical Features of Croatia

Lecturer in Charge
Izv. prof. dr. sc. Nenad Pokos

Course Description
Getting to know the basics of geography of Croatia. Creating the positive and creative way of thinking and understanding the physical-geographic and human-geographic processes.

Course Type
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (required course, 5th semester, 3rd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Show the spatial impact of certain processes.
2. Analyze the population distribution and population development.
3. Explain the economic and political connections between Croatia, Europe and World (the role of Croatia in European and World integrations).
4. Explain and apply the geographic knowledge of Croatia.

General Competencies
Forming the geographic way of thinking and demonstration of spatial impact of certain processes.
Grading

Lecture attendance 10%;
First test 45%;
Second test 45%.

Week by Week Schedule

1. Size, geographic location and symbols (flag and coat of arms of Croatia), territorial and administrative division of Croatia.
2. Relief of Croatia, karst, mountains, karst fields (karst polje), caves.
3. Climate of Croatia (temperature, precipitation, climate regionalization...) Vegetation in Croatia.
4. Inland waters (rivers, lakes, swamps).
5. Adriatic sea (creation, salinity, sea currents, winds, bays, isles).
6. Nature protection (national parks, parks of nature, strict reservations, special reservations).
7. Protected cultural heritage. Cultural heritage on UNESCO World Heritage List and on Tentative list. Traditional architecture.
8. Test.
10. Population of Croatia II (demographic structures age, sex, national, religious).
11. Urbanization of Croatia.
12. Traffic in Croatia (road traffic, railways, river traffic).
13. Economy of Croatia (agriculture, fishing, industry, mining, energetics).
14. Tourism of Croatia (tourist centres, religious tourism, health tourism).
15. Regionalization of Croatia.

Greek

Lecturer in Charge

Prof. dr. sc.
Josip Talanga

Course Description

Course objectives are to (1) familiarize students with basic grammatical forms of classical Greek; (2) introduce them to classical Greek philosophical terminology; (3) explain to them the influence of the ancient Greek philosophical terminology on Latin and Croatian terminology; (4) enable them to compare philosophical terminology in classical Greek, Latin, Croatian, English and German.

Course Type

» Philosophy (Dual-major studies Study) (latin or greek, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic grammatical form and structure of ancient Greek sentence
2. Analyze elementary philosophical sentences in Greek
3. Explain and explain the basic philosophical terminology in ancient Greek
4. Recognize the development of philosophical problems exemplified by the development of philosophical terminology in ancient Greek, Latin, Croatian and other languages
5. Identify the crucial concepts of philosophers who wrote in classical Greek
6. Demonstrate the linguistic and substantial influence of ancient terminology on Croatian scientific terminology
7. Explain the importance of Aristotle’s terminology for conceptual analysis and later development of scholastic method, exemplified by ancient Greek philosophical texts

General Competencies

After completing the course, students will be able to: (1) explain the basic philosophical concepts in the context of their linguistic origin; (2) analyze philosophical terminology within particular branches of philosophy in comparison to classical philosophical tradition; (3) recognize and evaluate the background meaning of philosophical terms in Croatian, Classical Greek and Latin language.

Grading

On the basis of regular attendance and active participation in classes, homework exercises, control tests and final tests.
Week by Week Schedule

1. Second declension; present active (first conjugation), auxiliary verb einai. Sentences for translation into Croatian (1-13).
2. Accents; enditics; proclitics: spiritus asper; spiritus lenis; compounds; placement of the spiritus. Greek Sentences for translation into Croatian (1-17 + 1-22).
3. First declension; second and first declension adjectives; mediopassive present; future; Greek questions. Translating from Greek (1-25 + 1-12).
4. Inflection of adjectives; the imperfect of auxiliary verb einai. Sentences for grammar repetition (1-13 + 1-26).
5. Exercises for repetition and preparation for the test. Sentences for translation into the Greek (1-5).
6. Consonant declension; the imperfect. Greek Sentences for translation into Croatian (1-26).
7. Comparison of adjectives and adverbs; sigmatic aorist. Greek Sentences for translation into Croatian (1-13).
8. Forms of the adjective pas; perfect and past perfect; augment; reduplication. Translation from Greek (1-8 +1-11).
9. Personal, reflexive and possessive pronouns. Greek Sentences for translation into Croatian (1-13); Exercises for repetition.
10. Demonstrative, relative, indefinite and interrogative pronouns; imperative. Sentences for translation (1-12); repetition for the test.
11. Numbers; participles and infinitives. Greek Sentences for translation into Croatian (1-5 + 1-25).
15. A selection from Aristotle’s Analytica priora and Analytica posteriora.

Literature

Stjepan Senc (1910). Grčko-hrvatski rječnik, Zagreb
Greek drama

Lecturer in Charge
Doc. dr. sc. Maja Matasović

Course Description
The goal of this course is to introduce students to the world of Greek drama: where and how it began (including the account in Aristotle's Poetics), what were the rules of its composition, who are the most important poets and what are the most notable works. There will be talk of tragedy, comedy and the satyr play. Tragedy will be discussed through the works of Aeschylus, Sophocles and Euripides, comedy through Aristophanes and Menander, while the satyr play will be read in more famous fragments. Students will be acquainted with these works by text examples read during the class, as well as obligatory readings. Obligations of the students include: regular attendance, preparation and discussion of selected texts and passing the exam after the semester has finished.

Course Type
» Latin language (Dual-major studies Study) (elective courses, 2nd semester, 1st year)
» Latin language (Dual-major studies Study) (elective courses, 4th semester, 2nd year)
» Latin language (Dual-major studies Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Indicate the authors of dramatic works in Greek literature
2. Relate the basic informations of the authors’ lives and conditions in which they have created their works.
3. Compare the linguistic and stylistic differences between tragic and comic texts, as well as differences between the works of the same kind in different periods of time.
4. Analyse the Greek dramatic works, in understanding of the Greek world view.
5. Describe the characteristics in style of various authors.
6. Explain the similarities and differences to today's understanding of drama and dramatic.
7. Indicate the actual importance of drama in today's world.
General Competencies

Students will be able to compare the dramatic works of Greek authors with the ones written in Rome. They will be able to describe the characteristics of these works (tragedy, comedy and the satyr plays). They will be able to analyse the development of the Roman dramatic literature while taking into account the level of development of Greek drama in the given period. They will be able to compose the scientific works regarding both Greek and Roman drama, to recognise Greek elements in the dramatic Roman texts, to understand the references to Greek drama and its authors which can be found in abundance in the Roman literature.

Grading

During the course of semester regular attendance is valued, as well as participation in discussing the selected texts. On the final exam the acquired knowledge is tested in writing and orally.

Week by Week Schedule

1. Introductory class on Greek drama: tragedy, comedy and satyr play. We shall speak of the common characteristics of these genres, of the cult of Dionysus and the origins of tragedy and comedy.

2. Theatre in ancient Greece: the situations in which drama is performed (the festivals of Dionysus), schedule of performing, the audience that attends the shows (accompanied by text examples).

3. Rules of Greek theatre: the layout of the theatre, the "taboos" of the stage, the conventions of performance, the aids used (parabasis, ekkykλêma, m êkhanê); accompanied by text examples.

4. Actors in Greek drama: masks, costumes, choruses; accompanied by text examples and the pictures of Ancient Greek vases. We discuss especially the problems of the number of actors in tragedy and comedy.

5. Characteristics of Greek tragedy, according to Aristotle's definition of tragedy in the Poetics. We mention the most important authors, characteristics of the plot and parts of a tragedy (accompanied by text examples).

6. Aeschylus: the first of the Great Three writers of tragedy and the author of the only surviving trilogy; his life and works, themes of the surviving plays and main style features (accompanied by text examples).

7. Sophocles: the second and allegedly most "classical" of the Great Three Greek tragic poets; his life and works, themes of the surviving plays and main style features (accompanied by text examples).

8. Euripides: the third and allegedly most tragic of the Great Three Greek tragic poets; his life and works, themes of the surviving plays and main style features (accompanied by text examples).

9. Satyr play: its origin, characteristics and relation to tragedy. We recount the surviving fragments of these works (accompanied by text examples).

10. Characteristics of Greek comedy, according to Aristotle's definition of tragedy in the Poetics, and the differences between Attic and Sicilian comedy. We mention the periods of development, most important authors, characteristics of the plot and language, as well as parts of a comedy (accompanied by text examples).

11. Aristophanes: the main representative of the Old Comedy; his life and works, themes of the surviving plays and main style features (accompanied by text examples).

12. Menander: the main representative of the New comedy; his life and works, themes of the surviving plays and main style features (accompanied by text examples).
13. Hellenistic period: the most important authors and works of the time and the popularity of theatre across the Greek world. We analyse the origin of drama in Rome and compare the works of Greek and Roman authors.

14. Drama in action: recreating the parts of a certain Greek drama while dealing with the practical problems of stage-action.

15. Summation class: review of the data acquired during the semester and resolving certain problems (according to the students’ needs.)

Greek Influence on Roman Culture

Lecturer in Charge

Doc. dr. sc. Maja Matasović

Course Description

The goal of this course is to introduce students to the everyday world of the Romans. That allows them to understand the Roman literature more completely. Also, it gives them insight to the influence that the Greek culture exerted on the Roman, extremely profoundly in almost every aspect of life. Students will be acquainted with these influences through the lectures as well as by text examples read during the class. Obligations of the students include: regular attendance, preparation and discussion of selected texts and passing the exam after the semester has finished.

Course Type

- Latin language (Dual-major studies Study) (elective courses, 1st semester, 1st year)
- Latin language (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
- Latin language (Dual-major studies Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish the original Roman aspects from the Greek influence in the everyday life of Romans.
2. Describe a day in a life of a certain Roman class (senator, slave, woman...).
3. Indicate the areas of most profound influence of Greek culture upon the Roman.
4. Describe the functions, characteristics and specialties of a certain aspects of a Roman life (army, senate).
5. Identify the Greek terms and transcribe from alphabet to Latin script and vice versa.
6. Explain the importance of Greek culture in the development of the Western civilisation.

ECTS Information Package for Academic Year 2013/2014

Course Catalogue – Undergraduate Study

University of Zagreb Centre for Croatian Studies
General Competencies

Students will be able to compare the authentic Roman features of the everyday life and culture with its Greek counterparts. They will be able to describe the characteristics, functions and specialties of the various aspects of Roman society. They will be able to compose the scientific works regarding both Greek and Roman world view in the various areas of culture, and to recognise the influence of Greek culture in the works of the Roman literature that they shall study throughout their education and work.

Grading

Student will be evaluated according to the accomplishment on his final exam (in writing and oral), as well as according to the regular attendance and participation during classes.

Week by Week Schedule

1. Introductory class on the location of Rome and its neighbours. We shall speak especially of the contacts with the Greeks, and of the taking over of the alphabet.
2. The greatest Greek influence is evident in the Roman religion, the subject of this class. We examine the most important beliefs, customs and deities.
3. The Roman housing: domus, insula, villa rustica, and comparison with the Greek housing.
4. Story of the Roman education and the role of Greek language and literature in it. We also discuss the Roman rites of manhood.
5. Organisation, equipment and the tasks of Roman army, in comparison with Greek military technique, especially the Spartan one.
6. The everyday life of the Romans, their dressing and food customs, in relation with the influence of the Greek customs (e.g. symposia).
7. The obligations and rights of a Roman citizen, conditions of becoming one, the formula of a Roman name; as well as the political system (in comparison with the Greek ones) and magistrates.
8. Roman law and the "underdog" classes: women and slaves; comparison of their positions in Greek and Roman society.
9. The overview of the Greek literature, an area with influence as big as that of Greek religion, with special focus on the works that influenced the Roman authors.
10. In continuation from the preceding class, we discuss the Greek philosophy and rhetoric and the influence it exerted on the Romans.
11. Greek colonisation enabled the contact between the Romans and the Greeks, and expanded the Greek culture throughout the Mediterranean world, as well as the coasts of the Black Sea and further. We also deal with the economy of the Greek and Roman civilisation.
12. We examine the contribution of Greek science to the Western civilisation, as well as the Roman calendar and the adaptions made in the time of Caesar.
13. The various pastimes of the Romans, especially festivities (both Roman and Greek), such as Olympian games, ludi Romani, dramatic festivals etc.
14. Greek art and architecture and its influence on the Roman, mentioning the most importants artists and their works.
15. Summation class: review of the data acquired during the semester and resolving certain problems (according to the students' needs.)

History and Culture of Ancient Egypt

Lecturer in Charge

Doc. dr. sc.
Mladen Tomorad

Course Description
The aim of this course is to: introduce students with the main knowledge related with the history and culture of the Ancient Egypt.

Course Type

» History (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (required course, 1st semester, 1st year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Outline the main events related with the history of Ancient Egypt.
2. Name the historical sources related with Ancient Egyptian history.
3. Review the most important historical characters of the Ancient Egyptian history.
4. Identify cause - consequence relations related with the main themes of the Ancient Egyptian history.
5. Relate processes of the development of the Ancient Egyptian state with the similar processes of the other civilizations of the Ancient world.
6. Identify the most important people of the Ancient Egyptian history.
7. Explain the most important cultural and artistic achievements of the Ancient Egyptians.
8. Relate the knowledge of mythology and religion of the Ancient Egyptians.
9. Describe the development of the funerary customs of the Ancient Egyptians.
General Competencies

After successful course students will be able to:
- define the historical processes about the certain periods of the Ancient Egyptian history,
- summarize the basic facts about the Ancient Egyptian history,
- name the main characters which marked the Ancient Egyptian history,
- structure the list of the relevant literature about the certain periods of the Ancient Egyptian history,
- reproduce clearly and concise the main outline of the historical events of the Ancient Egyptian history,
- review the main historical processes and explain cause-consequence relations between the historical events and historical processes of the Ancient Egyptian history,
- identify the main interpretations of the historical events and processes in the Ancient Egyptian history,
- discuss the context of the historical events and show the importance of the interdisciplinary review of the various topics of the Ancient Egyptian history,
- and point out the historical processes in various periods of the Ancient Egyptian history.

Grading

Obligatory class attendance 30%;
Colloquium I 35% + Colloquium II 35% or
Written exam 70 %.

Week by Week Schedule

1. Geographical position, territorial and administrative division of the Ancient Egypt.
2. Ancient Egyptian society and everyday life.
3. Review of the history and culture of the Ancient Egypt - introduction.
4. Pre-dynastic period: cultures of the Upper Egypt (Badari, Naqada I-III), cultures of the Lower Egypt (Buto, Maadi).
6. The Early dynastic period (Dynasties I-II). Centers, locations, tombs in Abydos, religious centers.
7. The Old Kingdom (Dynasties III-VI. The development of the funerary customs: mastabas, step pyramids, pyramids. Rulers: Djoser, Snofru, Khufu, Khafra, Menkaure, Unas, Pepi II. Sources, religion, sites, art.

Literature

History and Culture of the Greek and Roman World

Lecturer in Charge

Doc. dr. sc.
Mladen Tomorad

Course Description

Introducing students with the history and culture of the oldest civilizations of ancient Egypt, the eastern Mediterranean (Media, Persia, Hellenistic kingdoms), Greece, Etruria and Rome.

Course Type

- History (Dual-major studies Study) (required course, 1st semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 2nd semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 3rd semester, 3rd year)
- Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
- Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
- History (Study) (required course, 1st semester, 1st year)
- Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
- Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
- Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the most important events related to the history and culture of Greece and Rome,
2. Explain the historical origins of Greece and Rome,
3. Explain the context of the theme of Greek and Roman history,
4. Reproduce causal link related to certain topics Greek and Roman history and culture,
5. Compare the processes of development of various city-states and kingdoms in the territory of Greece and the Aegean Sea, Italy and the wider Mediterranean area,
6. Name the most important figures of Greek and Roman history,
7. Name the most important cultural and artistic achievements of Greek and Roman civilization,
8. Explain the differences in religion and mythology of Greece and Rome.
General Competencies

After successfully graduating student will be able to:
1. identify the most important person and institutions in the Croatian and the World history,
2. compile a list of literature for each historical period,
3. tell what is the interpretation of history,
4. distinguish difference between important and non-important facts within, historiographic interpretation,
5. interpret a historical sources,
6. appraise the value of historiographic interpretations.

Grading

Active students will be monitored throughout the semester. Classes is required to attend. The evaluation will be carried out continuously, based on activities in teaching and understanding of the issues and colloquia.

Week by Week Schedule

1. View the history and culture of ancient Greece: Greek colonization tribes, Cyclades, Minoan culture, Cretan-Mycenaean culture, the Greek-Trojan War (Iliad, Odyssey), dark period, archaic period, the classical period, the Hellenistic period; everyday life, writing, language, sources, religion and mythology, culture and science.

History and Theory of Film

Lecturer in Charge

Izv. prof. dr. sc. Danijel Labaš

Course Description

The aim of the course is to familiarize the students with the emergence and historical development of film and film art and the most important theories in this regard.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts of communicology associated with the film;
2. Recognise and describe the role of film in the society guided by its historical development;
3. Reproduce, apply and explain the basic theory of film as applied throughout history;
4. Classify and explain the history and prehistory of the film;
5. List the key figures in the history of cinema;
6. Indicate and explain the basic technological innovations and changes throughout the history of film.

General Competencies

Apply the knowledge of the basic concepts of communicology associated with the film; Identify and describe the place and role of film in the society; Reproduce, apply and explain the basic theory of film; Indicate and explain the key events and processes in the history of film.

Grading

Lecture attendance, literature reading and participation in discussions with the teacher and the colleagues (50% of the final grade), seminar assignment (25% of the final grade) and the final exam (25% of the final grade).
Week by Week Schedule

1. The beginnings of cinema and film, from the Lumières to Griffith; silent film, the climax and the ending, (1920’s) and the divas of the silent film; sound film, film and color.
2. The beginnings of cinema and film from the Lumières to Griffith.
3. Silent film, the climax and the ending.
4. The stars of silent film.
5. The stars of silent film.
7. The realism of sound film.
8. Orson Welles.
10. Film genres: comedy.
11. Film genres: western.
12. Film genres: crime film.
13. Film genres: musical.
15. Documentary film.

» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:
1. Describe the basic approaches to and methodological principles of the history of Croatian philosophy
2. Identify the most important representatives of both older and newer Croatian philosophy and to enumerate their most important works
3. Describe in their own words the most important theses of individual Croatian philosophers
4. Describe Croatian philosophy in the context of the general history of philosophy
5. Recognize and point to the historical and cultural relevance of individual Croatian philosophers

**General Competencies**

After completing the course, students will be able to: (i) develop additional capacity for historical approach to philosophical problems; (2) use the writings of Croatian philosophers in order to illustrate philosophical problems and their possible solutions; (2) explain the importance of the study of philosophy for understanding areas like the history of natural sciences or the history of literature.

**Grading**

On the basis of: (a) attendance, (b) grades of two tests during the semester, (c) grade of the seminar presentation, (d) grade of the oral exam.

**Week by Week Schedule**

1. Introduction: Conceptions of the history of Croatian philosophy (2+0)
2. Older Croatian philosophy: review (2+0)
3. Herman Dalmatin (1+1)
4. Matija Vlačić (1+1)
5. Frane Petrić (1+1)
6. Nikola Vitov Gučetić (1+1)
7. Ruđer Bošković (1+1)
8. Test
9. Newer Croatian philosophy: review (2+0)
10. Franjo Marković (1+1)
11. Gjuro Arnold (1+1)
12. Albert Bazala (1+1)

History of Croatian Theatre

Lecturer in Charge

Doc. dr. sc. Viktoria Frančić Tomić

Course Description

The subject dealing with the history of the Croatian theatre is concerned with basic literary and theatrical problems. They are mostly associated with the development of the dramaturgy and theatre sciences through the centuries in the connection with the analysis of specific dramatic texts as well as the theatrical performances. The studying of this subject will be concentrated in the Croatian cultural history. Participants will be introduced in various methodological problems of theater historiography and they will be trained for critical application of new approaches to contemporary theatre as well as to the history of the performing arts and their synthetic nature. Based on the structure of Croatian theater, based on the knowledge of poetics students will acquire a system of knowledge about the Croatian theater with particular insight into the history of it and its relations with other European theater, then also theatre of classical Greece to the latest achievements in this genre of literature. The course includes a working visits of the students to at least three theatrical performances or during the rehearsals. Course objectives include: acquiring of the fundamental knowledge of the theater, which will be presented as an overview of the focal points of the history of dramatic literature and also of the processes of making theatrical performances in Croatian cultural history. Acquisition of basic knowledge and skills connected with the interpretation of dramatic texts as well as theatrical context will help students to build systematic knowledge on this matter. Examples from the history of Croatian theater and drama will enable the students to consolidate their methodological approach based on chapters on the performative dimension of dramatic texts. Special accent will be given to the problems of the science dealing with the composition of dramatic texts and then to their qualities that are close to the acting and performing of those texts.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (required course, 5th semester, 3rd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the history of the Croatian theater
2. Assess of the current forms in contemporary theatrical life
3. Apply basic knowledge about the science on theatre in the description of the acted and performed texts
4. Apply dramaturgical knowledge during the description and analyzing drama texts
5. Analyze the relationship between the history of Croatian and other European theaters
6. Analyze theater iconography
7. Compare the canonical system of Croatian works with those of Western European cultural heritage
8. Analyze the different forms of theatrical arts in other arts

General Competencies

After completion of the course, students will acquire proficiency in the methodology of theater historiography and come in the possession of the basic knowledge needed for the interpretation of dramatic texts and the circumstances of theater performances. Students will learn about the development of the Croatian theater and after the end of this course they will be able to participate in its contemporary appearance.

Grading

The success of the student is evaluated on the base of written and oral exam, but also on active participation in lectures, theatre visits and writing the papers.

Week by Week Schedule

1. Introduction to the Croatian Theatre Studies. The survey of the most important chapters of the theory of drama and thoughts about theater practice. Renaissance thought about the theater. Classicist theory of drama. The crisis of bourgeois drama during the XIXth century and the reforms of the twentieth century: Craig, Artaud, Brecht. Croatian writers on theater: Demeter, Šenoa, Miletić, Gavella, Zuppa
4. Medieval theater and its relations to the drama of antiquity. Theological writers on the theater: Jerome, Augustine, Thomas Aquinas. The development of drama in the Croatia during the early and late Middle Ages. Missale antiquissimum from Zagreb and its staginess and theatricality. The Passion of St. Margaret as an example of a medieval drama figure and its theatrical reading of its signs.

9. Calderon drama Life is a dream, La Vida es sueno and her Croatian adaptation named Vučistrah and written by Peter Kanavelića 1682. Croatian baroque dramas based on Italian librettos and its influences on the romantic theatre of Demetrie Demeter. Đurđević’s Judith and other Judiths on Croatian stage. European Theatres and its reformers in the eighteenth century. The Myth of Nikola Zrinski as an object of popular theater as well as the paradigm of the national drama. Kukuljević as dramatist.

14. Croatian theater critics. Overview of the most important critical texts in the nineteenth and the twentieth century. Practicum: writing theater criticism. Analyzing of the most important and the most successful pieces of Croatian theatre criticism: Ranko Marinković, Marijan Matković, Peter Brečić, Dalibor Foretić, Marija Grgićević, Nikola Batušić, Boris Senker... Latest Croatian playwrights in the mirror of criticism: Miro Gavran, Lada Kaštelen, Mate Matišić and others.

15. Theater festivals in the twentieth century and their concepts. Dubrovnik Summer Festival and its history. Other Croatian theater festivals. The Days of Marul as a mirror in the contemporary Croatian drama and theater. Days of Hvar Theatre. Days of Križa in Osijek. Theatre Ltd as an important step in the Europeanization of Croatian theater repertoire in sixties and seventies of 20th Century. The overview of the most prominent Croatian theatre Directors: Gavella, Račić, Strozzi, Spaić, Habunek, Violić, Paro, Juvančić, Kunčević, Dolenčić...

Literature

History of Media Communications in Croatia

Lecturer in Charge
Prof. dr. sc.
Mijo Korade

Course Description
The aim of the course is to give the students a chronological overview of historical development of Croatian media - from the time of the first newspaper in Croatia until the appearance of radio and television as new media of informing the public. Instruct them to use historical documents stored in Croatian libraries and archives, and introduce them into methods of scientific and media presentation of research results.

Course Type
» Communication Sciences (Study) (required course, 3rd semester, 2nd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. List and explain most important turning points in history of Croatian journalism.
2. Classify and categorise key periods in history of Croatian journalism and their relation to political, social and economical turmoil, as well as on technological progress.
3. List the most important historical figures that made mark in Croatian journalism.
4. Demonstrate the ability to perform tasks of short research in some of the subjects related to history of media communication in Croatia.
5. Demonstrate a capacity to present own research results based on the adopted theoretical knowledge of the history of media communication and discuss the research.
General Competencies

Apply knowledge of the basic concepts of journalism;
Specify and explain key events and processes in the history of Croatian media
communication or journalism,
explain and analyze political, social and economic turmoil and their influence on
the development of journalism in Croatia,
knowledge of and application of fundamentals of usage of historical materials in
Croatian libraries and archives,
application of basics of scientific and media presentation of research results.

Grading

Attendance, required reading and taking part in discussions with professor and the
colleagues (25% of the final grade), student paper (25% of the final grade) and
exam (50% of the final grade).

Week by Week Schedule

1. Interdisciplinary approach in research oh history of journalism and media
communication in Croatia.
2. On the limes of cultural history - history of public media, political history
and informational sciences.
3. First media of public communication: why have the first three centuries of
journalism avoided Croatia?
5. Gaj and journalism in the period of national revival.
6. Press and revolutions of 1848/1849 and first voices of democracy.
7. Origins of sensationalism.
8. Most important features of Croatian journalism in second half of XIX
century: do newspapers turn modern?
11. Croatian journalism of the late XIX century in the spirit of resistance
towards assimilation into Hungarian culture.
14. Journalism before the WWI.
15. New media of public information.
Literature

Bilješke s predavanja
History of Medieval Philosophy

Lecturer in Charge

Doc. dr. sc.
Anto Gavrić

Course Description

Introduce students to the philosophy of the Middle Ages (5th – 16th century) studying the period of Western philosophy characterized by very fruitful discussion between philosophy and Christianity. The debates between the Greek rationality and the Judeo-Christian and Islamic beliefs transformed the philosophical investigation, opening up new horizons and new perspectives. History of philosophy of the Middle Ages studies the documents that transferred the thought of the Middle Ages and interprets their relationship with the cultural realities of that period, in order to make them more fruitful for better understanding of the development of Western philosophy. Special emphasis is placed on 13th and 14th centuries and thinkers who created systems of great philosophical interest, and may be regarded as representatives of the most important results of interaction between philosophy and theology (Albert the Great, Bonaventure, Thomas Aquinas, etc.). Chosen approach of the course will reveal the influence of ancient Greek philosophy, some authors of the patristic period (Augustine, Boethius, Pseudo-Dionysius the Areopagite) and Arab philosophers and commentators (Al-Farabi, Al-Kindi, Al-Ghazali, Avicenna, Averroes). The 14th century, marked by Master Eckhart, Dante Alighieri, John Duns Scotus and William Ockham, represents a fundamental break in medieval thought, opening up important perspectives toward modernity. The course aims to provide an introduction to the broad range of philosophical disciplines: logic, cosmology, metaphysics, ethics, aesthetics, anthropology, political philosophy, etc. Lectures are arranged by thematic units, with a short historical context.

Course Type

» Philosophy (Dual-major studies Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and explain the different schools and philosophical currents in the Middle Ages and outline some features of each school
2. Distinguish important philosophers and their major works
3. Explain how knowledge is transmitted and how some works of Greek and Arab philosophers circulated to Europe and also how some important works and commentaries were translated into Latin
4. Explain the definitions of key concepts relevant for understanding of the teachings of respective authors and outline the development and reception of essential concepts, definitions and authors coming from Greek, patristic and Arab world
5. Identify several fundamental topics
6. Analyze the philosophical texts of medieval philosophers
7. Reconstruct and evaluate the essential theses and arguments of some most important authors
8. Distinguish and evaluate presented reasons "pro" and "contra" of medieval method of discussion (quaestiones disputatae)
9. Compare some actual philosophical questions in the context of the history of medieval philosophy

General Competencies

As part of the undergraduate program the course aims to familiarize students with the most important schools and the most important authors of the Middle Ages and the diversity of their teachings and reflections on specific topics through deeper study of selected texts by certain authors. Read and interpret philosophical texts of medieval authors in a systematic way, understand some essential concepts and definitions, discover diverse approaches and reflections on selected topics, understand the method in which the authors set the thesis and present arguments. Show students that medieval philosophy is also relevant for understanding of the scientific culture in the West, how it is rediscovered by contemporary philosophy and in which way medieval philosophy could be actual today also.

Grading

30% class attendance and participation in exercises, 50% tests and essay, 20% oral exam.

Week by Week Schedule

1. Introduction
2. Prejudices about the Middle Ages and medieval philosophy
3. Happiness [Boethius, De consolatione philosophiae]
4. Beautiful and Beauty (Pulchrum – Pulchritudo) [Pseudo-Dionysius the Areopagite, De divinis nominibus, cap. IV; Thomas Aquinas, Summa theologiae I, q. 5 (De bono in communi)]
5. Time [Augustine, Confessiones, XI; Maimonides, Dux perplexorum I, 71; Thomas Aquinas, De aeternitate mundi]
7. Metaphysics of the Person
9. Women Philosophers [Christine de Pizan, The City of Ladies]
10. Love [Andreas Capellanus, De amore; Peter Abelard, The Letters of Abelard and Heloise; Dante Alighieri, Divine Comedy: Inferno, 5; Purgatorio, 17-18]
11. Philosophy of Language
12. Transcendentals [Thomas Aquina, De veritate I, 1]
13. Truth
14. Philosophy/Metaphysics and Theology - Philosophy and Faith [Ibn Sina (Avicenna), Metaphysics I, chap. 1-3; Ibn Rushd (Averroes), On the harmony of religion and philosophy (Kitāb faṣl al-maṣāq); Bonaventura, Itinerarium mentis in Deum; Thomas Aquinas, What is Philosophy?, Commentary on the Metaphysics of Aristotle, prooemium; John Duns Scotus, Quaestiones super libros metaphysicorum I; Nicholas of Cusa, De docta ignorantia]
15. Philosophy of God [Anselm of Canterbury, Proslogion; Thomas Aquinas, Summa theologiae I, q. 2 ("quinqva viae"); John Duns Scotus, Tractatus de primo principio]

History of the Croatian Standard Language

Lecturer in Charge
Prof. dr. sc. Branka Tafra

Course Description
The main objective of this course is to provide the students with a comprehensive description of the history of Croatian standard language in one place. In order to obtain an integral image of this phenomenon, the students will firstly adopt basic concepts of the theory of standard language with a special emphasis on the delimitation of concepts of literary and standard language. History of the Croatian standard language will be accessed in two ways: from the perspective of the so-called external linguistic history and from the perspective of internal linguistic history. The students will see the developmental path of Croatian standard language, while the main emphasis will be on the Croatian philological production over the centuries, as well as the basic features of development of language standards (grammatical, lexical and graphic). Through compiling seminar papers, the students will be encouraged to explore the abundant literature in this area, to an interdisciplinary approach to the problems of the history of the Croatian standard language, as well as applying the knowledge acquired through their education.

Course Type
» Croatian Studies (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Croatian Studies (Study) (required course, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Differentiate and learn basic terminology of the theory of standard language;
2. Explain the developmental path of the Croatian standard language;
3. Analyze and identify contemporary language issues in the Croatian standard language based on the diachronic image of this phenomenon;
4. Create and present a quality seminar paper on the history of Croatian standard language.

General Competencies
Adopting basic facts of the history of the Croatian standard language and getting an integrated perspective on Croatian standard language on diachronic and synchronic levels.
Grading

Knowledge and adoption of subject matter will be monitored during the course (active participation, oral presentations and tests), and at the end of the semester there will be a written test and oral examination.

Week by Week Schedule

1. Standard language: terminology and nomenclature
2. The relations between standard language and its dialectal basis
3. The foundations of Croatian standard language
4. The beginnings of language standardization
5. Four streams of literary language development
6. History of spelling and orthography
7. Geographical and functional expansion of Stokavian dialect in literary works of the 18th century
8. The standardization of Croatian language in the context of standardization of Slavic languages
9. Period before Croatian national revival
10. National revival between ideology and linguistics
11. The official position of the Croatian language
12. Philological schools in the 19th century
13. Croatian standard language at the turn of the 20th century – disruption or stabilization?
14. A century of struggle for the survival – Croatian and Serbian as two separate languages
15. Croatian language today – a look from the outside and inside

Tafra, Branka (1993). Gramatika u Hrvata i Vjekoslav Babukić, Matica hrvatska, Zagreb
History of Zagreb

Lecturer in Charge

Izv. prof. dr. sc.
Darko Vitek

Course Description

The aim of the course is to acquaint the student with the basic historical data and processes that determine the history of Zagreb and enable them to independently study the history of Zagreb. Over the course will specifically encourage independent student work.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» Croatian Studies (Study) (elective courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective courses, 4th semester, 2nd year)
» Croatian Studies (Study) (elective courses, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify relevant historical events and processes of the history of Zagreb.
2. Explain the causes of historical development of Zagreb.
3. Demonstrate the ability to write and presentations of independent work on the history of Zagreb.
4. Compare the historical development of Zagreb with other cities.
5. Formulate the elements of the historical development of Zagreb.

Grading

Active, independent work and a written exam.
Week by Week Schedule

1. Introduction. The concept of the city throughout history.
2. The Area of Zagreb in prehistory.
3. The Area of Zagreb in classical period.
5. Zagreb and the Ottoman conquest.
7. The modernization and industrialization in Zagreb.
8. Zagreb in World War I.
9. Zagreb in World War II.
10. The development of Zagreb in socialist Yugoslavia.
11. Showing Zagreb in literature.
12. Showing Zagreb in painting.
15. Concluding discussion.

Literature

Nada Klaić (1982). Povijest Zagreba, Liber
Human Rights

Lecturer in Charge
Doc. dr. sc.
Ivana Radačić

Course Description
The goal of the course is to acquaint the students with the historical development as well as political and philosophical foundations of human rights, the main concepts, ideas and controversies of the discipline, as well as the international, regional and national systems of human rights protection, so that they could apply in practice the knowledge gained. That way, the students will be encouraged to work for the promotion and the protection of human rights in their daily and professional lives.

Course Type
Sociology (Study) (elective courses 1., 1st semester, 1st year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Define basic human rights
2. Explain the basic theoretical concepts of human rights
3. Distinguish the different human rights theories
4. Identify and analyse violations of human rights in practice, its causes and consequences
5. Evaluate different human rights policies and practices
6. Apply innovative solutions to the problems in human rights theory and practice and reconstruct traditional cannon of human rights
7. Argue the importance of the values of dignity and equality, the basic values of human rights

General Competencies
Use the general knowledge of society and of social processes. Explain the initial assumptions of the different political, religious and cultural orientations. Conform to a teamwork with co-workers from various disciplines, of different attitudes and value orientations. Plan own engagement in resolving of the various social issues. Explain the key structural factors that are shaping society. Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.
Grading

Written exam: 80%, active participation in class: 10%, essays: 10%

Week by Week Schedule

1. Historical development, political and philosophical foundations of human rights
2. International human rights law
3. Universalism and cultural relativism
4. UN system
5. Regional systems and the European Court of Human Rights
6. Human rights protection in Croatia
7. The role of civil society in protection and promotion of human rights
8. Monitoring and reporting on human rights
9. Freedom from torture
10. The right to education
11. The right to equality
12. Women's rights
13. Children's rights
14. Hypothetical case
15. Evaluation

Literature

Hungarian History

Lecturer in Charge

Doc. dr. sc. Ivana Jukić

Course Description

The course objectives are to describe Hungarian past and relate it to the history of neighbouring countries and European history in general. Due to the fact that Croatia was in centuries long political union with Hungary, course will analyze and compare histories of both countries and demonstrate how they influenced each other and created perception of the Other.

Course Type

» History (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain complexity of Hungarian past from 9th to 21st Century.
2. Define major issues of the Hungarian past shaped by its geographic position.
3. Relate events and persons important for Hungarian past.
4. Explain cause and effect relations of different events within Hungarian past.
5. Demonstrate how different processes were conditioned by Hungarian geopolitical status.
6. Compare events in Hungarian past with Croatian experiences.
7. Evaluate contributions of Hungarian culture to European civilization.

General Competencies

After finishing the programme student will be able to:
outline in clear and simple way the major historical events from ancient to contemporary times;
explain cause and effect relations of historical events and processes;
construct a historical context;
compare historical processes of different periods;
differentiate specificities of historical periods;
combine different historical processes.

Grading

The final grade will be result of class activity and attendance. The final exam is written exam.
Week by Week Schedule

1. Class overview, schedule, requirements.
2. The Coming of Magyars and Honfoglalás.
3. The Arpad Family and Establishment of Kingdom in Central Europe.
4. The Anjou Family and the Power of the Kingdom.
7. The making of Monarchy of the Nobles 1437-1526.
8. The Lands of the St. Stephan's Crown 1437-1526.
9. Within the Habsburg Monarchy 1527-1606.
10. With Habsburgs, against Habsburgs.
14. Neo-Absolutism, dual Monarchy and the Fall.

Literature

Inferential Statistics

Lecturer in Charge

Doc. dr. sc. Mislav Stjepan Žebec

Course Description

Introducing students to the basic concepts of inferential statistics and enabling them for statistical inference from sample to population, using basic parametric and non-parametric procedures; Explaining Central Limit Theorem and its implications on calculation of confidence intervals for μ, and on various forms of t-tests. Generating students adoption of statistical power concept, its importance, determinants and calculation in various test situations. Generating students systematic insight in prerequisite assumptions of specific inferential test and their application in proper choosing of parametric/nonparametric procedures for statistical hypothesis testing. Training the students skill for autonomous usage of parametric/non-parametric statistical tests for central tendencies measures, dispersion measures or correlation. Preparing students for critical analyzing of professional and scientific texts employing the basic inferential statistics procedures.

Course Type

» Psychology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish statistical from non-statistical inference
2. Interpret and use one-tailed and two-tailed statistical hypothesis testing;
3. Generalize the basic logic of rejecting and not rejecting the null hypotheses (H₀) at t-test on all other tests (F, χ²)
4. Reproduce derivations of test statistics and the characteristics of related theoretical distributions
5. Identify prerequisite assumptions of specific inferential tests and by using them properly decide to use or not the specific test.
6. Explain the errors in statistical testing and the importance of statistical power concept
7. Apply parametric and non-parametric statistical procedures for testing the hypotheses on central tendency, dispersion and correlation measures.
8. Calculate the confidence interval for central tendency, dispersion and correlation measures.
9. Evaluate advantages and limitations of specific hypotheses testing procedures applied in solving an research problem, and evaluate the selection of the most appropriate procedure.
General Competencies

10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.
18. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Grading

Class attendance - up to 12% of the course grade;
Quiz tests - up to 18% of the course grade;
Two mid-term written tests - up to 46% of the course grade;
Oral exam - up to 24% of the course grade;
Additional points - up to 5% of the course grade.

Week by Week Schedule

1. Introduction to Inferential statistics course syllabus; Probability sampling, kinds of samples and sampling distributions; Parameters and statistics; Basic logic of statistical hypotheses testing; Null-hypothesis (H0) and alternative hypotheses (H1)
2. One-tail and two-tail H0 testing: normal and other sampling distributions; Central Limit Theorem; z- versus t- distribution at H0 testing on mean; Confidence interval for μ
3. General assumptions on t-test between two means; Dependent samples t-test: definition, research frame, H0, sampling distribution. Testing procedure in dependent samples t-test (small and large samples).
4. Independent sample t-test: definition, research frame, H0, sampling distribution. Assessment of standard error of mean difference (small and large samples) in relation to homogeneity of variance (Behrens–Fisher problem)
5. Confidence intervals for mean differences and variance; Type I, and Type II errors in statistical tests; Introduction to statistical power.
6. General assumptions on proportion t-tests; Proportion t-test on one (large) sample confidence interval for ; Proportion t-tests for 2 independent (large) samples and related confidence interval; Proportion t-tests for 2 dependent (large) samples; bootstrapping methods for parameter assessment: definition, purpose, basic logic and examples.
7. Statistical power calculation for 1 sample mean, for difference between two independent sample means, and for difference between two dependent sample means; Pearson correlation hypotheses testing. Testing the hypotheses on difference between two Pearson rs (dependent and independent samples).
8. Statistical power at Pearson r. Hypotheses testing on: (i) linear regression coefficient, (ii) difference between two linear regression coefficients, (iii) multiple correlation and multiple regression coefficients, (iv) partial correlations, and (v) other alternative correlation coefficients (point-biserial, biserial, and rank)
9. χ²-distribution and χ²-test: definition and importance; χ²-test at one-way classification (inductive derivation, H0, general formula, calculation). χ²-statistic and prerequisite assumptions.
10. χ²-test at two-way classification (typical situation, H0, general formula, calculation); Contingency tables 2x2 and Yates correction. Discussion on minimal f‘t and one-tail/two-tail H0 testing. Contingency coefficients (C, Φ, Φc).
11. Prerequisite assumptions, advances and limitations of non-parametric statistic based on rank variables; Two Independent samples testing on rank order variables: Run test, Median test, Wilcoxon rank-sum test.

12. Siegel Tukey test of variability equivalence at two independent samples; Three or more independent samples testing on rank order variables: Expanded median test, Kruskal-Wallis test.

13. Two dependent samples testing on rank order variables: Sign test, Wilcoxon Matched pairs Signed rank test; H0 testing on difference among three or more dependent samples with dichotomized variables - Cochran Q test.

14. Three or more dependent samples testing on rank order variables: Friedman's Rank test, Ferguson test.

15. Test.

Literature

Informatics in History

Lecturer in Charge

Doc. dr. sc. Mladen Tomorad

Course Description

The aim of this course is to introduce students the IT programmes for text processing and the databases (Word, Excel, Access), and with advanced searching for the relevant information related with the historical scientific research on the Internet. Students will also learn how to use mailing lists and forums, and how to access on-line database related with arts and humanities.

Course Type

» History (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Demonstrate the knowledge of the work and exercise in the MS Office programmes
2. Describe the relevant information for the historical research and learning on the Internet,
3. Review the relevant information for the historical research and learning on the Internet
4. Explain the importance for the collecting and presenting historical facts through digital media
5. Describe historical contents on the Internet: primary sources and secondary sources
6. Review the credibility of the historical sources published on digital media

General Competencies

After the successful study students will be able to: compose the list of the relevant literature for historical periods, write essay about the various historical themes, and review the necessary for the interdisciplinary view of the various historical topics.

Grading

Class attendance 20% of the grade,  
Word exercises 35% of the grade,  
Excel exercises 15% of the grade,  
Powerpoint presentations 30% of the grade.
Week by Week Schedule

1. Introduction to the course
2. MS Word: Exercise I - text processing.
3. MS Word: Exercise II - CV.
4. MS Word: Exercise III - CV.
5. MS Word: Exercise IV - Tables.
6. MS Word: Exercise V - Footnotes and References.
7. MS Excel: Exercise I - tables.
8. MS Excel: Exercise II - graphs.
11. MS Powerpoint: Exercise I.
12. MS Powerpoint: Exercise II.
13. MS Powerpoint: Exercise III.
14. MS Powerpoint: Exercise IV.
15. Final remarks and discussion.

Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the basics of working on a computer.
2. Apply and work with the MS Office suite (MS Word, MS Excel, MS PowerPoint).
3. Use different independent Internet tools for scientific-research methods in the social sciences and humanities (database searching, retrieval and use of resources).
4. Identify the advantages of distance learning (e-learning).
5. Independently use online applications.
6. Apply and respect the different methodologies and perspectives on specific issues and problems.
7. Collect, investigate and critically read scientific literature.

General Competencies

Apply, classify and distinguish the professional terminology in the research area of social sciences and humanities.

Grading

50% exercises, 50% written exam.

Week by Week Schedule

1. Introductory lecture - introduction to the course subject matter and student obligations.
2. Introduction to the Windows operating environment: interface, orders, tasks.
3. Understanding the university system of authentication and authorization infrastructure (AAI@EduHr).
4. Work with the MS Office suite: word processing in MS Word.
5. Working with the MS Office suite: Working with tables in Excel.
6. Working with the MS Office suite: preparing presentations in PowerPoint-in.
7. Working with Internet browsers (Internet Explorer, Mozilla Firefox, Google Chrome).
8. Working with Internet browsers (Internet Explorer, Mozilla Firefox, Google Chrome).
9. Internet communications.
10. Basic use of databases (Library of the Croatian Studies, National and University Library).
11. Techniques for searching and organizing the information downloaded from the databases.
12. The use of electronic mail.
13. Security of computer and information systems.
15. Final knowledge assessment.

**Literature**

Introduction to Clinical Psychology

Lecturer in Charge

Doc. dr. sc.
Anita Lauri-Korajlija

Course Description

The aim of the course is to provide students with the basics of clinical psychology, which includes: defining the field of clinical psychology, introduction to the activities of clinical psychologists, general overview of the historical development of clinical psychology, clinical approach, the key issues of assessment and measurement in clinical psychology, and specific of research in clinical psychology.

Course Type

» Psychology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and evaluate the criteria for defining normality.
2. Compare the field of clinical psychology with other areas of psychology and related disciplines.
3. Compare and analyze the differences and similarities between different theoretical systems in clinical psychology.
4. Explain the specifics of the clinical approach.
5. Assess critically the basic principles and methods of psychological assessment.
6. Distinguish and evaluate specific clinical interventions.
7. Distinguish different activities of clinical psychologists.

General Competencies

6. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.
7. Assess the mental status and classify the different diagnostic criteria for mental disorders.

Grading

During the course, activities are scored as follows: regular attendance - 5 points; essay - 15 points; one test 30 points; written exam - 50 points. Grade is determined as follows: 1 - up to 59 points; 2 - 60-69 points; 3 - 70-79 points; 4 - 80-89 points; 5 - 90 or more points.
Week by Week Schedule

1. Introduction to the course
2. Defining abnormal behavior
3. Mental health, mental illness and mental disorders
4. Paradigm in clinical psychology - biological and psychoanalytic
5. Paradigm in clinical psychology - behavioral, cognitive and humanistic approach
6. Integrative models in clinical psychology
7. Test for students
8. Clinical assessment - planning and data collection
9. Clinical assessment - data analysis and communication of the results
10. Clinical interview
11. Observation on clinical assessment
12. Clinical interventions
13. Research in clinical psychology
14. Areas of work for clinical psychologists
15. Integration of the acquired knowledge and an introduction to the field of clinical diagnostic

Literature

Introduction to Communication Sciences

Lecturer in Charge

Izv. prof. dr. sc. Danijel Labaš

Course Description

The main objective of the course is to introduce students to the communication sciences and communicology as an interdisciplinary and integrative science that seeks to address and improve communication opportunities, while the specific objectives of the study course are providing insight into the historical and contemporary communication and communicology themes and dynamics in order to master the basic knowledge of the area so as to enable the students to access and analyze communication on all its levels: intrapersonal, interpersonal, social and media.

Course Type

» Communication Sciences (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (required course, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare the historical development of communications and communicology
2. Reproduce the fundamental concepts of intrapersonal, interpersonal, verbal, non-verbal, social media communication;
3. Argue the importance of knowing the dynamics of communication;
4. Describe the role of verbal and non-verbal communication in daily life;
5. Analyze and interpret verbal and non-verbal communication;
6. Use the acquired knowledge of the relationship between interpersonal communication and communication through new media;
7. Evaluate the quality of interpersonal communication;
8. Analyze and compare the communication relationships in dialogue and persuasion;
9. Analyze critically media content and new media communication facilities;
10. Argue the reasons why it is necessary to know the dynamics of communication in everyday and business environment.

General Competencies

Students will become familiar with the anthropological, philosophical and communicology approach to the communication at all levels. They will especially be well versed to properly use verbal communication and learn to properly evaluate and interpret non-verbal communication in different social and cultural environments. Students will be able to use arguments to express the importance of knowledge of communicology and will develop skills of critical perception, presentation and analysis of modern communication and dynamic models, particularly in relation to interpersonal communication and communication through new media.

Grading

20% class attendance, 20% participation in the discussions, 60% colloquium and / or final exam.

Week by Week Schedule

1. Introductory lecture: introduction to the subject, a division of literature, presentation of students duties and required efforts;
2. Communication, its philosophical and anthropological foundations and features of communication;
3. From interpersonal communication to the communication of society (philosophical base and historical development);
4. Communication and European rationality, the subject(s) of communication;
5. From interpersonal communication to Facebook;
6. Conversation, dialogue and persuasion;
7. Assessment (first colloquium)
8. Language in the (con)text of computer-mediated communication (CMC);
9. Relationship between CMCommunication and face-to-face communication;
10. Nonverbal communication, kinescs, proxemics, haptics;
11. Body language, communicating by face and gestures;
12. Visual communication, eyes and facial expression;
13. Paralanguage and interpretation of non-verbal communication;
15. Assessment (second colloquium)

Introduction to Developmental Psychology

Lecturer in Charge

Doc. dr. sc.
Eva Anđela Delale

Course Description

After attending course and passing the exam, students will differ, describe and critically evaluate main terms and ideas of human development theories and their implications on work with children, parents and educators. They will understand factors and processes that cause developmental changes and acquaint methods of development research. Also, they will acquaint main features of pre-natal development and describe and explain, based on relevant theoretical models and research, the main changes in cognitive, physical and social-emotional development during infancy.

Course Type

» Psychology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish development theories regarding their contribution to the explanation of human development and the utilization of scientific research methods.
2. Describe and explain developmental changes in abilities, experiencing and behavior that are proceeding during infancy.
3. Apply the knowledge of physical, cognitive and social-emotional development of children in infancy onto organizing the surroundings and inclusion of children into activities that stimulate their development.
4. Rate the influence of parental actions on children development and implications of the early development research results onto work with children, parents and educators.
5. Compare orderly development, individual differences in development and developmental difficulties in areas of physical, cognitive and social-emotional development in first two years.
6. Value the methods of researching development of children’s perception, cognition, temperament and attachment in infancy age and their advantages and disadvantages.
General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.
19. Express the necessity of lifelong learning and professional development.

Grading

Students may pass the exam by passing two tests yielding 45 points each (minimum 50% of correct answers is needed). Students who don’t want to pass exam via tests, and students dissatisfied with test results, attend the written final exam whose volume, content and pertaining ECTS points correspond with the requirements of tests conducted during the semester. The attendance of at least 70% lectures is minimum requirement, while regular class attendance yields up to 10 points. Final course grade is determined by the following points collection arrangement: Excellent 91-100 points; Very good 80-90 points; Good 69-79 points; Sufficient 56-68 points; Non-sufficient 55 points and less.

Week by Week Schedule

1. Concept of development, developmental processes and periods through lifespan; historical views of childhood and beginning of developmental psychology.
3. Theories of surroundings and learning influences: behavioristic theories (Watson and Skinner) and Banduras social-cognitive theory of learning.
5. Ethological approach (Lorenz) and theory of ecological systems (Bronfenbrenner). Biological foundations of development: coaction of genes and surroundings.
6. Developmental psychology research methods; transversal, longitudinal and sequential research design.
7. Prenatal development and the newborn baby (physical characteristics and reflexes, sensory abilities, memory and learning).
8. Development during first two years: physical and motoric development.
11. Speech development.
12. Early social and emotional development: mutual regulation of children and guardians, temperament and emotions.
13. Assessment of affection in infancy and affection determinants.
15. Final lecture.
Introduction to Journalism

Lecturer in Charge
Doc. dr. sc. Jelena Jurišić

Course Description
The aim of the course is to familiarize the students with journalism, the characteristics and specificities of journalistic activity. Furthermore, they will become familiar with the journalistic profession and the role and functions of journalists, the tools and specific conditions of their work. The course enables the students to understand and use the basic concepts of journalism, both in theory and practice, and facilitates further study.

Course Type
» Communication Sciences (Dual-major studies Study) (required course, 2nd semester, 1st year)
» Communication Sciences (Study) (required course, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Define and explain the basic concepts of journalism.
2. Employ the fundamental concepts in journalism both in other courses in the study and in practice.
3. Distinguish and explain the different theories and theoretical approaches to journalism.
4. Demonstrate the capacity to manage the resources needed for the scientific study of journalism and for following it daily for informative reasons.
5. Define and explain the functioning of modern journalism and how journalists themselves work.
6. Explain the way modern journalism functions and how journalists themselves perform their work.
General Competencies

This course enables the students to understand the role, significance and importance of journalism in the society, but also its place and importance in the communicology itself. The students will be provided with more than just the basic knowledge of journalism - they will gain a foundation for later application and upgrade throughout the study.

Grading

100% preliminary exams / final written exam

Week by Week Schedule

1. What is journalism? Overview of the historical development of the profession and its place and importance in the society.
2. The basic characteristics of the contemporary journalism.
3. Journalism: from a skill to scientific research.
4. The place of journalism in the studies of other sciences - linguistics, sociology, psychology, political science, law, history, economics.
5. Basic concepts in journalism.
7. Forms of journalistic expression - development through the history of journalism, types, creative features.
10. Journalists and their training.
11. Media organization.
12. New media.
13. Special kinds of journalism.

Introduction to Latin Philology

Lecturer in Charge

Izv. prof. dr. sc. Tamara Tvrtković

Course Description

The course Introduction to Latin Philology gives insight into classical and the Latin Philology, defining Philology as a humanistic discipline based on written texts. It examines the diverse aspects of ancient Roman (and partly Greek) world. Students are introduced to the linguistic, historical, and literary-theoretical concepts, and then the various aspects of Roman civilization (language, art, literature, philosophy, history, etc.) are processed on preserved (mostly literary) texts. Genre approach provides a basic knowledge of representative authors and works which the student will meet during the study, and also the basic knowledge of different disciplines in which philology based.

Course Type

» Latin language (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the aim of philology and specifics of Latin philology.
2. Describe the literary genres and enumerate their characteristics.
3. Recognize representative authors in Roman literature and their works.
4. Define and explain the socio-historical context.
5. Compare contemporary and ancient genres.
6. Estimate the concept of philology today.

**General Competencies**

Students will learn about various aspects of the ancient (especially Roman world) through the genre approach and on the basis of representative literary works of Roman authors.

**Grading**

Class attendance, homework, exam or colloquium

**Week by Week Schedule**

1. What is philology? The meaning of the Latin language
2. Sources for the study of the history of Latin language
3. Parallel chronology of history and literature / Since the foundation of Rome to the fall of the Western Roman Empire
4. Classification of Literature - problems
5. Quotes and genres / Literary topography
6. The beginnings of epic / Mythological epic / Ovid / Mythology
7. Basic characteristics of the epic and epic poetry / Virgil / Pax Augusta
8. The origin of tragedy and comedy / Roman Theatre / Plautus and Terence
9. Roman lyric: terminology and representatives
10. Ancient roman / Petronius and Apuleius
11. Rhetoric / Cicero / Cursus honorum
12. Roman historiography / Representatives
13. Martial and epigrams / Phenomenon comic and scoptic epigram
14. What is classical philology today? Synthesis
15. The final examination

Introduction to Psychology

Lecturer in Charge

Prof. dr. sc.
Vlado Šakić

Course Description

The main objective of the course is to familiarize the students with the basics of psychology. Through the classes the students will be presented a historical overview of psychology (psychology and antiquity, philosophical and scientific roots of psychology), they will learn of those who carried, spread and transferred the idea of scientific psychology throughout the history, the definition of psychology and its theoretical and applied branches, and they will be presented an overview of the basic theoretical and applied branches of psychology (e.g., developmental, social, clinical psychology).

Course Type

» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (required course, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the historical development of psychology.
2. Identify the philosophical and scientific roots of psychology.
3. Point out those who carried, spread and transferred the idea of scientific psychology throughout the history.
4. Distinguish different definitions of psychology.
5. Compare basic and applied branches of psychology.
6. Apply the skills of presenting psychological content through the presentation of their seminar work to colleagues.

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
3. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Grading

Class attendance – 5%
Class activity – 5%
Completing and presenting a seminar work – 10%
Two preliminary exams or the final written exam – 70% (if the student does not sit the preliminary exams, does not pass them, or is not satisfied with his success in the preliminary exams, he shall attend the final written exam)
Final written exam – 10%

Week by Week Schedule

1. Introductory lecture (scientific areas, fields and branches; information about the course "Introduction to Psychology")
2. The beginnings of the development of the idea of psychology through philosophy
3. Antiquity and early Greece: Hippocrates, Galen, Pythagoras, Democritus, Zenon
4. The significance and contribution of Socrates and Plato to the development of psychology
5. The significance and contribution of Aristotle and post-Aristotelian philosophy to the development of psychology
6. The philosophical and scientific roots of psychology during the Renaissance (Descartes, La Mettrie)
7. Philosophical and scientific roots of psychology during post-Renaissance
8. Empirism (Hobbes, Locke, Berkeley) and nativism (Leibniz, Kant)
10. The significance of Renaissance and post-Renaissance for the development of psychology
11. The development of terms and the definition of psychology throughout the history, the methods in psychology and the modern definition of psychology
12. Directions in psychology and their representatives (functionalism, structuralism, associationism, behaviorism, psychodynamic psychology, gestaltism, humanism)
13. The development of psychology in Croatia
14. The objectives of psychology, fundamental and applied branches of contemporary psychology.
15. Final knowledge assessment

Introduction to Public Relations

Lecturer in Charge

V. pred. mr. sc.
Zdeslav Milas

Course Description

The aim of the course is to familiarize the students with the basic concepts of public relations and explain key concepts, processes, theoretical approaches and models of communication. The students will learn the importance of planning and management in public relations, the characteristics of media relations and the use of various techniques in PR. The participants will be introduced to the PR areas of practice in the public, political, non-governmental and non-profit sector, as well as in the for-profit sector, particularly in corporate communication. In addition to internal communication, the course will cover crisis communication, as well as ethical and legal standards in public relations.

Course Type

» Communication Sciences (Dual-major studies Study) (public relations, 3rd semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (public relations, 5th semester, 3rd year)
» Communication Sciences (Study) (public relations, 3rd semester, 2nd year)
» Communication Sciences (Study) (public relations, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the objectives and areas of application of public relations
2. Define and describe the function of public relations in non-profit and for-profit organizations
3. Write a draft of a communication plan
4. Select techniques and tools in public relations practice
5. Distinguish different ethical theories in the application of public relations

General Competencies

Apply the knowledge of the basic concepts from public relations;
Identify and describe the place and role of public relations in the society;
Reproduce and explain the basic theory of communication, journalism, marketing, public relations and mass media;
Identify, explain and analyze the situation, innovations, challenges and issues concerning public relations;
Explain and critically analyze the acquired theoretical and practical knowledge;
Apply the skill of academic discussion and writing of academic texts.
Grading

Lecture attendance, literature reading and participation in discussions (20% of the final grade), written papers (20% of the final grade) and final exam (60% of the final grade).

Week by Week Schedule

1. Overview of the course and class obligations, the concept and definition of public relations
2. The functions of public relations: strategic planning, research, publicity, promotion, decision-making through collaboration
3. Key terms: the public, a stakeholder, public opinion, the demarcation of public relations from other forms of public communication: journalism, advertising and propaganda; public relations and marketing, the issues of building confidence: identity, image, reputation
4. The historical development of public relations (the USA, Germany, Croatia and other countries)
5. PR as a scientific discipline; models and theoretical approaches to public relations: four models of PR (Grunig), and the model and theory of excellence (Grunig), system theory
6. Planning and managing public relations (four-step model of PR management according to Cutlip: analysis, planning, action/communication, evaluation)
7. Techniques (instruments and tools) in public relations (specifically: adrema, announcements, press conferences, press releases, press kit)
8. Internal communication
9. Media relations, the role of a spokesman for the relations with the press
10. Corporate communication (the role of communication in value creation, PR as a function of management, organization of corporate communication, investor relations, managing topics, public affairs, CSR)
11. State, public and political public relations, PR roles in a democratic society, PR in the non-profit sector
12. Crisis communication
13. Public relations in sports
14. Public relations agencies
15. Ethical and legal standards in public relations

Introduction to Scientific Research

Lecturer in Charge

Doc. dr. sc. Adrijana Košćec Đuknić

Course Description

Introducing students with basic principles of scientific work, developing critical thinking and introducing them to principles of reading scientific literature. The students will get acquainted with basic principles of scientific reasoning, basic components of scientific research and basic scientific methods in social sciences. They will also get introduced to the principles of writing the scientific paper and with ethical principles in scientific work.

Course Type

» Psychology (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish scientific and pseudoscientific approach.
2. Judge the question of causality in science.
3. Evaluate critically scientific papers and theories.
4. Analyze scientific methodology and fundamental elements of research process.
5. Assess dependent and independent variable in scientific research.
6. Distinguish research approaches, designs and methods.
7. Plan the control of relevant factors in experiment.
8. Prepare research report.
9. Appraise ethical questions in scientific research.

General Competencies

9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.
11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.
15. Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.
Grading

Class attendance and participation – 25%, Tests/Exam – 75%.

Week by Week Schedule

1. Introductory class
2. Scientific and nonscientific reasoning
3. Scientific methodology and goals
4. Theories and research
5. Different research approaches
6. Basic elements of research process
7. Logic of experimentation
8. The question of causality
9. Variables in experiment
10. Control in experiment
11. Non-experimental methods
12. Qualitative research
13. Writing the scientific paper and report
14. Ethical question in scientific research
15. Concluding class

Literature

Introduction to Scientific Work

Lecturer in Charge

Izv. prof. dr. sc.
Irena Cajner Mraović

Course Description

The aim of the course is to provide students with basic knowledge of science and scientific research, as well as enable them to make independent critical appraisal of scientific content.

Course Type

» Sociology (Dual-major studies Study) (required course, 1st semester, 1st year)
» Sociology (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and use the concepts of scientific theories, hypotheses, scientific methods and explanations in science, as well as contributions by authors such as Carl Hempel, Karl Popper, Thomas Kuhn and others.
2. Explain the key concepts and ideas in the text and their interconnections.
3. Recognize and avoid basic logic, rhetoric and statistical error in the argument.
4. Analyze the visual elements of a scientific paper (tables, graphs) and avoid common mistakes.
5. Prepare a summary and paraphrase the text read, and formulate a written argument with the evidence and topic sentence.
6. Prepare a formal draft of the research paper.
7. Distinguish types of scientific work and effectively analyze them.
8. Identify the topic eligible for scientific research and explain the stages of the research project.
9. Analyze the sources of scientific information.
10. Use techniques to format citations and scientific work in accordance with the requirements of the profession and publishers.
General Competencies

Upon successful completion of the course, students will: Improve the ability to apply knowledge in practice. Develop specific analytical and research skills. Be able to effectively collect data and manage information. Be able to effectively analyze social phenomena. Develop teamwork and interpersonal skills. Develop the ability to work independently. Develop problem-solving skills. Develop a concern for the quality of scientific research. Acquire specialized knowledge necessary to perform research activities within the social sciences and further training. Be able to effectively carry out research and organize time. Be able to effectively manage research projects. Develop problem-solving skills. Develop oral and written communication in the mother tongue.

Grading

Knowledge will be tested during the semester through homework with written exam, upon completion of the course. If a student fails to hand over all homework, he/she cannot take the written exam.

Week by Week Schedule

1. Basic concepts of science (hypothesis, method, induction, deduction)
2. Effective time management
3. Techniques of critical reading
4. Analysis of visual elements
5. Errors of argumentation
6. Writing a a paragraph
7. Forming and writing the argument
8. Drafting the research
9. Stages of the research project
10. Finding scientific information
11. Quoting, paraphrasing and summarizing
12. Types of scientific publications
13. Oral presentation and other forms of scholarly communication
14. Creating a CV
15. Repeating the material and preparation of final essay

Literature

Okasha, Samir (2004). Filozofija nauke, Šahinpašić, Sarajevo
Introduction to Social Psychology

Lecturer in Charge

Prof. dr. sc. Renata Franc

Course Description

The students gain an understanding of the basic psychosocial process, theory, key research and measurement procedures in the field of social cognition and perception, attitudes and prejudices, and develop ability evaluation thereof.

Course Type

Psychology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the fundamental concepts, theories and key research in the field of social cognition and perception, attitudes and prejudice
2. Evaluate different approaches in the field of social cognition and perception, attitudes and prejudices.
3. Construct an instrument in the area of attitudes and prejudices.
4. Apply knowledge from the field of social cognition and perception, attitudes and prejudices in practice

General Competencies

2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Grading

Attendance and activity in class 5%; attendance and activity during exercises 5%; group project 10%; 70% two colloquia, each 35% (in the case of non-participation or poor achievement at colloquia, student can take the final exam, which by volume, content and the corresponding ECTS points corresponding to requirements of colloquia); oral exam 10%.
Week by Week Schedule

1. Presentation of the course organization, the definition of social psychology
2. Historical overview of social psychology - forerunners of social psychology, the development of social psychology as a scientific discipline
3. The methodology of social psychology - observation, correlational research, experimental research
4. Social cognition: defining areas, automatic and controlled thinking, schemes, priming effect
5. Social cognition - the availability heuristic, representativeness heuristic, anchoring heuristic, counterfactual thinking, controlled thinking
6. Social perception - defining of the area, non-verbal communication
7. Social perception - attribution theory, the fundamental attribution error, the role of culture in attribution, self-serving bias, defensive attribution
8. The first colloquium
9. Structure and function of attitudes - cognitive, emotional and behavioral components of attitude, cognitive function, utilitarian function, the function of social adjustment, ego-defensive function
10. Measure of attitudes - self-assessment measures (Thurstone and Likert scale, Osgood semantic differential) and indirect measures (e.g. behavioral measures)
11. Relation between attitudes and behavior, cognitive dissonance, theory of planned behavior
12. Attitudes change, Yale approach to attitude change, elaboration likelihood model, heuristic-systematic model of persuasion, attitude inoculation
13. Prejudice - definition of the main concepts (prejudice, stereotypes, discrimination), cognitive sources and causes of prejudice, sources and causes of prejudice related to attribution bias
14. The realistic conflict theory as the source and cause of prejudice, normative sources and causes of prejudice, prejudice reduction
15. The second colloquium

Literature

Introduction to Social Research Methods 1

Lecturer in Charge

Izv. prof. dr. sc.
Vanja Šimičević

Course Description

Course Type

- Sociology (Dual-major studies Study) (required course, 3rd semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
- Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
- History (Study) (elective general foundation courses, 1st semester, 1st year)
- History (Study) (elective general foundation courses, 3rd semester, 2nd year)
- History (Study) (elective general foundation courses, 5th semester, 3rd year)
- Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
- Sociology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply the steps of the scientific method
2. Interpret the epistemological basis of different types of knowledge, basic social scientific methods and the various approaches to social research questions
3. Distinguish between the requirements and limitations of the various methodologies used in the social sciences
4. Identify various modes of design for data collection
5. Explain the role of theory in preparation of the research
6. Summarize the previous research findings
7. Explain the highest ethical standards of the social research
8. Develop goals and purpose of the research
9. Develop research hypotheses (quantitative methods)
10. Construct a comprehensive research design
General Competencies

Upon the successfully passed exam, students will be able to:
Design a simple research project.
Conform to a teamwork with co-workers from various disciplines, of different attitudes or value orientations.
Explain the difference between micro and macro level of the sociological analysis.
Develop the research question related to the subject/process/phenomenon of social interest.
Employ the adequate methodological approach in the research of social phenomena.
Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects form any possible harm.

Grading

Evaluated are: A research design (30%), in-class exam (20%), final written exam (30%), obligatory class attendance (20%).

Week by Week Schedule

1. Introduction into the course, principles of the science method
2. Epistemic base of different types of knowledge; basic methods of social research
3. The nature of the data
4. The role of theory in the social research
5. Qualitative methods
6. Qualitative methods, purpose, goals and research questions
7. Quantitative methods
8. Quantitative methods, purpose, goals, research questions, hypotheses
9. Mixed methods
10. The logic of sampling in qualitative and quantitative research
11. Research ethics
12. Research ethics - informed consent
13. Research design
14. Social research as a social relationship
15. Social research as a social relationship

Literature

Miroslav Vujević (2006). Uvođenje u znanstveni rad u društenim znanostima, Školska knjiga, Zagreb
Introduction to Social Research Methods 2

Lecturer in Charge

Izv. prof. dr. sc. Vanja Šimičević

Course Description

During the course students will learn how to design a research project based on draft research design; how to choose the best method for collecting of the data while being able to explain the advantages and weaknesses of different methods; how to build the instruments for gathering of the qualitative and quantitative data; apply the basic logic of sampling in both qualitative and quantitative approaches; understand the purpose and ways of generalizing the data findings in both qualitative and quantitative approaches.

Students will carry out their own simple research project on purposive sample while respecting the basic principals of research ethics, and will write a report on their research findings. Throughout the practical tasks students will learn the research methods in social sciences but also gain an insight into social research as primarily practice of social relations.

Course Type

» Sociology (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Sociology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical perspectives and previous research findings as the basis for the development of goals and purpose of research
2. Design a research project by using the best mode of observation to answer a specific research question
3. Design instruments for the collection of the data in qualitative and quantitative research
4. Apply the logic of probability and nonprobability sampling
5. Interpret validity and reliability in quantitative and qualitative research
6. Apply the highest ethical standards of social research
7. Arrange the gathering of qualitative and quantitative data
8. Analyze and interpret qualitative and quantitative data
9. Formulate an answer to the research question
10. Write a comprehensive report on the research findings
General Competencies

Upon the successfully passed exam, students will be able to:
Organize the implementation of a simple research project.
Report on the society related data in the coherent written and oral form.
Explain causal relationships between the various social phenomena.
Conform to a teamwork with co-workers from various disciplines, of different attitudes or value orientations.
Plan own engagement in resolving of the various social issues.
Employ the adequate methodological approach in the research of social phenomena.
Use different social sciences methods in the analyses of the relevant data.
Employ the highest ethical norms in conducting of the social research with an aim of protecting the human subjects form any possible harm.
Write a comprehensive research report.

Grading

Evaluated are: A research report (30%), final written exam (50%) and obligatory class attendance (20%). Submission of the research report is prerequisite for taking the exam.

Week by Week Schedule

1. Planning a research project 1. part
2. Planning a research project 2. part
3. Choosing methods
4. Logic and techniques of sampling
5. Methods of data collection 1. part
6. Methods of data collection 2. part
7. Methods of data collection 3. part
8. Methods of data collection 4. part
9. Data analysis, 1. part
10. Data analysis, 2. part
11. Data analysis, 3. part
12. Research report, 1. part
13. Research report, 2. part
14. Research report, 3. part
15. Repetitions, exam preparations

Introduction to Social Research Methods and Statistics

Lecturer in Charge

Doc. dr. sc. Ivan Burić

Course Description

The aim of the course is to provide insight into the proper conduct of social research methods and to train the students for the proper use, evaluation and interpretation of obtained data. The course objective is to introduce the students to the basic concepts in statistics and the techniques which are necessary for various applications in the field of communicology.

Course Type

- Communication Sciences (Study) (required course, 2nd semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
- Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, describe and apply the basic methods of social research.
2. Apply the statistical literacy and methodological competences and realize their importance in the modern society.
3. Employ the basics of statistics in order to use the media on the reflexive and productive level.
4. Apply statistical thinking within the framework of an educational process.
5. Use a computer and basic statistical programs.

General Competencies

Apply the knowledge of the basic concepts of the methods in social science and statistics. Employ the basic methodological and statistical knowledge and techniques which are used in the practice of communicology, with an emphasis on the interpretation of statistical indicators, particularly those contained in the standard computer printouts. Define, describe and apply statistical thinking. Use the acquired skills of methodological presentation and communication (written and spoken). Use precise statistical ways of expression. Use a computer and the programs for the processing of statistical data. Organize data complexes into a coherent whole. Define research topics for scientific research in communicology.
Grading

Lecture attendance, literature reading and participation in discussions with the professor and the colleagues (25% of the final grade), seminar assignment (25% of the final grade) and the final exam (50% of the final grade).

Week by Week Schedule

1. Introductory lecture and the entire curriculum overview; Why we study the social research methods?
3. Types of social research.
4. Types of social research.
5. Research stages. Devising a conceptual research draft.
7. Survey.
8. Interview and experiment.
9. The concept of statistics, data and their collection, the division into descriptive and inferential statistics.
10. Editing data and forming statistical series.
11. Tabular and graphical presentation of data.
12. Mastering the skill of grouping, tabular and graphical presentation of statistical data in MS Excel.
13. Data analysis using relative numbers.
14. Mastering the skill of data analysis using relative numbers in MS Excel.
15. Application in communication sciences.

Literature

Introduction to Sociology

Lecturer in Charge

Izv. prof. dr. sc. Renato Matić

Course Description

Understand and interpret social relations, values, social processes and forms of social action in modern societies.

Understand and interpret social relations, through which individual events reflect the general social experience, values, social processes and forms of social action in modern societies.

Select information on sociology and society, which facilitate the understanding of the meaning of sociological knowledge, scientific approach to the study of society as an inevitable part of the modern body of knowledge.

Interpretation of basic sociological categories.

Course Type

» Sociology (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and interpret basic sociological concepts and theories,
2. Define and distinguish the subject of sociology and other social sciences,
3. Apply basic sociological concepts and categories in interpreting the forms of social reality,
4. Classify information on social science and society, which facilitate understanding of the meaning of sociological knowledge.

**General Competencies**

- Use general knowledge about society and social processes.
- Shape the information on society in a meaningful way in written and oral form.
- Explain the causal relationship between social phenomena.
- Work in a team with colleagues from different disciplines, different positions and orientations.
- Engage in solving social problems.
- Define the key structural factors that shape the social world.
- Define social change through classical and contemporary sociological approaches.
- Define the difference between macro and micro levels of sociological analysis.
- Define the relevance of the concepts of culture, socialization, stratification, social structures and social institutions in explaining social phenomena.
- Explain social issues in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.

**Grading**

Compulsory participation and colloquia, and oral exam.

**Week by Week Schedule**

1. Introduction to the course.
2. Introduction to the socio-historical context of the emergence and development of sociology.
3. Similarities and differences between sociology and other social sciences.
4. The subject of sociology.
5. Social Stratification.
7. Society and Religion.
8. Power and politics.
10. Work, unemployment, free time.
12. Society and Media.
14. Theoretical thinking in sociology.
15. Theme by students.

**Literature**

Introduction to the Auxiliary Sciences of History

Prof. dr. sc. Franjo Šanjek
Lecturer in Charge

Course Description

The aim of the course is to introduce students to the basic skills of research (paleography, diplomatics, chronology, heraldry, seals, historical metrology, numismatics, genealogy, historical demography, geography historijska mapping, etc.) Introduction to fundamental skills of research and achieve insight into the technical knowledge and procedures particularly for work on medieval original material in archives, libraries, etc.

Course Type

» History (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List the most important sources of Croatian medieval history written in Latin language,
2. Describe the importance of the Latin script in its meaning for Croatian cultural identity,
3. Explain the origin and development of each of the Latin script
4. Identify developmental stages and main characteristics of each Latin script for dating the manuscript,
5. Analyze and transcribe manuscripts written in Beneventan script, Carolingian minuscule, Gothic minuscule and Humanist minuscule
6. Analyze public and private documents,
7. Explain different ways and styles when dating a medieval document,
8. Define the types and methods of sealing medieval documents,
9. Explain epigraphic inscriptions.

General Competencies

After finishing the programme student will be able to:

tell what is the interpretation of history,
demonstrate the importance of interdisciplinary interpretations of historical events,
reconstruct historiographic tools in making conclusions of historical processes and events.
Grading

Evaluation of the active participation and preparation for classes, evaluated colloquium, seminar. The final exam is oral.

Week by Week Schedule

1. Introductory lecture
2. What is history? - Concept and content, creators of history: the old world and the Middle Ages, the emergence of modern erudition, erudition of the historical science (19/20 c.)
3. Palaeography: Greek, Roman and medieval Latin paleography (capital cursive minuscule, uncials, minuscule roman, italic letter, Beneventan, Carolingian, Gothic and humanistic minuscule)
4. The system stands: nomina sacra, notes iuris, abbreviation signs
5. Epigraphy: Greek and Roman epigraphy; role inscription in ancient period and the Middle Ages; epigraphic documents and history; contribution inscriptions historical science, and how to use the old labels
6. Cryptography (SECRET)
7. Diplomacy: historical development, general and special; document types (public and private); development office (Imperial, Royal, Pontifical, notary, loca credibilia)
8. Analysis of documents: the original, authentic copies, forgeries
9. Chronology - time and place in historical science: duration, rhythm and continuity; climate fluctuations, cycles and solar activity, calculation of the calendar, weather categories: short and long periods of time; Church liturgical calendar (Computus) periods, eras and styles
10. Sphragistic: Antiquity and the early Middle Ages, the technique seals, sealing manner; royal seal, physical and moral persons, modern navigation studying seals, stamps and postal stamps
11. Heraldry
12. Archival (general and specific)
13. Numismatics: the meaning of money in economics and sociology, life and death, money, typology, aesthetics and art history, and the history of money
14. Historical geography: identify sites; relationship geography and history; geohistory (historical geography), historical cartography (methods)
15. Historical metrology (old measures and weights)

Literature

Introduction to the History of Humanism and the Renaissance

Lecturer in Charge

Doc. dr. sc.
Tomislav Popić

Course Description

To acquaint students with the main events and processes which characterized the period of Humanism and Renaissance. To acquaint students with the main figures of humanism and Renaissance in the European and Croatian territories.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify main representatives of Humanism and Renaissance
2. Explain social structures and political systems in Renaissance city-states
3. Define characteristics of court Humanism
4. Describe main centres of Renaissance art
5. Explain differences in patronage patterns of ecclesiastical and lay institutions
6. Compare acquired knowledge about Humanism and Renaissance to medieval historical trends.

General Competencies

After finishing the programme student will be able to:

differentiate specificities of historical periods,
interpret historical sources,
combine different historical processes,
Appraise the value of historiographic interpretations,
tell what is the interpretation of history.
Grading

Exam: 25% class attendance; 25% written essay; 50% oral exam.

Week by Week Schedule

1. Medieval Renaissances (Carolingian, Ottonian and the 12th century Renaissance).
2. Early Renaissance in Italy.
3. Dante, Petrarch, Boccaccio.
4. Political systems.
5. Renaissance society.
7. Ivan / Joannes Polikarp Severitan.
8. Church and Renaissance.
9. Patronage and art.
10. Dalmatian city-states and humanistic circles.
11. Dubrovnik.
12. Court of Matthias Corvinus.
14. Economy.
15. Renaissance historiography.

Literature

Introduction to the Study of Croatian Culture

Lecturer in Charge

Prof. dr. sc.
Stanislav Tuksar

Course Description

Systematization of knowledge about the major aspects and developments in the Croatian culture of the Middle Ages until the 21st century

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 1st semester, 1st year)
» Croatian Studies (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Develop an awareness of the historical journey of Croatian culture and the culture across the historical Croatian lands.
2. Analyze and direct: gain basic orientation in the field of the history of art (literature, visual arts, music, film).
3. Analyze and direct: gain basic orientation in the field of the history of scientific production (natural science, social sciences and humanities).
4. Develop the awareness of multicultural and supranational dimensions of the Croatian intellectual and material culture.

General Competencies

Competently navigate through the basic determinants of the history of Croatian culture.

Grading

Written grade based on the percentage of the score achieved in the exam.

Week by Week Schedule

1. Introduction to the basic concepts of Croatian culture
2. Croatian culture of the early Middle Ages
3. Croatian culture in the 13th century
4. Croatian culture in the 14th century
5. Croatian culture in the 15th century
6. Croatian culture in the 16th century
7. Croatian culture in the 16th century
8. Croatian culture in the 17th century
9. Croatian culture in the 17th century
10. Croatian culture in the 18th century
11. Croatian culture in the 18th century
12. Croatian culture in the 19th century
13. Croatian culture in the 19th century
14. Croatian culture in the 20th century
15. Croatian culture in the 20th century

Literature

Stanislav Tuksar Repetitorij iz Uvoda u studij hrvatske kulture (skripta)
Juraj Križanić

Lecturer in Charge

Prof. dr. sc.
Alojz Jembrih

Course Description

Introduce the students to the life and work of Juraj Križanić outside Croatia in the 17th century, mostly in Russia, with his ecumenical activity, with his economic and political work, with his linguistic work, musicological work, his controversial theological work, with his reform of the Russian Cyrillic alphabet.

Course Type

- Croatian Studies (Study) (elective courses, 2nd semester, 1st year)
- Croatian Studies (Study) (elective courses, 4th semester, 2nd year)
- Croatian Studies (Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the period in which Juraj Križanić lived and worked,
2. Present and understand his occupation with missionary work in Russia,
3. Analyze, understand and answer the question: why does he write various works in exile in Siberia?,
4. Analyze and understand his so-called Pan-Slavism with ecumenical undertones
5. Analyze and understand his work "Razgovori ob vladateljstvu",
6. Explain and understand his work on Slavic grammar,
7. Explain and understand the rest of his works: "De providentia Dei", "Opovrgnuće molbe Solovčana".

General Competencies

Students will learn about Juraj Križanić as a Jesuit student in Graz, later a theologian in Bologna and Rome, his work in Croatia before heading to Russia, his mission work and writing in Russia, individual works in the areas of economy, politics, theology, philosophy, linguistics, and his place and meaning in Croatian historiography.

Grading

Class attendance 20%,
Seminar paper 30%,
Exam 50%.
Week by Week Schedule

1. Socio-political period in Croatia and Europe at the time of Križanić (1617-1683).
2. Native origin of Križanić, his education in Ljubljana, Graz, Bologna and Rome.
4. Departure of Križanić to Russia and the socio-political situation in Russia at the time.
5. His missionary commitment in the ecumenical sphere.
6. Križanić out of favor and his exile in Siberia.
7. Križanić hired as economic and political writer in Siberia.
8. Slavism of Juraj Križanić.
9. Croatian precursors of Križanić in Russia.
10. Križanić as a controversial theological writer.
11. The economical-political work of Križanić "Razgovori ob vladateljstvu".
12. Linguistic works of Križanić.
13. Križanić as the first reformer of the Russian Cyrillic alphabet.
15. Juraj Križanić in Croatian and Russian historiography.

Literature

Vatroslav Jagić, (1917). Život i rad Jurja Križanića, Knjižara Jugoslovenske akademije L. Hartmana, Zagreb

Ivan Golub (1987). Križanić, Zagreb, JAZU

Course Description

It is the objective of the course to provide students with an insight into Immanuel Kant's philosophy, primarily into his conception of idealism, his approach to the problem of knowledge, foundations of his ethics and his influence on contemporary philosophy.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain Kant’s reasons for accepting transcendental idealism
2. Differentiate the concept of judgment of contemporary logic from Kant’s epistemological concept of judgment
3. Compare and recognize relationship between perception and thinking in Kant and in the context of contemporary philosophy
4. Explain the connection between Kant’s philosophy and the development of modern science
5. Express arguments about Kant’s positive and negative understanding of metaphysics
General Competencies

After completing the course, students will be able to: (1) understand and connect the basic problems of epistemology, metaphysics and ethics with their solutions as offered by Kant; (2) explain the relevance of Kant’s conception of knowledge and action for the conceptual analysis of knowledge and action in philosophical tradition, as well as in cultural and scientific context of contemporary world; (3) recognize and evaluate the importance of Kant’s philosophy for the basic existential questions, pertaining to every individual, about the knowledge of truth and justified action.

Grading

Oral and written examinations during the semester. Essay, prepared during the semester after consultations with the course teacher, submitted no later than 48 hours before the exam.

Week by Week Schedule

1. An analysis of prefaces to the first and second edition of Critique of Pure Reason (CPR) and their interpretation in the context of German enlightenment. Joint reading and interpreting of the selected text.
2. Kant’s introductions to CPR and parallel texts in Prolegomena as a program for transcendental philosophy. Joint reading and interpreting of the selected text.
3. Kant’s theory of perception. Kant’s conception of space and time in the context of modern philosophy and science. Student presentations on Kant’s theses on transcendental idealism and his theory of space and time.
4. Tradition of the classical logic and Kant’s epistemological theory of judgment. Student presentations on the topic of concept and judgment in the 17th and 18th century and in Kant’s lectures on logic. Joint reading and interpretation of selected the text from Prolegomena about the difference between experiential and perceptual judgment.
5. Tradition of the classical logic and Kant’s epistemological theory of judgment. Student presentations on the topic of concept and judgment in the 17th and 18th century and in Kant’s lectures on logic. Joint reading and interpretation of selected the text from Prolegomena about the difference between experiential and perceptual judgment.
6. Interpretation of metaphysical and transcendental deduction of categories. The importance of parallel texts in Prolegomena. Joint reading and interpreting of the selected text. Student presentations on various interpretations of deduction of categories.
7. Interpretation of metaphysical and transcendental deduction of categories. The importance of parallel texts in Prolegomena. Joint reading and interpreting of the selected text. Student presentations on various interpretations of deduction of categories.
8. Kant’s transcendental principles as the basis of his philosophy of science in the context of modern science. Theory of science in Prolegomena and Metaphysical Foundations of Natural Science. Short student presentations on Kant’s relation to Leibniz, Newton and Bošković.
9. Kant’s transcendental principles as the basis of his philosophy of science in the context of modern science. Theory of science in Prolegomena and Metaphysical Foundations of Natural Science. Short student presentations on Kant’s relation to Leibniz, Newton and Bošković.
10. Appendices to “Transcendental Analytic” and their significance for Kant’s conception of positive metaphysics. Student presentations on Kant’s relationship to metaphysical tradition. Traditional topics in special metaphysics.

11. “Transcendental Dialectic” and the critique of metaphysics. Conception of metaphysics in Kant’s lectures. Student presentations on Kant’s relationship to metaphysical tradition. Traditional topics in special metaphysics.

12. The relationship between theoretical and practical reason according to “Transcendental Dialectic” and according to Kant’s subsequent Critique of Judgment. Student presentations on the relationship between Kant’s three Critiques.

13. The problem of determinism and freedom according to Kant’s third antinomy. Kant’s contribution to foundations of ethics. Student presentations on determinism, freedom and foundations of ethics.

14. Kant’s philosophy of mathematics according to “Transcendental Doctrine of Method” in CPR and according to Prolegomena. Joint reading and interpretation of Kant’s “Refutation of Idealism”, as well as of paragraphs about the difference between philosophical and mathematical cognition.

15. The problem of transcendental apperception and the beginning of the classical German idealism. Written exam. Student presentation (and essay) topics: Kant’s theory of perception; Kant’s transcendental idealism; Descartes and Kant; Kant’s relationship to British empiricists; Identity of the subject in Kant; Kant’s refutation of idealism; Deduction of categories in Kant; Kant’s transcendental principles and Newton’s physics; Distinction between the concepts of phaenomena and noumena; Kant’s criticism of Leibniz in the “Amphiboly of reflexive concepts”; Regulative use of the reason; Kant and the scholastic tradition.

Language and Style Practicum

Lecturer in Charge

Prof. dr. sc. Branka Tafra

Course Description

The aim of the course is to convey to the students the theoretical and practical knowledge of Croatian standard language with special emphasis on its polyfunctionality and on its use in mass media. Language will be viewed primarily from point of view of its functional, social, individual and territorial multifacetedness. The main part of the course will consist of the comprehension of grammar and linguistic norms of the Croatian standard language so that the students will later be able to apply them in their writing, but also in verbal communication.

Course Type

» Communication Sciences (Study) (required course, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the main characteristics of the Croatian standard language
2. Identify functional styles present in Croatian standard language and their particular features
3. Select the appropriate language aids in solving linguistic and stylistic issues
4. Use linguistic norm of standard Croatian language
5. Distinguish between good and bad linguistic expression
6. Apply the knowledge in their written and oral communication

General Competencies

Acquire and deepen theoretical knowledge of the Croatian standard language and its characteristics of autonomy, standardization, spatial stability and the elastic stability in time and polyfunctionality. Students will reinforce their proficiency of norms pertaining to the Croatian standard language. Students will be able to utilise their knowledge in everyday communication.
Grading

Students' work throughout the semester and class activities shall be monitored and evaluated as well as successful presentation of papers, colloquia. Two passed colloquia qualify for a written exam.

Week by Week Schedule

1. Croatian language and Croatian standard language
2. Croatian standard language - features
3. Essential normative manuals
4. Normative levels
5. Ortographic norm
6. Linguistic norm: phonology and morphology
7. Syntactic norm; written exam
8. Lexic norm
9. Word formation
10. Interlingual borrowing
11. Functional dispersion of language
12. Non-fictional writing style
13. Scientific writing style
14. Business communication
15. Review of the course; written exam

Course Description

The objectives of the items refer students the basics of Latin morphology and syntax, and thus create the basis for subsequent work independently.

Course Type

» History (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the underlying problems of Latin morphology and syntax,
2. Name forms of Latin morphology (declension, conjugation and comparison),
3. Distinguish the specifics of individual declination,
4. Define the forms of the Latin syntax,
5. Apply the acquired knowledge in translating and understanding of the text,
6. Analyze original texts in a critical way,
7. Show skills in dealing with individual assignments.

General Competencies

After finishing the programme student will be able to:
1. interpret historical sources,
2. demonstrate the importance of interdisciplinary interpretatons of historical events.

Grading

the student is in charge to attend at least 80% of the total number of lectures
student, for a positive evaluation, is required to obtain a minimum of 75 credits
during the semester and the final exam. The maximum amount of points is 150,
divided in this way - four tests, which are held throughout the semester, carrying
a total of 95, working in class 5, and the final exam 50 points.
Week by Week Schedule

1. Introduction - Overview of linguistic map of Europe and a history of Latin, a division of Indo-European languages, an overview of the language spoken or once spoken in Europe, the development of the Latin language of the local language with a negligible number of speakers to the world of language that has survived Empire in which it occurs

2. Parts of speech, reading and pronunciation - ways of pronouncing the Latin language: classical and traditional emphasis words: exercise, kind words and grammatical categories

3. The first declension - description and practicing the words I declination

4. First conjugation - present, formation and use of the present tense, the difference between assets and liabilities

5. The second declension - divisions within II. Declension: the masculine and neuter, extensions and exercise

6. Adjectives I and II. declension - a division of adjectives to declension, ways of declining certain genera

7. Present 2, 3 and 4 Conjugation - the difference in formations present within each conjugation, the use of present active and passive

8. The third declension - consonant fundamentals, methods of declining certain genera, formation basics

9. The third declension i-grounds and adjectives of the third declension - differences compared to III. declination of consonant basis, divisions within the adjectives with three, two and one endings

10. Imperfect - imperfect formation of active and passive, the use of imperfect

11. The fourth declension - divisions within IV. Declension: the masculine and neuter, extensions and exercise

12. The fifth declension - declension ways and peculiarities noun of V. declensions

13. Futur I - formation and methods of use of the future tense I. description of the differences between the first verb and 2 verbs and third and 4 Conjugation, the use of active and passive forms

14. Imperative I and II. - Description of the formation, the use of the imperative

15. Irregular verbs - the most irregular verbs and peculiarities in the formation of their forms

Literature

Latin

Lecturer in Charge

Prof. dr. sc.
Josip Talanga

Course Description

Course objectives are to (1) familiarize students with basic grammatical rules of the Latin language; (2) introduce them to Latin philosophical terminology; (3) explain to them the influence of Latin philosophical terminology on Croatian terminology; (4) enable them to compare Latin and contemporary English philosophical terminology.

Course Type

» Philosophy (Dual-major studies Study) (latin or greek, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic grammatical form and structure of the Latin sentence
2. Analyze elementary philosophical sentences in Latin
3. Recognize the basic philosophical terminology in Latin
4. Recognize the development of philosophical problems exemplified by the development of philosophical terminology in Latin, classical Greek, Croatian and other languages
5. Identify the crucial concepts of philosophers who wrote in Latin
6. Demonstrate the linguistic and substantial influence of Latin terminology on Croatian scientific terminology
7. Explain the importance of scholastic method and conceptual analysis using the examples from Latin texts

General Competencies

After completing the course, students will be able to: (1) explain the basic philosophical concepts in the context of their linguistic origin; (2) analyze philosophical terminology within particular branches of philosophy in comparison to Latin philosophical tradition; (3) recognize and evaluate the background meaning of philosophical terms in Croatian, Latin and English language.

Grading

On the basis of regular attendance and active participation in classes, homework exercises, control tests and final tests.
Week by Week Schedule

1. First declension; first conjugation present tense; auxiliary verb esse. 24 philosophical sentences for translating from Latin and 10 sentences for translating into Latin.
2. Second declension; first and second declension adjectives; second, third and fourth conjugation present tense. 17 philosophical sentences for translating from Latin and 9 for translating into Latin.
3. Third declension; present passive and deponent verbs. 40 philosophical sentences for translating from Latin and 3 for translating into Latin.
4. Third declension adjectives; imperative, imperfect and future. 35 philosophical sentences for translating from Latin and 11 for translating into Latin.
5. Repetition. 20 + 20 philosophical sentences for translating from Latin.
6. Fourth and fifth declension; perfect. 15 philosophical sentences for translating from Latin. Additional 22 + 14 sentences for translating.
7. Week 5: Repetition. 20 + 20 philosophical sentences for translating from Latin. Week 6: Fourth and fifth declension; perfect. 15 philosophical sentences for translating from Latin. Additional 22 + 14 sentences for translating. Week 7: Comparison of adjectives and adverbs; past perfect; 32 philosophical sentences for translating from Latin. Week 8: Personal, reflexive and possessive pronouns; participles and infinitives; supin, gerund and gerundive. 32 philosophical sentences for translating from Latin.
8. Personal, reflexive and possessive pronouns; participles and infinitives; supin, gerund and gerundive. 32 philosophical sentences for translating from Latin.
9. Repetition. 27 additional sentences for translating from Latin (topics from ancient philosophy).
10. Repetition. 27 sentences for translating from Latin (topics from medieval philosophy).
11. Demonstrative pronouns; accusative with infinitive; the verb esse and compounds. 45 sentences for translating from Latin (related to philosophical tradition from Descartes to Kant).
12. Demonstrative pronouns; accusative with infinitive; the verb esse and compounds. 45 sentences for translating from Latin (related to philosophical tradition from Descartes to Kant).
13. A selection from De ente et essentia by Thomas Aquinas.
14. Relative and interrogative pronouns; ablative absolute; verb eo and compounds. Selected readings from Latin translation of Aristotle’s Categoriae (4-6).
15. Numbers; verbs fero, volo, nolo, malo, fio; future exact; conjunctive forms. Selected readings from Latin translations of Aristotle, Metaphysica (IV 1-2) and De interpretatione (1-5).

Lecturer in Charge

Doc. dr. sc. Šime Demo

Course Description

The objectives of the items refer students the basics of Latin morphology and syntax, and thus create the basis for subsequent work independently.

Course Type

» Croatian Studies (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the underlying problems of Latin morphology and syntax,
2. Name forms of Latin morphology (declension, conjugation and comparison),
3. Distinguish the specifics of individual declination,
4. Define the forms of the Latin syntax,
5. Apply the acquired knowledge in translating and understanding of the text,
6. Analyze original texts in a critical way,
7. Show skills in dealing with individual assignments.

General Competencies

Identify the underlying problems of Latin morphology and syntax. Name forms of Latin morphology (declension, conjugation and comparison).

Grading

Students will write three colloquies and a final exam. Colloquies pring 67% of the grade, and final exam 33%.

Week by Week Schedule

1. Introduction - Overview of linguistic map of Europe and a history of Latin, a division of Indo-European languages, an overview of the language spoken or once spoken in Europe, the development of the Latin language of the local language with a negligible number of speakers to the world of language that has survived Empire in which it occurs.
2. Parts of speech, reading and pronunciation - ways of pronouncing the Latin language: classical and traditional emphasis words: exercise, kind words and grammatical categories
3. The first declension - description and practicing the words I declination
4. First conjugation - present, formation and use of the present tense, the difference between assets and liabilities
5. The second declension - divisions within II. Declination: the masculine and neuter, extensions and exercise
6. Adjectives I and II. declination - a division of adjectives to declination, ways of declining certain genera
7. Present 2, 3 and 4 Conjugation - the difference in formations present within each conjugation, the use of present active and passive
8. The third declension - consonant fundamentals, methods of declining certain genera, formation basics
9. The third declension i-grounds and adjectives of the third declension - differences compared to III. declination of consonant basis, divisions within the adjectives with three, two and one completion
10. Imperfect - imperfect formation of active and passive, the use of imperfect
11. The fourth declension - divisions within IV. Declension: the masculine and neuter, extensions and exercise
12. The fifth declension - dekliniranja ways and peculiarities noun of V. declensions
13. Futur I - formation and methods of use of the future tense I. description of the differences between the first verb and 2 verbs and third and 4 Conjugation, the use of active and passive forms
14. Imperative I and II. - Description of the formation, the use of the imperative
15. Irregular verbs - the most irregular verbs and peculiarities in the formation of their forms

Literature

Interni priručnik za studente Hrvatskih studija (Knezović-Demo); svaki student će na početku semestra dobiti vlastiti primjerak udžbenika

Latin 1

Lecturer in Charge

Prof. dr. sc. Pavao Knezović

Course Description

Understanding and mastering the phonology, part of morphology (declension of nouns, adjectives and pronouns part, first and second verbal stem indicative) and the basis of Latin syntax (sentence structure, verb valence, use of the preposition). The adoption of the basic concepts of grammatical analysis. Learning basic vocabulary. Introduction to Roman culture and civilization in accordance with the texts. Qualification for partial understanding and translating texts written in classical Latin.

Course Type

» Latin language (Dual-major studies Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify any forms of nouns and the present and perfect tense (indicative).
2. Apply acquired knowledge of the morphology of the Latin language in selected Latin text and translate it into Croatian.
3. Explain how the forms of nouns and verbs are used in Latin and translated into Croatian.
4. List the meaning of the Latin words of basic vocabulary without the help of dictionaries.

General Competencies

Identify any forms of nouns and the present and perfect tense (indicative). Explain how the forms of nouns and verbs are used in Latin and translated into Croatian.

Grading

During the course and exam students will face sentences and short texts of classical Latin and it will be expected of them to accurately read the text, recognize forms and simple syntactic function of certain parts of sentences. On demand they will morphologically analyze each word; based on consulting reference literature they will fit the sentence in the context of civilization; finally, with understanding and respect to the rules of the mother tongue translate the given text. These skills will be assessed during the semester and the final exam.
Week by Week Schedule

1. An introduction into the history of the Latin language and the formation of
the Latin alphabet. Phonetics in Latin (classical and traditional
pronunciation, accent).
2. Phonetics in Latin (classical and traditional pronunciation, accent). Types of
words. Grammatical categories. The first verb stem.
3. First or a- declension. Present indicative active. Infinitive of concurrence
active. Imperative I active.
4. The sentence - the basic unit of text. The second or o- declension. Adjectives
first class. Pronominal adjectives.
5. Indicative present passive. Infinitive of concurrence passive. The third
declension - consonant stems.
6. Imperfect. Prepositions (Part I). Basic elements of the sentence. The order of
words in a Latin sentence.
7. The third declension the i- stem. Imperative II. Adjectives of the second
clace. Prepositions (Part II).
8. Sentence core. Fourth or u- declension.
9. Future I. Fifth or e- declension.
11. Participle of concurrence. Peculiarities in the formation of tenses of the first
base. Prepositions(Part IV).
12. Sentence peripherals. Connectors. Personal, reflexive, possessive pronouns
and possessive reflexive pronoun.
(perfect infinitive) active.

Lecturer in Charge

Lekt.
Zdravka Martinić-Jerčić

Course Description

Mastering part of morphology (forms of the third verbal stem, subjunctive, pronouns, comparison of adjectives, formation and comparison of adverbs, numbers, words of Greek origin), and base syntax of the Latin language (syntax of numbers, comparative and superlative, semantic subjunctive). Training the subject matter from the Latin language 1 course and expanding of basic vocabulary (about 1500 words). Introduction to further basic concepts of Roman civilization. Qualifications for independent translation of simple texts written in classical Latin.

Course Type

» Latin language (Dual-major studies Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the forms of all nouns and verb tenses of all stems (indicative and subjunctive).
2. Apply the knowledge acquired in the analysis of Latin text.
3. Apply knowledge by translating independently an easier text from Latin into Croatian and vice versa.
4. Create forms transforming a simpler Latin sentence to another tense, voice or mode.

General Competencies

Identify the forms of all nouns and verb tenses of all stems (indicative and subjunctive).
Apply knowledge for translating simple texts written in classical Latin.

Grading

Students must morphologically analyze the given sentence in class, transforming them with respect to the categories of tense, number, mood and voice, and translate into Croatian and vice versa, respecting the rules of grammar and meaning of words, phrases and entire sentences. All these elements will continue to be monitored and evaluated in midterm examinations and the final exam.
Week by Week Schedule

2. Declension of Greek words in Latin. The syntax of comparatives and superlatives.
4. Comparison of adjectives (II).
7. The third verb stem (participle). Perfect, pluperfect and future II. passive.
8. The cardinal numbers up to 20. Ordinal numbers up to 20th. Stacking of subject and predicate.

Literature

Latin 3

Lecturer in Charge

Doc. dr. sc. Šime Demo

Course Description

Understanding and mastering of the syntax of the conjunctive, consecutio temporum, part of the construction of non-finite verbs (nominativus cum infinitivo, gerund, gerundive, periphrrastic conjugations) and of the syntax of the cases. Broadening, implementation and consolidation of knowledge of morphology. Establishing and expanding knowledge of the Latin vocabulary and phraseology. Training for partially understanding and translating texts written in classical Latin.

Course Type

» Latin language (Dual-major studies Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify different ways of the semantic use of the conjunctive.
2. Describe constructions of the non-finite verbs.
3. Construct sentences with the constructions of the non-finite verbs.
4. Discriminate different syntactical uses of the individual cases.
5. Estimate individual sentence with the construction of the non-finite verbs used.
6. Compare ways how to express different semantic concepts in Croatian and in Latin language.
7. Use earlier knowledge of morphology in the new texts.

General Competencies

Use earlier knowledge of morphology in the new texts. Compare ways how to express different semantic concepts in Croatian and in Latin language.

Grading

During the classes and the exam, students will be confronted with sentences and text of the classical Latin language, and they will be expected to be able to recognize syntactical and semantical functions of the individual segments. Also recognizing of the non-finite verb constructions is expected. Students are also supposed to be able to carefully translate text to the Croatian language.
Week by Week Schedule

1. Semantical and grammatical conjunctive.
2. Future active participle and periphrastic conjugation active.
3. Consecutio temporum.
4. Gerund and gerundive.
5. Periphrastic conjugation active.
6. Gerundive as adjective of the gerund.
7. Supine.
8. Subject.
9. Complements of the subject.
10. Nominativus cum infinitivo.
11. Syntax of the accusative.
12. Syntax of the dative.
13. Syntax of the genitive.
15. Expression of the relations of the tenses.

Lecturer in Charge

Doc. dr. sc.
Šime Demo

Course Description

Understanding and mastering of the syntax of the trivalent verbs; part of the construction of non-finite verbs (accusativus cum infinitivo; ablative absolute) and of the syntax of the sentence clause structure. Broadening, implementation and consolidation of knowledge of morphology and earlier learned syntax. Establishing and expanding knowledge of the Latin vocabulary and phraseology. Training for fully self-understanding and translating texts written in classical Latin.

Course Type

» Latin language (Dual-major studies Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Compose sentences with the trivalent verbs.
2. Compose accusativus cum infinitivo.
3. Analyze different types of the construction of the ablative absolute.
4. Identify different types of the attributes and of the appositions.
5. Predict different constructions of the adjectives and of the adverbs.
6. Classify sentence clause structure.
7. Explain Latin text.

General Competencies

To analize Latin sentence by meaning and its structure. To explain Latin text.

Grading

During the classes and the exam, students will be confronted with sentences and text of the classical Latin language, and they will be expected to be able to recognize syntactical and semantical functions of the individual segments. Also recognizing of the non-finite verb constructions is expected. Students are also supposed to be able to carefully translate text on the Croatian language.

Week by Week Schedule

1. Trovalent verbs.
2. Accusativus cum infinitivo.
3. Indirect matters.
4. Other complements.
5. Ablative absolute.
6. Attribution and apposition.
7. Modification of the adverbs and of the adjectives.
8. Deliberative sentences.
11. Temporal sentences.
13. Permissive sentences.
15. Attribute sentences.

Literature

Demo, Šime Latinski jezik 4 (interni priručnik)
Divković, Mirko Latinsko-hrvatski rječnik: za škole, više izdavača
Course Description

The main objective of the course is to recognize the basic stylistic terminology and give a broad picture of the stylistic characteristics of representative works of Roman prose authors (historiography with Caesar and Livy, oratory and Cicero and novel with representatives Apuleius and Petronius).

Students will be able to work by themselves on the original text written in Latin by active reading and to linguistically and stylistically analyse these texts.

Course Type

» Latin language (Dual-major studies Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define the difference between ancient rhetoric and modern stylistic
2. Identify and describe the basic styles of Roman literature;
3. Name and identify the basic stylistic means of expression;
4. Identify and name syntactic and semantic structures in the text;
5. Analyze the styles of certain author;
6. Compare the similarities and differences in the style of certain genres.

General Competencies

Students will identify and recognize stylistic means of expression and they will be able to translate the complex language structures.

Grading

Class attendance, exam or colloquium.

Week by Week Schedule

1. Introduction, Literature
2. Ancient rhetoric and modern stylistics; similarities and differences / Work in prose text: Caesar, De bello civili, III, 2 (lecture), III, 102 (seminar)
3. Basic terms of ancient rhetoric; terminology, the representatives authors / Work in prose text: Caesar, De bello civili III, 3-4 (lecture), 103-104 (seminar)

4. Main styles (genus humile, medium genus, genus sublime) / Work on prose text: Livy, Ab urbe condita, XXI, 40 (lecture), XXI, 21 (seminar)

5. "Elocutio" Quintilian: Institutio oratoria / Work in prose text: Livy, Ab urbe condita, XXI, 40 (lecture), XXI, 22 (seminar)

6. Terminology: Comparison of historiographical and rhetorical style / Work in prose text: Livy, Ab urbe condita, XXI, 41 (lecture), XXI, 23 (seminar)

7. Tropes and figures / Work in prose text: Cicero, Epistulae ad familiares XVI, 4 (lectures); Somnium Scipionis 9,10,11 (seminar)

8. Coma, colon, period (Cicero Pro Archia poeta) / Work on prose text: Cicero, Epistulae ad familiares XVI, 4 (lectures); Somnium Scipionis 12,13 (seminar)

9. Stylistic differences in Cicero's speeches and letters / Work in prose text: Cicero, Epistulae ad familiares XVI, 4 (lectures); Somnium Scipionis 14, 15 (seminar)

10. Linguistic features of imperial period; / Work on prose text: Petronius, Cena Trimalchionis XXXII (lectures); LXXI (seminar)

11. Characteristics of Petronius style / Work in prose text: Petronius, Cena Trimalchionis XXXIII (lectures); LXXI (seminar)

12. Characteristics of Apuleius style / Work in prose text: Petronius, Cena Trimalchionis XXXIII (lectures); LXXI (seminar)

14. Comparison of all writers, works and characteristics of specific genres and periods

15. Synthesis

Latin 6

Lecturer in Charge

Izv. prof. dr. sc.
Tamara Tvrtković

Course Description

The main objective of the course is to recognize the basic stylistic terminology and give a broad picture of the stylistic characteristics of representative Roman poetry works (elegy with Tibullus and Propertius, comedy with Terence, didactic epic poetry with Lucretius and satire with Juvenal). Students will be able to work by themselves on the original text written in Latin by active reading and to linguistically and stylistically analyse these texts.

Course Type

» Latin language (Dual-major studies Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and describe the types of lyric and epic and list their characteristics;
2. Identify and list poetic stylistic means of expression;
3. Identify differences among the types of lyric;
4. Apply vocabulary;
5. Recognize and name syntactic and semantic structures in the text;
6. Compare lyric or epic text with other texts by the same author or same genre.

General Competencies

Students will identify and recognize stylistic means of expression and they will be able to translate the complex language structures.

Grading

Class attendance, homework, exam or colloquium.

Week by Week Schedule

1. Introduction, Literature
2. The concept of poetry in antiquity: Aristotle and Horace / Epistula ad Pisones: Ars Poetica
3. Literary genres; work on text / Terence 806-881 (lecture); Introduction and Prologue (seminar)
4. Development of the Latin language; work on text / Terence 806-881 (lecture) 26-58 (seminar)
5. Development of comedy; work on text / Terence 806-881 (lecture) 957-1001 (seminar)
6. The lyrical forms: elegy / Tibullus I, 3 (lectures) and 1 (seminar)
7. Perception of genres in Roman poetry; work on text / Tibullus III, 19 (lectures) and 1 (seminar)
8. Structure of poetry; work on text / Propertius I, 1 (lectures) and 2 (seminar)
9. Metric terms; work on text / Propertius I, 1 (lectures), II, 12 (seminar)
10. Caesura in Roman poetry; work on the text: a comparison of Tibullus, Propertius and other elegists
11. Changing of rhythm as stylistic means, work on the text: Lucretius V, 1028-1090 (lectures) V, 925-965 (seminar)
12. Tropes and figures; work on the text: Lucretius V, 1028-1090 (lectures) V, 966-987, 1161-1178 (Seminar)
13. Semantic field, work on the text: Juvenal 268-314 (lectures); 1-40 (seminar)
14. Stylistic features of genres; work on the text: Juvenal 268-314 (lecture) 41-80 (seminar)

Course Description

Introduction into Roman literature, writers and opus of Golden age - late republic and age of August. Student is introduced to writers' history overview, their affiliation to the same scientific disciplines as well as literary genres also. First period of Golden age literature is called Cicero's period (late republic), and second is August time or Caesar’s age.

Course Type

» Latin language (Dual-major studies Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Arrange data about writers and opus of so called Golden Age, so they can be reliably abstracted from total corpus of Latin literature.
2. Identify writers of Cicero’s and August period and their value in Roman and world literature.
3. Compare knowledge about writers and opus so called Golden Age with previous period of Roman literature.
4. Categorize knowledge and apply it on other study field (Roman poetry, Roman prose etc.)

General Competencies

Identify authors of Cicero’s and August’s age among with their character in Roman and world literature. Arrange knowledge and apply it on other study field (Roman poetry, Roman prose etc.)

Grading

Participation, discussion in class. Presentation of particular writer and his work. Written examination, or oral one.

Week by Week Schedule

1. Introduction with literature and students obligations.
3. T. Lucretius Carus and didactical epic.
4. M. T. Cicero and rhetorical and philosophy development.
5. T. Terentius Varro and historiography of 1.ct. before Ch.
7. Summarizing main characteristics of Cicero’s age (examination).
8. II. part. Augustan age.
10. P. Vergilius Maro, idyllic poetry and making national epic.
11. C. Horatius Flaccus.
12. Roman elegy (A. Tibullus, S. Propertius, P. Ovidius Naso).
13. Age prose (T. Livius).
14. Summarizing main characteristics of age (examination).
15. Conclusion, discussion.

Lecturer in Charge

Prof. dr. sc.
Pavao Knezović

Course Description

To familiarize students with the writers and works of early Christian literature in Latin. By reading the original texts students will gain knowledge and ability to identify characteristics of patristic texts regarding vocabulary and patristic world view. Conducting a detailed analysis of selected texts from Jerome's translation of the New Testament students will make an inventory of lexical and syntactic peculiarities of Vulgar Latin. Students will acquire sufficient knowledge to identify the characteristics of the Latin and early Christian patristic literature.

Course Type

» Latin language (Dual-major studies Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Collect data on the patristic writers and works in order to differentiate them from writers from Roman literature classical era.
2. Identify Latin patristic writers and their value in the context of Roman and world literature.
3. Explain the importance of patristic authors works in development of Latin language and Christian world view.
4. Collect data about Latin patristic writers and to apply them in other courses
5. Combine knowledge about latin patristic writers and their works and knowledge about writers from other eras in literacy
6. Define differences between vulgar peculiarities and literate Latin.

General Competencies

Elaborate the importance of patristic writers in the development of Latin literature and Christian world view. Collect data about patristic writers and their works in order to distinguish them form the writers of other eras in Roman literacy.

ECTS Credits 3.0
English Level L1
E-learning Level L1
Study Hours 30
15
15

Teaching assistant
Prof. dr. sc. Pavao Knezović

Prerequisites
Latin Literature 4
Grading

During the course, the evaluation is comprised of: participation in the lesson exercises, writing the essay, two written colloquiums during the semester or final written and oral exam.

Week by Week Schedule

1. Early Christian literature; term and span. Characteristic deviations in use of prepositions
5. Arnobius; Navatianus, Lactantius.
6. The age of great Church fathers: Ambrose, Jerome, Augustin, Prudentius.
7. The age of great Church fathers: Ambrose, Jerome, Augustin, Prudentius.
8. The age of great Church fathers: Ambrose, Jerome, Augustin, Prudentius.
9. The age of great Church fathers: Ambrose, Jerome, Augustin, Prudentius.
10. The age of great Church fathers: Ambrose, Jerome, Augustin, Prudentius.
11. The age of great Church fathers: Ambrose, Jerome, Augustin, Prudentius.
12. Halcidius, Priscianus, G. M. Victorinus
13. Iuvencus, Comedianus, Dracontius, Sedulius
14. Leo the Great, Cassiodorus, Benedict
15. Leo the Great, Cassiodorus, Benedict

Literature

Logic 1

Lecturer in Charge

Prof. dr. sc.
Srećko Kovač

Course Description

(1) To become familiar with and to understand basic logical (syntactic and semantic) concepts, (2) to master the formal language of first-order logic and techniques of the translation of Croatian sentences into the logical language,

(3) to master the formal methods of proof in first-order logic.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply logical formalization to simpler, concrete examples from the philosophical literature
2. Explain basic logical concepts: proposition, formula, truth, validity, consequence, provability, consistency
3. Interpret the distinction between the logical syntax and logical semantics
4. Apply logical procedures in solving basic types of logical problems (validity, satisfiability, equivalence)
5. Construct a truth-tree or a simpler formal proof
6. Explain the use of formal logic in the logical analysis of Croatian sentences
General Competencies

After successfully finished course students will be able to (1) interpret the role of logic and logical concepts in philosophy, (2) apply logical formalization to simpler, concrete examples from the philosophical literature.

Grading

During the course, at each meeting short assignments are being written (for + or mark) with the possibility of the joint work, during the semester three individual assignments are written (for a numeric mark). By written assignments and written exam mainly technical skills are checked, whereas at the oral exam the understanding of concepts and problems is checked.

Week by Week Schedule

1. The concept of logic, logical language, and inference (2+2)
2. Syntax of the propositional logical language, proposition (2+2)
3. Semantics of the propositional logical language, truth (2+2)
4. Translation of Croatian sentences into the propositional logical language (2+2)
5. Validity, consequence, truth-tree (2+2)
6. Provability, inconsistency and propositional deduction (2+2)
7. Syntax of the first-order logical language, formula, quantifiers (2+2)
8. Semantics of the logical first-order language, first-order truth (2+2)
9. Translation of Croatian sentences into the logical first-order language (2+2)
10. Logical opposition and the square of opposition (2+2)
11. Semantic properties in the first-order logic and first-order truth-tree (2+2)
12. Deductive concepts and first-order deduction (2+2)
13. First-order logic with identity (2+2)
14. Methods and procedures in first-order logic with identity (2+2)
15. Formalization of definite descriptions, uniqueness and numbers (2+2)

Literature

Čirović, B. (1996). Uvod u matematičku logiku i teoriju rekurzivnih funkcija (1 od prva 4 naslova), FTI D. I., Zagreb

Logic 2

Lecturer in Charge

Prof. dr. sc.
Srečko Kovač

Course Description

(1) To prove the main meta-theoretical results about first-order logic, (2) to make students familiar with the problems of algorithms in logical methodology (2) to make students familiar with the basics of higher-order logic, its properties and motives. On the ground of this, the aim is to show how to approach to ontological problems by means of logic.

Course Type

» Philosophy (Dual-major studies Study) (required course, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and interpret the philosophical (especially ontological) relevance of logical methodology,
2. Explain the basic properties of logical systems and procedures: soundness, completeness, computability and decidability
3. Interpret the basic distinctions between first-order logic, first-order arithmetic, and higher-order logic
4. Interpret the reasons of the appearance of logical antinomies and apply logical knowledge in their solving

ECTS Credits 7.0
English Level L1
E-learning Level L2
Study Hours 30

Teaching assistant
Dragana Sekulić, dr. sc.

Prerequisites
Logic 1
5. Describe and draw a flowchart of a simpler register machine and describe it as a first-order inference
6. Select a logical approach in studying basic philosophical questions
7. Apply the logical methodology in the treatment of philosophical problems

**General Competencies**

After successfully finished course students will be able to (1) describe and interpret the philosophical (especially ontological) relevance of logical methodology, (2) apply the logical methodology in the treatment of philosophical problems like the relationship of truth and proof, objective world and abstract syntactic systems, scope and limits of mechanical procedures, the relationship between abstract and concrete objects etc.

**Grading**

During the course, at each meeting short assignments are being written (for + or mark) with the possibility of the joint work, during the semester three individual assignments are written (for a numeric mark). By written assignments and written exam mainly technical skills are checked, whereas at the oral exam the understanding of concepts and problems is checked.

**Week by Week Schedule**

1. Truth functions and expressive completeness (2+2)
2. Reduction of logical language to a smaller number of operators and mathematical induction (2+2)
3. Duality laws (2+2)
4. Soundness of first-order deductive system (2+2)
5. Maximal consistency and Lindenbaum's lemma (2+2)
6. Omega-completeness and the sturated sets lemma (2+2)
7. Canonical models and the theorem of completeness (2+2)
8. Löwenheim-Skolem theorem, compactness (2+2)
9. Decision procedure and Church's thesis (2+2)
10. Formalization of the concept of computability, register machine and the halting problem (2+2)
11. Theorem of undecidability of first-order logic (2+2)
12. Arithmetization of syntax (2+2)
13. Gödel's incompleteness proof (2+2)
14. Logical and semantic paradoxes (and their ontological aspect) (2+2)
15. Solution of the paradoxes in simple type theory, language and semantics of higher-order logic (2+2); incompleteness in higher-order logic (2+2)
Literature

Magazines and Periodicals

Lecturer in Charge

Doc. dr. sc. Jelena Jurišić

Course Description

Present all possible ways of writing in weekly, monthly and bimonthly magazines and train students to write in magazines and periodicals with a critical perception of reality. Furthermore, the intention is to train students to work for a magazine or a periodical, that is, to participate in editorial board, collaborate with other members of the editorial staff and conduct some field work.

Course Type

- Communication Sciences (Dual-major studies Study) (agencies-the press, 4th semester, 2nd year)
- Communication Sciences (Dual-major studies Study) (agencies-the press, 6th semester, 3rd year)
- Communication Sciences (Dual-major studies Study) (elective courses, 4th semester, 2nd year)
- Communication Sciences (Study) (agencies-the press, 4th semester, 2nd year)
- Communication Sciences (Study) (agencies-the press, 6th semester, 3rd year)
- Communication Sciences (Study) (elective courses, 2nd semester, 1st year)
- Communication Sciences (Study) (elective courses, 4th semester, 2nd year)
- Communication Sciences (Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define magazines and periodicals.
2. List, apply and identify common codes and standards of journalistic writing for magazines and periodicals.
3. Distinguish, in theory and use, between reporting for daily newspapers and that for magazines and periodicals.
4. Define and know the work of a magazine or periodical editorial staff of and a development process.
5. Demonstrate the knowledge and use of a news writing style in reporting.
6. Define, explain and apply the skills of editing a text.
7. List, identify and use typical magazine and periodical forms.
8. Demonstrate knowledge of and apply journalism ethics for work in magazines and periodicals.

ECTS Credits 4.0
English Level L1
E-learning Level L1
Study Hours 15
15

Teaching assistant
Martell Vukušić, dipl.nov.
General Competencies

Apply knowledge of the basic concepts of communication sciences and journalism related to the subject; Identify and describe the place and the role of journalism and mass media in society; Explain and critically analyze the acquired theoretical and practical knowledge; Identify, explain and analyze the situation, innovations, challenges, and issues in the media and journalism; Apply acquired journalistic skills in reporting for magazines and periodicals;

Grading

Class attendance and participation in the course discussions are particularly taken into account, in addition to writing articles and the final written and oral exam.

Week by Week Schedule

1. Introductory lecture: Introduction to the course content and duties and tasks - the layout of the course. Seminar: Introduction: the questionnaire is handed out for the purposes of a quality individual work and progress. Writing an article without using the computer for the sake of a better insight into the current writing ability of each student.

2. 2nd lecture: General standards of journalistic writing - general presentation of writing rules in journalism. Seminar: Individual work with each student on the questionnaire and an article in order to gain a better insight into the current state of a student’s journalistic writing, and then determine thematic areas in which each student will create topics for an impromptu editorial board and write articles.

3. 3rd lecture: Differences between daily and weekly / monthly publications: differences in the way of work, approach and thematic content of the publications. Seminar: Surveying weekly and daily editions and identifying important differences.

4. 4th lecture: The role and importance of the editorial board. What is an editorial board, what purpose does it have and what is expected of a young journalist? Seminar: Understanding the psychology of the editorial committee and the work on the topic development. How to identify appropriate topics and how to present them?

5. 5th lecture: From the editorial staff to the final text: a piece of journalism from the editorial staff to a text that is ready for printing. Seminar: Incorporating TEXT FEATURES (headline, title and subtitle).

6. 6th lecture: The writing style and language: the manner in which a text is written, the basic rules, what we must, and we should not do in the text. Special emphasis on writing in magazines and periodicals. Seminar: Incorporating TEXT FEATURES (headline, title and subtitle).

7. 7th lecture: Text composition: the 5W rule, the importance of the first and last sentence, introducing new people and information, the sequence of events. Seminar: Shortening the text to a preset size, adjusting it to the available newspapers space.

8. 8th lecture: Developing the topic in writing: setting, presenting research results, new insights, conclusion-making and commentary. Seminar: Shortening the text to a preset size, adjusting it to the available newspapers space.

9. 9th lecture: Relationship towards information sources: personal contacts and responsibilities towards people from whom we receive information; written/tangible/sources; where and how to verify information. Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.
10. 10th lecture: Relationships and duties in the newsroom: the importance of cooperation with other colleagues in the newsroom. Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.

11. 11th lecture: Responsibility towards the editor, owner and reader. Seminar: Writing the outline, connecting the outline and the main text, writing subheadings within the text.

12. 12th lecture: Journalistic forms. Special reference to magazines and periodicals. Seminar: Individual presentations of finished research projects and presentation of content.

15. 15th lecture: A visit from the chief editor of one of the leading Croatian weekly or monthly newspapers. S: Writing an article of 3 standard pages + an outline of 600 characters.

Marketing Communications and Publicity

Lecturer in Charge

Izv. prof. dr. sc.
Nada Zgrabljić
Rotar

Course Description

The main objective of this course is to introduce students to the basics of marketing communications and publicity, as well as their role in the marketing process. Students should acquire the basic concepts and theories and be able to apply them.

Course Type

» Communication Sciences (Dual-major studies Study) (public relations, 3rd semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (public relations, 5th semester, 3rd year)
» Communication Sciences (Study) (public relations, 3rd semester, 2nd year)
» Communication Sciences (Study) (public relations, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, understand and apply integrated marketing concepts, principles and the terminology in a business and non-profit environment.
2. Explain and understand the role of integrated marketing communications and of the professionals who use it in an organization;
3. Define, explain and use the skills of advertising campaigns, press releases, sales promotion, and other elements of the promotional mix;
4. Develop a unique promotional plan for real companies;
5. Demonstrate the ability to understand the role and importance of publicity of organization and its products.
General Competencies

Apply knowledge of the basic concepts of marketing;
Identify and describe the place and role of marketing and marketing communications in society;
Reproduce, apply and explain basic theories of marketing that can be applied to the main functions of marketing communications;
Identify, explain and analyze situation, innovations, challenges and problems in marketing and marketing communications;
Use marketing techniques that can be applied to all major marketing communication functions: advertising, direct marketing, sales promotion, public relations and personal selling;
Define, explain and critically analyze features of marketing activities;
Effective group and independent work.

Grading

10% Lecture attendance;
10% Taking part in lectures;
50% Project;
10% Presentation of the project;
10% Grading other teams’ presentations;
10% Team’s grade.

Week by Week Schedule

1. Introductory lecture - inform students about the content and objectives of the course and student responsibilities
2. Fundamentals of marketing communication
3. Fundamental aspects of communications science
4. Internal marketing communication
5. Basic concepts of organisation’s identity, image and reputation influence on marketing
6. Integrated Marketing Communications
7. Analyzing communication situations
8. Communication Strategies
9. Communication Strategies
10. Media planning in marketing communications
11. Creating marketing communications
12. Publicity
13. Cooperation with agencies
14. International marketing communications
15. The future of marketing and corporate communications

Literature

Marko Antun de Dominis' Message of Peace

Lecturer in Charge

Prof. dr. sc. Mijo Korade

Course Description

The aim of the course is to introduce the idea of the famous Croatian scientist and thinker Marco Antonio de Dominis (1560-1624) on peace, tolerance, co-existence of different nations and religions, respect the secular and ecclesiastical authorities, spiritual and material, etc. through reading and analysis of selected texts from his major works, and compare his ideas with other European thinkers on the same and similar issues.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
» History (Study) (elective courses / working groups, 1st semester, 1st year)
» History (Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Study) (elective courses / working groups, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and identify the main settings of the life and activity of De Dominis.
2. Explain the main guidelines of his works, ideas and controversies that his acts caused throughout history.
3. Analyze the main features of life and activity of individual European thinkers and writers that will be processed.
4. Compare similar ideas, thoughts and preferences between De Dominis and the respective European thinkers.
General Competencies

After finishing the programme student will be able to:
defend his/her own opinion in discussions on different historical events and processes,
demonstrate the importance of interdisciplinary interpretations of historical events,
differentiate specificities of historical periods,
interpret a historical source,
write an essay on different historical periods,
appraise the value of historiographic interpretations.

Grading

The activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is written.

Week by Week Schedule

1. Dominis advocate of peace
2. Dominis for religious reconciliation and rapprochement ("ecumenism")
3. Dominis of parliamentarism in the Church (the collegiality of bishops)
4. Dominis for separation of Church and state
5. Context and predecessors Dominis - Marsilius of Padua, "Defensor Pacis"
6. Thomas More - "Utopia"
7. Erasmus of Rotterdam - "Christian monarch"
8. Frane Petric - "Happy Town"
9. Nicholas Gucetic - "State Management"
10. Tommaso Campanella - "Città del Sole"
11. Hugo Grotius and Thomas Hobbes
12. Dominis in Senj - A. Senoa: "Beware of Senj hands"
13. Dominis in Split - reform and controversy
14. Dominis and Ivan Supek - "Heretik"
15. Dominis in England - transition or reconciliation

Literature

Mass Communication: Legal Aspects

Lecturer in Charge

Izv. prof. dr. sc. Nada Zgrablić Rotar

Course Description

The aim of the study course is to familiarize students with the principle of freedom of thought, speech and thinking through a system of mass media, to introduce them to the Croatian media system and media legislation and the introducing major international regulations governing matters of public communication, the right to freedom of speech, the right of access to the media, rights to information and copyright protection.

Course Type

- Communication Sciences (Dual-major studies Study) (required course, 6th semester, 3rd year)
- Communication Sciences (Study) (required course, 6th semester, 3rd year)
- Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
- History (Study) (elective general foundation courses, 2nd semester, 1st year)
- History (Study) (elective general foundation courses, 4th semester, 2nd year)
- History (Study) (elective general foundation courses, 6th semester, 3rd year)
- Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use theories and terms pertaining to freedom of speech, opinion and thinking.
2. Explain Croatian media legislation.
3. Use major international regulations governing principles of human rights of communication (the UN Universal Declaration of Human Rights, the UN Declaration on the Rights of the Child, etc).
4. Demonstrate the ability to research and analyzes freedom of speech in Croatian media system.
5. Distinguish relationships inherent to media regulations and right to privacy.
6. Operate Croatian media law regulation and copyright; practical application of rights.
General Competencies

Apply knowledge of the basic concepts of communication science and journalism, which are related to subject course;
Apply knowledge of fundamental concepts from other social sciences involved in the study programme, especially rights;
Reproduce, explain and apply the basic theory and teachings about the legal aspects of mass communication, mass media and journalism;
Explain and critically analyse the acquired theoretical and practical knowledge;
Identify, explain and analyse the situation, challenges and problems in the legal regulation of media and journalism in general.

Grading

50% student paper, 50% exam

Week by Week Schedule

1. Introduction.
2. Croatian media system.
5. Act on Croatian national Information agency.
6. Act on digital media.
7. Act on Croatian radio and Television.
8. Ethical code of journalists.
9. Ethical code of advertisers.
10. Limitations to the freedom of expression.
13. Rights to access to information.
15. Breach of copyright and the Internet.
Literature

Mass Communication Research: A Historical Overview

Lecturer in Charge

Doc. dr. sc.
Ivan Burić

Course Description

Introduce students to the knowledge of the historical development of media studies and mass communication at home and abroad, and instruct them in its current systematics as well as in different approaches to this research. In the practical part, students will renew the knowledge of the methodology of social sciences, and try out for themselves a simple research of communicators, messages, media and recipient.

Course Type

» Communication Sciences (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Communication Sciences (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and explain key events from the history of mass communication.
2. Classify a communication process and explain classification of research of mass communications.
3. Demonstrate ability to use professional literature and critical interpretation thereof.
4. Classify a communication process and explain classification of research of mass communications.
5. Demonstrate ability of efficient teamwork.
6. Explain and apply methods of critical analysis to the acquired theoretical knowledge.

General Competencies

Identify and describe the position and role of communication science in society. Indicate and explain key events and processes of history of communication science, especially the most important researches. Define research topics for scientific research communications. Reproduce and explain the fundamental research of mass communication, and theories arising from them.
Grading

Of particular importance for grading are the attendance of classes and active taking part in discussions. Papers (presentations and student papers), written exam and oral exam.

Week by Week Schedule

1. L: Introductory lecture: The communication process according to Lasswell formula - the structure of the course S: Introduction to the seminar: Recap of social science methodologies.
2. L: Origins of education of journalists and media research worldwide - A short historical overview of the communication sciences. S: Division of seminar topics: Research communicator, message and media. Reading the presentation of the literature on early studies of media in Croatia, analysis professional and popular periodicals dealing with journalism and media. Small research projects on communicators, messages and media in Croatia.
3. L: The development of media and communication research in Croatia: from reflection on newspapers and journalists to university communications disciplines. S: The first marketing research media in Croatia (Vjesnik and Faculty of Political Sciences) - Student papers. First part.
4. L: Exploring the communicator - the term Gatekeeper. Who decides what is news and what is not? S: The first marketing research of media in Croatia (the Vjesnik and Faculty of Political Sciences). Student papers. Second part.
5. Review of individual works in the preparatory phase.
7. Review of individual works in the preparatory phase.
8. L: Exploring media, within the system: a communicator - content - Media - recipient - effect. Differentiation concept, types, levels ... S: Individual presentations of finished research projects and presentation of content.
10. Review of individual works in the preparatory phase.
11. L: The beginnings of research of recipients and effects of mass communication in the United States. S: Individual presentations of finished research projects and presentation of content.
12. L: A psychological approach to the study of communication. Four messages in one. S: Individual presentations of finished research projects and presentation of content.
15. L: The function of the media for society, political system and the individual. Germany Political Science Research. S: Individual presentations of finished research projects and presentation of content.

Literature

Media and Communication History

Lecturer in Charge

Prof. dr. sc.
Mijo Korade

Course Description

Present the essential paths of development of media and communication and point out the dependency of that development on development of society and information techniques and technologies. Students should further receive basic orientation in the historical literature, and be instructed in its use for scientific and journalistic purposes.

Course Type

- Communication Sciences (Dual-major studies Study) (required course, 2nd semester, 1st year)
- Communication Sciences (Study) (required course, 2nd semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
- History (Study) (elective general foundation courses, 2nd semester, 1st year)
- History (Study) (elective general foundation courses, 4th semester, 2nd year)
- History (Study) (elective general foundation courses, 6th semester, 3rd year)
- Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce the historical development of social communication and its technical resources. Knowing the professional historical literature and critically read. Identify the problems of modern social communication and its challenges. Connect their existing knowledge of history with a new area of education. Engage in the use of literature in the preparation of scientific and newspaper articles with its help.
2. Demonstrate knowledge of professional historical literature and read it critically.
3. Identify the problems of modern social communication and its challenges.
4. Attach the existing knowledge of history to a new area of education.
General Competencies

Identify and describe the place and role of communication and journalism in society. Indicate and explain key events and processes of world history communications and journalism. Explain and critically analyze the acquired knowledge.

Grading

Attendance and participation in discussions, seminars, written and oral exam are valued separately. Their average provide the final assessment.

Week by Week Schedule

2. L: From animal signals to language communications. S: Natural, verbal and written forms of communication.
5. L: Media and meta-media. S: China and India.
10. L: Books as a universal data storage media. S: Gutenberg’ invention of the printing beginnings.
12. L: The establishment of television in 1950's. S: New technical inventions: the telegraph, telex, telephone, recordings from vinyl records to mp4; image media from photography to motion pictures and film.
15. L: Internet and virtual reality. S: Normative regulation of the media and social communication.
Literature

Sapunar, Marko (2002). Opća povijest novinarstva, ITG, Zagreb

Media and Terrorism

Lecturer in Charge
Doc. dr. sc. Anita Perešin

Course Description
The aim of the course is to provide insight into the global security threats, primarily contemporary transnational terrorism which is now considered the greatest threat to national and international security and the role of the media in its development, threats, consequences and suppression.

Course Type
- Communication Sciences (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
- Communication Sciences (Study) (elective courses, 1st semester, 1st year)
- Communication Sciences (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:
1. Define the fundamental concepts of communicology and journalism associated with the media coverage of terrorism;
2. Define basic concepts of security sciences, political science and geopolitics associated with the studied area;
3. Identify and describe the place and role of journalism and mass media in the society in terms of reporting on terrorism;
4. Analyze the effects of media content concerning terrorism on audiences;
5. Describe and critically analyze the specific characteristics of the media and their actions in reporting on terrorism;

General Competencies
Apply the knowledge of basic concepts from communicology and journalism associated with the course subject matter; Apply the knowledge of basic concepts from the security sciences and geopolitics; Identify and describe the place and role of journalism and mass media in the society in terms of reporting on terrorism; Define, explain and distinguish the effects of different media content on the attitudes, knowledge and behavior of the audience.

Grading
Lecture attendance, literature reading and participation in discussions (25%), seminar paper (25%), exam (50%).
Week by Week Schedule

1. Historical development of terrorism until the French Revolution;
2. Historical development of terrorism from the French Revolution to the present day;
3. Historical development of terrorism from the French Revolution to the present day;
4. Historical development of terrorism from the French Revolution to the present day;
5. The causes of radicalization in the contemporary Muslim society;
6. The causes of radicalization in the western societies;
7. The creation and global reach of the Al-Qaeda network;
8. The creation and global reach of the Al-Qaeda network;
9. Characteristics of the modern mega-terrorism and the post-Al-Qaeda;
10. The role of media in the contemporary society;
11. "Symbiotic relationship" between the media and terrorism;
12. "Symbiotic relationship" between the media and terrorism;

Media Communication Stylistics

Lecturer in Charge

Doc. dr. sc. Dubravka Zima

Course Description

The aim of this subject course is to define elements that make up styles used for media communications and to apply the acquired knowledge to define own style in different genres of printed and electronic media.

Course Type

» Communication Sciences (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use acquired capabilities of synthesis and analysis
2. Demonstrate oral and written communication in native language
3. Apply the acquired knowledge of journalist stylistics in practical work
4. Use the capabilities of teamwork
5. Apply the acquired abilities of critique and self-evaluation and creation of new ideas (creativity)

General Competencies

Apply knowledge of the basic concepts of communications, journalism and public relations. Explain and critically analyze the acquired theoretical and practical knowledge. Effectively work in a team. Demonstrate and apply knowledge of the Croatian language and culture journalism stylistics verbally and in writing. Use defined stylistic preferences in forming of their own style and personality and achieve credibility in communicating and presenting information.

Grading

100% colloquium / exam.

Week by Week Schedule

1. Functional style, stylistics, figures of speech, examples of the texts, exercises
2. The basic journalistic genres, exercises on the texts and newspaper articles, writing of their own administrative texts
3. Interview, report, critique, review, comment - exercise, identification of individual genres
4. Interviewing - pair work
5. The exercises in grammar and spelling (texts of the printed editions of daily newspapers)
6. Language taboo
7. Identification of euphemism or dysphemism
8. Writing a report
9. Colloquium 1
10. Phraseology, exercise
11. Ad/commercial, language and non-lingual code, exercise
12. Ambiguity - polysemy and homonymy, synonymy .. exercises
13. Writing of a communique, exercise
14. Writing of a communique, exercise
15. Colloquium 2

Gramatika hrvatskog jezika (Barić, Lončarić, Malić, Pavešić, Peti, Zečević, Znika), Školska knjiga, Zagreb, 1997.
Course Description

The increasing presence and popularity of technologies such as broadband, mobile internet, social networks and IPTV fundamentally change the way we work, that we have fun and the way we consume media. The convergence of media is no longer future, but rather a framework in which modern media and mass communication operate. What occurs is intertwining, merging and combining of various media with the help of telecommunications functionally into one. Ultimately, the convergence of media results in a change of the organization of media, content and manner of its distribution, habits and the role of consumers, who from consumers of media content become “prosumers” and, also, in new approaches to media management, advertising, marketing and public relations. The main objective of this course is to familiarize the students with this new framework, which has changed the mass media and journalism in general, but also communicology, which previously studied media as separate media platforms, and now must study them as a combination of multiple platforms and accordingly adjust research methodology. The students will also be introduced to the rules and regulations imposed by the new media and consumers themselves, and the knowledge of how to create a rounded digital identity in the 21st century (of a journalist, as well as of a media product). Accordingly, the students will during the course acquire knowledge and skills that are necessary for their work in a converged media environment and so they could exploit the opportunities offered to them on individual platforms, and ultimately allow them to create their own media product during the course, adapt it to various technological devices and place it on the market.

Course Type

» Communication Sciences (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Communication Sciences (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts of media convergence and converged journalism;
2. Identify, understand and describe the place and role of media convergence in the contemporary journalism and society;
3. List, explain, recount and apply the basic theory of the convergence of media and of journalism which arose from it;
4. Identify, explain and critically analyze the contemporary situation, development and challenges, positive and negative, in this area;
5. Use converged media;
6. Produce announcements for converged media applying the acquired journalistic skills necessary to work in a converged media environment;
7. Distinguish, define and explain the specific characteristics of converged media, recognize the specificities of their operation;
8. Demonstrate effective completion of tasks independently and in a team;

General Competencies

Apply the knowledge about the basic concepts from communicology and journalism which are related to media convergence; Identify and describe the role and place of the convergence of media and journalism in the contemporary society; Reproduce, apply and explain the basic theories of media convergence and converged journalism; Explain and critically analyze the acquired theoretical and practical knowledge; Identify, explain and analyze the situation, innovations, challenges and problems of media convergence and converged journalism; Define, explain, distinguish and critically analyze the specific characteristics of converged media and their operation; Apply the acquired journalistic skills of converged journalism in reporting for the media.

Grading

50% fulfilling seminar assignments; 50% exam.

Week by Week Schedule

1. Introduction to basic concepts
2. Objectives of media convergence
3. Comparison of the characteristics of traditional and converged media
4. Specific characteristics of journalism in a converged media environment
5. Specific characteristics of journalism in a converged media environment
6. Converged redaction of structures, news selection, production
7. Converged redaction of structures, news selection, production
8. Media content of converged media, special characteristics, differences in relation to the content of traditional media
9. Media content of converged media, special characteristics, differences in relation to the content of traditional media
10. Infotainment product of converged media
11. Management of converged media - ways of business operation, specific characteristics of advertising and marketing approaches
12. Management of converged media - ways of business operation, specific characteristics of advertising and marketing approaches
13. Business communication via converged media, adaptation of public relations to new platforms and channels
14. Business communication via converged media, adaptation of public relations to new platforms and channels
15. Converged audiences from consumers to producers of media content

» Communication Sciences (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define basics of the process of the development of European integration
2. Define the role and the meaning of the media in European Union
3. Analyze role and the meaning of printed media in specific membering countries.
4. Explain the relationship of media and European integration.
5. Describe the status of media in the EU countries.
6. List most important media corporations in the EU countries
7. Relate basics of media control in the EU countries
8. Compare legal status of media corporations in different EU countries
9. Develop an interest for the research of media in EU countries
10. Use acquired knowledge on media in advancing of the freedom of the press

General Competencies

Student will be able to identify and distinguish the underlying characteristics of the EU institutions, its historical evolution and the way of action and the role of print media in them.

Grading

Written exam, term exam, seminar, presentation.

Week by Week Schedule

1. Meaning of European integration
2. Development of European integration
3. Promoters of process of EU integration
4. Role of individuals in process of EU integration
5. Evolutions of EU Institutions
6. Fundamenta Treaties
7. Initiatives for the strengthening of the European integration process
8. Maastricht Treaty and the creation of EU
9. Lisbon Treaty
10. Development of printing media in EU countries
11. Ideology and printing media

Medieval European History

Lecturer in Charge

Prof. dr. sc.
Mladen Ančić

Course Description

The main aim of this course is to provide students with basic knowledge about the medieval period, and to acquaint them with the main political, institutional, social, economic, cultural and religious medieval trends. Besides acquiring knowledge in basic data, students will be encouraged to analyse characteristically medieval processes in comparative perspective and to develop sensibility for changes that were occurring during a thousand year long period. Students will be able to perceive peculiarities of medieval society, and to detect social, religious and political continuities and discontinuities from the late antiquity to the early modern and even until modern era. The aim is, also, to elaborate medieval history topics which were insufficiently analysed in historiography and those which require new interpretations.

Course Type

» History (Dual-major studies Study) (required course, 2nd semester, 1st year)
» History (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify causes of new political geography of the European territories from 4th to 7th century
2. Describe main processes in social, cultural and political history of medieval times
3. Describe key turning points in the development of medieval civilisation
4. Analyze process of layering medieval civilisation onto Western and Eastern societies
5. Describe main directions of Arab conquest
6. Explain changes in European society around the year 1000
7. Describe medieval political systems
8. Analyze relations between Church and the state in the Middle Ages
9. Identify changes in society in the late medieval period
General Competencies

After finishing the programme student will be able to:
describe historical processes,
explain cause and effect relations of historical events and processes,
identify major issues in interpretation of history,
tell what is the interpretation of history,
design his/her own conclusion on different historical events and processes,
demonstrate the importance of interdisciplinary interpretations of historical events,
reconstruct historiographic tools in making conclusions of historical processes and events.

Grading

Written exam: 40 %; oral exam: 60%.

Week by Week Schedule

1. What are the “Middle Ages”: question of periodization
2. Continuity and discontinuity with Roman civilization
3. Reconstruction of Europe: barbarian invasion and the birth of medieval civilization
4. Realm of Franks
5. Emergence and development of the Byzantium in the Middle Ages
6. Arab conquests
7. Christianization
8. Transformation of the year 1000 and the concept of the Three orders society
9. “Feudalism”: reality or construct
10. Medieval society: nobility, peasantry, burghers
11. Medieval monarchies
12. Relations between papacy and secular rulers
13. Scandinavia and east-Slavic states
14. Christian society: the age of monasteries and the age of cathedrals
15. City-states and the Renaissance

Literature

Medieval Towns in Europe

Lecturer in Charge

Izv. prof. dr. sc. Irena Benyovsky
Latin

Course Description

The history of European towns will be considered chronologically and thematically. The students will be introduced to the design of medieval towns from the late antiquity to the early modern age. The most important processes in this development will be analyzed, as well as the most important events, subjects and events that marked it. On the examples of the Mediterranean towns, the towns of the Western, Northern, Central and Eastern Europe the circumstances of their development will be compared. The students will learn of the basic processes and the most important examples in the development of medieval towns in Europe.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Comparatively analyze medieval towns,
2. Compare the different processes of town development across the European territory,
3. Define towns according to type, time of founding, political and social circumstances,
4. Compare the emergence of the Croatian medieval town in the European context,
5. Explain its significance in the wider geographical, political and social circumstances.
General Competencies

After successfully completing their studies, the students will be able to:
- define the historical processes inherent to different historical periods,
- produce independent conclusions about particular events and processes,
- point out the necessity of interdisciplinary consideration of certain historical themes,
- connect various historical processes,
- list the people and institutions that marked the Croatian and European history.

Grading

Oral student presentation, written essay.

Week by Week Schedule

1. Introduction
2. The introduction to urban history/the medieval history of European towns
3. (Dis)continuity of the ancient urban culture
4. Early medieval town
5. New towns of the High Middle Ages
6. European metropolises
7. The town and the central authority
8. Internal town organization
9. Town nobility in a medieval town
10. Commoners in medieval towns
11. The Church and the medieval towns
12. Town management
13. The relationship between a town and the country
14. Family and household in the medieval town
15. Town and disease

Mediterranean in the 19th and 20th Century

Lecturer in Charge

Prof. dr. sc. Mijo Korade

Course Description

Introduction to the issues concerning the history of the Mediterranean in the 19th and 20th centuries through the analysis of selected historical sources.

Gaining a deeper insight into the political, social, economic and cultural history of the various parts of the Mediterranean in the 19th and 20th centuries.

Developing analytic and synthetic skills for the reconstruction of the development of certain social and political tendencies in the Mediterranean during the 19th and 20 centuries.

Describing the process of exchanging ideas and technology through cross-cultural dialogue in the Mediterranean during the 19th and 20 centuries.

Introduction to the contribution of the Croatian constituent in the history of the 19th and 20th century Mediterranean.

Defining individual issue topics (e.g. the role of violence (rebellions, upheavals, civil wars, terrorism) in the history of the Mediterranean societies of the 19th and 20th century; the opposition between cesarean dictatorships and "Mediterranean totalitarian regimes"; "the Mediterranean in the small": the Mediterranean Sea and its coasts during the 19th and 20th centuries; "the discovery of the Mediterranean": from the pioneers of archeology to mass tourism).

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
» History (Study) (elective courses / working groups, 1st semester, 1st year)
» History (Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Study) (elective courses / working groups, 5th semester, 3rd year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish between political, social, economic and cultural history of the various parts of the Mediterranean in the 19th and 20th centuries.
2. Describe the development of certain social and political tendencies in the Mediterranean during the 19th and 20th centuries.
3. Describe the various processes of exchanging ideas and technology through cross-cultural dialogue in the Mediterranean during the 19th and 20th centuries.
4. Explain what was the contribution of the Croatian component in the history of the 19th and 20th century Mediterranean.
5. Define individual issue topics (e.g. the role of violence (rebellions, upheavals, civil wars, terrorism) in the history of the Mediterranean societies of the 19th and 20th centuries; the opposition between cesarean dictatorships and "Mediterranean totalitarian regimes"; "the Mediterranean in the small": the Mediterranean Sea and its coasts during the 19th and 20th century; "the discovery of the Mediterranean": from the pioneers of archeology to mass tourism).

General Competencies

After completing their studies, the students should be able to present and argue their conclusions about the adopted subject matter to professional and general audiences in a clear and unambiguous manner.
Furthermore, they should be able to apply the knowledge they acquired in the course in new and unfamiliar situations in an interdisciplinary context that is associated with the area of their studies.

Grading

The student activity will be monitored throughout the classes and it will reflect on the final grade. Attendance is obligatory. The final exam consist of a written and an oral part.

Week by Week Schedule

1. Introductory lecture: introduction to the content and objectives of the course
2. The Mediterranean and the world of the Mediterranean in the period from 1796 to 1815: "Scene Set for Orientalism": Napoleon's campaign in Egypt
3. The Mediterranean and the world of the Mediterranean in the period from 1815 to 1830: "Last Days of the Janissaries": the beginning of a century of agony "of the sick man of the Bosphorus"
4. The Mediterranean and the world of the Mediterranean in the period from 1830 to 1848: "Hero of the Maghreb": Emir Abd el-Kader leads a guerrilla war against the French conquest of Algeria
5. The Mediterranean and the world of the Mediterranean in the period from 1848 to 1861: "Tutti Fratelli": Henry Dunant and the Battle of Solferino
6. The Mediterranean and the world of the Mediterranean in the period from 1861 to 1878: "Dream and Reality of Technology": the Suez Canal completed
7. The Mediterranean and the world of the Mediterranean in the period from 1878 to 1896: "Citius, Altius, Fortius": the Olympic Games return to their homeland
8. The Mediterranean and the world of the Mediterranean in the period from 1896 to 1908: "Marriage with Dried Figs": Jelena Petrović and Vittorio Emanuele of Savoy became the happiest married couple in Italy
9. The Mediterranean and the world of the Mediterranean in the period from 1908 until 1918: "Uprising in the Desert": Colonel T.E. Lawrence and "The Great Arab Revolt"

10. The Mediterranean and the world of the Mediterranean in the period from 1918 to 1930: "The Party of the Revolution": artists and freelancers with D'Annunzio in Rijeka

11. The Mediterranean and the world of the Mediterranean in the period from 1930 to 1940: "Short Summer of Anarchy": writer George Orwell in the maze of the Spanish Civil War

12. The Mediterranean and the world of the Mediterranean in the period from 1940 to 1945: "Desert Fox": the strategy and tactics of General Rommel and his Afrika Korps

13. The Mediterranean and the world of the Mediterranean in the period from 1945 to 1960: "Next Year in Jerusalem": the causes, course and the consequences of the First Arab-Israeli War

15. The Mediterranean and the world of the Mediterranean in the period from 1975 to 1992: "Lord of the Land of Eagles": a political portrait of Enver Hoxha

» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and list the key works and philosophers involved in contemporary analytic metaphysics
2. Explain the main problems in metaphysics, as well as problems related to specific metaphysical disputes
3. Interpret and read and understand the most important contemporary works of analytic metaphysics
4. Explain the most important views in contemporary metaphysics
5. Compare various competing metaphysical views
6. Evaluate the plausibility of particular views and arguments in contemporary metaphysics

General Competencies

After they pass the exam, (1) students will be able to see and understand how are particular metaphysical views connected to views in formal logic, epistemology, philosophy of mind, philosophy of religion, philosophy of language etc., (2) they will be able to understand and interpret the main metaphysical disputes and concepts in contemporary analytic metaphysics, (3) they will be able to apply some of the results of metaphysical analysis in other philosophical disciplines, such as epistemology, logic, philosophy of mind, philosophy of religion, meta-ethics, philosophy of science etc.

Grading

1st test is 25% of the final grade, 2nd test is 25% of the final grade, and the final written exam is 50% of the final grade.

Week by Week Schedule

1. Introduction
2. Universals and metaphysical realism (4 hours)
3. Nominalist criticism of realism and nominalist alternatives (4 hours)
4. Concrete particulars and the bundle theory (4 hours)
5. Concrete particulars and the substratum theory (4 hours)
6. Aristotelian substances (4 hours)
7. Hume's criticism of causation (4 hours)
8. NeoHumean approaches to causation (4 hours)
9. McTaggart's argument that time is unreal (4 hours)
10. The A-series and the B-series theories (4 hours)
11. The freedom of will as a metaphysical problem (4 hours)
12. Fatalism (4 hours)
13. Arguments for Gods existence (I) (4 hours)
14. Arguments for Gods existence (II) (4 hours)
15. The closing discussion

Military and Political Aspects of the Battle of Vukovar

Lecturer in Charge

Izv. prof. dr. sc. Josip Jurčević

Course Description

The defense and fall of Vukovar are symbols of the Croatian War of Independence, and the process of creating an independent Croatian Republic. The aim of the course is to familiarize students with the various sources of study subjects Vukovar battle, point out the importance of Vukovar defenders and health care, but also describe the significant contributions of women to events in Vukovar in 1991.

Course Type

- History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
- History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
- History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
- History (Study) (elective courses / working groups, 2nd semester, 1st year)
- History (Study) (elective courses / working groups, 4th semester, 2nd year)
- History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the media image of the battle of Vukovar
2. Describe the course, the success and difficulty of defending the city in the context of all the battlefields of the war,
3. Show the importance of the contribution of women in the defense of the city,
4. Compare the testimony of witnesses / participants in the battle with media reports and based on that create potential interpretations,
5. Analyze historiographical controversies of the battle of Vukovar.
General Competencies

After finishing the programme student will be able to:
write an essay on different historical periods,
defend his/her own opinion in discussions on different historical events and processes,
reconstruct historiographic tools in making conclusions of historical processes and events,
interpret historical sources,
combine different historical processes.

Grading

Activity of each student will be monitored, which will be reflected in the overall score. Classes is required to attend. The exam is oral.

Week by Week Schedule

1. Introduction to the topic of the working group
2. The historical context of the battle for Vukovar
3. Media reports on the battle of Vukovar
4. The role of CDF's in the battle of Vukovar
5. The attitude of state authorities towards the battle of Vukovar
6. The role of the international community in the battle of Vukovar
7. Croatian Radio Vukovar
8. General Blago Zadro
9. Vukovar hospital
10. Ovčara
11. The role of women in 1991
12. The media image of Vukovar in 1991
13. Vukovar defender Stjepan Sučić Crni
14. Vukovar defender Josip Horvatz Madar
15. Final review

Literature

Modern and Post-Modern Croatian Literature

Lecturer in Charge

Doc. dr. sc. Dubravka Zima

Course Description

Introduce the students to the Croatian modern and postmodern literature. Read canonical texts from selected periods. Introduce the students to strategies of periodisation and literary-historical overviews of the periods in question.

Course Type

» Croatian Studies (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Croatian Studies (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and explain the literary canon of the Croatian literature in the modern and postmodern periods;
2. Explain the manner of articulation and functioning of the literary canon;
3. Identify the foundations of canonical authors’ opuses in the Croatian modern and postmodern literature;
4. Present and write a short academic text on a literary topic which will demonstrate elementary academic literacy (referencing, quoting).

General Competencies

Describe and explain the literary canon in the Croatian literature of the modern and postmodern periods. Explain the manner of articulation and functioning of the literary canon.

Grading

Class participation 10%;
Class assignment performance 10%;
Independent required reading 40%;
Seminar paper 20%;
Written exam 10%;
Oral exam 10%.

Modern English and the Media

Lecturer in Charge
Pred.
Spomenka Bogdanić

Course Description
To make effective use of sociolinguistic competences.
To enable students to develop strategies of successful communication.
To enable students to apply the acquired strategies through discussions in complex linguistic situations.
To enable students to express their personal attitudes on a particular topic.

Course Type
» Communication Sciences (Study) (required course, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Differentiate registers and conventions of communication processes in the context of changing socio-cultural environment.
2. Explain their personal views and attitudes closely reasoned in different communication situations.
3. Recognize and make correct use of English idioms and phrases to accomplish communication.
4. Demonstrate and contribute to discussions and debates by effective use of modern professional terminology related to the media and communication sciences in the English language.
6. Write autonomously a seminar essay in English.

General Competencies
Apply and make effective use of the acquired basic concepts related to modern journalism in the English language.
Express themselves clearly and concisely in spoken and written word in the English language with emphasis on English for journalists and public relations.
Explain and critically analyse the acquired theoretical and practical information.
Grading

Regular attendance and active participation in classes 20%; presentation of a topic of choice 10%; seminar essay 30%; oral final exam 40%.

Week by Week Schedule

1. Differences in register, linguistic markers of social conventions.
2. Introduction to discussion- differences between conversation and discussion; criteria for a well organized debate.
3. Gathering, selecting and preparing materials from different types and sources of information.
5. Presenting views and attitudes: agreeing, disagreeing, disapproving, accepting, objecting, delivering news, etc.
6. Presenting views and attitudes: agreeing, disagreeing, disapproving, accepting, objecting, delivering news, etc.
7. Vocabulary enrichment related to the media – newspaper genres, journalism and the Internet.
8. Vocabulary enrichment related to the media – newspaper genres, journalism and the Internet.
9. Lexical taboos (political correctness).
10. Standards of journalistic ethics and socially responsible journalism.
12. Anglo-American aspect of political system.
13. Student oral presentation of a previously announced topic of choice and subsequent group discussion.
14. Student oral presentation of a previously announced topic of choice and subsequent group discussion.
15. Student oral presentation of a previously announced topic of choice and subsequent group discussion.

Motivation

Lecturer in Charge

Doc. dr. sc. Eva Anđela Delale

Course Description

The course is developed in order to acquaint the students with systematic compendium of scientific concepts and understandings in area of motivation, as well as the development and implementation of scientific concept of motivation in general and specifically with concept of motivation in learning, gifted, motivation in sports and labor. Particular emphasis is put on the implementation of motivational psychology's theoretical cognition in everyday life and professional practice.

Course Type

» Psychology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and differ basic principles of motivational processes influence on behavior and achievement, as well as external and internal influences on motivation.
2. Apply the knowledge of the nature of motivation on understanding of its nature and its correlation with other mental processes and human wellbeing.
3. Generalize motivational processes knowledge on special cases and phenomenon in professional work.
4. Estimate abstractly logical relations between motivational and other mental processes.
5. Evaluate research projects and scientific articles in the area of motivation.
6. Create new scientific ideas to verify the relations between motivational processes and activity outcomes.
General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
3. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
4. Devise plans for searching the literature, databases and other information sources.
5. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.
6. Evaluate and develop personal competences, knowledge and skills in accordance with the changes and the standards of the profession.

Grading

Students collect points for certain activities that are later turned into final grade. A student can achieve maximum of 80 points according to following arrangement: 10 points for regular class attendance (70% lectures is minimum requirement) 20 points for group presentation 50 points for mid and end term tests (OR written exam, more than 50% correct answers is needed.

Week by Week Schedule

1. Introduction: Motivation as behavior regulator
2. Goals, needs and their interaction: motivational cycle of behavior
3. Theories of need as action motivators (Murray, Maslow, Aldefer, McClelland); theories of needs and cultures
4. Contemporary needs and attempts to find basic needs
5. Theories of reinforcement as motivation initiator
6. Theories of expectations (Adams, Locke, Vroom, attribution theories)
7. Types of motivation according to the self-determination theory (Deci and Ryan, flow)
8. Evolutionary theory of motivation
9. Neuro-scientific theory of motivation
10. Content and processes theories; motivation intensity and achievement; motivation and work
11. Motivation in learning: opposing the theory and practice of reinforcement and punishment
12. Development of motivation in childhood
13. Motivation of gifted
14. Motivation and sports
15. The subconscious motivation: defense mechanisms in Freud and contemporary interpretation

Myths and Religious Rituals in the Ancient World

Course Objective

Course objective is to introduce the students with the Sumerian, Hittite, Canaanite, Persian (Old Iranian) and Egyptian literature and mythology along with the religious ceremonies and cults.

Course Type

- History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
- History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
- History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
- History (Study) (elective courses / working groups, 1st semester, 1st year)
- History (Study) (elective courses / working groups, 3rd semester, 2nd year)
- History (Study) (elective courses / working groups, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the most important subjects from mythological texts of the Ancient Near East
2. List mythological texts
3. Explain the historical context of the emergence of the mythological texts
4. List sources that describe the evolution of religion in the Near East
5. Identify the events that resulted in the emergence of several mythological texts
6. Compare the processes and the development of the religious beliefs considering different social, political and cultural background.

General Competencies

After successful course students will be able to: define the historical processes of certain people of the Ancient World; summarize the basic facts about Ancient people literature (especially mythological texts); name the main characters which marked the mythological texts; discuss the historical context of the emergence of texts of certain people.
Grading

Student activity will be monitored throughout the entire semester. Attendance is mandatory. Students must write a seminar and present it during lectures. The final exam is oral.

Week by Week Schedule

1. Introduction to the subject. A short introduction into Semitic languages and the chronology of the written history.
2. Sumerian texts, myths and gods.
3. Cosmogonic myths; Students have to prepare a short lecture on chosen myths, and the objective is to compare the greatest number of mythological texts on cosmogony from all around the world.
4. Myths concerning the Creation of the Man.
5. Hittite texts, myths and gods.
6. Deluge myths; Students prepare short lecture about deluge myths.
7. Canaanite, Phoenician and Aramaic texts, myths and gods.
8. Egyptian texts, myths and gods.
9. Underworld, myths about afterlife; the question about resurrection.
10. New Year - the repetition of cosmogony.
11. Old Iranian (Persian) and Arabic texts, myths and gods.
12. The most famous heroes from the myths; Students have the chance to prepare a lecture on a hero in case they were justifiably prevented to attend the lectures.
13. Mythological creatures and beasts; Students prepare lectures about mythological creatures.
14. Holy places, Sacrifice, altars and shrines, temples.
15. Final lecture/field class in Archaeological Museum in Zagreb.

Literature

Campbell J. (2009). Junak s tisuću lica, Jesenski i Turk, Zagreb
Neurobiology of Abnormal Behaviour and Mental Illness

Lecturers in Charge

Prof. dr. sc. Zdravko Petanjek
Doc. dr. sc. Ivana Hromatko

Course Description

The general aim of the course is to familiarize students with the basic characteristics of the most common mental illnesses and their biological background, with special emphasis on the characteristic features visible with methods of brain imaging.

Course Type

» Psychology (Study) (elective courses, 2nd semester, 1st year)
» Psychology (Study) (elective courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the basic psychological and neurological characteristics of the major psychopathological disorders
2. Explain the relationship between biological predisposition and external factors in the development of behavioral disorders and mental illness,
3. Apply the theoretical and practical knowledge in understanding of symptoms of major mental disorders and abnormal behavior
4. Apply their knowledge in practical work with patients, using functional brain imaging (EEG, fMRI, PET, MEG)
5. Create multimedia presentations with clinical examples which show the correlation between damage/dysfunction of certain brain areas and psychopathological condition,
6. Analyze the scientific articles in the field of neurobiology of psychopathology
7. Explain the role of biological factors in the development of mental disorders and abnormal behavior

Grading

Activity in class 20%, seminar 20%, two written tests 20%, essay 20%, practical work 20%, final exam 20%.
Week by Week Schedule

1. Imaging of brain structure (MRI, CT, ultrasound) in the study and diagnosis of psychomotor and cognitive disorders. Imaging of brain function (fMRI, PET, SPECT, EEG, MEG) in the study and diagnosis of psychomotor and cognitive disorders
2. Classical neuro-histopathological methods. Methods of molecular biology in the research and diagnosis of psychomotor and cognitive disorders
3. The neurobiology of schizophrenia – brain imaging methods. The neurobiology of schizophrenia - structural and chemical change
4. Neurobiology of manic-depressive psychosis - brain imaging methods. Neurobiology of manic-depressive psychosis - structural and chemical changes
8. Parallel processing in the visual system and disorders of the visual recognition. Functional classification of associative visual areas and the correlation with specific visual dysfunctions
9. Consciousness and attention: the functional activity of the brain in normal and abnormal states of consciousness
11. The biological predisposition for development of addiction. Changes in functional brain activity in addicts
13. The neurobiology of learning and memory. Functional brain activity in learning and memory disorders
14. Pathophysiological mechanisms of stroke. The neurobiology of brain hemorrhage
15. Mechanisms of brain plasticity in the adult human. Visualization of brain plasticity using fMRI. Anatomical, histological and molecular changes in the brain during normal and abnormal aging

Non-Experimental Methods

Lecturer in Charge

Prof. dr. sc.
Goran Milas

Course Description
The main objectives of the course are to introduce students to the basics of the non-experimental methodology and the different modalities of its use. Through lectures, students will get to know the basics of the non-experimental methodology, the reasons for its use, and basic designs through which it is applied. Students will also be acquainted with the way of conceiving non-experimental research and writing a report or research paper based on it.

Course Type
» Psychology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Explain the non-experimental designs and different modalities of their use
2. Analyze the different segments of non-experimental research approaches
3. Evaluate the non-experimental studies
4. Apply non-experimental designs in their own research
5. Create the research that will make advantage of the non-experimental design

General Competencies
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquisition of knowledge.
10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.

Grading
Quizzes, seminars, attendance and oral exam.

Week by Week Schedule
1. Introduction to the non-experimental methods
2. The reasons for using non-experimental methods, introduction to correlation methods
3. Test reliability and validity, interpretation of the correlation
4. Time dimension correlation draft
5. Scientific observation, classification methods
6. Observed behavior, recording and sampling
7. Survey research, basics of sampling
8. Non-probability sampling
9. Probabilistic sampling: simple, systematic, stratified
10. Probabilistic sampling: clusters, multi-step, zonal
11. Sources of error in the survey
12. Sample size, reliability of questionnaires
13. The validity of questionnaires
14. Data collection techniques
15. Test

Literature

Organisational Psychology

Lecturers in Charge

Prof. dr. sc. Ljiljana Kaliterna-Lipovčan
Doc. dr. sc. Adrijana Košćec Đuknić

Course Description

The course provides a detailed overview of the basic psychological knowledge in the area of human labour. Through learning about different topics such as job analysis, working capacity and performance, selection and training of personnel, evaluating work performance, motivation to work, absenteeism and accidents and the impact of physiological processes in the performance, the students will acquire the knowledge necessary for psychologists working in the organization.

Course Type

Psychology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Assess critically work capacity and performance.
2. Select measurement instruments for the selection process.
3. Evaluate the advantages and disadvantages of different organizations of work in shifts.
4. Plan the procedures of job analysis.
5. Assess the need for professional training.
6. Assess the critical factors that impact work motivation.
7. Assess causes of absenteeism and work accidents.
8. Select interventions able to reduce the negative physiological effects on performance that are caused by changes.

General Competencies

1. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
2. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.
3. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.
Grading

15% class attendance, 5% paper, 20% two colloquia, final exam 60%.

Week by Week Schedule

1. Introduction to the course
2. Historical overview of the psychology of work
3. Work ability and evaluating performance
4. Workplace analysis
5. Work motivation, theories and application
6. Professional training
7. Resource selection, Introduction to human resources
8. Absenteeism and work accidents
9. Physiological changes during operation, biological rhythms
10. Modern challenges to work psychology
11. Shift work
12. Students' presentations
13. Students' presentations
14. Students' presentations
15. Concluding lecture

Literature

Originators of Communication Sciences and Their Works

Lecturer in Charge

Doc. dr. sc. Jelena Jurišić

Course Description

Introduce the students to the development of communicology through works (books, articles, films, TV and radio features), theoreticians, scientists, journalists and public relations specialists who have contributed most to the present development of communicology as a science and of mentioned professions studied theoretically.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses 2, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses 2, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply basic concepts in communicology.
2. State the crucial theoreticians and scientists associated with the emergence and the development of communicology, reproduce and explain their basic theories or researches.
3. State and explain crucial events in the history of communicology.
4. Define the freedom of the press and the freedom of expression, explain and analyze their development through history.
5. State, reproduce and explain the basic theories of communication and communicology.
6. State and explain the basic learning or discoveries of authors in read, watched or listened works.

General Competencies

Apply the knowledge of the basic concepts in communicology. Identify and describe the place and role of communicology in the society. Reproduce and explain the basic theories of communication and communicology. State and explain the crucial events in the history of communicology. Work efficiently and independently.
Grading

100% revision tests/ written exam.

Week by Week Schedule

1. Freedom: definition, legal formulations, the freedom of the press definition, the most important Declarations (UN, OESS, etc.) and other documents (the Constitution of the Republic of Croatia, Electronic Media Act), first activists, first government concessions; the emergence of mass media: the circumstances, the context, the state of media freedom; censorship and other government measures to restrict the freedom of the press and expression.

2. The emergence of mass media: the circumstances, the context, the state of media freedom; censorship and other government measures to restrict the freedom of the press and expression.

4. The impact of the press freedom on the development of society, Liberalism and the media relations, the deregulation of media.

5. The first indirect media studies in Europe, literary criticism, F. and Q. Leavis, Thompson; The Frankfurt School, Adorno, Lowental, Benjamin, Marcuse, sociology of knowledge.

6. The beginnings of American communicology and the market research in the first decades of the 20th century in the USA, Walter Lippman (Public Opinion, chapters 7-8).

7. The beginnings of American communicology and the market research in the first decades of the 20th century in the USA, Walter Lippman (Public Opinion, chapters 7-8).

9. Lazarsfeld P. F’s position and influence on the development of communicology, People’s Choice and other researches, defining the functions of the media, two-step flow communication.

10. Harold Laswell formula of the communication process, investigating the effects of war and political propaganda, group dynamics, the concept of gatekeeping.

11. Hovland C. I – study of propaganda influences and social communication, the sleeper effect.

12. Merton R. K study of mass persuasion and its impact, the effects of propaganda, the narcotizing dysfunction of media, an in-depth interview as a research method.

13. Frank Stanton the pioneer in research in communicology on radio programmes; Herta Herzog the impact of the media content on the audience, the media and panic spreading in the society, the uses-and-gratifications theory, the audience habits.

14. Bernard Berleson research on public opinion, behaviourism, content analysis method; Elihu Katz mass communication, the effects of the mass media, middle range theory (Media effects).
15. The development of communicology in Europe, the history of media research, contributions to the sociology of knowledge, the most important representatives: the preliminary exam 2.

Literature

Course Description

In the context of great Croatian personalities, the students will become familiar with the life and work of polymath Pavao Ritter Vitezović as: - historian – poet - heraldist – linguist - the Croatian Latin script reformer – copperplate engraver – political writer - popular enlightenment thinker of the 17th and 18th centuries.

Course Type

» Croatian Studies (Study) (elective courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective courses, 3rd semester, 2nd year)
» Croatian Studies (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the contextual importance of P.R. Vitezović in the Croatian history of the 17th and 18th century
2. Recognize the value of his “Kronika” of 1696.
3. Recognize the importance and value of his patriotic poetry.
4. Recognize his linguistic contribution to the history of the Croatian language.
5. Analyze the original works of Vitezović.
6. Recognize his lexicographical importance in the Croatian historical lexicography.

General Competencies

The students will learn about: the commitment of Vitezović to the political and cultural affirmation of Croatia within the Habsburg monarchy at the time. They will be introduced to the Latin and Croatian poetic production of Vitezović. Learn of his first Croatian historical work “Kronika” of 1696. Get to know Vitezović as a publisher and head of Zemaljska tiskara printing house in Zagreb 1694 -1706. Become familiar with the epic work of Vitezović “Odljenje sigetsko 1684”. Learn of the importance of his Latin-Croatian dictionary and get to know him as a publisher of popular calendars, wise sayings and proverbs.

Grading

Class attendance 15%; seminar assignment 25%; written exam 60%.
Week by Week Schedule

1. The socio-political situation in the Habsburg Monarchy and Croatia at the time of Vitezović
2. Background, youth and education of P.R. Vitezović
3. Vitezović and Valvazor
4. The political commitment of Vitezović
5. Vitezović as a historian, his "Kronika" of 1696.
6. Vitezović as a Latin poet
7. Vitezović a Croatian poet
8. Vitezović and Zagreb bishops
10. "Oživljena Hrvatska" by Vitezović
11. "Dva stoljeća ucviljene Hrvatske" by P. R. Vitezović
12. "Odiljenje sigetsko 1684." by P. R. Vitezović
13. Vitezović as the reformer of the Croatian Latin script and his followers
14. The Latin-Croatian dictionary of Vitezović
15. Vitezović in Croatian historiography

Peer Support for Students with Disabilities

Course Description

Enabling students to provide quality peer support for students with disabilities in the academic setting.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 5th semester, 3rd year)
» Communication Sciences (Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Maintain quality social contacts in the context of peer support
2. Examine the social context and their own attitudes/values towards people with disabilities
3. Recognize ethical challenges in providing peer support
4. Explain and support with arguments the applicability of social policy in direct work with people with disabilities
5. Write work plans for providing peer support
6. Provide peer support to students with disabilities in the academic setting

General Competencies

The course is declared as a university course and is not tied to a particular study programme.

Grading

ECTS credits are obtained upon receiving the confirmation that the student has passed the course. Student will obtain ECTS credits if:
1) they attend a preparatory workshop,
2) devise individual peer support plans that receive positive evaluation,
3) provide peer support under the individual plan,
4) attend supervision.

Week by Week Schedule

1. Peer support (1 lecture + 1 exercises): Introduction to peer support. The analysis of concrete examples, a student with a disability and his peer - provider of support - establish adequate and appropriate form of support.
2. General characteristics of persons with disabilities (5 lectures + 3 exercises):
   Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of the persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.

3. General characteristics of persons with disabilities (5 lectures + 3 exercises):
   Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.

4. General characteristics of persons with disabilities (5 lectures + 3 exercises):
   Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.
5. General characteristics of persons with disabilities (5 lectures + 3 exercises):
Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.

6. General characteristics of persons with disabilities (5 lectures + 3 exercises):
Definition of basic concepts, classification of impairments and disabilities, active policy measures, support models. The etiology and phenomenology of physical disability; capabilities and limitations of students with physical disabilities; barriers to students with physical disabilities in the higher education and the possibility of overcoming them. Visual impairment (blindness and low vision; characteristics, capabilities and specificities of the functioning of students with visual impairments, difficulties in everyday academic life of students with visual impairments, the possibility and importance of support). Understanding hearing impairment (deafness and hearing loss; specificities in the field of adoption of speech and language; sign communication; the needs in the higher education system; support system). Specificities, characteristics and needs of persons/students with deafblindness and the support system in their daily academic activities. Sensitization to the needs of the students with disabilities in the academic setting.

9. Accessibility of higher education to persons with disabilities (2 lectures + 3 exercises): A review of existing legal regulations that enables work on assuring equal opportunities for students with disabilities in the higher education system of the Republic of Croatia; overview of the special rights of students with disabilities; analysis of the current state of accessibility to higher education institutions in the Republic of Croatia. Specific needs of students with disabilities and the obstacles they encounter in the academic environment through practical examples. Forms of support for students with disabilities (institutional, individual).

10. Accessibility of higher education to persons with disabilities (2 lectures + 3 exercises): A review of existing legal regulations that enables work on assuring equal opportunities for students with disabilities in the higher education system of the Republic of Croatia; overview of the special rights of students with disabilities; analysis of the current state of accessibility to higher education institutions in the Republic of Croatia. Specific needs of students with disabilities and the obstacles they encounter in the academic environment through practical examples. Forms of support for students with disabilities (institutional, individual).

14. Ethics (2 lectures + 2 exercises). Ethical principles in the relationship between a student and an assistant - a student with disabilities. Ethical issues and dilemmas in the relationship between a student and an assistant - a student with disabilities. Peer support skills (0 lectures + 10 exercises): The importance of recognizing our own feelings and the feelings of others. Appropriate display of feelings. The importance of empathy in human relations. Developing skills of empathy. Setting boundaries in relationships. Assertiveness skills. Academic skills (0 lectures + 2 exercises): The components of responsible and assertive learning. Cooperative learning. Planning and organizing time. Devising individual plans (0 lectures + 5 exercises): On the basis of acquired knowledge and skills, each student, under supervision, devises an individual support plan for the upcoming semester.

15. Ethics (2 lectures + 2 exercises). Ethical principles in the relationship between a student and an assistant - a student with disabilities. Ethical issues and dilemmas in the relationship between a student and an assistant - a student with disabilities. Peer support skills (0 lectures + 10 exercises): The importance of recognizing our own feelings and the feelings of others. Appropriate display of feelings. The importance of empathy in human relations. Developing skills of empathy. Setting boundaries in relationships. Assertiveness skills. Academic skills (0 lectures + 2 exercises): The components of responsible and assertive learning. Cooperative learning. Planning and organizing time. Devising individual plans (0 lectures + 5 exercises): On the basis of acquired knowledge and skills, each student, under supervision, devises an individual support plan for the upcoming semester.

Perception

Lecturer in Charge

Doc. dr. sc.
Tihana Brkljačić

Course Description

To familiarize the students with the research and theories in the area of perception.

Course Type

» Psychology (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe human sensory system and the way how sensation is formed.
2. Compare different sensory systems regarding to stimulus, sensory organs, the way sensation is formed.
3. Explain perception of depth, perception of shape, perception of motion, and constancy of perception.
4. Explain connection between stimulus and sensation.
5. Describe phenomena of attention.
6. Compare different perceptive illusions and explain their background.
7. Analyze subjective factors of in perception.
8. Name typical perceptual disorders.

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
Explain the biological and neurobiological foundations of psychological processes and behaviour.
Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).

Grading

Preliminary exam 30;
Final exam 40;
Exercises 20;
Seminar 10.
Week by Week Schedule

1. Review of theoretical approaches to perception
2. Stimuli, senses, perception
3. Specific characteristics of different senses and sensory systems
4. Measurement of senses, classic and modern psychophysics
5. Attention and perception
6. Perception of shapes and forms
7. Perception of size, distance and movement, constancy of perception
8. Perception of speech, perception of music
9. Subjective factors in perception, how attitudes, values and emotions modify perception
10. Illusions
11. Development of perception, perception in other species
12. Perception disorders
13. Extrasensory perception
14. Extrasensory perception

Philosophy of Language

Lecturer in Charge

Doc. dr. sc. Davor Pećnjak

Course Description

The goal of the course is to introduce students to basic problems and views in philosophy of language (e.g. how the reference works, what determines the meaning of expressions, distinction between literal/conventional and non-literal meaning, the dispute between descriptivists and direct-reference theorists), to point to the importance of philosophy of language for other philosophical disciplines (such as metaphysics, epistemology, philosophy of mind, and meta-ethics), and to prepare students for their independent study of philosophy of language.

Course Type

» Philosophy (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. List and explain the central problems and views in philosophy of language
2. Argue independently about issues in philosophy of language
3. Apply the arguments and methodology of philosophy of language in epistemology, metaphysics, logic, ethics etc.
4. State the major authors and the literature within the discipline
General Competencies

After they pass the exam, (1) the students will be able to connect the content of the course with some of the philosophical disciplines they encountered before (most notably, formal logic, metaphysics, and epistemology), (2) the things they will learn in this course they will easily apply in other philosophical disciplines and courses, (3) they will be able to engage in interdisciplinary investigations, and use their knowledge of philosophy of language in doing sociology, psychology, linguistics, croatology etc.

Grading

The written exam is 70% of the final grade, and the oral exam is 30% of the final exam.

Week by Week Schedule

1. Introduction
2. Traditional theories of meaning
3. Proper names: the description theories
4. The criticism of the description theories of names: Kripke and Donnellan
5. Causal-historical theory of reference
6. The criticism of causal-historical theory
7. The direct reference theory
8. The natural kind and substance terms
9. Definite descriptions: Russells theory
10. The opposition to Russell: Strawson and Donnellan
11. The dispute over Donnellans distinction
12. Tarskis semantic conception of truth
13. Davidsons program: the truth-conditional theory of meaning (I)
14. Davidsons program: the truth-conditional theory of meaning (II)
15. The closing discussion

Physical Education and Sports 1

Lecturer in Charge

V. pred.
Irena Bagarić

Course Description

Educate the students about the importance of lifelong exercise and sports or recreation activity for the purpose of maintaining and improving health so they would maintain and improve their physical fitness.

Course Type

» Communication Sciences (Dual-major studies Study) (required course, 1st semester, 1st year)
» Croatian Studies (Dual-major studies Study) (required course, 1st semester, 1st year)
» History (Dual-major studies Study) (required course, 1st semester, 1st year)
» Latin language (Dual-major studies Study) (required course, 1st semester, 1st year)
» Philosophy (Dual-major studies Study) (required course, 1st semester, 1st year)
» Sociology (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (required course, 1st semester, 1st year)
» Croatian Studies (Study) (required course, 1st semester, 1st year)
» History (Study) (required course, 1st semester, 1st year)
» Psychology (Study) (required course, 1st semester, 1st year)
» Sociology (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply teamwork skills in sports.
2. Analyze and demonstrate tolerance, work habits and self-discipline.
3. Promote a healthy and sporty lifestyle.
4. Take care of personal health.
5. Design active breaks (active breaks between learning, on the job...).
6. Apply movement and technical structures during play.
General Competencies

Upon completion of all obligations required by PE, the students will be able to:
- independently distinguish composing parts of PE classes (warm-up, the main part, stretching);
- independently distinguish conditional and corrective exercises aimed at strengthening specific muscle groups,
- apply practical knowledge and skills acquired in PE classes in preventing occupational illnesses that their future profession may cause to their health,
- recommend sports activities to their colleagues and transfer to them the awareness of the importance of lifelong physical exercise and they will be able to independently distinguish and follow the rules of different sports activities, monitor and understand sports and fair play.

Grading

Regular attendance, fulfilling tasks.

Week by Week Schedule

1. Pursuant to the Physical Education Syllabus approved by the University Senate, we present teaching content in accordance with the material conditions of work provided to us by the Management of the Croatian Studies, and along with mandatory PE classes the students frequently choose to participate in sports competitions organized by the Office for Sport of the University of Zagreb. In terms of teaching content we hold classes in: swimming, corrective gymnastics, pilates, aerobics, exercise at the gym, basketball, volleyball, handball, futsal, badminton, table tennis, tennis, ice-skating and hiking tours.
2. Continuous work in the gym or as part of additional activities.
3. Continuous work in the gym or as part of additional activities.
4. Continuous work in the gym or as part of additional activities.
5. Continuous work in the gym or as part of additional activities.
6. Continuous work in the gym or as part of additional activities.
7. Continuous work in the gym or as part of additional activities.
8. Continuous work in the gym or as part of additional activities.
9. Continuous work in the gym or as part of additional activities.

Plato and Aristotle

Lecturer in Charge

Izv. prof. dr. sc. Pavel Gregorić

Course Description

Introduce students to the central texts, problems, ways of thinking and arguing of the two leading ancient philosophers. Reading and analysing selected texts of Plato and Aristotle. Identifying main similarities and diversities in the works of Plato and Aristotle, and the main avenues of influence and reception. Provide students with the required concepts and techniques for understanding and interpreting classical philosophical writings. Encourage students to express themselves clearly and concisely in spoken and written word.

Course Type

» Philosophy (Dual-major studies Study) (required course, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)

» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the historical context and intellectual climate of Plato and Aristotle
2. State and contrast the main interpretative approaches to Plato's and Aristotle's works
3. Outline the main avenues of Plato's and Aristotle's critique of Presocratic philosophy
4. Describe Socrates' influence on Plato
5. Contrast the character, methods, topics and main theses of Plato's works relative to the period of their formation (early, middle, and late)
6. Explain Aristotle's system of philosophy and determine the positions of Aristotle's writings in that system
7. State and compare Plato's and Aristotle's philosophical positions in metaphysics, philosophy of nature, epistemology, philosophy of science, philosophy of mind and philosophy of language
8. Explain the basic outlines of Aristotle's criticism of Plato

General Competencies

Students will be able to: put Plato and Aristotle in a wider historical context state the main works of Plato and Aristotle, the topics and main theses of these works explain the basic problems, theses and arguments in Platonic and Aristotelian philosophy summarize Platonic and Aristotelian main contributions to later philosophy and science contrast philosophical problems and methods of Plato and Aristotle with those characteristic of later epochs

Grading

Discussion: 10%;
Quiz: 10%;
Seminar essay: 20%;
Two written tests: 30%+30% or final written exam: 60%.

Week by Week Schedule

1. Ethics and epistemology ("Meno", translation by F. Grgić)

Political Communication

Lecturer in Charge

Izv. prof. dr. sc. Danijel Labaš

Course Description

Political communication is one of the most important elements of the politics, which is itself based on mutual communication of individuals as well as on common knowledge that arise as a result of communication. In contrast to the idea of mass communication, which typically represents a process of targeted one-way flow of information, the concept of political communication, especially in democratic societies, includes also the interrelationship of factors in the political process and the methods and ways of conveying information. The methods of political communication reveal the true identity of a political system. The public space in its role of a place of communication and shaping of public opinion in modern western democracies becomes a sophisticated mechanism of various information transfer. In this context, the media is becoming less an instrument of media policy and more a kind of stock exchange for information and the boundary is lost between the sender and the recipient, and the participants are required to have specific skills at their disposal. Development of media brings changes in the structure of political communication and creates new political priorities.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the structure of the political system;
2. State and explain the development of methods of political communication through history;
3. Define, identify and explain the various models of political communication;
4. Define, explain and use various elements of political communication in the context of access (citizen, media policy, public relations), structure (motives, strategies, methods);
5. Define, explain and recognize the consequences of political communication (knowledge, dialogue, manipulation).
General Competencies

Apply knowledge of the basic concepts of communications and journalism related to political communication; Identify and describe the place and role of political communication in society; Reproduce, apply and explain the basic theories of political communication and public opinion; Identify, explain and analyze the situation, innovations, challenges and problems in application and research of political communication and public opinion; define, explain and distinguish the effects of political media, attitudes, knowledge and behavior of the audience;

Grading

Regular and active participation, oral presentation and written term paper.

Week by Week Schedule

1. Public opinion and political communication
2. Political communication in the classics of political thought
3. The public as an arena of political communication: political institutions, the media, citizens
4. Political communication in the context of communication science
5. Democracy, legitimacy and political communication
6. Political processes and communication
7. The role of media in political communication
8. Direct communication and social networks as means of communication
9. Parties in political communication
10. Parliament and the public
11. The role and strategy of the government in political communication
12. Economy, business and lobbying
13. Political communication in the context of intercultural exchange
14. T. Parsons doctrine
15. The role and opportunities of citizens in contemporary processes of political communication

Political Economy

Course Description

To introduce students to the basic categorical apparatus of economic science. In addition to the standard basis of performance of micro and macroeconomics study captures the relationship between economic and political processes, stressing the importance of economic theory for understanding political decision. Special attention is paid to the importance of microeconomics, which has for understanding public policy. Categories such as efficiency and inefficiency of the market, monopoly, externalities, marginal costs, are an integral part of the analysis of public policies in contemporary political science. Likewise, the study of macroeconomic categories such as economic growth, employment, net exports and inflation, it is necessary for understanding the modern rule and governance. Economic policy has become a key dimension of the government's actions, and therefore an indispensable element of sociological studies. The study is based on analysis of the main economic categories, without thorough exposure to the development of theory and methods throughout the history of economic thought. The main objective of the study is to introduce students to the basic concepts of economic and non-mathematics analysis of micro and macroeconomics. The case is essentially similar cases now begun economy or Principles of Economics that are running on the faculties of economics.

Course Type

- Sociology (Dual-major studies Study) (required course, 2nd semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)

- Sociology (Study) (required course, 2nd semester, 1st year)

ECTS Information Package for Academic Year 2013/2014
Course Catalogue – Undergraduate Study
University of Zagreb Centre for Croatian Studies
Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic categorical apparatus of microeconomics and macroeconomics.
2. Use learned categories for the purpose of political-economic analysis of the political process.
3. Apply the solution of practical examples in the field of macroeconomics, such as the calculation of the CPI, the rate of productivity, the effect of taxation on inequality in income distribution, use graphs of supply and demand, price elasticity coefficient.
4. Analyze monetary and fiscal policy.
5. Analyze the economic effects of public policies.
6. Distinguish between political elements of economic trends.

General Competencies

Upon successful completion of the course, students will be able to:

Use general knowledge about society and social processes. Prepare the information society in a meaningful whole in written and oral form. Explain cause-and-effect relationships among social phenomena. Explain the key structural factors that shape society.

Grading

Students who achieve 10/13 presence at the seminar classes also generate 5% of the results achieved by checking the knowledge (the second colloquium is not counted in attendance). For example, if a student assessment on the first colloquium was 8/10 points, while the second also 8/10, this means that the material is passed with 80 percent success. Assuming that student regularly attended the seminar classes (10 meetings) and produced an essay/book review, student is credited with 10% of the final grade, and instead of a very good (4) The student achieves excellent (5).

To pass the exam student needs to collect a minimum of 50% of the test within the framework of each colloquium. Good (3) 60-79%, very good (4) 80-89%, excellent (5) - 90-100%. There is no possibility of correction of exams, or repeat exams in which the student failed to meet the conditions for passing.

Week by Week Schedule

1. The basic principles of economic organization and the types of economic goods, the market and the state in the modern economy
2. Elasticity of demand and supply, demand and consumer behavior
3. Production and cost of production
4. Complete and Incomplete Competition
5. Markets of factors of production and types of income
6. The growth of role of the state in the economy, public choice theory
7. 1. colloquium
8. Taxation and government expenditure; distribution of income and wealth; Public Debt
9. Accounts of the national income and product
10. Consumption and investment; Aggregate Demand
11. Money and Monetary Policy
12. Economic Growth and Aggregate Supply, Unemployment
13. Ensuring price stability, international trade
14. 2. colloquium
15. Survey Evaluation Course
Literature

Political Geography

Lecturer in Charge

Izv. prof. dr. sc. Nenad Pokos

Course Description

Getting to know with basic knowledge in geography related to politics.

Course Type

» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective courses, 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 1st semester, 1st year)
» Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the political institutions, processes and issues from the perspective of political geography and geopolitics.
2. Differentiate the types of borders on the land and sea.
3. Explain the most important inter-state conflicts and disputes last sixty years.
4. Define the countries according to the type of government.
5. Define the basic geopolitical terms.
6. Define basic geographical concepts.
General Competencies

Understanding the basic characteristics of politics through the processes of creation, development, functioning, and disappearing of political-territorial units (countries) in the world.
associate general knowledge about society and social processes
point out the conflicting opinions and alternative hypotheses in various social issues
point out the contradiction and common features of assumptions different political, religious and cultural orientation
identify cause-and-effect relationships among social phenomena
show the key structural factors that shape society
combine different theoretical assumptions in the study of social phenomena

Grading

Lecture attendance - 10%;
First test - 45%;
Second test - 45%.

Week by Week Schedule

1. Definition of political geography. Belgium
4. Theories of the creation of a country. Afghanistan.
7. Borders on the sea, borders of the air space. Israel (Palestine).
8. Test
9. Types of the countries according to the government. North Korea.
10. Capital City. Cuba

Literature

Post-Industrial Society

Lecturer in Charge

Izv. prof. dr. sc.
Krešimir
Perćković

Course Description

Introduce students to the sociological theories of post-industrial society according to D. Bell, A. Touraine, M. Castells and J. Fourastie. Enable students to acquire and apply the theories and basic sociological concepts of post-industrial society. Teach students how to operationalize these concepts using examples of empirical research on changes in social structures that lead to post-industrial society.

Course Type

« Sociology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain theoretical concepts and empirical models of post-industrial society.
2. Explain and evaluate concepts and empirical research on the changes in modern division of labor, socio-economic and socio-professional structure.
3. Evaluate the impact of technology on social change and the importance of an interdisciplinary approach to research these topics.
4. Write research on changes in the socio-professional structure.
5. Analyze the data from the research and interpretation of the results.

General Competencies

Use the general knowledge of society and of social processes. Explain the key structural factors that are shaping society. Explain the social change using classical and contemporary sociological approaches. Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.

Grading

Class attendance, participation in discussion, presentation of seminar work, final exam.

Week by Week Schedule

1. Meaning of the concept of post-industrial society
2. Basic sociological concepts from the theory of post-industrial society
3. Socio-historical factors in establishing the post-industrial society
4. Basic features of post-industrial society according to the theory of D. Bell
5. Dimensions of technological change and the "revolution" in the materials
6. A critical approach to the concept of post-industrial society by A. Touraine
7. The theory of M. Castells: informationalism as a developmental form of post-industrial capitalism
8. Company services as a sociological concept
9. Working in the service society: a critical review of postindustrial polarization on socio-professional structure
10. Changes in the socio-professional structure as an empirical indicator of post-industrialization
11. The new division of labor - the micro and macro approaches
12. The negative social consequences of postindustrial change
13. The process of demographic transition and changes in the labor market
14. Feminization of labor as a factor of post-industrial society
15. Croatian society in the post-industrial age - social development or regression?

Literature

Practical Ethics [Ethics]

Lecturer in Charge

Izv. prof. dr. sc.
Tomislav
Bracanović

Course Description

Course objectives are to provide students with basic knowledge about standard problems of practical (applied) ethics, especially with the utilitarian approach to these problems advocated by Peter Singer in his influential book Practical Ethics. Problems to be dealt with in the course are: the foundations of preference utilitarianism, the principle of equal consideration of interests, wrongness of killing in general, moral status of non-human animals, abortion and moral status of embryo and fetus, euthanasia, rich and poor, the refugee issue, protection of environment, means-ends reasoning in ethics, reasons for being moral.

Course Type

» Philosophy (Dual-major studies Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Summarize the central problems of contemporary practical ethics
2. Distinguish questions typical of normative ethics and from questions typical of practical ethics
3. Illustrate unique features of applied ethics and its differences to other branches of ethics and philosophical disciplines
4. Analyze the main features of preference utilitarianism and compare them with features of other approaches to applied ethics

General Competencies

After completing the course, students will be able to:

(i) explain the importance of ethics and applied ethics for assessing the life-style of contemporary humans and the advances of science;
(ii) recognize the assumptions of applied ethics originating from other philosophical disciplines (e.g. metaphysics, metaethics, political philosophy and philosophy of mind);
(iii) integrate practical models of ethical reasoning into the general philosophical ability of critical thinking.
Grading
On the basis of (a) regular attendance and active participation in discussions, (b) oral presentation grade and (c) grades of two tests.

Week by Week Schedule
1. Introductory lecture
2. The basic features of preference utilitarianism
3. The problem of equality and the principle of equal consideration of interests
4. The moral status of non-human animals and speciesism
5. The moral status of non-human animals and speciesism
6. The general wrongness of killing
7. Abortion and moral status of embryo and fetus
8. Test
9. Euthanasia
10. Rich and poor and the moral obligation to help
11. The refugee question
12. Protection of environment
13. Do ends justify means?
14. Why should one be moral?
15. Test

Practicum in Biological Psychology

Lecturer in Charge

Prof. dr. sc.
Zdravko Petanjek

Course Description

The overall objective of the course is to identify morphological and functional organization of the brain in practice, with particular emphasis on structures important in the processing of complex mental functions in humans. Specific objectives are elaborated per lecture subjects.

Course Type

Psychology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and identify fundamental parts of the central nervous system, the main morpho-functional division of the cerebral cortex, laminar organization and basic morphological properties of neurons in the human cerebral cortex;
2. Recognize and identify on the map of the human cerebral cortex functional specialization of different areas;
3. Recognize and identify the main structures of the limbic system;
4. Apply their knowledge in practical work using different instruments for brain imaging (MRI, IMRI, PET, MEG, EEG);
5. Use of multimedia web educational materials of the field of neuroscience in the preparation of presentations;
6. Create multimedia presentations with clinical examples that show the correlation between damage / dysfunction of specific brain areas and functional failure;
7. Analyze (basic level - recognition of basic structure) brain imaging records.

General Competencies

3. Explain the biological and neurobiological foundations of psychological processes and behaviour.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
13. Value the basic contents from the complementary social, humanistic and biomedical disciplines.
Grading

Active participation in classes - 10%
Exercise - 20%
Two written colloquia - 25%
Two practical colloquia - 35%
Oral exam - 10%

Week by Week Schedule

5. Functional neuroanatomy of ascending reticular activating system (ARAS) in the brainstem: raphe nuclei, slider nigra, ventral tegmental area, locus ceruleus. Exercises on cadavers: the peripheral nervous system, brain and spinal nerves, autonomic nervous system, sympathetic and parasympathetic nervous system, sensory and autonomic ganglia, the spinal nerves, phrenic nerve, wandering nerve, facial nerve, the trigeminal nerve.

8. Columnar organization of the visual cortex: oculodominant, orientation and metabolic column. The structure of the eye and ear: identification of the fundamental parts of the eye (cornea, sclera, choroid, retina, ciliary body, lens, vitreous, pupil and optic nerve) and the ear (outer, middle and inner ear, cochlea, semicircular ducts, auditory and vestibular nerve, ossicles) on the models. Display native preparations of the eye and ear.

10. Functional properties of the hypothalamus: the role of the hypothalamus in maintaining biorhythms, sexual orientation, the limbic system. The autonomic nervous system: sympathetic and parasympathetic, sympathetic and parasympathetic ganglia, the hierarchical level of the autonomic nervous system, autonomic structures of the brain stem, the hypothalamus as the main regulator of the autonomic and endocrine systems, identifying on diagram.

11. Papez circuit: the hippocampus, cingulum, mammary body, anterior nucleus of the thalamus, fornix, mammillo-thalamic tract. Anatomy of the limbic system: Papez circuit, the amygdala, the central limbic continuum, medio-basal (septal) area, hypothalamus, hippocampus, fornix, identifying on diagram, the model and the native preparation.

13. The hippocampus and the neural circuits of learning: the dentate gyrus, perforant path, mossy fibers, Schafer collaterals, CA1 and CA3 area. Anatomy and histology of associative areas of the brain: identifying different associative areas (dorsolateral, orbito-medial, medial-peri-cingulate cortex, parietally area, gyrus angularis and supramarginalis) on diagram, the model and the native preparation. Magno-cellularity - a histology slides.

14. "Cognitive" neurons and "cognitive" neural circuits: role in the development of the highest (and peculiar to human) cognitive functions, and relevance to psychopathology. The morphology of the brain - the visual presentation of magnetic resonance imaging. Recognizing the fundamental structure of the brain on MR image, correlation with histological sections, demonstrations of brain imaging using MR.

15. Imaging the brain functional activity: MEG, PET, functional magnetic resonance, quantitative EEG display, correlation of MR and CT. Display of brain activity - EEG. Demonstration of 64-channel EEG. Multimedia presentation of direct cortical and intracortical EEG recording. Application of EEG in the diagnosis of pathology of epilepsy (multimedia presentation).

Literature

Petanjek, Z. Funkcionalna anatomija mozga (ppt web prezentacija)

Sheme za vježbe
Prehistory and the First Civilisations

Lecturer in Charge

Doc. dr. sc.
Mladen Tomorad

Course Description

Students are introduced with the earliest periods of human history; with the emphasis on prehistoric cultures in Croatia and the earliest cultures of the Near East.

Course Type

» History (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (required course, 1st semester, 1st year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Outline the most important periods in the history of mankind and define them
2. Interpret historical sources
3. Explain the context of ancient history
4. Reconstruct cause and effect relationship connected with ancient history
5. Compare the processes of development of early statelike formations
6. Identify the most important persons from ancient history
7. Write an essay on most important cultural achievements in ancient history
8. Compare mythology and religion of ancient civilizations
General Competencies

After finishing the programme student will be able to: define historical processes typical for certain historical period; summarize basic information of the Croatian and the World history; compile a list of literature for ancient history; describe historical processes; explain cause and effect relations of historical events and processes; compare historical processes of different periods; interpret historical sources; appraise the value of historiographic interpretations.

Grading

Student activity will be monitored throughout the entire semester. Attendance is mandatory. The final exam is written and oral.

Week by Week Schedule

1. Introduction to subject
3. Paleo­litic and mesolitc.
5. Eneolithic. Bronze Age. Indoeuropean migration.
6. Late Bronze Age and Iron Age in Croatia. First contact with Greek culture.
8. Uruk era.
9. Third dynasty of Ur.
15. Concluding remarks / guest lecture

Literature

- Pritchard (ur.); Goldstein (priredio) (1990). Biblijski atlas the Times, Cankarjeva založba, Ljubljana
- Dimitrijević et al. (1998). Prapovijest, Naprijed, Zagreb
Proofreading and Editing

Lecturer in Charge

Prof. dr. sc.
Branka Tafra

Course Description

The aim of this course is for the students to implement their knowledge of orthographic and linguistic norms of Croatian standard language acquired during their studies by making an assessment of diverse texts, to gain practical experience in editorial and proofreading activities and to learn what they can edit in a text and how they can do it so the given text complies to the norms of the Croatian standard language. With constant practice during classes and doing their homework assignments, students will gain the basis for editing and proofreading, and also learn how to constantly improve their techniques. There will be at least one opportunity to talk with an editing professional.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective courses, 3rd semester, 2nd year)
» Croatian Studies (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Differentiate the following concepts: linguistic accuracy, standard and usage, functional styles;
2. Distinguish the concepts of editing, proofreading and revision;
3. Describe and utilize linguistic tools;
4. Analyze and edit a text on paper;
5. Analyze and proofread a text of the paper;
6. Analyze and proofread a text on a computer;
7. Analyze and edit a text on a computer;
8. Outline and observe punctuation and grammar errors in public communication;

General Competencies

Broaden the conversance of the mother tongue and practically apply the knowledge on a text.
Grading
Max number of points: compulsory attendance 80% = 10, both tests passed = 30, written exam = 30, oral examination = 10, activity in class = 20, a total of 100 points. Grades on tests and final exam: 51-63 = 2, 64-75 = 3, 76-87 = 4, 88-100 = 5.

Week by Week Schedule
1. What is a proofreader, an editor and a reviser?
2. Editing symbols and editing on paper
3. Orthography and the linguistic norm of Croatian language
4. Normative handbooks and differences between them
5. Orthographic issues outside the handbooks of Croatian orthography
6. Principles of compiling bibliographies
7. Units of measurement, mathematical and logical symbols
8. Workshop and test
9. Foreign proper names and their derivatives
10. Proofreading hassle with adjectives
11. Proofreading hassle with numeral words
12. Correcting a text on a computer
13. Analysis of proofread texts
14. Editing a text and various text formats
15. Workshop and test

- E. Barić i dr. (1999). Hrvatski jezični savjetnik, Školska knjiga, Zagreb
Psychological Measurement

Lecturer in Charge

Doc. dr. sc.
Maja Vurnek Živković

Course Description

Main objective of this course is introducing students to basics of psychological measurement: definition and basic concepts, and short overview of psychological constructs and their measurement.

Course Type

» Psychology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain what is a psychological test and understand ethical implications of psychological testing
2. Identify scaling techniques, be able to analyse their advantages and flaws
3. Explain basic metric characteristics of psychological tests and their relationship
4. Use independently computer programmes for data analysis
5. Recognize basic psychological constructs and tests that measure them
6. Evaluate psychological instruments

General Competencies

Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions and establish the advantages and limitations of different research methods and statistical methods in psychology and related disciplines.

Critically assess scientific insights for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Grading

Student’s work is continuously evaluated, they earn points for attendance, active participation, homework and knowledge testing. Grade is given based on all aspects of work. In case of failure in tests student can approach written examination that covers the same area.

Week by Week Schedule

1. Introduction
2. History of psychological testing
3. Psychological test
4. Test tasks
5. Test results
6. Five metric characteristics: reliability, calibration
7. Five metric characteristics: reliability, calibration
8. 1st preliminary exam
9. Personality assessment
10. Interests assessment
11. Values assessment
12. Tests of intelligence
13. Tests of creativity
14. Measuring school and work performance
15. 2nd preliminary exam

Literature

Psychology of Addiction

Lecturers in Charge

Prof. dr. sc. Slavko Sakoman
Doc. dr. sc. Renata Glavak Tkalić

Course Description

To acquaint the students with contemporary knowledge about the complex phenomenon of substance abuse and addiction, required to participate in the organization of prevention programs for youth; and also conducting diagnostics, participation in treatment, and the immediate implementation of individual and family counseling.

Course Type

» Psychology (Study) (elective courses, 1st semester, 1st year)
» Psychology (Study) (elective courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define substance abuse and addiction
2. Differentiate and describe the basic notions related to addiction
3. Classify different drugs into categories
4. Describe the effects of different types of drugs on psychological functions
5. Explain different factors that influence drug abuse and addiction
6. Analyze the consequences of substance abuse and addiction
7. Argue different approaches to the addiction treatment
8. Analyze different types of addiction prevention programs

General Competencies

Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
Value the basic contents from the complementary social, humanistic and biomedical disciplines.
Explain the biological and neurobiological foundations of psychological processes and behaviour.
Grading
Participation in class - 10%;
Seminar essay - 10%;
First test - 40%;
Second test - 40%.
If a student does not take tests or achieve unsatisfactory result on one or both tests, student will take written exam that corresponds the tests by its scope, content and the ECTS.

Week by Week Schedule

1. Social factors that influence the supply and demand of psychoactive substances.
2. Family factors and the risk of drug abuse and addiction.
3. Influence of individual psycho-biological disposition to the risk of drug abuse and development of addiction.
4. Development of addiction from the initial experimental use to the development of severe brain disease.
5. Types of drugs, mechanisms of action on the central nervous system, clinical presentation of addiction.
7. Consequences of substance abuse (individual, family, social).
9. Social programs aimed at reducing drug demand (school and after school prevention programs, secondary prevention, treatment and rehabilitation of addicts).
10. Social programs aimed at reducing the supply (availability) of drugs. Specifics of drug-related crime and the role of repression quality in the protection of youth and society from drug abuse.
11. Alcohol abuse, alcoholism and its consequences, prevention of alcoholism.
12. Tobacco smoking, its consequences, prevention of smoking.
13. Non-chemical addictions (gambling etc.).
15. Individual and family counseling.

Literature

Psychology of Adulthood and Aging

Lecturer in Charge

Prof. dr. sc.
Jasminka Despot Lučanin

Course Description

The aim of the course it to introduce students to the knowledge on physical, cognitive, emotional, and social development in early, middle, and late adulthood form the lifespan developmental perspective. Through the course, the students will be acquainted with different theoretical approaches to the development in adulthood and ageing, different factors that affect adult development, and research methodology in the field. Students will also acquire knowledge on developmental problems in adulthood and ageing. This course should enlarge the knowledge of students on developmental changes in adulthood and ageing, and consequently offer them the opportunity to develop and enlarge their own professional attitudes and skills.

Course Type

» Psychology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define characteristics of physical, cognitive, emotional, and social development in early, middle, and late adulthood.
2. Differentiate specific research methodology in developmental psychology in relation to the research in other fields of psychology.
3. Explain research results in the adulthood and ageing psychology in accordance with knowledge in developmental psychology.
4. Relate adulthood development theories to the previously acquired knowledge of developmental psychology theories.
5. Compare developmental tasks in early, middle, and late adulthood.
6. Apply the acquired knowledge of the adulthood and ageing psychology in research, and in professional task demonstration.
7. Explain, individually and in teamwork, theoretical and research findings of the adulthood and ageing psychology.
General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
4. Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
5. Compare theoretical approaches to the study of individual differences.
16. Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Grading

Students' achievement is continually evaluated through certain activities. A student can achieve a maximum of 100 points according to following arrangement: 5 points for regular class attendance, 10 points for individual seminar task presentation, 5 points for group task presentation, and 80 points (two times 40) for mid and end term tests OR written exam. Points are turned into final grade as follows: 60-69% - pass (2); 70-79% - good (3); 80-89% - very good (4); 90-100% - excellent (2).

Week by Week Schedule

1. The lifespan developmental psychology, stages of development, the life-cycle concept, the ageing process.
2. History of research in adulthood development, theories of adulthood development.
3. Research methods in adulthood development, variables in development research, research designs, problems in researching adult persons.
4. Physical and cognitive development in early adulthood: biological ageing, physical changes and health; post-formal stage, changes in the structure of thought, expertise and creativity.
6. Emotional and social development in early adulthood: Vocational choice and career development, close relationships, romantic love, marriage, parenthood, family life-cycle, diversity of adult lifestyles.
8. Emotional and social development in middle adulthood: Close relationships, family, becoming grandparents, siblings, career.
9. Physical and cognitive development in late adulthood: Life expectancy, physical changes and health, cognitive abilities - intelligence, memory, learning, wisdom; dementia; cognitive interventions.
12. Death, dying and bereavement: Understanding of and attitudes toward death, thinking and emotions of dying people, the right to die, bereavement process.
13. Life expectancy of students (questionnaire application, and response analysis); Students' beliefs about ageing (quiz on ageing myths and response analysis).

14. Life-review or looking back (semi-structured interview with an elderly person).

15. Visit to a retirement home.

**Literature**

Psychology of Childhood and Adolescence

Lecturer in Charge

Prof. dr. sc.
Zora Raboteg-Šarić

Course Description

After completing the course and passing the exam, students will understand the principles of human development and know the changes in the physical, cognitive, social and emotional development and personality development in early childhood, middle and late childhood and adolescence. Students will acquire skills that enable them to distinguish between typical development and developmental problems in children and adolescents and to identify developmental risk and protective factors at the individual, family, peer group and the wider social environment levels. Based on this knowledge, through individual work, seminars and group discussions, students will acquire the skills to plan activities to promote positive behaviour and prevent undesirable behaviour in children and youth.

Course Type

Psychology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe developmental changes in the physical, cognitive and socio-emotional development during early, middle and late childhood and adolescence;
2. Explain the mechanisms and processes underlying the changes in abilities, perceptions and behaviours during childhood and adolescence;
3. Choose appropriate approaches and methods to evaluate various skills, behaviours and attitudes in children and adolescents;
4. Compare normative development, individual differences in development and developmental problems in the physical, cognitive and socio-emotional development in childhood and adolescence;
5. Predict and evaluate the effects of biological changes, parents, family, peers, school and the wider community on the physical, cognitive and socio-emotional development in childhood and adolescence;
6. Identify developmental risk and protective factors, the problems and difficulties that can occur in children and adolescents and their causes and consequences;
7. Evaluate and recommend interventions at individual, family, school and society aimed at addressing the problems and difficulties in the development and the promotion of optimal development in childhood and adolescence.
General Competencies

Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.

Organize and present professional and scientific reports based on empirical data using scientific literature and demonstrating respect for international standards, independently or in a team.

Grading

Seminar paper is graded during the semester and it contributes 15% to the final grade. Students' performance on two written exams during the first and the second half of the semester or one final written exam contributes 85% to the final grade. Students who successfully pass two exams during the semester are not required to take the final exam. Students who do not wish to take two exams during the semester, as well as those students who are not satisfied with their achievement on these exams, are required to take the final written exam. The scope, the content and the corresponding ECTS points of the final exam meet the requirements of two exams conducted during the semester. Minimum achievement for a passing grade is 50% of the maximum number of grade points. The final grade is calculated based on points earned/total points possible for exams and seminar paper, as follows: 50% to 61% - sufficient, 62% to 74% - good, 75% to 87% - very good, 88% to 100% - excellent.

Week by Week Schedule

1. Early childhood: Cognitive development (Pre-operational Stage of cognitive development, memory) and socio-emotional development (children's fears, relationships with peers, play).
2. Early childhood: Gender roles (development and understanding of gender roles, gender stereotyping, gender identity, androgyny).
4. Middle and late childhood: Physical and cognitive development (Concrete Operational Stage of cognitive development, memory, cognitive style, the development of person perception).
5. Middle and late childhood: Measuring intelligence, children in schools, learning difficulties, extremes in intelligence.
7. Middle and late childhood: Kohlberg's theory of moral development.
8. Middle and late childhood: Aggressive and prosocial behaviour.
9. Middle and late childhood: Relationships with peers.
10. Adolescence: Introduction to adolescence, biological and physical development, cognitive development.
11. The social context of adolescence: The family.
12. The social context of adolescence: Peers, leisure and work.
15. Risk and protective factors of development, problems in adolescence.
Literature

Psychology of Communication

Lecturer in Charge

Prof. dr. sc.
Jasminka Despot Lučanin

Course Description

The aim of the course is to introduce students to the theory and practice of communication skills, and train them to be able to analyze communication skills and abilities of people in different situations. Students will also acquire the skills to improve communication, which should enable them to plan or suggest adequate approach to a specific communication problem and its resolution.

Course Type

- Psychology (Study) (elective courses, 2nd semester, 1st year)
- Psychology (Study) (elective courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the forms of interpersonal communication, communication skills and abilities.
2. Differentiate the forms of communication with regards to its goal: information or therapeutic.
3. Define the characteristics of communication with regards to the interpersonal relationship - family, friendship, partnership, business.
4. Explain the characteristics of communication in a helping relationship.
5. Identify the specific communication problems.
6. Plan for the strategy in resolving a specific communication problem.
7. Select communication skills useful in groupwork, negotiations and teamwork.

General Competencies

6. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.
8. Integrate the knowledge of cultural differences and critically assess the general principles, standards of good practice and work which demonstrates respect for diversity in a professional manner.
14. Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.
17. Devise appropriate forms of communication and cooperation in various professional environments.
Grading

Students' achievement is continually evaluated through certain activities. A student can achieve a maximum of 50 points according to following arrangement: 5 points for regular class attendance, 5 points for group task presentation, and 40 points (two times 20) for mid and end term tests OR written exam. Points are turned into final grade as follows: 30–34 points = pass (2); 35–40 points = good (3); 41–46 points = very good (4); 47–50 points = excellent (5).

Week by Week Schedule

1. Introduction to communication skills: Social interaction and communication.
4. Communication skills and abilities: Openness, kindness, avoidance of stereotypes and prejudices.
5. Communication skills and abilities: Active listening, empathy, assertiveness.
6. Information communication: Interview, asking questions.
7. Therapeutic communication: Aims and objectives, the course of communication.
8. Communication in conflicts: Forms of conflicts, outcomes, resolving skills.
9. Communication with persons with communication limitations: Cognitive impairments, emotional and mental problems, sensory impairments.
12. Communication skills in teamwork: Presumptions, communication styles.
15. Strategy planning in resolving a specific communication problem.

Literature

Psychology of Learning

Lecturers in Charge

Doc. dr. sc. Nina Pavlin Bernardić
Doc. dr. sc. Andrea Vranić

Course Description

The aim of the course is to provide students with an overview of the types, theories and basic principles of human learning. To compare human learning with that of animals and machines. To integrate findings of applied research on learning within the context of one of the three main approaches to the study of learning: behaviorism, cognitive learning and social learning. Upon course completion, students will be familiar with different types of learning and will be able to recognize their application in everyday life.

Course Type

» Psychology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the basic principles of human learning.
2. Identify and describe main approaches to human learning.
3. Compare the principles of learning in humans, machines and animals.
4. Apply knowledge of the basic principles of learning to specific learning situations in everyday life.
5. Discuss the contribution of the various individual characteristics to the success of the learning process.

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Grading

Regular attendance - 10%;
Seminar - 20%;
Two tests or final exam - 70%.
Week by Week Schedule

1. Introduction to the course
2. Behaviorism: Classical conditioning
3. Behaviorism: Instrumental conditioning
4. Cognitive learning theory
5. Social learning theory
6. Elaboration of research drafts from the area of psychology of learning
7. Test for students
8. Learning in a natural context
9. The impact of intelligence and cognitive styles on learning and memory
10. Machine learning
11. Learning strategies
12. Learning difficulties
13. Metacognition
14. Elaboration of research drafts from the area of applied psychology of learning
15. Test for students

Literature

Psychology of Memory

Lecturer in Charge

Doc. dr. sc. Andrea Vranić

Course Description

The objective of the course is to introduce students to the principles and mechanisms supporting human memory and theoretical underpinnings of different memory systems. Finishing the course will enable students to understand and analyze basic methodologies in the psychology of memory, to compare different research traditions, and differentiate normative and pathological memory processes. By applying basic memory principles and mnemonics students will be able to plan and design adequate procedures for memory improvement.

Course Type

» Psychology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe basic component processes involved in the process of memory.
2. List and compare different memory systems in terms of the information stored and mechanisms enabling the workings of each system.
3. Identify factors related to memory efficacy.
4. Differentiate between normal and pathological process in memory systems.
5. Apply the knowledge of memory systems with the aim of improving one's memory.

Grading

Regular attendance - 10%;
Seminar - 20%;
Two tests or final exam - 70%.

Week by Week Schedule

1. The history of memory research and early research tradition. Experimental approach to memory research.
3. Working memory.
5. Reading week and colloquium.
6. Forgetting theories and fundamental findings. The importance of forgetting.
8. Memory deficits. Categorization and basic symptoms.
10. Metamemory.
12. Everyday memory.
14. Memory improvement.
15. Reading week and colloquium.

Literature

Psychology of Management

Lecturer in Charge

Izv. prof. dr. sc.
Josip Burušić

Course Description

Course Type

» Psychology (Study) (elective courses, 1st semester, 1st year)
» Psychology (Study) (elective courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe and define the most important concepts in the psychology of management.
2. Describe the most important, basic, knowledge of contemporary psychology used to explain the most important issues in the psychology of management.
3. Compare the research within the field of psychology of management with other psychology research areas.
4. Develop awareness of the importance of continuous improvement of their own knowledge in the field of psychology of management.

General Competencies

Compare theoretical approaches to the study of individual differences.
Value the basic contents from the complementary social, humanistic and biomedical disciplines.
Devise appropriate forms of communication and cooperation in various professional environments.

Grading

The final student’s grade is determined by the final exam. Provisional grade with which a student comes to the examination term is formed over the course of the subject in a way that a score is kept of individual student activities. The maximum number of points that a student can achieve in certain activities is related to degree of student loading and include participation (arrivals + activities), midterm and critical readings.

Week by Week Schedule

1. Introduction to Psychology Management: Introduction to the Syllabus.
2. The foundation of management as a scientific discipline: approaches to defining management as fields.
3. Approaches to understanding and describing a manager's job.
4. Styles and theories of leadership.
5. Managing the behavior of individuals in the organization: the question of individual differences.
6. Managing the behavior of individuals in the organization: communication, conflict and negotiation.
7. Management of group behavior in the organization: teamwork, leadership and power.
8. Managing the behavior of individuals and groups in the organization: innovation, organizational change and stress in the organizational environment.
10. Midterm.
11. How Leaders Create and Use Networks. Leading Clever People.
13. Stress and 'burnout' in the workplace. The nature and causes of bullying at work.
15. Final lecture: analysis and evaluation of the subject.

Literature

Psychology of Religiosity

Lecturer in Charge

Prof. dr. sc.
Ilija Živković

Course Description

The main objective is to introduce the students to the branch of psychology of religiosity and with everything that this branch explores, as well as with the phenomena of religiosity which are dealt with in psychology and psychiatry.

Course Type

» Psychology (Study) (elective courses, 1st semester, 1st year)
» Psychology (Study) (elective courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize that religion is an important topic of psychological research,
2. Summarize modern neurology and neuro-psychology daily provide evidence that the human being is genetically predetermined for religiosity,
3. Explain certain psychological phenomena of religion,
4. Explain the importance of religious sentiments in social communication,
5. Assemble that religious development significantly affects the development of identity,
6. Explain the importance of religion in mental health,
7. Explain the psychopathological forms of religiosity.

General Competencies

Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
Identify the characteristics, mechanisms and models of psychological development and evaluate the effects of various biological and social factors on the physical, cognitive, social, and emotional development.
Value the basic contents from the complementary social, humanistic and biomedical disciplines.

Grading

100 % written exam.
Week by Week Schedule

1. The place of religiosity in the contemporary sociological, biological and psychological theories (the relationship between religiosity and modern science).
2. Opening assumptions of the psychology of religiosity (what religion encompasses, what may be subject to psychological research, review of the main religions of the world, contents, cults, concepts).
3. The historical heritage of the psychology of religiosity (the first research interests of Hall, Starbrook, James, Fred, Jung, Fromm, Erikson, Piaget, Skinner, Allport, Maslow, Rolo May, Frankl, Kostović, Živković).
4. Religiosity in the psychological systems of Freud, Jung, Allport and Frankl.
5. Psychological phenomena of religion (prayer, mystical experiences, possession, apparitions, conversion, altruistic behavior).
6. Religion and mental health (religiosity as therapy, the importance of confession, freedom from anxiety, ability of self-control, personal integrity).
7. Psychological dimensions of the religiosity of children, young adults and adults (the characteristics of children's religiosity, Goldman and Fowler's theory of religious development, the characteristics of young adult religiosity (Piaget) and the importance of religion in adulthood).
8. Mature as opposed to immature religiosity (the analysis and studies of Allport about the intrinsic and extrinsic religiosity).
9. Mature as opposed to immature religiosity (the analysis and studies of Allport about the intrinsic and extrinsic religiosity).
10. The development of conscience in psychology (conscience is examined from a psychological and theological point of view).
11. The development of conscience in psychology (conscience is examined from a psychological and theological point of view).
12. Religious identity in different cultures (analysis of current research on the views of young people on religiosity).
13. Religious identity in different cultures (analysis of current research on the views of young people on religiosity).
14. Psychopathological forms of religiosity (analysis of the so-called ekklesiogene neuroses).
15. Psychopathological forms of religiosity (analysis of the so-called ekklesiogene neuroses).

Literature

Psychology of the Gifted

Lecturer in Charge

Doc. dr. sc.
Nina Pavlin Bernardić

Course Description

The aim of the course is to provide students with the overview of the most important theories of giftedness and talent and defining phenomena and processes of giftedness. The aim is to introduce students to the basic approaches and problems in assessing talent and high abilities, specific characteristics and special needs of gifted individuals and different approaches to their education.

Course Type

» Psychology (Study) (elective courses, 1st semester, 1st year)
» Psychology (Study) (elective courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Name and explain the stereotypes, prejudices and myths about gifted individuals.
2. Explain the definitions and theoretical approaches to giftedness and to compare the differences and similarities between them.
3. Explain the cognitive characteristics of gifted individuals and personality components that contribute to the realization of giftedness.
4. Explain the process of identification of gifted students
5. Explain and compare different approaches to education of gifted students.
6. Explain specific characteristics of the education of gifted students with special needs.

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
Grading

During the course, activities are scored as follows:
- Report - 10 points
- Two tests or written exam - 90 points

Students can choose whether to take two shorter tests during the course or a written exam at the end of the course.

Grade is determined as follows:
- 1 - up to 60 points
- 2 - 61 to 70 points
- 3 - 71 to 80 points
- 4 - 81 to 90 points
- 5 - 91 or more points

Week by Week Schedule

1. Introduction to the course
2. Stereotypes, prejudices and myths about gifted children
3. Theoretical approaches and definitions of giftedness
4. Cognitive characteristics of gifted individuals
5. Components of personality that contribute to the realization of giftedness
6. Various forms of giftedness
7. Creativity as a component of giftedness
8. Identification of gifted students
9. Education of gifted students: acceleration
10. Education of gifted students: enrichment of the program
11. Education of gifted students: grouping students of similar abilities
12. Special groups of gifted students: gifted with special needs
13. Special groups of gifted students: gifted who underachieve in school
14. Special groups of gifted children: ethnic minorities
15. Test for students

Literature

Public Relations in Culture and Sports

Lecturer in Charge

Doc. dr. sc.
Jelena Jurišić

Course Description

The aim of the course is to enable the students to acquire practical tools and skills for planning and performing public relations activities in different types of projects and organizations, with particular emphasis on the projects in the fields of culture and sports.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Indicate, define and apply basic concepts of PR in culture and sports.
2. List, describe and apply the tools of public relations which are applicable to the projects in the field of culture and sports.
3. List, describe and apply the tools of public relations which are applicable to the projects in the field of culture and sports.
4. Demonstrate the ability to develop a public relations activity plan for a concrete project in the field of culture and sports, on the basis of the business analysis.
5. Demonstrate the ability to effectively and independently carry out practical tasks and prepare a research paper in a team.

General Competencies

Apply the knowledge of the basic concepts of public relations, primarily those associated with PR in culture and sports.
Define, explain and critically analyze the characteristics of public relations in culture and sports.
Apply the acquired public relations skills and techniques.
Work effectively independently and in a team.
Grading

50% seminar assignment, 50% preliminary exam / final exam.

Week by Week Schedule

1. Public relations in culture, examples;
2. Specific characteristics of PR tools in culture;
3. SWOT analysis;
4. SWOT analysis;
5. Analysis of PR activities of cultural institutions;
6. Public relations in sports;
7. Preliminary exam 1;
8. Specific characteristics of PR tools in sports;
9. Analysis of PR activities of sports institutions;
10. Analysis of PR activities of sports institutions;
11. Devising a concrete activity plan for PR in culture or sports;
12. Devising a concrete activity plan for PR in culture or sports;
13. Presenting students' seminar assignments;
14. Presenting students' seminar assignments;
15. Preliminary exam 2.

Materijali s predavanja
Qualitative Methods

Lecturer in Charge

Doc. dr. sc.
Tihana Brkljačić

Course Description

To introduce students to qualitative methods in psychological research, specific characteristics of qualitative methods compared to quantitative methods. To enable students to prepare, conduct and analyze qualitative research.

Course Type

Psychology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish qualitative and quantitative method.
2. Apply specific qualitative method for a particular research.
3. Apply content analysis method.
4. Apply focus-group method.
5. Apply in-depth interview method.
6. Apply case study method.
7. Describe projective techniques.
8. Write an article on the basis of qualitative research.

General Competencies

Critically evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge. Critically evaluate scientific and professional papers in the field of humanities, social sciences and biomedicine. Analyze the assumptions and apply appropriate methodological and statistical knowledge for the purpose of answering specific research questions, as well as identify the advantages and limitations of different research methods and statistical methods in psychology and related disciplines.

Grading

Seminars 2x25;
Exercises 20;
Project 30.
Week by Week Schedule

1. Introduction to qualitative methods: Features and relevance of qualitative approach.
2. Areas and reasons for qualitative methods.
3. Introspection: theoretical, historical and scientific value. Example and analysis.
4. Content analysis: function, preparation and application
5. Content analysis: result analysis, writing a report
6. In-depth-interview: function, preparation and application
7. In-depth-interview: result analysis, writing a report
8. Focus groups: function, preparation and application
9. Focus groups: result analysis, writing a report
10. Projective techniques in qualitative research
11. Computer programs for qualitative data analysis
12. Case study: function, preparation and application
13. Case study: function, preparation and application
14. Case study: result analysis, writing a report
15. Case study: result analysis, writing a report

Literature

Rationalism and Empiricism

Lecturer in Charge

Izv. prof. dr. sc.
Pavel Gregorić

Course Description

The aim of this course is to acquaint students with the leading philosophers of the Early Modern period and their capital works. Historical and intellectual context of the early modern philosophers will be presented. The main philosophical preoccupations of rationalist and empiricist philosophers will be explained, their agreements and disagreements will be outlined. The salient concepts employed by the rationalists and empiricists will be explained, their main theses and arguments elucidated. By reading and commenting on the selected passages from the main works of the leading rationalists and empiricists, students will solidify their understanding of the main philosophical terms, theses and arguments of Early Modern Philosophy. Another aim of the course is to demonstrate how to approach texts of classical philosophers in a scholarly and critical manner.

Course Type

» Philosophy (Dual-major studies Study) (required course, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

ECTS Information Package for Academic Year 2013/2014
Course Catalogue – Undergraduate Study
University of Zagreb Centre for Croatian Studies
Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the philosophical questions and concepts introduced by early modern philosophers
2. State the role of the rationalist and empiricist philosophers in the "scientific revolution"
3. List and evaluate the main arguments of the leading rationalists and empiricists in metaphysics and epistemology
4. Compare and contrast metaphysical and epistemological doctrines of the leading rationalists and empiricists
5. Recognize the philosophical questions and concepts that contemporary philosophy inherited from early modern philosophers
6. Explain the common sources, assumptions and concepts of the rationalists and empiricists

General Competencies

Students will be able to: describe the historical and intellectual context of the Early Modern period (16th–18th centuries); list the main works and ideas of the leading rationalist philosophers (Descartes, Spinoza, Leibniz) and empiricist philosophers (Locke, Berkeley, Hume); outline the main arguments in metaphysics and epistemology of the rationalists and empiricists; explain the common sources, assumptions and concepts of the rationalists and empiricists; outline the main disagreements between the rationalists and empirists and the avenues of their mutual critiques; contrast the philosophical concerns and methods of early modern philosophers in relation to scholastic philosophers; state the main contributions of early modern philosophers to later philosophy, in particular to the German idealism and contemporary philosophy; demonstrate a critical and scholarly approach to classical philosophical texts.

Grading

Participation in class: 10%;
Report: 20%;
Written tests: 35+35% or Final exam: 70%.
Students who receive grade C (Good) or above in both written tests do not have to take the final exam, though they are allowed to take it if they wish to increase the final grade from this course.
Students who do not sign up to give a report in class, will be evaluated as follows: Written tests: 45+45% or Final written exam: 80%.

Week by Week Schedule

1. Descartes
2. Descartes
3. Descartes
4. Spinoza
5. Spinoza
6. Leibniz
7. Leibniz
8. Locke
9. Locke
10. Locke

Realism and Antirealism [Metaphysics]

Lecturer in Charge

Prof. dr. sc.
Josip Talanga

Course Description

The objective of the course is to introduce students to main semantic, metaphysical, and epistemological problems concerning the realism-antirealism dispute (e.g., should truth be understood in epistemic terms or as correspondence, how tight is meaning connected to understanding, and is the objective reference possible), as well as to a number of specific realism-antirealism disputes, e.g., concerning moral facts, mathematical entities, modalities, fictional entities, theoretical entities etc., and to put the dispute into a broader philosophical context.

Course Type

» Philosophy (Dual-major studies Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify and list the key works and philosophers involved in the contemporary realism debates
2. Explain the main problems related to acceptance of realism, as well as problems related to specific realism-antirealism debates (e.g. concerning the existence of fictional entities, mathematical entities, theoretical entities, moral facts etc.)
3. Describe the most important contemporary works relevant for the realism-antirealism debate
4. Compare various competing views and solutions to particular disputes
5. Evaluate the plausibility of particular views and arguments in realism-antirealism debates

General Competencies

After they pass the exam, students will be able to (1) connect the newly learned material with the previously learned material in epistemology, metaphysics, logic, and ethics courses, (2) use the new knowledge in future courses, such as Philosophy of Language, Metaphysics 2, and Epistemology 2, (3) investigate by themselves further problems related to the realism-antirealism debate.
Grading

First written paper 15% of the final grade, second written paper 15% of the final grade, oral exam 70% of the final grade.

Week by Week Schedule

1. Introduction
2. What is realism?
3. What does exist? The basic ontological problem (Quine)
4. Realism and antirealism in philosophy of mathematics
5. Realism and antirealism in modal metaphysics
6. Realism and antirealism concerning fictional entities
7. Realism and antirealism concerning time
8. Metaphysical and semantic realism
9. Dummetts criticism of semantic realism (I)
10. Dummetts criticism of semantic realism (II)
11. Quine and the ontological relativity
12. Putnams internal realism (I)
13. Putnams internal realism (II)
14. Realist reaction to global antirealism
15. The closing discussion

Republic of Croatia: Information Systems

Lecturer in Charge

Doc. dr. sc.
Jelena Jurišić

Course Description

The aim of the course is to familiarize the students with the development of Croatian journalism since the advent of radio and television as new media of public information at the beginning of the 20th century, until today and the emergence of the Internet as the latest media of public information, with particular emphasis on the current information system of the Republic of Croatia.

Course Type

» Communication Sciences (Study) (required course, 4th semester, 2nd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Identify the most important events and milestones in the history of Croatian journalism and journalism in the 20th and early 21st century.
2. Classified and put into the context of the key periods in the history of Croatian journalism of the 20th century, and their dependence on the political, social and economic turmoil, but also technological progress.
3. Identify the most important names that marked the Croatian journalism in the 20th century, and the most important print and electronic media in Croatia.
4. Develop and conduct short independent research on a topic of modern communication media in Croatia.
General Competencies

Indicate and explain key events and processes in the history of media communication in Croatia, from the advent of radio and television as new media of public information at the beginning of the 20th century until the present times, in which the Internet dominates as the latest means of public media. Enumerate, explain and distinguish the most important printed and electronic media in Croatia (agencies, daily and weekly newspapers - national, regional and local, the system of HRT, private radio stations, private television, and the most important portals on the Internet). Identify, analyze and explain the specificities of media activity, with a focus on the media market of audience and marketing. Define, identify and critically analyze key challenges and problems of journalism in the 20th and early 21st century, and the characteristics of contemporary journalism and information systems in the Republic of Croatia.

Grading

Class attendance, literature reading and participating in the discussions with the professor and the colleagues (25% of the final grade), seminar paper (25% of the final grade) and the exam (50% of the final grade).

Week by Week Schedule

1. Course introduction, the historical context of the studied period.
3. Journalism at the time of the First World War: the creation of mass readership.
4. Journalism in the Kingdom of Serbs, Croats and Slovenes.
5. Croatian journalism and media communication a hundred years after the appearance of the first Croatian newspaper.
12. Croatian journalism and media communication in the war.
13. Croatian journalism and media communication in the Homeland War.
Literature

Research, Measurement and Restraining Corruption.

Lecturer in Charge

Izv. prof. dr. sc.
Irena Cajner Mraović

Course Description

The aim of the course is to introduce students to the phenomenon of corruption in a comparative perspective and to gain the skills necessary to identify and analyze corruption. The purpose of the course is to introduce students with instruments for the detection, prevention and effective methods of restraining corruption in modern societies, especially in transitional and unconsolidated democracy countries. Therefore, students will be familiar with the most important works in this area and will analyse all the relevant aspects of corruption.

Course Type

» Sociology (Study) (elective courses (2), 2nd semester, 1st year)
» Sociology (Study) (elective courses (2), 4th semester, 2nd year)
» Sociology (Study) (elective courses (2), 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define corruption.
2. Identify and classify the manifestations of corruption in modern societies;
3. Compare the basic features of corruption in developed democratic countries and in transitional countries
4. Identify ways of measuring corruption
5. Explain the meaning and objectives of international instruments to restrain corruption
6. Explain the impact of the European Union on restraining corruption

General Competencies

Explain the cause-and-effect relationships among social phenomena.
Plan own engagement in solving of social problems.
Point out the relevance of the concepts of culture, socialization, stratification, social structures and institutions in explaining social phenomena.
Explain the origin of social problems and conflicts while keeping in mind the way in which the social order is maintained and questioned.
Grading
1. colloquium 25%
2. colloquium 25%
3. Written seminar 25%
4. Active participation in seminars 25%

Week by Week Schedule
2. Corruption forms in modern societies: definitions and approaches.
3. Corruption in developed countries.
4. Corruption in transitional countries: basic features.
5. The economic costs of corruption: corruption and privatization in transitional countries.
6. Corruption through the judicial system and public administration.
7. Political corruption and the financing of political parties.
8. The first test.
9. Free access to information and corruption. Preventing conflicts of interest and corruption.
11. International instruments for restraining corruption.
12. The European Union and restraining corruption as part of the EU accession conditionality.
13. Corruption in Croatia.
14. The second test.
15. Concluding score, evaluation of the case and the final conversation.

Literature
Research and Analysis in Journalism

Lecturer in Charge

Izv. prof. dr. sc. Blanka Jergović

Course Description

Through media analysis introduce the students to the two most important methods of journalistic work which underlie the entire journalistic production – information investigation and analysis. The students will be taught skills of gathering, selecting, analyzing and commenting on information.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, describe and apply the fundamental concepts in investigative journalism.
2. Distinguish, explain and apply the methods of investigative journalism.
3. Define, describe and use the methods for information collection and selection
4. Define, describe and use the methods for working with the source of information.
5. Recognize, explain and use newspaper types of investigative journalism.
6. Apply journalistic skills of investigative journalism.

General Competencies

Apply the knowledge of the basic concepts of investigative journalism. Identify and describe the place and role of investigative journalism in journalism and society in general. Identify, explain and analyze the challenges and problems of investigative journalism. Apply the acquired journalistic skills of investigative journalism.

Grading

33.3% participation in discussions, 33.3% seminar work, 33.3% exam.
Week by Week Schedule

1. Journalistic investigation: the term, emergence and development;
2. Selection of research topics; sources of information;
3. Classification, methods of establishing and maintaining contact, use; information;
4. The term, specific methods of searching for information and its processing, search on the Internet;
5. Text writing, material preparation, genre selection;
6. Specificities of investigative article;
7. Ethical aspects of journalistic investigation;
8. Journalistic analysis: the term, emergence and development;
9. The reason and choice of the topic of analysis;
10. Genre selection: article;
11. Genre selection: overview, commentary;
12. Genre selection: criticism, review, feuilleton;
13. Methods of analysis and interpretation of information and reality;
14. Text writing;
15. Ethical aspects of journalistic analysis.

Literature

Research Methods Practicum

Lecturer in Charge

Doc. dr. sc.
Maja Vurnek Živković

Course Description

Enable students to gain knowledge of applying different research methods and experimental designs in psychology and other social sciences, as well as presenting and interpreting results and writing scientific reports. Enable students to recognize all the advantages and limits of a specific research method and design, and to choose the appropriate method and design for a specific research question. Mentioned objectives are achieved through practical exercising most research methods that were taught in courses: Experimental Methods and Non-experimental Methods, since this course is planned as an expansion of mentioned courses.

Course Type

» Psychology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Prepare and conduct quantitative research in social sciences;
2. Interpret, discuss and conclude about psychological phenomenons based on conducted research studies and theories, or on empirical data from one’s own research;
3. Analyze data obtained in research, knowing the limitations of used methodology;
4. Compare and evaluate different research methods for different problems;
5. Write scientific reports

General Competencies

9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquisition of knowledge.
10. Judge scientific and professional papers in the field of social sciences, humanities, and biomedicine.
11. Analyze the assumptions and apply consistent methodological and statistical knowledge for the purpose of answering specific research questions, and determine the advantages and limitations of different research and statistical methods in psychology and related scientific disciplines.
Grading

Written Reports represent written examination and determine the grade in this course (final grade is a combination of grades obtained for all reports).

Week by Week Schedule

1. Introduction, conducting research for the 1st topic (Topic 1: The significance of randomised allocation and sample size for psychological experiment), instructions for writing 1st report.
2. Conducting research for 2nd topic (Topic 2: Experimental design with control group i testing only after treatment), instructions for writing 2nd report; writing 1st report.
5. Conducting research for 5th topic (Topic 5: correlational research), instructions for writing 5th report, reviewing 3rd reports, writing 4th report.
6. Instructions for conducting the research for 6th topic, reviewing 4th reports, writing 5th report.
7. Conducting research for 6th topic (field work kids in elementary school).
9. Instructions for conducting the research for Topic 7 (Topic 7: questionnaire); writing 6th report.
10. Conducting research for Topic 7 (field work).
11. Handing in results for Topic 7, instructions for writing the 7th report, reviewing 6th report.
12. Conducting research for Topic 8 (Topic 8: Focus group), instructions for writing 8th report, writing 7th report.
13. Reviewing 7th report, writing 8th report.
15. Final conclusions.

Literature

Rhetorics

Lecturer in Charge

Doc. dr. sc.
Tomislav Janović

Course Description

The aim of the course is to enable students to understand the rhetorical discourse in the context of written and spoken media and introduce them to the principles of creation of rhetorical content and modes of public appearance.

Course Type

» Communication Sciences (Dual-major studies Study) (agencies-the press, 4th semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (agencies-the press, 6th semester, 3rd year)
» Communication Sciences (Dual-major studies Study) (public relations, 4th semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (public relations, 6th semester, 3rd year)
» Communication Sciences (Dual-major studies Study) (radio-television, 4th semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (radio-television, 6th semester, 3rd year)
» Communication Sciences (Study) (agencies-the press, 4th semester, 2nd year)
» Communication Sciences (Study) (agencies-the press, 6th semester, 3rd year)
» Communication Sciences (Study) (public relations, 4th semester, 2nd year)
» Communication Sciences (Study) (public relations, 6th semester, 3rd year)
» Communication Sciences (Study) (radio-television, 4th semester, 2nd year)
» Communication Sciences (Study) (radio-television, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Support claims with arguments in accordance with logical patterns.
2. Defend from eristic tricks.
3. Demonstrate the skill to design statements for different media.
4. Demonstrate the analytical approach to drafting a speech and present it.
5. Prepare and develop argumentation strategies in a debate.
6. Follow the manners in speaking.
7. Demonstrate the ability to adjust voice and pronunciation for a public speaking appearance.
General Competencies

Rhetoric is a comprehensive discipline that is integrated into almost all university programmes since the teaching and professional activity in communicology are for the greatest part performed through speech. It is expected that the adopted principles of rhetorical discourse, which necessarily implies the pursuit of truth, will ennoble all speaking efforts of students, in the context of text creation and its performance.

Grading

50% seminar paper, 50% preliminary exam / final exam.

Week by Week Schedule

1. Introductory class
2. What is rhetoric?
3. The history of rhetoric from the Greeks until the twentieth century
4. Strategies of informal reasoning I
5. Strategies of informal reasoning II
6. Types of statements
7. Argumentation: Toulmin and Perelman
8. Tricks
9. Preliminary exam (written)
10. Listening to speech
11. Rhetoric types
12. Speech
13. Speech and pronunciation
14. Practicum: Debate
15. Preliminary exam

Roman History and Civilization

Lecturer in Charge
Doc. dr. sc. Šime Demo

Course Description
The knowledge of the Roman history and civilization is a prerequisite for the understanding of our history, culture and civilization heritage in general. The course offers insight into the roots, development (anthropological, social, economic, historical, legal and architectural) and the downfall of the subject civilization and its reflection on the history to the present day. The concepts are explained through the wide world examples correlated to our area for easier acquiring of knowledge.

Course Type
- Latin language (Dual-major studies Study) (required course, 1st semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
- Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
- History (Study) (elective general foundation courses, 1st semester, 1st year)
- History (Study) (elective general foundation courses, 3rd semester, 2nd year)
- History (Study) (elective general foundation courses, 5th semester, 3rd year)
- Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
- Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
- Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Define the basic methodological approaches to the understanding of history and civilization
2. Identify key people and processes that left traces in the Roman history and civilization
3. Explain the causal links between historical processes and civilization heritage of individual periods of the Roman history and civilization

Roman metrics

Lecturer in Charge

Doc. dr. sc. Šime Demo

Course Description

During the seminars and the exercises student gets familiar with Roman versificatory system, metrics and prosody.

Course Type

- Latin language (Dual-major studies Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use internet resources for Roman metrics.
2. List and explain main concepts in Roman metrics and prosody.
3. Identify feet, verses and stanzas of Roman poetry.
4. Describe Greek origins of individual Roman metrical forms.

General Competencies

Use internet resources for Roman metrics. Identify feet, verses and stanzas of Roman poetry.

Grading

Attendance of classes (up to 3 times absence) - 20% of the grade;
Two colloquies - 50% of the grade;
seminary tasks - 30% of the grade;
Final exam: defining and eventual correction of the grade achieved during the classes.

Week by Week Schedule

1. Introduction into the subject: presentation of the subject, Assignment of seminarary paper tasks, meeting the students.
2. Definitions of the metrics and the prosody, Greek origins of Roman metrics, making of the rhythm in Roman poetry.
3. Syllable uqantities.
4. Feet, phonological metrical deformations.
7. Colloquium.
11. Asclepiadean verses and Asclepiadean stanzas.
12. Alcaic stanza.
15. Final discussion.

Roman poetry 1

Lecturer in Charge

Doc. dr. sc. Šime Demo

Course Description

The course will make it possible for the student to analyse Roman epic poetry. At the lessons the representative segments will be treated on all levels (metrical, phonological, morphological, syntax, semantic and so-called real).

Course Type

» Latin language (Dual-major studies Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use dictionaries, foreign literature and manuals.
2. Analyze selected epical segments.
3. Apply earlier knowledge of Roman metrics.
4. Identify main features of epic poetry and their authors.
5. Write independently a translation of a chosen segment of an epic work.

General Competencies

Use dictionaries, foreign literature and manuals. Identify main features of epic poetry and their authors.

Grading

Attendance of classes (up to 3 times absence) - 20% of the grade;
Two colloquies - 50% of the grade;
seminary tasks - 30% of the grade;
Final exam: defining and eventual correction of the grade achieved during the classes..

Week by Week Schedule

1. Introduction into the course. Assignment of seminary paper topics.
2. Repeating of Roman metrics, especially hexameter as a style of epics.
4. Work with the dictionary as an auxiliary tool in the analysis of a poetic text.
5. Morphological analysis: word types and forms.
6. Identifying predicates and examining their role in the structuring of the text.
7. Analysis of the periphery parts of a sentence in an epic work.
8. Colloquium.
9. Analysis at the level of the period: independent and dependent clauses.
10. Higher levels of the text: intersentential connectors and the structure of the narrative segments.
11. Real commentary: historical and mythological persons, places and concepts.
12. The level of meaning: semantic details.
13. Translation of the text.
15. Final considerations about epic poetry. Discussion.

Literature

Roman poetry 2

Lecturer in Charge

Lekt. Zdravka Martinić-Jerčić

Course Description

The main objective of the course is to give a broad picture of Roman poetry by reading representative texts of Roman lyrics and drama. Students will be able to work by themselves on the original poetic text written in Latin by active reading of poetry written by Horace, Ovid, Plautus and Seneca. The objective is to develop translating strategies, literary, linguistic and stylistic analysis of text, applying and broadening knowledge of syntax, stylistic analysis, metric use, vocabulary and phraseology.

Course Type

» Latin language (Dual-major studies Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize and explain basic characteristics of Roman poetry and representative authors in Roman literature,
2. Recognize and differentiate metric diversity according to the type of Roman poetry,
3. Analyze an original text of Roman lyric poetry and drama,
4. Apply previously acquired skills of morphology and syntax of Latin language,
5. Evaluate and choose a translation of Roman lyric poetry and drama that is accurate and of quality.

General Competencies

Student will be able to: recognize, describe and differentiate metric diversity according to the kind of Roman poetry (lyric, epic and drama), interpret and apply acquired translating skills and techniques with an accent on lyric poetry and drama, recognize, list, differentiate and explain basic characteristics of roman poetry regarding thematic and content diversity of the poems, place Roman poetry in literary, social and historic context.

Grading

Attending classes. Active participation. Implementation of assignments. Written exam.
Week by Week Schedule

1. Introduction to the course. Assignment of seminar essays.
2. P. Ovidius Naso, Tristia, introduction translation, linguistic and metric analysis, seminar essays
3. P. Ovidius Naso, Tristia, translation, linguistic and metric analysis, seminar essays
4. P. Ovidius Naso, Amores, translation, linguistic and metric analysis, seminar essays
5. Q. Horatius Flaccus, Carmina, introduction, translation, linguistic and metric analysis, seminar essays
6. Q. Horatius Flaccus, Carmina, translation, linguistic and metric analysis, seminar essays
7. Q. Horatius Flaccus, Carmina, translation, linguistic and metric analysis, seminar essays
8. Q. Horatius Flaccus, Carmina, translation, linguistic and metric analysis, seminar essays
9. T. Maccius Plautus, introduction to the chosen comedy, translation, linguistic and metric analysis, seminar essays
10. T. Maccius Plautus, Aulularia, translation, linguistic and metric analysis, seminar essays
11. T. Maccius Plautus, Aulularia, translation, linguistic and metric analysis, seminar essays
12. L. Annaeus Seneca, Medea, introduction to the chosen tragedy, translation, linguistic and metric analysis, seminar essays
13. L. Annaeus Seneca, Medea, translation, linguistic and metric analysis, seminar essays
14. L. Annaeus Seneca, Medea, translation, linguistic and metric analysis, seminar essays

Scepticism (Epistemology)

Lecturer in Charge
Prof. dr. sc.
Zvonimir Čuljak

Course Description
The course objectives are to inform students about the epistemological problem of skepticism through the most important skeptical views. Types of skepticism (ancient and modern skepticism), basic skeptical hypotheses and analysis of skeptical arguments and those against the skeptic will be elaborated.

Course Type
» Philosophy (Dual-major studies Study) (elective courses, 6th semester, 3rd year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Explain and understand the importance of the skeptical assumption in the context of justification and knowledge
2. Review and evaluate the plausibility of certain skeptical arguments
3. Relate historical and contemporary context of skeptical arguments
4. Interpret read and understand original philosophical texts
5. Review and evaluate the plausibility of certain skeptical arguments

General Competencies
After passing the exam, students will be able to: recognize the importance of skeptical arguments within the epistemological theory of knowledge and justification critically analyze and apply the philosophical arguments formulate their own philosophical views and objectively evaluate them read and understand original philosophical texts

Grading
On the basis of: (i) oral presentation grade and (ii) both tests grade/final written exam.

Week by Week Schedule
1. Introductory lecture
2. Background and importance of the skeptical assumption
3. Types of skepticism
4. Ancient (pironism, Agripa’s trilemma, Sextus Empiricus) and contemporary skepticism (R. Descartes, H. Putnam)
5. Paradoxes
6. Skeptical arguments and the principle of epistemic closure
7. Argument from error
8. Test 1
9. The dream argument
10. Argument from ignorance
11. Argument from ignorance
12. Commonsense realism
13. Strategies against the skeptic
14. Contextualism
15. Test 2

Scientific Research Methodology

Lecturer in Charge

Doc. dr. sc. Mladen Tomorad

Course Description

The aim of the course: to develop the ability and skills associated with the basic methodology of the scientific work and research in historical sciences, to gather sources and literature relevant with the various historical topics, to review and analyse them, and to write various scientific works with the help of the IT technologies.

Course Type

» History (Study) (required course, 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Reproduce methodology of the scientific work related with historical sciences
2. Explain historical sources and literature
3. Relate and reproduce types of historical sources
4. Identify and compare the various problems of the methodology in historical sciences
5. Reproduce the important selection of sources for various historical research
6. Use of tables, graphs in scientific research
7. Classify the scientific works and their structure
8. Reproduce of the main terms related with the writing of the scientific works and preparation for print
9. Use of the gained knowledge in writing of the scientific works and bibliographies
10. Identify plagiarism and know how to avoid it

ECTS Information Package for Academic Year 2013/2014

Course Catalogue – Undergraduate Study

University of Zagreb Centre for Croatian Studies 553
General Competencies

After successful course students will be able to:
- explain methodology of the scientific work related with historical sciences,
- name types of historical sources and discuss sources and literature,
- identify the importance of historical sources in historical research,
- produce tables, graphs and databases in historical research,
- define the main terms related with the writing of the scientific work and prepare it for print,
- evaluate the importance of the gained knowledge and to use it in process of writing,
- identify plagiarism,
- name the most important institutions in which the historical sources are kept.

Grading

Class attendance 20 %;
Bibliography 20 %;
Review 20 %;
Colloquium I 20 %;
Colloquium II 20 %.

Week by Week Schedule

3. Tables and graphs and their usage in scientific research.
4. Classification of the scientific works. Structure of the scientific works.
6. The main sections of the scientific work: abstract, introduction, methods, research, results of the research, conclusion, summary, references, bibliography, footnotes, the other parts. Seminars.
7. Bibliographies, list of references: the main rules and the basic ways how to write it.
8. The historical research. How to write historical texts. Plagiarism in historical sciences.
9. Scientific footnotes: footnotes (definition); the main international abbreviations; structure of footnotes; styles of writing footnotes (Chicago, Harvard, various variations).
10. Scientific footnotes: exercise I.
11. Scientific footnotes: exercise II.
12. Collection of historical sources.
13. Archives.
15. Colloquium.
Literature

Sectoral Public Relations

Lecturer in Charge

Doc. dr. sc. Zoran Tomić

Course Description

The aim of the course is to familiarize the students with the fundamentals of public relations (PR) and strategic communications in a variety of sectors: corporate and business communications, PR in government agencies and the public sector, PR in politics, the civil sector, relations with the local community, establishing communication between sectors. The students apply the theories of PR in practice, learn the differences in PR for certain sectors, the characteristics of public, external and internal relations and communication, and in particular the importance of strategic planning and resources that PR uses in practice.

Course Type

» Communication Sciences (Dual-major studies Study) (public relations, 3rd semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (public relations, 5th semester, 3rd year)
» Communication Sciences (Study) (public relations, 3rd semester, 2nd year)
» Communication Sciences (Study) (public relations, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, distinguish and apply in practice the basic theories of PR.
2. Demonstrate knowledge and distinguish the characteristics of sectoral PR and apply the acquired knowledge specifically to each sector.
3. Apply the tools that PR uses in its work.
4. Analyze the social, economic and political context of PR.
5. Apply the learnt PR tools in practice.
6. Distinguish good from bad practice and know the relevant examples of good communication in various sectors.
7. Demonstrate progress in critical thinking and the skill of articulating problems.
General Competencies

Apply the knowledge of the basic concepts of public relations, especially in relation to the effects of sectoral PR;
Identify and describe the place and role of public relations in the society, especially sectoral PR;
Reproduce, apply and explain the basic theories of sectoral public relations;
Identify, explain and analyze the situation, innovations, challenges and problems in communicology and sectoral public relations;
Explain and critically analyze the acquired theoretical and practical knowledge.

Grading

The final grade is based on the students' activity throughout the semester, the assessment of the seminar assignment and the score in the final written exam.

Week by Week Schedule

1. Introduction to PR. Definitions, development of PR, PR role in organizations. Interactive work in teaching, group discussions to determine the initial knowledge and the understanding of the subject.
2. The role of PR. Demarcation between PR and related disciplines and sectors. The position in the dominant coalition. Professionalism.
3. PR in the corporate sector and corporate communication. The position, role, characteristics. Basics of the systems theory.
4. Practical work - analysis of a case problem from the environment.
5. PR in the corporate sector - business roles, strategies, planning in the organization.
6. Organizational dynamics and PR - building internal relations within the organization.
7. PR in politics. Rhetorical theory. PR and political campaigns.
8. Rhetorical theory and the art of persuasion. Practical work - analysis of a case problem from the environment.
10. The theory of interest-influence groups. PR in the non-profit sector. Relationship between PR and activism, and the politics of pressure.
11. Communications risk management. Establishing relations with interest-influence groups. Example of a communication related to environmental issues.
12. Corporate social responsibility. Sustainability, CSR and PR. The role of communication in establishing of CSR processes. Practical assignment: instructions for writing the final paper - a critical thinking essay.
14. Lobbying and public affairs. The connection to PR.
15. Measurement and evaluation of the effects of PR.
Literature

Selections from World Literature

Lecturer in Charge

Doc. dr. sc. Dubravka Zima

Course Description

Given that the course in question is part of the undergraduate study, the goal of the course is to provide an introduction to the study of literature and to introduce the students to the basic concepts of the scientific study of literature, the basic concepts of literary theory and the basics of academic literacy in the study of literature.

Course Type

» Croatian Studies (Study) (elective courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective courses, 3rd semester, 2nd year)
» Croatian Studies (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain and provide examples for the concepts of literature, world literature and literary science,
2. Distinguish between an intrinsic and extrinsic approach to literature,
3. Recognise and explain individual literary processes,
4. Write a short basic academic text, with proper referencing and citation.

General Competencies

Explain and provide examples for the concepts of literature, world literature and literary science,

Grading

Required literature according to the detailed work plan. Seminar papers involve additional literature which is agreed upon with each student individually.

Week by Week Schedule

1. Introduction to the study of literature. Course objectives. Student obligations and tasks. Seminar assignments. The way seminar papers are written. Work Plan. Reading and required literature list.
2. The concepts of literature and world literature. Reading the text by Jonathan Culler: Literature, what is it and does it matter?
5. Work on the text: Gustave Flaubert: Madame Bovary. Introduction to literary modernism.
10. Work on the text: Günter Grass: The Box.

Semiotics in Mass Communication

Lecturer in Charge

Izv. prof. dr. sc.
Danijel Labaš

Course Description

The main objective of this course is to provide insight into the basic knowledge of semiotics, with special reference to its interdisciplinary nature, understanding it as a point of blending of life sciences and the science of signs (T. Sebeok). The specific objective of the course is to prepare students to understand semiotics as a science, general semiosis and communication systems, as is reflected in the broad range - from everyday communication over a public (and mass) communication to the aesthetic structure of language, image and sound signals - in order to evolve a character into a sign and recognize opportunities of semiotic interpretation of texts of all kinds of media (print media in general, front pages, promotions, photos, music, film).

Course Type

» Communication Sciences (Dual-major studies Study) (required course, 3rd semester, 2nd year)
» Communication Sciences (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze and compare historical development of semiotics and its content
2. Explain basic author approach to semiotics and basic concepts such as sign and symbol
3. Argue importance of familiarity with knowledge of semiotics in the study of communication sciences
4. Describe the role of signs and symbols in everyday life;
5. Analyze and interpret signs and symbols in print media, promotional materials and photography
6. Use the acquired knowledge on semiotic interpretation of mass media
7. Estimate quality and capabilities of application of stereotypes and manipulation through media
8. Analyze in critical manner the media content from the semiotic point of view
9. Argue the reasons for importance to be familiar with semiotics of mass media

ECTS Credits 4.0
English Level L1
E-learning Level L1
Study Hours 30
Prerequisites
Introduction to Communication Sciences
General Competencies

Students will learn about the semiotic point of view at the human being who is animal symbolicum - a being of symbol, because human is the only one with the opportunity and ability to create symbols and think and live in a world of symbols. Since the language, myth, art, religion and media are parts of that universe, and symbols become part of human communication, students will be trained not only to notice, but also correctly interpret the various signs and symbols conveyed to us daily by the media in different social and cultural environments. Students will be capable of arguing the reasons why it is necessary to have knowledge about the semiotics of mass media, and will develop skills of critical perception, presentation and analysis of media ranging from printed media to new media through which signs and symbols can be created, but also to manipulate, stereotype and ideologize modern society.

Grading

10% attendance, 10% active taking part in discussions for blog work, 80% colloquia and/or exam.

Week by Week Schedule

1. Introductory lecture and introduction to the subject course, presentation of required reading and duties
2. History of semiotics I
3. History of semiotics II
4. Sign, symbolism, symbols, meaning;
5. Semiosys. Semiotics: systems of symbols and communication process;
6. Language and language codes;
7. Semiotics of media;
8. Semiotics of (newspaper) text;
9. Semiotics of television;
10. Semiotics of (daily) newspaper;
11. Semiotics of photography;
12. Semiotics of film;
13. Semiotics of commercials;
14. From a sign to a symbol: communication role a symbol has in mass media.
15. Review of the exam material

Social Ecology

Lecturer in Charge

Izv. prof. dr. sc. Vladimir Lay

Course Description

Basic objectives of the course are to give knowledge (accomplishments) and comprehension on:

1. Elementary concepts of social ecology;
2. Fundamental problems on the organisation of survival in the conditions of endangering natural basis of life on the planetary level;
3. Concept of quality of living;
4. Concept and issues of sustainability and sustainable development;

Along with these above mentioned objectives, the final thematic block has an intention to give students comprehension on:

5. Environmental peculiarities and excellence of Croatia in the European context;
6. Phenomena and issues of (un)sustainable development of Croatia;
7. National interests of the development of Croatia, through the prism of the concept of sustainable development;

The course also encompasses some elements of support in building a modern, towards affirmation of life, oriented worldview, and is critical to the civilisation of death and modern forms of destruction, and self-destruction of life.

Course Type

» Sociology (Study) (elective courses 1., 1st semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe modern social and ecological processes in modern world;
2. Apply acquired knowledge (accomplishments) and comprehension in organisation of one's own forms of behaviour toward environment and life;
3. Develop one's own mental map of social and ecological structure of modern world;
4. Analyze contemporary social and ecological, as well as developmental, problems in contemporary Croatia and the world;
5. Estimate one’s own value orientation and worldview, the idea of which is the guidance of life affirmation;
6. Demonstrate acquired knowledge (accomplishments) to other (young) people who do not have opportunity to attend this course;
7. Apply knowledge (accomplishments) in different life situations.

General Competencies

Use the general knowledge of society and of social processes.
Explain causal relationships between the various social phenomena.
Explain the key structural factors that are shaping society.
Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.

Grading

Emphasis is on oral examinations with the duration of about 30 minutes per candidate. As there are only about 20 students in total, they are monitored individually – tutorial guidance.
Seminars are graded on the part of all attendees. Maximum of tolerated nonappearance is 3x (1/5). Continual record-keeping of attendance is managed.

Week by Week Schedule

4. Climate changes as anthropogenic sociological and ecological processes.
5. Climate changes in Croatia – analysis of public policy.
6. Processes of degradation of planetary biodiversity caused by the development.
7. Processes of endangering world drinking water reserves.
8. Modern forms of attack on life.
9. Concept of quality of living: dimensions, indicators, variables / history of concepts and range.
10. Analysis of results of research of the quality of living in Croatia and EU.
11. Analysis of the results of research of the development of Croatia and EU, on the basis of HDI (Human Development Index).
12. Concept of integral sustainability and sustainable development.
13. National interests of the development of Croatia through the prism of the concept of sustainable development.

Social Pathology

Lecturer in Charge

Izv. prof. dr. sc. Irena Cajner Mraović

Course Description

The main goal is to enable students studying different types of deviant behaviour and on the basis of that understanding the key concepts explaining deviance. Students will adopt interdisciplinary approach explaining deviant behaviour and study methodology and results of recent research in the field of social pathology. The final goal is to enable students for practical use of their theoretical knowledge, particularly in the field of relevant research as well as in creating public policies.

Course Type

» Sociology (Study) (elective courses (2), 1st semester, 1st year)
» Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the subject, objective and purpose of social pathology as empirical science.
2. Illustrate historical development of thought and research in the field of social pathology.
3. Differentiate forms of deviant behaviour in relation to gender.
4. Interpret drugs and alcohol addiction in relation to certain crimes.
5. Demonstrate different concepts explaining deviant behaviour.
6. Analyze social role of deviants and deviance.
7. Classify sources of deviance.
8. Differentiate forms of deviant behaviour in different social context.
9. Compare social and situational approach to prevention of deviance.

General Competencies

Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.

Explain the origin of social problems and conflicts while bearing in mind the ways in which the social order is maintained, and is challenged.

Explain causal relationships between the various social phenomena.

Plan own engagement in resolving of the various social issues.

Explain the key structural factors that are shaping society.
Grading

1. colloquium 25%;
2. colloquium 25%;
3. Written seminar 25%;
4. Active participation in seminars 25%.

Week by Week Schedule

1. introduction.
2. Definition, subject, objective, purpose and methodology of social pathology and its relation to criminology and other relevant science. Basic terms and concepts.
3. Historical development of socio-pathological thought and research.
5. Relation between crime and deviance. Recidivism.
6. Alcohol and drug abuse in relation to crime.
7. First colloquium.
8. SEMINAR: Conceptions of deviance.
9. SEMINAR: Consumerism and deviance.
10. SEMINAR: Deviance.
11. SEMINAR: Deviance in sport.
12. SEMINAR: Institutional deviance.
15. Final remarks.

Literature

Social Psychology

Lecturer in Charge

Prof. dr. sc. Renata Franc

Course Description

The students gain an understanding of the basic psychosocial process, theory, and key research and measurement procedures in the field of social cognition and perception, attitudes, prejudices, the self, social influence, group process and to develop students' ability evaluation thereof.

Course Type

» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Sociology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the fundamental concepts, theories and key research in the field of social cognition and perception, attitudes and prejudice, self, social influence and group process.
2. Evaluate different approaches in the field of social cognition and perception, attitudes and prejudice, self, social influence and groups and group process.
3. Conduct simple analyses or research study on social psychology topic.
4. Apply knowledge from the field of social cognition and perception, attitudes and prejudice, self, social influence, groups and group process.
General Competencies

Apply knowledge and understanding of concepts and theories in the field of social cognition and perception, attitudes, prejudices, self, social influence and group process. Critically evaluate theoretical approaches and research methods.

Learning outcomes:
2. Integrate the knowledge of the fundamental psychological processes and characteristics (perception, memory, learning, motivation, emotions, personality, and social behaviour).
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Grading

Class attendance and participation - 10%;
Research study and presentation - 10%;
Two colloquia - 80%.
A test of knowledge through two colloquia will be organized (in case of non-passing or unsatisfactory achievement on colloquia students can take the final exam, which, by volume, the content and the corresponding ECTS meets the colloquia.

Week by Week Schedule

1. Presentation of the course organization,
2. The definition of social psychology
3. The methodology of social psychology - observation, correlational research, experimental research
4. Social cognition: automatic and controlled thinking, schemes, heuristics
5. Social perception - non-verbal communication and first impressions
6. Social perception - attribution theories and biases,
7. The Self
8. Structure and function of attitudes
9. Attitude change and relation between attitudes and behavior
10. Prejudice - definition of the main concepts (prejudice, stereotypes, discrimination), sources and causes of prejudice,
11. Prejudice reduction
12. Social influence, informational and normative, conformity,
13. Social influence - Obedience To Authority
14. Group structure and process
15. Leadership in groups

Literature

Sociological Theory 1

Lecturer in Charge

Prof. dr. sc.
Ivan Markešić

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems thorough the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Course Type

» Sociology (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Sociology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define social issues as research topics.
2. Evaluate different theoretical approaches.
3. Demonstrate conceptual basics of independent research.
4. Relate different approaches in solving of theoretical issues.
5. Modify and integrate actual social theories and write complex scientific papers.
6. Evaluate and judge critically and connect different theoretical approaches.

General Competencies

Upon successfully passed exam, students will be able to:
Use the general knowledge of society and of social processes.
Explain the key structural factors that are shaping society.
Explain the social change using classical and contemporary sociological approaches.

Grading

1. Written exam: 60%;
2. Seminar discussions: 25%;
3. Oral exam: 15%.
Week by Week Schedule

1. Introduction to sociological theories.
2. Auguste Comte.
3. Herbert Spencer.
4. Emile Durkheim I.
5. Emile Durkheim II.
6. Karl Marx I.
7. Karl Marx II.
8. Max Weber I.
9. Max Weber II.
11. Karl Mannheim.
12. Critical theory.
13. Talcott Parsons I.
14. Talcott Parsons II.
15. Robert King Merton.

Literature

Sociological Theory 2

Lecturer in Charge

Prof. dr. sc.
Ivan Markešić

Course Description

The main goal of the course is to enable students for independent and critical explaining of the social phenomena by using analytical tools offered by theories covered during the course. In that the special emphasis is given to the process of synthesizing of the knowledge, that is critical judgement and connecting of different theoretical approaches. Students will be encouraged to recognize social problems thorough the prism of explained theories and use them as research topics, and also to try to apply concepts and theories that are covered within the course in the context of Croatian society.

Course Type

» Sociology (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Sociology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define concepts of sociological theories established in 1960s and 1970s.
2. Explain three main theoretical approaches: symbolic interactionism, phenomenology and exchange theory.
3. Use acquired analytical tools for understanding of social phenomena.
4. Apply all mentioned sociological theories.
5. Combine sociological theories and write complex science papers.
6. Evaluate approaches and individual interpretations of sociological theories.

General Competencies

Upon successfully passed exam, students will be able to:
Use the general knowledge of society and of social processes.
Explain the key structural factors that are shaping society.
Explain the social change using classical and contemporary sociological approaches.

Grading

1. Written exam: 60%
2. Seminar discussions: 25%
3. Oral exam: 15%
Week by Week Schedule

1. Introduction to the course.
2. Spiritual ground of symbolic interactionism.
3. George Herbert Mead.
5. Howard Becker.
6. Alfred Schütz.
7. Peter L. Berger/Thomas Luckmann.
9. George Homans.
10. Michel de Certeau.
12. Alain Touraine.
15. Marxist sociology in east Europe and Croatia.

Literature

Sociology of Art

Lecturer in Charge

Izv. prof. dr. sc. Snježana Čolić

Course Description

To provide the basic knowledge on relationship between art and society, and to secure an insight into the investigative continuity in this specific field of research.

Course Type

» Sociology (Study) (elective courses (2), 1st semester, 1st year)
» Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use basic concepts and terms of the sociology of art.
2. Use meanings of cultural production.
3. Define art as collective action.
4. Explain different practices of evaluation and criticism of art.
5. Explain deviant and activist art.

General Competencies

Upon successfully passed exam, students will be able to:

Use the general knowledge of society and of social processes.
Explain the initial assumptions of the different cultural orientations.
Illustrate the relevancy of the concepts of culture in interpreting of the social phenomena.

Grading

Final oral and written exam.

Week by Week Schedule

1. Introduction to course
2. Sociology of art and sociology of culture
3. What is Art and how do we do a sociology of art
4. Cultural Production
5. Popular culture vs. “high” culture
6. Art as collective action
7. Artistic careers
8. Style in the arts
9. Evaluation and criticism of art
10. Artistic performance and performance art
11. Art and deviance/deviant art
12. Art and politics/art and the State
13. The future of art and cultural production
14. Art and hegemony
15. Repetitions, exam preparations

Sociology of Consumption

Lecturer in Charge

Izv. prof. dr. sc.
Krešimir Peračković

Course Description

To introduce students with the sociological approach of consumption as a social process, consumers as a social group and the market as a social relation;

Gaining knowledge of basic concepts in the sociology of consumption and theories of consumer society and their operationalization in empirical research on the structure of consumption and consumer segmentation process.

Course Type

» Sociology (Study) (elective courses (2), 1st semester, 1st year)
» Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Resume theoretical concepts and empirical models in the sociology of consumption as a new specialist sub-discipline of sociology;
2. Defend theoretical conceptualization and operationalization of key concepts.
3. Use knowledge from other sciences about consumption (economy, psychology, demography).
4. Prepare the draft research about consumer culture and society.
5. Use knowledge for basic analysis of consumption structure.
7. Analyze social roles in process of consumption.

General Competencies

Use the general knowledge of society and of social processes.
Explain the key structural factors that are shaping society.
Explain the social change using classical and contemporary sociological approaches.
Explain the difference between micro and macro level of the sociological analysis.

Grading

Class attendance, participation in discussions, final written exam.
Week by Week Schedule

1. Keynote lecture: What is consumption and subject discipline
2. The concept of the market in classical sociology
3. Socio-demographic aspects of consumption
4. Psychological approaches to consumption
5. Market, market society and the process of marketisation
6. Commodification process
7. The basic characteristics of the consumer society and culture
8. Theorists of the sociology of consumption
9. Consumption, purchase, trade: social roles in the process of consumption
10. Brands and experience as a commodity
11. Selected Topics in Sociology of consumption
12. Empirical analysis: changes in the structure of consumption
13. Consumerism - ideology of consumption
14. Shopping center - a combination of rational and irrational
15. Final lecture and discussion

Sociology of Croatian Society 1

Lecturer in Charge

Izv. prof. dr. sc.
Vladimir Lay

Course Description

Sociology of Croatian Society 1 is the first of five steps during the whole of the study that is directed to acquiring knowledge (accomplishments) on the structures and processes within the Croatian society, from the sociological standpoint. From this basic thesis follow elementary objectives:

1. Give students knowledge (accomplishments) on the social structure of the Croatian society and the processes unfolding within this structure, since 1990 to the present moment.

2. Give students knowledge (accomplishments) and insights on the dominant processes in the Croatian society, from 1990 to the present moment.

3. Elaborate forms of social disintegration, vertical (social strata) as well as horizontal (regions and micro-regions of Croatia) – on this occasion explain specially:
   a. the phenomenon of corruption as a destroyer of every society, and so the Croatian society;
   b. development trends of the quality of life in Croatia and the process of massive impoverishment of people within the Croatian society, in modern neo-liberal, planetary political and economic context, and
   c. processes of weakening of the human production substance of the Croatian society, from 1990 up to the present moment.

4. Introduce the students with historical and present Croatian regions;

5. Give empirical knowledge on the relation of the centre and periphery in Croatia;

6. Elaborate the concept and practice of the Croatian social identity, and give them knowledge on the topic – Globalisation disrupts local identity;

7. Give knowledge on the topic – Political sustainability as inwardly shaped identity (example Croatia).

Course Type

» Sociology (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
History (Study) (elective general foundation courses, 1st semester, 1st year)
History (Study) (elective general foundation courses, 3rd semester, 2nd year)
History (Study) (elective general foundation courses, 5th semester, 3rd year)
Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
Sociology (Study) (required course, 1st semester, 1st year)

Learning Outcomes
On successful completion of the course, students will be able to:

1. Define modern processes in contemporary Croatia.
2. Apply internalised knowledge and skills into daily basis behaviour.
3. Analyze modern processes in dynamics of the Croatian society.
4. Develop personal mental map of organization of the Croatian society.
5. Develop personal value orientation towards the Croatian society.
6. Develop the aspiration for further learning about the Croatian society.
7. Outline internalised knowledge to other people.

General Competencies
Use the general knowledge of society and of social processes.
Explain causal relationships between the various social phenomena.
Explain the key structural factors that are shaping society.
Illustrate the relevancy of the concepts of culture, socialization, stratification, social structure and social institutions in interpreting of the social phenomena.

Grading
Annotation/Commentary: Emphasis is put on seminar papers and the preliminary exam, and especially on the final oral exam with the duration of about 30 minutes per candidate. As there are about 50-60 students in total, we cannot offer an individual supervisor guide to each student. The maximum of discontinued attendance is 3x. The record-keeping of attendance is continual.

Week by Week Schedule
1. Social structure of the Croatian society – fundamental strata characteristics;
2. Shifts in the Croatian social structure, from 1990 to the present moment;
3. Basic forms of vertical and horizontal social disintegration of the Croatian society, from 1990 to the present moment;
4. Processes of massive impoverishment - causes and consequences;
5. Processes of unemployment increase of the youth in Croatia – structurally developmental indicator;
6. Weakening of the Croatian human production substance, from 1990 to the present moment;
7. Main Croatian regions and their characteristics (historically and the present moment);
8. Case study Slavonia;
9. The relation of the centre and periphery in Croatia;
10. Croatian modern centralism and ways to decentralisation;
11. Croatian identity, What is that?
12. Globalisation as a process of violating local identities;
13. Political sustainability as internally formed identity (analysis of the position of Croatia within the EU);
14. Comparative analysis of social processes in the EU and Croatia (fluctuation of the GNP, quality of life, human development index);
15. Unemployment, number of highly educated people, demographic fluctuations.

Literature

Sociology of Croatian Society 2

Lecturer in Charge

Prof. dr. sc.
Ankica Marinović

Course Description

The aim of the course is to acquaint students with the changes related to religion in the context of Croatian society. It introduce them to the basic concepts in the sociology of religion and to gain an insight into the empirical research of religiosity in the Croatian society.

Course Type

- Sociology (Dual-major studies Study) (required course, 2nd semester, 1st year)
- Communication Sciences (Study) (elective general foundation courses, 2nd semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
- Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
- Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
- Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
- History (Study) (elective general foundation courses, 2nd semester, 1st year)
- History (Study) (elective general foundation courses, 4th semester, 2nd year)
- History (Study) (elective general foundation courses, 6th semester, 3rd year)
- Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
- Sociology (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply basic terms in the field of sociology of religion.
2. Explain basic theories in sociology of religion.
3. Analyze religion and religiosity in the croatian society.
4. Analyze relationship between church and state.
5. Describe new religious movements.
6. Outline religion and education.
General Competencies

Upon successful passed exam, students will be able to:
Use the general knowledge of society and of social processes.
Explain the initial assumptions of the different religious orientations.
Explain the key structural factors that are shaping society.
Illustrate the social questions in the context of religion.

Grading

Class attendance and participation in discussion (10 points);
Presentation (30 points);
Colloquium 1 (80 points);
Colloquium 2 (80 points).

Week by Week Schedule

1. Introduction. Basic concepts.
2. Religion and sociology.
3. Basic theories in sociology of religion.
4. Religion and religiosity in the Croatian society before and after socialism.
5. Religion and religiosity in the Croatian society - between traditional and individual.
6. Religion and religiosity in the Croatian society - sustainable change.
7. Relationship between church and state.
12. Religion and education.
15. Final remarks.

Ančić, Branko. 2008. Bahai religion as a new religious movement

Sociology of Croatian Society 3

Lecturer in Charge

Izv. prof. dr. sc.
Irena Cajner
Mraović

Course Description

Introduce the main phenomenological features of juvenile delinquency with particular emphasis on territorial approach.

Understanding public policies regarding juvenile delinquency in Croatia as well as in some other countries with particular emphasis on juveniles’ privileged position in the Croatian and international criminal law.

Understanding juvenile delinquency etiology.

Understanding relations between social context, juvenile delinquency and social responses.

Course Type

» Sociology (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Sociology (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Use terminology relevant for juveniles’ privileged position in the Croatian criminal law.
2. Explain minimum age for criminal responsibility in the Croatian society.
3. Combine classical and modern approach in sociology of adolescence.
4. Identify juvenile behaviour disturbances.
5. Analyze risk and protective factors of juvenile delinquency in Croatia.
6. Recognize trends in juvenile delinquency in Croatia and other countries.
7. Explain some special features of criminal proceedings regarding juvenile offenders in Croatia.
8. Relate all relevant international documents and the Croatian juvenile criminal law.
General Competencies

Illustrate the social questions in the context of social class, ethnicity, gender, religion, capitalism, individualization, nationalism and globalization.

Explain the origin of social problems and conflicts while bearing in mind the ways in which the social order is maintained, and is challenged.

Explain causal relationships between the various social phenomena.

Plan own engagement in resolving of the various social issues.

Explain the key structural factors that are shaping society.

Grading

1. colloquium 25%;
2. colloquium 25%;
Written seminar 25%;
Active participation in seminars 25%.

Week by Week Schedule

1. Introduction. Basic terms and concepts.
2. Controversial issues in juvenile delinquency.
4. Special features of juvenile delinquency in Croatia.
6. Risk and protective factors - the Croatian and international comparative research.
7. Risk and protective factors - the Croatian and international comparative research.
8. Trends in epidemiology of juvenile delinquency.
10. Some special features of criminal proceedings for juveniles.
11. Privileged juveniles' position in the Croatian criminal proceedings.
12. Educational measures.
15. Final remarks.

Literature

Sociology of Croatian Society 4

Lecturer in Charge

Izv. prof. dr. sc. Mladen Puškarić

Course Description

Introduce the students to the process of globalization and its impact on the society. Globalization is a process the effects of which are felt in all areas of life. A large number of authors associate the globalization with new political architecture of the world and the overall U.S. monopoly in it. The globalization process strongly influences the social, political and economic situation in Croatia, because Croatia as a democratic society is open to all positive and negative impacts in the environment. The process of globalization is over three thousand years old and has changed its characteristics. The modern globalization came into force after the collapse of the communist system in Europe and the involvement of communist China into the global economic system. The globalization is a social phenomenon that has positive and negative effects and strongly influences the change of the place and role of the nation state in the modern society.

Course Type

» Sociology (Dual-major studies Study) (required course, 6th semester, 3rd year)
» Sociology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the process of globalization
2. Recognize the fundamental characteristics of the process of globalization
3. Apply the acquired knowledge to understand relationships in the modern world
4. Explain all the positive and negative effects of the privatization process
5. Describe the effects of globalization on the nation state
6. Indicate positive and negative effects of the globalization process
7. Connect the process of globalization with the current social changes
8. Compare the effects of globalization in different parts of the world
9. Raise the awareness about the effects of globalization on individuals and the society
10. Use the acquired knowledge in the presentation of topics related to globalization

ECTS Information Package for Academic Year 2013/2014
Course Catalogue – Undergraduate Study

University of Zagreb Centre for Croatian Studies
General Competencies

The students will be able to:
Use general knowledge about the society and social processes;
Plan their own engagement with the aim of aligning global and local problems;
Apply general knowledge of the society and social processes;
Present key structural factors that shape society;
Explain social change through the classical and contemporary sociological approaches;
Analyze personal and local social issues;
Present the origin of social conflicts and problems;
Choose an appropriate methodological approach;
Use the highest ethical standards;
Write a comprehensive research report.

Grading

Written exam, term exam, seminar, presentation

Week by Week Schedule

1. Globalization
2. Introduction in Globalization
3. The History of Globalization
4. Transfer of Economic and Political Power
5. Arhaic Globalization
6. Proto Globalization
7. Modern Globalization
8. Postcolonial Globalization
9. What is Globalization?
10. Policentric Worl Politics
11. Hegemony of New Type
12. Globalization and Transition
13. Globlization and National State
14. Globalization and Regionalization
15. Globalization and Welfare State

Sociology of Culture

Lecturer in Charge

Izv. prof. dr. sc.
Snježana Čolić

Course Description

To provide the basic knowledge on relationship between culture and society, and to secure an insight into the investigative continuity in this specific field of research.

Course Type

» Sociology (Study) (elective courses 1., 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply theoretical sociological approach in empirical research.
2. Explain basic terms and elements of the concept of culture.
3. Explain cultural diversity and universality.
4. Explain how culture leads to social change.

General Competencies

Upon successfully passed exam, students will be able to:

Use the general knowledge of society and of social processes.
Explain the initial assumptions of the different cultural orientations.
Illustrate the relevancy of the concepts of culture in interpreting of the social phenomena.

Grading

Final oral and written exam.

Week by Week Schedule

1. Introduction to the sociology of culture
2. The definition of culture
3. The production, distribution and reception of culture
4. Mass culture
5. The social constitution of meaning of cultural subjects
6. Culture and stratification
7. Cultural hegemony and cultural resistance
8. Construction of cultural identities
9. Postmodern culture
10. Semiotic studies of culture
11. Culture as institution
12. How cultures constitute individuals and collectivities
13. Structure, culture and action
14. Culture and transformation - how culture leads to social action
15. Repetitions, preparing the exam

Sociology of Dying and Death

Lecturer in Charge

Prof. dr. sc.
Ivan Markešić

Course Description

The goal of the course is to acquaint students with the emergence and development of the sociology of death and dying, with the basic terms of the field, main representing authors and with the sociological understanding of death and its meaning in the contemporary Croatian society.

Course Type

- Sociology (Study) (elective courses (2), 2nd semester, 1st year)
- Sociology (Study) (elective courses (2), 4th semester, 2nd year)
- Sociology (Study) (elective courses (2), 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic concepts related to death and dying according to the most influential sociological, philosophical and religious theories.
2. Explain current social debates related to topics of death and dying.
3. Assemble and combine classical and modern sociological approaches to death.
4. Explain difference between death and dying as traditionally different concepts.
5. Reconstruct the different sociological approaches to the topic of death and dying.
6. Evaluate social function of traditional and contemporary approach to death and dying.

General Competencies

Use the general knowledge of society and of social processes. Explain the key structural factors that are shaping society.

Grading

1. Written exam: 60%;
2. Seminar paper: 30%;
3. Oral exam: 10%.

ECTS Credits 4.0
English Level L1
E-learning Level L1
Study Hours 30
Week by Week Schedule

1. Social meaning of death
2. Death and society (historical overview)
3. Social history of death
4. Awareness of death and ideology of death
5. Legal, ethical, religious and other ways of relations towards death and dying
6. Dying: biological and medical aspects
7. Social and physical dying
8. Institutionalization, bureaucratization and professionalization of death
9. Social consequences of prolonged life expectancy
10. "Beautiful death", euthanasia and assisted death
11. Suicide
12. Killing other people, Collective killing (war)
13. Funeral, grief
14. Media and notification on death
15. Future of death and dying

Literature

Sociology of Health and Illness

Lecturer in Charge

Izv. prof. dr. sc. Živka Juričić

Course Description

The aim is to familiarize students with specific, distinctive characteristics and way of functioning of the growing importance of social subsystems - the health care system in the new socio-political and technological-scientific context.

Course Type

» Sociology (Study) (elective courses (2), 1st semester, 1st year)
» Sociology (Study) (elective courses (2), 3rd semester, 2nd year)
» Sociology (Study) (elective courses (2), 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain the changes that occur in the modern market of medical services.
2. Develop a critical attitude towards the new social facts which constitute a serious threat to the health and effective treatment.
3. Demonstrate strong and coherent arguments of a new health policy.
4. Assess the validity of any ideas and strategies of treatment and care for the health of the population, regardless of paradigmatic stronghold of such ideas and / or strategies.
5. Define basic medical terms.
6. Explain the basic scientific and social aspects of Western and alternative medicine.

General Competencies

Upon successful completion of the course, students will be able to:

Use general knowledge about society and social processes.
Explain cause-and-effect relationships among social phenomena.
Explain the key structural factors that shape society.

Grading

Attendance; interactive interview with the student that takes place in the deep dialog form during class; oral exam.
Week by Week Schedule

1. Social concept and the social context of health (health care is "prephenomenon" of Human Being; different definition of health: health as a social construct)
2. Social concept and the social context of disease (lexical-conceptual distinction between "disease", "illness" and "sickness"; disease as abnormality, disease as dysfunction)
3. The social role of the patient (Parsons functionalist theory of society and definition of social roles of patients, switching roles, rights and responsibilities of patients; paternalism as the dominant physician - patient relationship)
4. Needs of de (re) construction of social roles of patients in contemporary postmodern society (changes in the structure of morbidity, loss of paternalism; flexibilization of the labor force in conflict with the social role of patients)
5. The philosophical origins and main constituent principles of biomedical paradigm (Kuhn's theory of scientific revolutions; Descartes - Discussion on the method, the dualism of body and soul; dualism, health and disease; reductionism; mechanism; positivism; biologism; pathologism; boundaries of applicability of the natural-scientific paradigm of discovery and treatment of modern diseases)
6. Medicalisation and iatrogenesis (development meaning of medicalization; Illich and radical critique of scientific medicine, clinical iatrogenesis; social iatrogenesis; structural iatrogenesis)
7. Contemporary medical pluralism; Status and representation of alternative medicine in modern medical market (hegemonic position of academic-orthodox medicine; reasons the growing proliferation of alternative treatment modalities in modern medical market; semantic mitigation-the new name for the same treatment modalities; medicine "based on evidence")
8. Divergente patient’s perception (of risk) of the drug; between "fascination" and "disfascination" therapeutic effects of modern drugs (drug-“Materia Medica", the etymology of the term pharmakon in the Greek language; increase aversion to "western" drugs: causes and social and health consequences)
9. The pharmaceutical industry, some of the ethical dimensions of the discovery, production and distribution of drugs (so-called list. Essential drugs; concept of allocative efficiency; patent on new drugs, generic drugs)
10. Were the new drugs responsible for the increase in life expectancy? Do they create new medicines living conditions for some new Methuselah? (biotech thesis versus social theory, radical version of social-thesis I. Illich; epidemiological transition; modern biofantasies)
11. On some social, economic, demographic, political, institutional and moral implications of increasing life expectancy (which would mean longevity of the institution of treatment, retirement homes, retirement insurance, insurance companies and so-called. Life insurance, a table of moral values?)
12. Can pharmacists in terms of market deregulation by drugs (d) reconcile and commercial interests and professional ethics?; One socio-reflexive approach to pharmacy ethics (the original meaning of the word profession is emerging opposition between commercial interests and professional ethics, some major social and health consequences of deregulation of drugs market)
13. Pharmaceutical profession "under siege", about the process of increasing the de pharmacist (right attributes, the archetypal profession: a large body of knowledge, autonomy, monopoly, altruism of ethics, pharmaceutical professions - for example semi-proessions; pharmaceutical profession - quo vadis)
14. "If it almost kills you it means that it acts"; Cultural models of chemotherapy treatment - a spin in lay at (a) acceptance of the side effects of chemotherapy (disease as a metaphor - S. Sontag; dominant metaphors of cancer, etiology of treatment of cancer in the lay perception)

15. WHO definition of health: basic definitions and the main shortcomings (idealistic-utopian approach to health; health as a negation of the disease; health as an absolute rather than a relative category; health is determined by the situation rather than process)

**Literature**

Sociology of Identity

Lecturer in Charge

Izv. prof. dr. sc. Renato Matić

Course Description

The course Sociology of Identity is focused on the analysis of individual and social identities from sociological starting point of view. A sociological approach to self and identity begins with the assumption that there is a reciprocal relationship between the self and society. The focus of the course is on how social structure influences one's identity, and in turn, behavior. More attention is being given to understanding the development of multiple role identities and their outcomes for individual behavior. Therefore, the basic objectives of the subject are:

1. Outline the knowledge about the basic concepts of identity from different scientific perspectives.
2. Define the insights into the dominant social processes that have an impact on the formation of social identity.
3. Demonstrate the knowledge of the relational nature of identity
4. Elaborate different forms of social disintegration, both vertical (different social groups) and horizontal (policy) - especially when it explains the different fields of social and individual identity;
5. Apply the historical relationship between the society and individual to a culture that represents the intersection of the formation of different identities;
6. Classify and compare the insights on contemporary empirical research in the field of social identity;
7. Explain the social identity of Croatian society, with emphasis on the impact of globalization processes of the local identities.

Course Type

» Sociology (Study) (elective courses (2), 2nd semester, 1st year)
» Sociology (Study) (elective courses (2), 4th semester, 2nd year)
» Sociology (Study) (elective courses (2), 6th semester, 3rd year)
Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and interpret basic relational dimension of identity.
2. Define and distinguish the approaches to the concept of identity in sociology and other natural sciences.
3. Apply basic sociological concepts of identity and categories in interpreting forms of social habitus.
4. Explain the modern social processes in which identity occurs in the context of the sociology of everyday life.
5. Apply the acquired knowledge and understanding within the social action that manifests a high degree of respect for the established hierarchy and loyalty.
6. Analyze current processes governing the dynamics of the Croatian society (mass impoverishment, social disintegration, stagnation of social production; develop their own mental map of the social structure and relational dimensions of identity; develop and build their own value orientation and "world view" in relation to the other and different, traditional and modern value systems).
7. Analyze current processes governing the dynamics of the Croatian society (mass impoverishment, social disintegration, stagnation of social production).
8. Develop their own mental map of the social structure and relational dimensions of identity.
9. Develop and build their own value orientation and "world view" in relation to the other and different, traditional and modern value systems.
10. Define and be able to present their knowledge and insights to other (young) people who have problems with socio-cultural integration, which is the most common form in understanding issues of identity.

General Competencies

The main learning outcomes are: the knowledge, insight and understanding of contemporary characteristics, structure and dynamics of social identity. After completing undergraduate studies sociology student will be able to:

• reproduce and interpret classical sociological texts in terms of different approaches to social identity,
• correctly interpret basic social effects induced by the nature of the issues of identity differentiate, classify and compare different theories of society in terms of different dimensions of identity - cultural, ethnic, religious, gender, etc.
• argue the pros and cons of various social action from the perspective of gender identities and normative structure society. (Legal framework)
• evaluate the lessons learned through their own contributions through seminar work, oral presentations and to create critical questions.

Grading

A Regular attendance (three unexcused absences, score decreases)
B. Each student has a seminar in front of an audience who evaluates/ or submission in writing
C. three written exams during the semester;
D. Oral exam at the end of the semester

Week by Week Schedule

1. Introduction to the course, getting to know the purpose of the course, mode, student rights and responsibilities.
2. The primary analysis of sociological aspects of identity.
3. The identity of the earliest communities.
4. Analysis of individual- psychological level Identity of - identity as the
   subject of memory and solidarity.
5. Relationship society - culture - identity - an anthropological level.
6. The identity of the individual in the sociology of everyday life.
8. The social complexity of ethnic identity.
9. The identity of Europe - between democracy and the nation.
10. Multiple Identities.
11. Social and Role Identities.
15. Integrating the Identity - Theory Versions.

Literature

Sociology of Religion

Lecturer in Charge

Prof. dr. sc.
Ivan Markešić

Course Description

The main goal is to acquaint students with the development of the sociology of religion, with its basic concepts and main representatives as well as to acquaint them with the sociological understanding of the role of religion and churches in society. The course takers will gain an insight into the sociological aspects of religion and religiosity, they will be equipped for a better understanding of the meaning of religion in human life and society at large, as well as with the meaning of the human influence in emergence of different types of religion. The aim of the course is to offer to the student a new perspective of religion as phenomena which in postmodern context holds an important position.

Course Type

» Sociology (Study) (elective courses 1., 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain basic approaches of the most influential social theories of religion.
2. Evaluate critically and connect classical and modern socio-religious approaches.
3. Use analytical tools for understanding of socio-religious phenomena.
4. Use theoretical conceptualization/formulation of basic independent socio-religious research.
5. Write complex scientific papers and independently read books on social theory.
6. Use gained knowledge.

General Competencies

Upon successfully passed exam, students will be able to:

Use the general knowledge of society and of social processes.
Explain the initial assumptions of the different religious orientations.
Explain the key structural factors that are shaping society.
Explain the social change using classical and contemporary sociological approaches.
Illustrate the social questions in the context of religion, capitalism, individualization, nationalism and globalization.
Grading

1. Written exam: 60%
2. Seminar paper: 30%
3. Oral exam: 10%

Week by Week Schedule

1. Introduction.
2. Definition of sociology of religion.
3. Critiques of sociology of religion, and development.
4. Classical theories of religion I.
5. Classical theories of religion II.
6. Classical theories of religion III.
7. Contemporary sociological approaches I.
8. Contemporary sociological approaches II.
9. Contemporary sociological approaches III.
10. Theories of secularization.
11. New religious movements.
12. New age spirituality.
13. Fundamentalism, Esotery, Common religiosity, Conversion and communication.

Knoblauch, Hubert (2004): Sociologija religije. Zagreb, Demetra
Specific Psychopathology

Lecturers in Charge

Prof. dr. sc. Slavko Sakoman
Doc. dr. sc. Renata Glavak Tkalić

Course Description

To gain knowledge about specific disorders and diseases in psychopathology; categorization of mental illness; clinical features of disorders; diagnostics, epidemiology, comorbidity; course and prognosis; and various forms of treatment. To learn the methods of clinical assessment and methods of communicating with patients with mental health disorders. The adoption of the specific role of psychologists in the diagnostics and treatment of persons with mental disorders.

Course Type

Psychology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Distinguish between normal and psychopathological.
2. Classify psychological disorders into categories.
3. Define criteria for mental disorders and diseases.
4. Compare different types of treatment of mental disorders and diseases.
5. Create the working diagnosis on the basis of clinical interview.
6. Apply the principle of confidentiality in the relationship between psychologist and patient.

General Competencies

7. Assess the mental status and classify the different diagnostic criteria for mental disorders.
14. Support interdisciplinarity, establishing and maintaining relationships with other professionals, as well as relevant organizations.
15. Explain the fundamental principles of the ethics of psychology and relate the principles of the ethics of psychology to different areas of psychological practice.
Grading

Participation in class - 10%;
Seminar essay and its oral presentation - 10%;
First test 30%;
Second test - 30%;
Clinical interview - 10%;
Oral exam - 10%.

If a student does not take tests or achieve unsatisfactory result on one or both tests, student will take written exam that corresponds the tests by its scope, content and the ECTS.

Week by Week Schedule

1. Anxiety disorders
2. Somatoform and dissociative disorders
3. Psychophysiological disorders
4. Mood disorders
5. Personality disorders
6. Sexual disorders
7. Eating disorders
8. Sleep disorders
9. Substance abuse and addiction
10. Schizophrenia and other psychotic disorders
11. Intellectual disabilities; disorders of childhood and adolescence
12. Aging and psychological disorders
13. Organic mental disorders
14. Psychopharmacology and psychotherapy
15. Legal and ethical issues in psychopathology

Literature

Statistics for Communication Sciences

Lecturer in Charge

Izv. prof. dr. sc.
Vanja Šimičević

Course Description

The main goal of the course is to introduce students to basic statistical concepts and techniques needed for various applications in communicology. Students, through lectures, exercises, readings and autonomous problem solving learn difference between descriptive and inferential statistics, graphical and numerical display of data, calculate and estimate average values, mod, median, learn basics in probability, learn discrete and continuous probability functions, calculate and interpret variance and standard deviation, Bernoulli, binomial, uniform, exponential, standard normal and normal probability functions. Students will be acquainted with all fundamental statistical knowledge and techniques which are being used in business practice with emphasis on interpretation of statistical parameters contained in computer outputs. Students develop statistical way of thinking and learn precise statistical manner of communication. It is expected that students demonstrate clear statistical interpretation of the results.

Course Type

» Communication Sciences (Study) (required course, 3rd semester, 2nd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Psychology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Prerequisites

Introduction to Social Research Methods and Statistics
Learning Outcomes

On successful completion of the course, students will be able to:

1. Apply knowledge of fundamental concepts from other social sciences involved in the study program.
2. Define, describe and apply the basic methods of social research.
3. Demonstrate statistical literacy and methodological competence and realize their importance in modern society.
4. Apply and use the basics of statistics and statistical methods to the media to use the reflective and productive level.
5. Use of statistical thinking and develop awareness for the need of the same.
6. Explain the functions of statistical indicators in teaching, the criteria for their selection and use.
7. Select appropriate methods and techniques.
8. Collect data for statistical analysis.

General Competencies

Use the general knowledge of society and of social processes.
Design a simple research project.
Organize the implementation of a simple research project.
Use the computer software for the analyses qualitative and quantitative data.
Use different social sciences methods in the analyses of the relevant data.
Employ the adequate methodological approach in the research of social phenomena.

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises, and orally

Week by Week Schedule

1. Introduction, syllabus presentation. Statistics as a science, descriptive and inferential statistics, graphical display of data.
3. Measures of central tendency: Mod.
8. Introduction in probability.
11. Confidence intervals for the mean.
12. Correlation.
13. Correlation Coefficient.
15. Applications in communication sciences.
Literature

Course Type

» Sociology (Dual-major studies Study) (required course, 4th semester, 2nd year)
» Sociology (Study) (required course, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Prepare for a thorough insight into the specifics, advantages and limitations of particular methods of descriptive statistics to analyze the data.
2. Apply adopted methodological knowledge in sociological research. Use statistical software.
3. Use statistical software.
4. Argue the interpretation of results obtained using different statistical methods.
5. Plan the research activities related to the use of methods and techniques of descriptive statistics.
6. Select appropriate methodological procedures.
7. Collect data for statistical analysis.
General Competencies

Use the advanced statistical terms and information.
Design a simple research project.
Organize the implementation of a simple research project.
Use the computer software for the analyses qualitative and quantitative data.
Employ the adequate methodological approach in the research of social phenomena.
Use different social sciences methods in the analyses of the relevant data.

Grading

Attendance is obligatory. Fundamental statistical knowledge under the first goal is tested both in written form of tests with numeric and application exercises/written exam and orally

Week by Week Schedule

1. Introduction, syllabus presentation. Statistics as a science, descriptive and inferential statistics.
2. Data description, Frequency distribution. Variables and types of data.
4. Indexes.
10. Probability. „Tree” diagram.
11. Bayes Theorem.
Literature

Strategies of Informal Reasoning – Critical Thinking

Lecturer in Charge

Prof. dr. sc. Srećko Kovač

Course Description

Adopting basic knowledge and techniques important for a successful and established argumentation (analysis and evaluation, as well as foundation and justification of positions) in various areas of practical and theoretical activities.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
» Philosophy (Dual-major studies Study) (required course, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses, 5th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 1st semester, 1st year)
» History (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (elective general foundation courses, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Recognize the structure of arguments and understand the relationship between logical strength and truth of the statements in the arguments
2. Use diagram arguments
3. Identify and understand the informal errors (fallacies): errors in relevance and manner of argumentation
4. Distinguish between basic types of deductive inferences, and similar but invalid forms of inferences
5. Distinguish types of inductive inferences and understand conditions that must be met in cogent inductive argument (sample size, representativeness, reference sets)
6. Describe the basic heuristics and sources of biases in reasoning

**General Competencies**

The students will be able to (1) recognize and separate arguments from the broader text (2) distinguish basic types of inferences (3) identify the most common errors in argumentation (4) analyze and evaluate, as well as proper formulate arguments.

**Grading**

Active participation in class 10%,
Exercises 10%,
Quiz-tests 10%,
Written exam 50%,
Oral exam 20%.

**Week by Week Schedule**

1. Presentation of the course
2. Conversational implicature
3. Inference, argument, explanation
4. Logical strength, truth
5. Separation of argument, standard form
6. Diagramming arguments and evaluation
7. Reconstruction of arguments and evaluation
8. Analysis applied to the examples of student arguments
9. Fallacies 1 (ambiguity, slippery slope, appeal to emotion)
10. Fallacies 2 (ad hominem, red herring, straw man)
11. Fallacies 3 (circular argument, redefinition, appeal to ignorance)
12. Deductive reasoning
13. Formal errors in reasoning, Inductive reasoning
14. Heuristic and biases in reasoning
15. Heuristic and biases in reasoning

Systematic Sociology 1

Lecturer in Charge

Izv. prof. dr. sc.
Renato Matić

Course Description

The objective is to acquaint the students with classical sociological theory with the emphasis put on the contemporaneity of classical theoreticians and to ensure they acquire knowledge, skills and competences in order to be able to analytically and critically master classical theoretical concepts, basic sociological terms, and theoretical paradigms on the level of operative application. This means the students are prepared for the study of sociological theories (classical and contemporary) of other special sociological disciplines on later study years as well as for the writing of a paper on the level of a book report.

Course Type

» Sociology (Dual-major studies Study) (required course, 2nd semester, 1st year)
» Sociology (Study) (required course, 2nd semester, 1st year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the widest range of classical theoretical perspectives in sociology aware of their philosophical origins.
2. Argue the importance of developing critical (self)awareness and interdisciplinary approach.
3. Sum up the dialectical interconnectedness and interdependence of theory and practice.
4. Describe the socio-historical context of the origins and developments of sociological theory.
5. Interpret the relevance of the French revolution, political revolutions, and the industrial revolution in the context of the newly appearing social sciences.
6. Define the basic sociological concepts of Henri de Saint-Simon and Auguste Comte.
7. Interpret organicism and basic sociological concepts of Herbert Spencer, evolutionism in sociology, social Darwinism and the theories of state formation.
8. Define basic concepts of the formal German and American sociology (Chicago school).
9. Analyze the basic concepts of structuralism.
10. Define the basic tenets and concepts of functionalism in sociology.
**General Competencies**

Upon the completion of undergraduate study of sociology, the student will be able to:
- Interpret classical sociological texts in the light of philosophical influences
- Correctly analyse basic professional terms
- Compare different theories of society
- Give arguments for and against various rationales in the background of theoretical-methodological paradigms/programmes
- Analyse the adequacy of contemporary social theory regarding actual empirical situation and social and cultural conditions
- Correctly interpret the importance of teaching classical sociological theory in its generality and specificity
- Analyse diachronically the development of social theory
- Interpret the philosophical and critical bases of the discipline
- Apply the learned content on the analysis of research results
- Synthesize the learned content through one's own attempts of contributing by writing a paper, giving an oral presentation and asking critical questions.

**Grading**

Attendance at lectures and seminars is monitored and recorded, and makes together with active participation in class 10% of the final grade. Individual oral presentation of the previously assigned topic and the writing of a seminar paper each carry 10% of the final grade. Passing tests (continuous assessment exams) or the written exam and the final oral exam make a maximum of 70% grade (excellent).

**Week by Week Schedule**

1. Introduction to the course, the topics, the way of work, the rights and duties of students, and the way records are kept.
2. The socio-historical context of the origins and development of sociology.
5. Herbert Spencer.
6. Ferdinand Tönnies.
10. Structuralism, Claude Levi-Strauss.
11. Functionalism in sociology: Emile Durkheim.
12. Talcott Parsons, Robert King Merton.
15. Karl Marx: the contribution to contemporary social sciences.

Systematic Sociology 2

Lecturer in Charge

Izv. prof. dr. sc. Renato Matić

Course Description

The objective is to acquaint the students with classical sociological theory with the emphasis put on the contemporaneity of classical theoreticians and to ensure they acquire knowledge, skills and competences in order to be able to analytically and critically master classical theoretical concepts, basic sociological terms, and theoretical paradigms on the level of operative application. This means the students are prepared for the study of sociological theories (classical and contemporary) of other special sociological disciplines on later study years as well as for the writing of a paper on the level of a professional, review or research paper.

Course Type

» Sociology (Dual-major studies Study) (required course, 3rd semester, 2nd year)
» Sociology (Study) (required course, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Interpret the widest range of classical theoretical perspectives in sociology aware of their philosophical origins.
2. Explain the importance of developing critical (self)awareness and interdisciplinary approach.
3. Sum up the dialectical interconnectedness and interdependence of theory and practice.
4. Describe the socio-historical context of the origins and developments of neo Marxist interpretations of Marx, as distinguished from the post Marxist ones.
5. Interpret the critiques of positivism and scientism in science (particularly sociology), the heritage of Enlightenment, modern society and mass consumerist society.
6. Define the basic sociological concepts of Adorno, Horkheimer, Marcuse, Fromm and Habermas.
7. Analyze the concepts of dialectics, affirmative culture, one-dimensional man, communicative action, authoritarian personality, and healthy society.
8. Interpret methodological and theoretical contributions of Max Weber’s sociology and his basic sociological concepts (social action, understanding, value neutrality, science and politics as a vocation, ideal type, theses on rationalisation and the Protestant Ethic – the theory of modernization).
9. Define the basic tenets and contributions of symbolic interactionism (Mead, phenomenology, ethnomethodology).
10. Define the basic tenets and concepts of feminism, its history and connections with sociology (feminist epistemology, sociology of everyday life, power and gender, reproductive status of women, stigmatization...).

General Competencies

Upon the completion of undergraduate study of sociology, the student will be able to:
- Interpret classical sociological texts in the light of philosophical influences
- Correctly analyse basic professional terms
- Compare different theories of society
- Give arguments for and against various rationales in the background of theoretical-methodological paradigms/programmes
- Analyse the adequacy of contemporary social theory regarding actual empirical situation and social and cultural conditions
- Correctly interpret the importance of teaching classical sociological theory in its generality and specificity
- Analyse diachronically the development of social theory
- Interpret the philosophical and critical bases of the discipline
- Apply the learned content on the analysis of research results
- Synthesize the learned content through one's own attempts of contributing by writing a paper, giving an oral presentation and asking critical questions.

Grading

Attendance at lectures and seminars is monitored and recorded, and makes together with active participation in class 10% of the final grade. Individual oral presentation of the previously assigned topic and the writing of a seminar paper each carry 10% of the final grade. Passing tests (continuous assessment exams) or the written exam and the final oral exam make a maximum of 80% grade (excellent).

Week by Week Schedule

1. Introduction to the course, the topics, the way of work, the rights and duties of students, and the way records are kept.
2. Socio-historical context of the origin and development of the Frankfurt school (critical theory) in sociology.
3. Adorno and Horkheimer (Sociological studies, Dialectic of Enlightenment).
4. Marcuse’s understanding of culture, Fromm’s healthy society and escape from freedom; various interpretations and revisions of Freud.
5. Habermas’s theory of communicative action and modernity as an unfinished project; sociology and ideology.
11. Symbolic interactionism, mind, self, and society; stages of socialization (play and game, significant and generalized others) – 2 lessons.
12. Phenomenology (Schütz) and ethnomethodology (Garfinkel).
13. Feminism and sociology (critique of classical sociology).
14. Feminism and sociology (feminist epistemology, sociology of everyday life).
15. Feminism and sociology (power and gender, reproductive status of women, human rights).
Literature

Television Genres in Popular Culture

Lecturer in Charge

Doc. dr. sc. Jelena Jurišić

Course Description

The main objective of the course is to use the analysis of the television genres that are present on the Croatian television programmes in order to determine what actually makes a television genre, which are its limits and possibilities for further development, how hybrid genres come to be, whether there really are male and female genres in the traditional sense ... Using the cultural studies approach, small groups of students will observe each television genre in the context of those who produce it and those who consume it, focusing on one particular issue/topic.

Course Type

» Communication Sciences (Dual-major studies Study) (elective courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective courses, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define television genres as a product of culture.
2. Distinguish television genres.
3. Distinguish between genres in relation to the audience that consumes them.
4. Analyze television genres in terms of cultural value.
5. Classify, critically analyze and evaluate media content.

General Competencies

Apply knowledge of the basic concepts of communicology and journalism related to television genres and popular culture. Apply the knowledge of the basic concepts of cultural studies. Reproduce, apply and explain the basic theory of communicology and journalism related television genres and popular culture. Define, explain, distinguish and critically analyze the characteristics of the media and their effects.

Grading

50% seminar paper, 50% exam
Week by Week Schedule

1. Television genres
2. Popular culture
3. Audience and genres
4. Experts and genres
5. Media genre production
6. Reality programmes
7. Drama programmes
8. Traditional principles of genre analysis
9. Genre economy
10. Genre hybridization
11. Genre mutation
12. Documentary programmes
13. Philosophy, sociology and television genres
14. Television as (always) a new medium
15. Television genres in the Croatian production

The Croatian People in the Kingdom of Yugoslavia and during World War II

Lecturer in Charge

Prof. dr. sc.
Zdravko Dizdar

Course Description

Course objectives are to introduce students to the basic to complex and difficult problems of position and development and the suffering of the Croatian people and Croatians in the first Yugoslavia during the Second World War, pointing out all those internal and external factors that have influenced this situation.

Course Type

» History (Dual-major studies Study) (required course, 5th semester, 3rd year)
» Communication Sciences (Study) (elective general foundation courses, 1st semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 3rd semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 5th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 1st semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 3rd semester, 2nd year)
» History (Study) (required course, 5th semester, 3rd year)
» Psychology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 1st semester, 1st year)
» Sociology (Study) (elective general foundation courses, 3rd semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of historical events in Croatian history between 1918 and 1941,
2. Define the basic problems of Croatian history between 1918 and 1941,
3. Explain the cause-and-effect relationships in the present period,
4. Show the most relevant information about people and events in Croatian history,
5. Explain historical processes of Croatian history during the period,
6. Define historical events from Croatian history of the first half of the 20th century with those from other periods of Croatian history.
General Competencies

After finishing the programme student will be able to:
define historical processes typical for certain historical period,
summarize basic information of the Croatian and the World history,
identify the most important person and institutions in the Croatian and the World history,
explain cause and effect relations of historical events and processes,
reconstruct historiographic tools in making conclusions of historical processes and events.

Grading

Activity of students will be monitored throughout the semester. Classes is required to attend. Written exam, with the possibility for oral.

Week by Week Schedule

1. Croatian people during the First World War (1914-1918), the creation of the State of Slovenes, Croats and Serbs and the proclamation of the Kingdom of Serbs, Croats and Slovenes (1918).
2. Croatian people in the Kingdom of SCS (1918 to 1921).

The History of Scotland in 17th and 18th Century

Lecturer in Charge

Izv. prof. dr. sc.
Alexander
Buczynski

Course Description

Introduce students to the different interpretations of the history of Scotland during the early modern history of Croatian and world historiography, teach them to critically analyze the relevant literature and to formulate arguments thesis in connection with it.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the arguments of some historians regarding the history of Scotland, particularly its union with England.
2. Compare different historiographical interpretations in relation to this.
3. Distinguish the important from the unimportant, both in terms of theory and in terms of the facts relevant to this topic.
4. Explain the correlation between the English and Scottish history.
5. Analyze and collaborate in small groups and share the experiences and opinions.
6. Argue attitudes related to the history of Scotland: how it came to Union in 1707 year, what were the reactions in Scotland and what consequences?
General Competencies

After finishing the programme student will be able to:
- explain cause and effect relations of historical events and processes,
- defend his/her own opinion in discussions on different historical events and processes,
- demonstrate the importance of interdisciplinary interpretations of historical events,
- distinguish difference between important and non-important facts within historiographic interpretation,
- appraise the value of historiographic interpretations.

Grading

Activity of students will be reflected in the overall score. The exam is written.

Week by Week Schedule

1. Introduction to the major challenges and tasks of historiography
10. Movie: „Rob Roy“
13. Same, p. 188-209.
15. Reporting contemporary Scottish newspaper and final review.

The History of the United States of America in the 19th Century in Motion Pictures: Fiction and Reality

Lecturer in Charge

Doc. dr. sc.
Mladen Tomorad

Course Description

The aim of the course is to enable students to recognize difference between facts shown in motion pictures and the real historical facts. Within the course, students will learn interdisciplinary approach of this subject through various motion pictures filmed during 20th and early 21st century and the historical sources (letters, biographies, paintings, photographs, literature etc.). After the whole course students will be able to demonstrate their knowledge about this subject and the difference between facts shown in movies and the facts based on the historical sources and literature.

During the course students will get review of the most important motion pictures related to the history of the United States of America in the 19th century and the historical sources of the same subjects.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe key historical facts of the expansionism of the American "Wild west" and myths and legends of their key figures.
2. Explain and analyse the key issues of the American expansionism of the West.
3. Explain and analyse the key issues of the Indian wars and treaties with American Indians.
4. Explain and analyse the key issues of the various myths and legends of the heroes of American frontier and "Wild west".

ECTS Credits: 4.0
English Level: L0
E-learning Level: L1
Study Hours: 30
5. Explain and analyse the key issues and development of movies related with the American history.
6. Explain and analyse the key issues of the American Civil War.
7. Identify the major characteristics of the American history of the 19th century.
8. Explain and analyse the key issues of the American history of the 19th century, movies about some themes related with it, and the difference between facts and fiction.

General Competencies

Learning outcomes at the level of the programme to which the course contributes:
1) engage meaningful debate about the history of the U.S.A. in the 19th century,
2) identify and explain the main sources about the history of the U.S.A. in the 19th century,
3) identify the main characters of the American history of the 19th century,
4) identify and explain the difference between the historical sources and fiction.

Grading

Class attendance 25 %;
Colloquium 50 % or Written exam at the end of term (50 %):
- 1st colloquium 25%
- 2nd colloquium 25%
- Written exam 50 %;
Seminar essay 25%.

Week by Week Schedule

1. Birth of a nation and the expansion of the West (1763-1891). Historical facts, movies and reality: Birth of a nation (1915), The big trail (1930), Union Pacific (1939), How the west was won (1962), Red River (1948), Stagecoach (1939), High noon (1952), Shane (1953), The men who shot Libery Valance (1963), Open range (2003), Cimarron (1930).

10. Analyze and offer concrete solutions for dealing with the audience of media violence and violence through the media on a social level.

ECTS Information Package for Academic Year 2013/2014

Course Catalogue – Undergraduate Study

University of Zagreb Centre for Croatian Studies
General Competencies

Define, explain and distinguish the effects of violent media content, attitudes, knowledge and behavior of media users. Use the media content in a more ethical, aware and competent manner. Classify and explain the mechanisms through which media violence affects children and adolescents. Critically analyze and offer concrete solutions for deal with the audience of media violence and violence through the media on a social level. Apply the acquired skills in the course of adequate media coverage of violence in real life.

Grading

20% class attendance;
20% discussion participation;
20% seminar work;
40% exam.

Week by Week Schedule

1. Introductory lecture introducing the students to the content and objectives of the course and student obligations
2. Violence in the media - definition of the term
3. Theoretical approaches to the effect of violence in the media
4. Research on the impact of violence in the media (psychological and sociological approach)
5. Short-term and long-term effects of violent content in the media
6. Normative regulation
7. Violence in the print media
8. Violence on television / film
9. Violence on the Internet and social networks
10. Violence in video games
11. Image of violence in the media in Croatia and abroad
12. Specificities of reporting on violence in the media
13. Ethical aspects of reporting - guidelines for reporting on violence
14. Importance of media education
15. Final knowledge assessment

Literature

Theoretical Systems and Models in Personality Psychology

Lecturer in Charge

Izv. prof. dr. sc. Boris Mlačić

Course Description

Provide explanations of major theories (both classical and contemporary), models and research in psychology to the students, identify relations between findings from the different theories and research. Explain man as a whole. Describe the main theoretical approaches in personality psychology. Describe the specific theories within the main approaches. Argue the importance of the personality in everyday life. Interpret a measurement of individual differences.

Course Type

» Psychology (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the basic features of different theoretical approaches to human personality.
2. Apply the acquired knowledge in the seminar activities.
3. Distinguish the main approaches to human personality.
4. Write an essay.
5. Apply acquired knowledge in later professional work.

General Competencies

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.
6. Classify basic theoretical approaches and principles of psychological assessment and counselling in various areas of applied psychology.
9. Evaluate scientific knowledge for the purpose of generating research hypotheses and support the scientific approach to the acquirement of knowledge.

Grading

Classes and seminars attendance - 10%;
Student paper - 20%;
Two colloquia - 70%.
Week by Week Schedule

1. Definitions of personality importance of personality psychology for the overall psychology, characteristics of theories of personality, personality theories in relation to other disciplines of psychology, research methodology personality.

2. Freud's psychodynamic theory of personality: personality structure - id, ego, superego, personality dynamics, personality development, defense mechanisms, free association, dream analysis, case studies.

3. Jung's analytical theory of the individual personality - the ego, the personal unconscious, collective unconscious, attitudes, interaction of personality, personality development, Jungian typology.

4. Social-psychology psychoanalytic theory: Adler (desire for superiority, inferiority complex, a complex of superiority, lifestyle, birth order and personality), Fromm (psychoanalysis and Marxism), Horney (anxiety, neurotic needs) and Sullivan (interpersonal theory of psychiatry, tension, transformation of energy).

5. Erickson contemporary psychoanalytic theory (Erickson's theory of psychosocial development, eight stages of man, psihohistory).

6. Lewin topological theory of personality (living space, living space region, valence, vectors, locomotion).

7. Cognitive theory of personality: Kelly theory of personality - personal constructs, the basic postulate and its derivations, a continuum of cognitive awareness.

8. Cognitive-experiential theory of self-concept (Epstein - the nature of personality theories that emphasize the reality, the system of experience, maladaptive schemas, constructive opinion).

10. Rogers phenomenological theory - the importance of self-concept (self), the tendency of actualization, the world of experience, a fully functioning person, therapy focuses on the client).

12. Miller-Dollard SR theory (innate disposition for behavior, learning process, higher mental processes, social context, adoption of neuroses, psychotherapy).

13. Theories of social cognition; Bandura and social learning theories - the principles of observational learning, processes of retention, production and motivational processes, reciprocal determinism, self-system, self-efficacy; Mischel's theory - cognitive personality variables, the importance of the situation, cognitive-affective theory of personality; Rotter - primary and broader concepts of social learning, psychological needs, locus of control, interpersonal trust.

14. Structural-dispositional approach: Allport's personological theory of personality - personality, character and temperament, the concept of personality characteristics, dispositions, propria, functional autonomy, measuring personality, the study of expressive behavior, idiographic approach; Cattell's factorial-analytic theory of personality traits - factor analysis, features personality - Surface and original, dynamic properties, ergos and sentiments, L, Q and T data, factor analysis of the individual; Eysenck's dimensional-biological typology of personality - extraversion, neuroticism and psychoticism, description and causation in explanation of personality, the biological basis of personality.
15. Five-factor model: Velepetori model - personality dimensions in natural language - psycho lexical access, taxonomy descriptors of personality traits in different languages, creating a paradigm of personality, cross-cultural comparisons of the taxonomies; Fiove-factor model (Costa and McCrae) - dimensions of personality questionnaires.

Literature

Theoretical Systems in Psychology

Lecturer in Charge

Doc. dr. sc.
Nina Pavlin
Bernardić

Course Description

The aim of the course is to provide students with the overview of the development of psychology, psychological insights and schools of thought through discussion and analysis of development of different paradigms and schools, shaped into theoretical systems in psychology. The aim is to create competences for the critical analysis of the main "classical schools" and theoretical systems in psychology, based on knowledge, with an emphasis on their comparison. Particular emphasis is on determining the impact of different theoretical approaches, models and paradigms on the contemporary state of academic psychology, development of scientific research in psychology and general development of modern psychology.

Course Type

» Communication Sciences (Study) (elective general foundation courses, 2nd semester, 1st year)
» Communication Sciences (Study) (elective general foundation courses, 4th semester, 2nd year)
» Communication Sciences (Study) (elective general foundation courses, 6th semester, 3rd year)
» Croatian Studies (Study) (elective general foundation courses, 2nd semester, 1st year)
» Croatian Studies (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 2nd semester, 1st year)
» History (Study) (elective general foundation courses, 4th semester, 2nd year)
» History (Study) (elective general foundation courses, 6th semester, 3rd year)
» Psychology (Study) (required course, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 2nd semester, 1st year)
» Sociology (Study) (elective general foundation courses, 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the contribution of each of the theoretical system to the development of psychology and its contribution to contemporary research in psychology.
2. Explain the difference between scientific and unscientific approach.
3. Describe and explain the significance of the theoretical approach and scientific paradigm in psychology.
4. List and describe different theoretical approaches in psychology.
5. List the most important authors who have contributed to the development of psychology and explain their contribution to psychology.
6. Compare and analyze the differences and similarities between different theoretical systems in psychology.

**General Competencies**

1. Outline the historical development and theoretical approaches in the different branches of theoretical and applied psychology.

**Grading**

During the course, activities are scored as follows: regular attendance - 5 points; essay - 15 points; two tests or written exam - 80 points. Students can choose whether to take two shorter tests during the course or a written exam at the end of the course. Grade is determined as follows: 1: up to 39 points; 2: 40-54 points; 3: 55 to 69 points; 4: 70-84 points; 5: 85 or more points.

**Week by Week Schedule**

1. Introduction to the course
2. Overview of theoretical systems in psychology
3. Associationism
4. Structuralism
5. Gestalt psychology
6. Functionalism
7. Behaviorism
8. Test for students
9. Neo-behaviorism
10. Psychoanalysis
11. Clinical psychology
12. Humanistic psychology
13. Cognitive psychology
14. Synthesis of learning material
15. Test for students

Theories and Systems of Print Communications

Lecturer in Charge

Doc. dr. sc.
Jelena Jurišić

Course Description

Introduce students to the characteristics of print media as well as the printed communication

Course Type

» Communication Sciences (Dual-major studies Study) (agencies-the press, 3rd semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (agencies-the press, 5th semester, 3rd year)
» Communication Sciences (Dual-major studies Study) (radio-television, 3rd semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (radio-television, 5th semester, 3rd year)
» Communication Sciences (Study) (agencies-the press, 3rd semester, 2nd year)
» Communication Sciences (Study) (agencies-the press, 5th semester, 3rd year)
» Communication Sciences (Study) (radio-television, 3rd semester, 2nd year)
» Communication Sciences (Study) (radio-television, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts in the field of print media and journalism in the print media.
2. List, explain and apply the basic theories of the press as media, journalism and the production process in print media
3. List, identify and reproduce basic stages of development of the press and key events and individuals in its history.
4. Define, explain and understand the production process in press.
5. Identify and explain the today situation in the press, its innovations, challenges and problems and analyze them.
6. Apply journalistic skills acquired at the seminar classes.
7. Define, identify and independently use any news type.
8. Explain and critically analyze the acquired theoretical and practical knowledge.
General Competencies

Apply knowledge of the basic concepts of journalism that are in connection with printing and print communications.

Identify and describe the role and place of the print journalism in today society.

Reproduce, apply and explain the basic theory of the printing press and printed journalism. Explain and critically analyze theoretical and practical knowledge acquired. Identify, explain and analyze the situation, innovations, challenges and problems in printing and printed journalism. Apply journalistic skills acquired on the course for the purpose of writing a newspaper report.

Grading

50% practical work, 50% exam.

Week by Week Schedule

1. A brief historical overview of the development of the printed journalism;
2. State of the press in the world today;
3. Printed media: features, functions, specifications and types;
4. Daily newspaper: function, specification and organization;
5. Production of a daily newspaper: journalistic (editorial, editor, journalist), printing (printing technology, design and graphical layout of newspapers) and selling phase of the production
6. Economic aspects of daily newspapers production;
7. Modern organization of a daily newspaper: publisher, editor, editorial board
8. Sections: domestic politics, foreign politics, city, regional, sports, cultural, graphics, etc;
9. Sections: domestic politics, foreign politics, city, regional, sports, cultural, graphics, etc;
10. Forms of expression in the dailies: news genres;
11. Forms of expression in the dailies: analytic genres;
12. Forms of expression in the journals: journalistic genres;
13. Typology (division) of the press;
14. IT evolution and press: new forms of communication and information;
15. Newspapers of the future: e-newspapers, newspaper upon request; Main topics of the seminar portion of the course are: short news forms, lead, development of the lead; work with sources, citation and quotations; collecting, processing and verification of information, reporting on events: press conferences, accidents and disasters, courtrooms, conferences and sessions, observation and reporting; communication use, verification and processing; interview; reasoning attitude new possibility, review, comment and articles, reviews and criticism; sectoral journalism.

Literature

Theories and Systems of Radio Communications

Lecturer in Charge

Izv. prof. dr. sc.
Blanka Jergović

Course Description

The aim of the theoretical part of the subject is to introduce students to the history and development of radio, to introduce them theoretically to its characteristics and modes of action and types of radio news. The aims of the practical part of the course are to provide practical insight into the basic rules of the forms of radio communication, and to familiarize students with journalistic forms present in it.

Course Type

» Communication Sciences (Dual-major studies Study) (agencies-the press, 3rd semester, 2nd year)
» Communication Sciences (Dual-major studies Study) (agencies-the press, 4th semester, 2nd year)

Teaching assistant

Anto Mikić, Pred.
Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts in the field of radio and radio journalism;
2. Define and use verbal communication as an important tool of radio journalist;
3. Indicate, explain and apply the basic theory of radio as a medium and as radio type of journalism;
4. List, define and identify different types of radio news;
5. Apply and develop journalistic skills acquired in the classes;
6. Demonstrate the ability to effectively work independently and in a team.

General Competencies

Apply knowledge of the basic concepts of communications and journalism, especially those relating to radio and radio journalism.
Define and use verbal communication.
Identify and describe the place and role of radio and radio journalism in society.
Reproduce, apply and explain the basic theory of radio and radio journalism.
Explain and critically analyze the acquired theoretical and practical knowledge.
Apply journalistic skills acquired at the seminar classes.

Grading

50% exam, 50% practical work.

Week by Week Schedule

1. Introductory lecture
2. Features of radio (in comparison to other media; its (dis)advantages)
3. Radio symbols and codes
4. Radio in Croatia
5. News
6. Radio audience
7. News sources
8. News writing
9. News and characteristics of media
10. Event reporting
12. Interview
13. Talk radio, music radio
14. Radio drama
15. Drama programme. Content of the seminar part of the class: introduction to the individual elements of radio facilities and equipment, and the internal organization of radio as a medium; special characteristics of radio and its differences in comparison to other media; journalistic sources of radio information; radio news and news program - Reporting 'from the spot'; radio interview - radio reports; the audience as a participant of radio communication; the role of speech in transmitting radio messages; the role of music in radio programme; author's radio show; elements of planning of radio programs: radio "sheet" and radio scheme.

Theories and Systems of Television

Lecturer in Charge

Izv. prof. dr. sc.
Vine Mihaljević

Course Description

Distinguish and describe the basic concepts and special characteristics of television. Define and present television systems and the main theoretical approaches to television communication. To address the complexity of the phenomenon of television communication. Differentiate and create content belonging to certain genres of television journalism. Enable students to think critically and analytically about communication through television. Compare television communication and communication in other media and on social networks.

Course Type

- Communication Sciences (Dual-major studies Study) (agencies-the press, 3rd semester, 2nd year)
- Communication Sciences (Dual-major studies Study) (agencies-the press, 5th semester, 3rd year)
- Communication Sciences (Dual-major studies Study) (radio-television, 3rd semester, 2nd year)
- Communication Sciences (Dual-major studies Study) (radio-television, 5th semester, 3rd year)
- Communication Sciences (Study) (agencies-the press, 3rd semester, 2nd year)
- Communication Sciences (Study) (agencies-the press, 5th semester, 3rd year)
- Communication Sciences (Study) (radio-television, 3rd semester, 2nd year)
- Communication Sciences (Study) (radio-television, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define, explain and apply the basic concepts of television communication.
2. Distinguish between television approach and other approaches in mass communication.
3. Describe and use the main forms of television (news, reports, stories, direct transfer, interview, debate, comment).
4. Apply basic professional skills: word and image, language and speech, style, choice of topics, research, information check, investigative journalism.
5. Explain and critically analyze the acquired theoretical and practical knowledge.
6. Effectively deliver on journalistic tasks.
General Competencies

Apply knowledge of the basic concepts of communications and journalism in relation to television and television communications. Define and use verbal communication and learn to properly evaluate and interpret non-verbal communication in a television environment. Reproduce, apply and explain the basic theory of television and television communications. Explain and critically analyze the acquired theoretical and practical knowledge. Apply basic journalistic skills that are used in television journalism.

Grading

Colloquium, presentation, oral exam

Week by Week Schedule

1. The etymology of the word television, formal and substantial object of the course study
2. Technical inventions that preceded the creation of television
3. Historical overview of the emergence of television (the history of television in Croatia)
4. Models and theories of television communication, structure of a television institution
5. Social and cultural value of television communication
6. Television as a medium, the relationship between television and journalists
7. Ethical principles in television communication
8. Television language, style, language, relationship between image and word
9. Shot
10. News, report
11. Narrative, discussion, interview
12. Anchoring, direct coverage
13. Comment, piece of news, documentaries
14. New technology (digitization) and television communication
15. Media convergence, convergence of television: practice and model

Literature

Theories of Media and Mass Communication

Lecturer in Charge

Doc. dr. sc. Jelena Jurišić

Course Description

Familiarize the students with the theoretical definition and research of mass media since the beginning of the 20th century, when it was indirectly (literary criticism, Frankfurt school) and ideologically aimed (liberals, Marxists) through the theories generated by direct study of the media and their role in society, until postmodernism.

Course Type

» Communication Sciences (Study) (required course, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define and explain the role, function and objectives of the theory of media and mass communication
2. Distinguish theories of media and the theories of mass communication and their characteristics.
3. Assess the role of the studied theories in the historical development of communicology, theoretical studies and scientific research of mass communication and media.
4. Identify connections between different theories and teachings, explain and analyze them.
5. Demonstrate the ability to summarize and critically present larger materials (books)

General Competencies

Reproduce and explain the basic theory of mass media originated in the researched period. Apply knowledge of the basic concepts of the theory of media and communication studies. Discuss and reflect critically studied media theory.

Grading

100% oral exam.
Week by Week Schedule

1. Introduction to the subject, a brief overview of the theory of communicology that are related to this subject course, the definition of mass communication;
2. Definition of media and the mass media, the relationship between the mass media and mass communication;
3. theories of ideology;
4. Liberalism and literary critique of the early 20th century, Leavis F, Thompson Q and their followers;
5. Marxism, Frankfurt school, early representatives and their teachings;
6. Late representatives of the Frankfurt School, the followers of their teachings;
7. Empiricism - representatives, followers;
8. Relativism - representatives, followers;
9. Utilitarianism - representatives, followers;
10. Sociological school of mass media and mass communication, representatives and followers;
11. Functional theories of mass media and mass communication, representatives, followers;
12. Economic theories of media and mass communications, representatives, followers;
13. Theories of media responsibility, representatives and followers;
14. Theorists of manipulation;
15. From objectivity to honesty.

The Persecution of Witches

Lecturer in Charge

Izv. prof. dr. sc. Alexander Buczynski

Course Description

Introduce students to the different interpretations of the witch in Croatian and world historiography, teach them to critically analyze the relevant literature and to formulate arguments thesis in connection with it.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 1st semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 5th semester, 3rd year)
» History (Study) (elective courses / working groups, 1st semester, 1st year)
» History (Study) (elective courses / working groups, 3rd semester, 2nd year)
» History (Study) (elective courses / working groups, 5th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze the arguments of some historians in connection with the persecution of witches.
2. Compare different historiographical interpretations in relation to this.
3. Show the important from the unimportant both in theory and in terms of the facts relevant to this topic.
4. Explain the correlation between the (alleged) witches and their prosecutors.
5. Analyze and collaborate in small groups and share the experiences and opinions.
6. Explain and express reasoned opinions in connection with the persecution: who were witches, who were plaintiffs, to read as follows accusations in order to explain the ups and downs of persecution?
7. Reproduce and present the main conclusions related to this topic.
General Competencies

After finishing the programme student will be able to:
- identify major issues in interpretation of history,
- defend his/her own opinion in discussions on different historical events and processes,
- demonstrate the importance of interdisciplinary interpretations of historical events,
- reconstruct historiographic tools in making conclusions of historical processes and events,
- appraise the value of historiographic interpretations.

Grading

The activity of students will be monitored, that will be reflected in the overall score. The exam is written.

Week by Week Schedule

1. Introduction to the major challenges and tasks of historiography
7. Same, p. 178-244.
10. Movie: "The Crucible" (according to the theater production of Arthur Miller)

Literature

Enemies of God, John Donald Publishers Ltd
Travels and Travel Writers throughout History

Lecturer in Charge

Prof. dr. sc. Mijo Korade

Course Description

Presenting the issues of everyday history and the history of mentalities through analysis of travel writing. Describing the process of idea exchange through contact between civilizations. Gaining a deeper insight into the political, social, economic and cultural history of different civilizations in the past. Describing different transport means and ways to travel through history. Developing analytic and synthetic skills for the reconstruction of parallel flows of global history. Introduction to the contribution of the Croatian travel writers to the national and world culture. Defining issue topics (e.g. the opposition tourist - traveler, travel writing as a historical source and literary genre).

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze what was the contribution of Croatian travel writers to the national and world culture,
2. Describe different transport means and ways to travel through history,
3. Distinguish different processes of idea exchange through contact between civilizations,
4. Explain a work of travel writing within the context of parallel flows of global history,
5. Define certain issue topics (e.g. the opposition tourist - traveler, travel writing as a historical source and literary genre).
General Competencies

Upon successfully completing their studies, the students will be able to:

- identify the basic problems of interpretation of historical events and processes,
- write an essay on individual historical periods,
- point out the necessity of interdisciplinary consideration of certain historical themes,
- compare the historical processes at different times,
- interpret historical sources,
- assess the value of certain historical interpretations.

Grading

During the course each student activity will be monitored and this will reflect on the final grade. Class attendance is mandatory. The final exam will consist of a written and oral part.

Week by Week Schedule

1. Travel and travel writing in the period of antiquity (I) - The History of Herodotus
2. Travel and travel writing in the period of antiquity (II) - Anabasis by Xenophon
3. Travel and travel writing in the period of antiquity (III) - Guide to Greece by Pausanias
4. Travel and travel writing in the Middle Ages (I) - Book of Travels by Benjamin of Tudela
5. Travel and travel writing in the medieval period (II) - The Million by Marco Polo
6. Travel and travel writing in the medieval period (III) - Journey by Ibn Battuta

8. Travel and travel writing in the early modern period (II) Croatian Jesuits - missionaries
9. Travel and travel writing in the early modern period (III) - Voyages Round the World of James Cook
10. Travel and travel writing in the 19th century (I) - Journey from St. Petersburg to Moscow of Aleksandar Radiščev
11. Travel and travel writing in the 19th century (II) - The Oregon Trail by Frank Parkman
12. Travel and travel writing in the 19th century (III) - How I Found Livingstone by Henry Morton Stanley
13. Contemporary travel and travel writing (I) - Travels of Seljan Brothers
14. Contemporary travel and travel writing (II) - the diaries of Ernesto "Che" Guevara
15. Contemporary travel and travel writing (III) - the Kon-Tiki expedition of Thor Heyerdahl
Literature

Urban Sociology

Lecturer in Charge

Izv. prof. dr. sc.
Anka Mišetić

Course Description

The key aim of the course is to enable students to understand, investigate and explain the social phenomena, relations and processes specific for urban settlements, in their complexity and diversity: in their basic and longterm but also in their short term and changeable occurences.

Course Type

» Sociology (Study) (elective courses 1., 4th semester, 2nd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Explain how economic, political, cultural and demographic factors affect cities and the life experiences of people in cities
2. Evaluate work of policy makers, planners, and designers in effective solving of urban and regional problems
3. Compare historical and contemporary patterns of urbanization and suburbanization
4. Outline issues related to the social, local, and micro levels of urban contexts

General Competencies

Upon successfully passed exam, students will be able to:
Use the general knowledge of society and of social processes.
Explain causal relationships between the various social phenomena.
Plan own engagement in resolving of the various social issues.
Explain the key structural factors that are shaping society.
Explain the social change using classical and contemporary sociological approaches.

Grading

Class attendance and participation - 30%;
Thematic paper (non-obligatory) - 15%;
Oral exam - 55%.

Week by Week Schedule

1. Main theoretical approaches in urban sociology.
2. Historical approach to the interpretation of the development of urban settlements (Mumford)

3. Development of the city through the history: antics and middle ages.

4. Development of the city through the history: baroque and industrial city.

6. Simmel and sociology of metropolis.

7. Weber theoretical model and interpretation of the city.

8. Chicago school of urban sociology - main authors: Park and Burgess

9. Chicago school of urban sociology - main authors: Wirth

12. Postmodern questions: relationship between village and city

13. The role of the cities in contemporary society: socially-sustainable city.

14. Virtual cities

15. Croatian urban sociology: main issues and research

Literature

Venetian History

Lecturer in Charge

Doc. dr. sc. Marino Manin

Course Description

The objective of the course is to familiarize students with the emergence, development and influence of the Venetian Republic in Europe, but the Croatian history from the Middle Ages until the fall of the Republic. Also, more detailed analysis and comparison of Venetian and Croatian history will result in new knowledge and interest in the history of both nations.

Course Type

» History (Study) (required course, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Describe the course of historical events in the Republic of Venice from 5 to 18 century,
2. Identify the most important information and people from Venetian history contributed to the emergence and development of the Republic,
3. Explain the causal relationship of Venetian ups and downs with European developments,
4. Analyze the relationship of the Venetian Republic and the eastern Adriatic coast,
5. Analyze the reasons for the negative Venetian politics through the centuries against the Dubrovnik Republic,
6. Compare the cultural and artistic achievements of Venice with European as well as Croatian,
7. Show similarities in political and daily life of both sides of the Adriatic coast.

General Competencies

After finishing the programme student will be able to:

1. summarize basic information of the Croatian and the World history
2. identify major issues in interpretation of history
3. design his/her own conclusion on different historical events and processes
4. compare historical processes of different periods
5. differentiate specificities of historical periods
Grading

During continue to monitor the activity of each student, which will be reflected in the overall score. Classes is required to attend. The exam is written.

Week by Week Schedule

1. Introduction to the history of Venice
2. Venetians as commercial agents to the hinterland
3. Establishing control over the northern and central Adriatic
4. The fight for control of the southern Adriatic and the trade benefits in the area of Byzantium
5. The urban development of the city on the lagoon
6. The highlight of the Venetian power: IV. Crusade
7. The social and institutional development of the Venetian Republic
8. II. Genoa war, and the deeds of the Polo family
9. III. and IV. Genoa war: economic exhaustion
10. Social Development of the Republic of Venice, condottiere and end communal Italy
11. Geostrategic opportunities in the Mediterranean up to the Battle of Lepanto
12. Last century the Republic of Venice and the Venetian contribution to European cultural heritage
13. Croats in Venice
15. Dalmatia under Venetian rule

Jednojezični rječnik prema izboru

Gramatički priručnik prema izboru
Zadar in the Middle Ages

Lecturer in Charge

Doc. dr. sc. Tomislav Popić

Course Description

The aim of this course is to provide students with basic knowledge about the development of the most important Dalmatian city of Zadar in the Middle Ages, taking into account political, social, economic and cultural processes. The exceptional position of the city imposed its development from the early Middle Ages, and throughout the medieval period the city balanced between Byzantium, Venice, Hungarian kings and Croatian leaders, while developing its own institutions and municipal government. During the semester, students will familiarize themselves with some of the main sources for the study of Zadar medieval history, and working on literature they will learn to read and to think critically.

Course Type

» History (Dual-major studies Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Dual-major studies Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Dual-major studies Study) (elective courses / working groups, 6th semester, 3rd year)
» History (Study) (elective courses / working groups, 2nd semester, 1st year)
» History (Study) (elective courses / working groups, 4th semester, 2nd year)
» History (Study) (elective courses / working groups, 6th semester, 3rd year)

Learning Outcomes

On successful completion of the course, students will be able to:

1. Define main problems of Zadar medieval history.
2. Describe the course of Zadar history to the end of the 15th century.
3. Explain events on micro level compared to general political and social circumstances.
4. List the main sources for the study of Zadar medieval history.
5. Analyze literature critically.
6. Compare the significance of literature.
General Competencies

After successfully graduating student will be able to:
summarize basic information of the Croatian and the World history,
describe historical processes,
distinguish difference between important and non-important facts within
historiographic interpretation,
combine different historical processes.

Grading

Oral exam 100%
